It is not known if blood from one baby's umbilical cord would contain enough stem cells to reconstitute an adult's bone marrow, Wagner said. But he speculated it may be possible to stimulate the cells to multiply.

Another possible use of umblical cord blood may be in gene therapy experiments for inherited blood diseases, Wagner said. Researchers might be able to correct gene defects in cells taken from a sick child's blood sample, rather than subjecting them to bone marrow harvesting.

CHICAGO (OCT. 1) UPI - Harris Bankcorp. Inc. on Monday completed its $16.7 million acquisition of Frankfort Bancshares Inc., which owns 89 percent of the Frankfort State Bank of Franfort, Ill.

A Harris spokesman said the holding company - parent of Harris Trust and Savings Bank - plans to acquire the remaining 11 percent of Frankfort State Bank common stock later.

Frankfort State Bank, located in northeastern Will County, had assets of $92 million and total deposits of $83 million as of June 30.

The purchase brings to 12 the number of Chicago-area community banks acquired by Harris Bankcorp since 1982.

#90274u1440 10/01/1990 ~United Press International

KIEV, Ukraine, U.S.S.R. (OCT. 1) UPI - A reported 200,000 people marched through the city Monday to demand independence for the Ukraine and the transfer of all enterprises from central Soviet control to their workers.

But labor activists' call for a general strike to push the nationalist demands

went largely unheeded, with only scattered walkouts reported in Kiev and other parts of the large republic.

Strike organizers said that managers at three huge plants in Kiev, each of which employs 10,000 to 15,000 people, gave their workers the day off to defuse the planned labor protest.

Workers walked off the job at only several dozen small enterprises in Kiev and a limited number of factories elsewhere in the republic, according to members of the strike committee and the Rukh nationalist organizatin.

But demonstrators gathered in Kiev to support the general strike, chanting ''Ukraine without Moscow'' as they flooded through their key republic's capital under a sea of banners splashed with the nationalist colors of yellow and blue.

The Ukrainian news agency Ratau said at least 200,000 protesters marched through Kiev in a rally that grew in size as it crossed the city of 2.6 million people.

While the demonstrators filled the streets of Kiev, deputies in the Ukrainian Supreme Soviet met in closed session for discussion of measures to implement the legislature's July 16 declaration of sovereignty.

The general strike was called to demand that the giant Ukraine take control of all factories on its territory and conclude no agreements with Moscow, prohibit Ukrainian draftees from serving in the Soviet army and shut down the Chernobyl nuclear power plant.

The No. 4 reactor at Chernobyl exploded in April 1986 in history's worst nuclear power accident, but the plant's other three units subsequently resumed operation.

The affected region of the northern Ukraine and nearby areas of the Byelorussian and Russian republics have continued to be plagued by the aftereffects of the catastrophe's radiation release.

The nationalists also demanded that the Soviet government make good on the promises it made in July 1989 to end nationwide coal strikes. The Donbass region, in the heart of the Ukraine, is the largest coal field in the world's No. 1 coal producer.

Mikhail Volynko, an organizer of the Donbass coal strikes last year, said the miners in his region had not intended to join the general strike Monday.

The protesters also urged the denationalization of all Communist Party property and the withholding of Ukrainian products from the rest of the Soviet Union.

The Ukraine, with a population of 52 million, is the country's industrial heartland and agricultural bread basket.

Deputies in the Ukrainian Parliament voted to consider the demonstrators' demands and have them read out at the legislative session.

In a break with past practice, the parliamentary meeting was not broadcast on Ukrainian radio. But the session was piped into the Ratau news agency's Kiev offices, where monitoring indicated stormy debate.

''We want to have a sovereign economy in order to pull the Ukraine from economic crisis,'' lawmaker Igor Yukhnozsky told other deputies. ''We are for a market economy. The commands from Moscow for our economic system have not worked. We should find our own system for the Ukraine.''

Yukhnozsky belongs to the radical Democratic Bloc, which claims 130 members in the 449-seat Ukrainian Parliament. The Communist Party has 239 deputies, but some of them are liberals who voted for the July sovereignty declaration.

In the sovereignty proclamation, the republic claimed the right to issue Ukrainian citizenship, mint its own money and form an independent army. The declaration was among the most radical of the sovereignty or independence acts that 13 of the Soviet Union's 15 republics have passed this year in their battle against central control.

The Soviet Parliament is currently mired in disagreement over whether to adopt a radical economic plan that would devolve virtually all economic powers to the republics or a more cautious reform program that calls for retaining substantial control in Moscow.

#90274u1442 10/01/1990 ~United Press International

WASHINGTON (OCT. 1) UPI - A group of leading economists Monday assailed the agreement to slash the federal budget by $500 billion over five years and warned the pact fails to confront America's fundamental fiscal problems.

They also said ''the U.S. economy has stopped growing.''

''No one can be heartened or encouraged by months of negotiations that concentrate on the least important aspects of fiscal policy, and after much labor, produce little substantive improvement,'' the Shadow Open Market Committee said.

The economists cited these major concerns:

-Substantial tax increases.

-The effects on savings and investment.
-Marginal cuts in spending growth.
-Inadequate reform of the budget process.

''It's a lot of the old smoke and mirrors,'' said Mickey Levy, a member of the panel and an economist at CRT Government Securities in New York.

The group follows the activities of the Federal Reserve Board's influential Federal Open Market Committee, which sets interest rate conditions, and also comments on other aspects of the economy.

''Congressional leaders and the administration labored long and produced little,'' the economists said. They said the congressmen ''should not now compound their failure'' by pushing for easier credit.

''Monetary policy is not a substitute for fiscal policy,'' the group said.

The economists doubt the United States is in ''for a deep and long recession '' said Jerry Jordan, a member of the committee and a chief economist at First Interstate Bancorp in Los Angeles.

But Jordan said a mild or moderate recession, or possibly and extended period of extremely slow growth, are possible in the months ahead.

''The U.S. economy has stopped growing,'' the economists said. ''Some sectors and regions were contracting before the Middle East crisis. Whether or not a 'recession' is declared to have begun is of little importance.

''Monetary policy has been a major factor in bringing the economy to this point, but the risk of a decline in real activity has been heightened by recent increases in the price of oil,'' in the wake of the Iraq crisis, they said.

#90274u1471 10/01/1990 ~United Press International

ISLAMABAD, Pakistan (OCT. 1) UPI - Ousted Prime Minister Benazir Bhutto, campaigning Monday for re-election, told supporters that her enemies ''tried to gang up on me'' but ended up bickering over who would replace her.

Bhutto's campaign tour came as a leading army official warned of a plot to create widespread disturbances across Pakistan. Critics of the military have alleged the army would use such an excuse to prevent the Oct. 24 elections.

Bhutto, fired Aug. 6 by President Ghulam Ishaq Khan, staged a whistle-stop tour of 10 villages near the capital and then attended a two-hour rally in Kahuta, the town where her father established a nuclear research facility in the 1970s.

The ousted prime minister, who brought along a crowd of 3,000 cheering supporters in 100 buses, ridiculed her opponents during the rally in Kahuta, a township near Islamabad that is off limits to foreigners.

''Everyone is posing as the next prime minister and trying to stop the other from even getting elected to the Assembly,'' Bhutto said. ''All of them had tried to gang up on me but fell out over the question of leadership.''

Bhutto, whose government was accused of nepotism and corruption by the president, told her supporters she is confident of re-election and vowed that she would ''restart development activities from where we left off.''

Since her government's dismissal, Bhutto has been charged with corruption in special courts set up by Khan to investigate allegations against her administration. If convicted of any of the counts, she could be barred from politics for seven years.

Bhutto has denied any wrongdoing, and her Pakistan People's Party has challenged in court the constitutionality of the president's actions. In addition, she is campaigning for office in the Oct. 24 elections called by Khan when he dismissed the government.

Bhutto's election tour came as Gen. Mirza Aslam Beg, the army chief of staff, warned that authorities have uncovered a plot to cause turmoil across the country, Radio Pakistan reported.

''These miscreants had planned to cause trouble all over the country, but their focus was on the province of Sind in particular,'' he said.

Unabated ethnic violence in Sind Province, Bhutto's home region, was one of the causes of her downfall, but many critics of the prime minister's dismissal have predicted that the military will create some incident to prevent the new elections.

#90274u1494 10/01/1990 ~United Press International

(OCT. 1) UPI - World oil prices fell as much as $2 a barrel in early trading Monday after a quiet weekend in the Middle East and the prospect Congress will release more oil from the U.S. reserve.

In midday trading on the New York Mercantile Exchange, the benchmark West Texas Intermediate crude for November delivery dropped $2.11 from Friday's close to $37.42 a barrel.

Unleaded gasoline for November delivery was down 4.25 cents to 94.4 cents a gallon, while November home heating oil had fallen 3.42 cents to $1.025 a

gallon.

On the European spot market, where crude is bought and sold for cash, Britain's widely traded North Sea Brent was off $1.15 to $39.65 a barrel.

United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - had plunged $1.20 to $34.15 a barrel.

On the U.S. Gulf Coast spot market, prompt delivery WTI was down $1.65 to $37.85 a barrel.

Since the start of the Persian Gulf crisis after Iraq's Aug. 2 invasion of Kuwait, traders have been in the habit of moving heavily to sell positions on Friday for fear a war will break out over the weekend.

''Just the fact nothing happened over the weekend, plus the fact (Iraqi President) Saddam Hussein made more peaceful statements, plus the possible approval by Congress of the release of 15 million barrels of crude from the Strategic Petroleum Reserve is moving the market down,'' said Tom Bentz, trading director of United Energy Inc. in New York.

''That's been the pattern for Monday's - we relax after Friday's rumors of a war starting over the weekend,'' said James Steel of Refco Inc. in New York.

The downward move, however was seen by Bentz as ''only a temporary correction in the market.''

Saddam said Sunday Iraq would seek to open discussions with France on the basis of settlement terms French President Francois Mitterrand offered last week in a U.N. speech.

Mitterrand said all the issues brought up by Saddam, including demands for a Palistinian homeland, could be discussed once Iraq withdrew from occupied Kuwait.

The official Iraqi News Agency Monday said Saddam had ordered nine French hostages released and said they could ''leave Iraq together with a delegation of the French-Iraqi friendship society'' now in Baghdad.

Last week, the oil market only shrugged when President Bush announced he would utilize the power of new legislation to release 5 million barrels of crude to test the nation's reserve.

Congress is now expected to approve the release of 15 million barrels after Energy Secretary James Watkins testified Thursday that 5 million barrels was not sufficient to test the system.

Analysts have said such a release would be enough to affect prices on oil

markets.

-30- 2939
#90274u1541 10/01/1990 ~United Press International
(OCT. 1) UPI - Against the background of war drums in the Persian Gulf, President Bush today hailed the global condemnation of Iraq for invading Kuwait. Bush told the U-N General Assembly that the United States will continue, for now, to rely on economic sanctions to compel Saddam Hussein to back down. .

In Baghdad, Iraq today further raised hopes that it wants to pursue a French peace proposal. The official Iraqi News Agency says Saddam has ordered the release of nine French hostages and said they could leave Iraq. The French government estimates that some 350 French nationals are being detained against their will by Saddam.

It's now up to Congress to keep the threat of a massive government shutdown from taking place next Monday. President Bush and top congressional leaders reached agreement yesterday on a radical five- year, 500-BILLION-dollar cut in the federal deficit. Now they must sell it to Congress, which must approve it without changes by Friday.

Israel says it will distribute gas masks to all its citizens starting next week. But the government denies that the decision is a response to any increased threat of chemical attack from Iraq. Even before it invaded Kuwait, Iraq had threatened to wipe out half of Israel with chemical weapons if Israel attacked Iraq or any other Arab nation.

West Germany's Christian Democratic party today merged with its smaller East German sister party... forming the most powerful political grouping in Germany. The merger comes two days before German unification and is a personal triumph for West German Chancellor Kohl, who was elected to the chancellorship eight years ago today.

-30- 1817
#90274u1552 10/01/1990 ~United Press International
(OCT. 1) UPI - The U-S Supreme Court refused today to review the case of Clarence Brandley, a black man freed after nearly a decade on the Texas Death Row in what many called a case of racial injustice. The court's refusal to hear the case appeared to ensure that Brandley won't be retried in the 1980 rape-murder of Cheryl Dee Fergeson. .

The high court also let stand a ruling that members of the military who test positive for the AIDS virus can be ordered to tell prospective sex partners about their condition. The case stems from the 1988 court- martial of an Air Force enlisted man for disobeying a ''safe sex'' order from a military doctor.

.

In a case involving the banking industry's move into non-traditional financial services, the Supreme Court let stand a ruling that permits banks to sell insurance. The court refused to hear the case brought by a number of insurance trade groups and companies that challenged a Federal Reserve Board decision to permit banks to expand into new areas.

#90274u1558 10/01/1990 ~United Press International

EASTERN SAUDI ARABIA (OCT. 1) UPI - Elements of the 101st Airborne Division honed urban warfare skills in the rubble of an abandonded oasis village Monday skills that could be used to liberate Kuwait City or defend Saudi Arabian towns.

With hand signals, shouts and even grunts, riflemen worked their way through rooms, diving through windows and bursting through doors.

To the east, elements of the 101st's artillery units went through their own set of drills, in case they were called upon to back Saudi and Gulf Cooperation Council forces deployed ahead of them.

These forces are the northernmost deployed U.S. combat troops in Saudi Arabia, although liaison teams to help coordinate military activities are posted further forward with Arab forces.

Their precise location, size and composition may not be disclosed under rules governing coverage of operation Desert Shield.

In addition to practicing urban warfare tactics, Col. Greg Giles, the commander of task force Strike, said the men had been studying pocket cards of Arabic phrases in case they did battles with Iraqi troops - phrases such as ''hands up,'' ''lie down,'' and the like.

The remote site at the oasis, Giles said, allowed the men to train away from bases near more populated areas, lessening any chances of a terrorist attack, something constantly on the minds of commanders, although they would not discuss any specific warnings.

The artillery men practiced unhitching, aiming and firing their 105 mm Howitzers, weapons both towed behind trucks and airlifted by helicopters.

They were flanked by air defense teams armed with Stinger surface-to- air missiles.

Some were clearly bored at only having training exercises.

''We're stuck out here with nothing to do. If we got the word to go in (battle), we'd be so happy,'' said Spec. 4 Sean Edwards, of St. Louis, Minn.

''All anyone wants to do is get home in one piece,'' said Spec. 4 John Hilton of Springfield, Va. ''... I hope we can do it without too many people getting hurt.

''We're aware this is for real. This is no time for messing around. You've got to be ready,'' he said.

The 101st was in the news when 248 of its soldiers died in a December 1985 plane crash at Gander, Newfoundland, as they returned for Christmas from Middle East peacekeeping duties.

The oasis site was fitting for the 101st, nicknamed the ''Screaming Eagles,'' for the outfit had a base in Vietnam called Oasis. Also, the area U.S. troops have been assigned to protect in Saudi Arabia is called OASIS.

#90274u1560 10/01/1990 ~United Press International

GROTON, Conn. (OCT. 1) UPI - The nation's major builder of submarines Monday announced the layoff of 582 workers and warned of more job reductions next month because of cuts in defense spending.

The layoffs were less than the 4 percent to 5 percent forecast Sept. 12 by the Electric Boat Division of General Dynamics Corp., the sole producer of the Navy's Trident submarine fleet.

The cutback in the company's work force of 23,000 included 415 salaried employees and 167 hourly workers who were given 60-day notices, said spokesman Neil Reunzel.

''The actual figure is somewhat less then expected as a result of attrition and a hiring freeze implemented earlier this year,'' he said.

Ruenzel warned, however, further layoffs could result in November, depending on the finalizing of the government's defense budget for the fiscal year that began Monday.

Electric Boat is the sole builder of the Navy's Trident submarines. However, Defense Secretary Dick Cheney earlier this year halted the planned production of one of two Tridents.

Electric Boat also has a contract to build the prototype of the Seawolf, the nation's next generation submarine.

The shipyard's job reductions came on the heels of a budget settlement between

President Bush and Congress which calls for military cuts of $10 billion in the next year and up to $180 billion in five years.

Ruenzel said the company has set up meetings to provide the laid off workers with specific services, benefits and options available.

''An array of services has been put in place to provide them with the support and skills they'll need to find new jobs,'' said Ruenzel.

NEW YORK (UPI-FNNPRO) - Unisys Corp. is likely to suspend payments of its common stock dividend until the third quarter of 1991 as the ailing computer manufacturer is restructuring, computer industry analyst Peter Labe said Monday.

The Blue Bell, Pa., computer manufacturer last week said it was suspending payments on its common stock dividends and forecasted a loss for the third quarter.

''They are doing the right thing,'' said Labe, of Labe, Simpson. ''The demand for computers in Europe has been lower than expected and there were other factors, including the weakening economy.''

Labe said Unisys could suspend payment on its dividends until the third quarter of 1991. He did not rule out the possibility Unisys might also suspend payments on its preferred stock.

''I can see Unisys resuming paying dividends late next year, but at a much lower level,'' he said.

The computer manufacturer Monday unveiled its Integrated Information Environment software platform which it hopes will help increase revenues by widening its client base.

The Unisys open systems platform is designed to answer a growing demand from business users for networking solutions that allow them to use simultaneously computing equipment from different makers, as well as different categories from large mainframes to individual stations.

#90274u1596 10/01/1990 ~United Press International

WASHINGTON (OCT. 1) UPI - The Energy Department said Monday it plans to permanently cease nuclear weapons production activities at its uranium processing plant near Fernald, Ohio, and focus all efforts on environmental cleanup.

Deputy Energy Secretary Henson Moore told reporters that Energy Secretary James Watkins had decided there is no further need for uranium-metal products from Fernald, which has been shut down since July 1989 due to safety problems.

''He (Watkins) has made the decision that it will never produce again,'' Moore said. ''He is making permanent what's been a de facto (shutdown) for a year.''

After the session with reporters, department officials clarified Moore's statement, saying the department has not completed a study on whether weapons production at Fernald should cease permanently. They said the study would be finished in January 1991, at which time they expected the decision to halt production would be finalized.

As part of the shutdown, Moore said management responsibility for Fernald operations would be shifted to Leo Duffy, director of the department's Office of Environmental Restoration and Waste Management. Fernald is currently under the department's Office of Defense Programs.

Moore said Fernald would be maintained in ''cold standby'' operating condition in the event of a national security emergency that required resumed production. However, he said the department is planning to meet any future uranium metal production needs through contracts with private companies.

Before the 1989 shutdown, Fernald, located near Cincinnati, processed uranium into metal parts for use in nuclear weapons production reactors that generate radioactive materials needed for atomic warheads.

Over four decades of operations, poor emission control and waste disposal practices at Fernald have released large amounts of radioactive uranium dust and other pollutants into the environment, contaminating nearby ground water supplies.

Moore said cleanup operations would provide Fernald workers with a mission for ''a long time'' and that no layoffs of the plant's 790 workers are planned. He said 75 percent of the facility's work force already is engaged in cleanup activities.

Duffy said production is no longer needed from Fernald because the department has stockpiled a two-year supply of uranium metal in anticipation of a

shutdown.

He also noted demand for processed uranium had been vastly reduced because none of the department's weapons reactors have been operating for more than a year due to safety problems.

#90274u1603 10/01/1990 ~United Press International
WASHINGTON (OCT. 1) UPI - Former Treasury Secretary Donald Regan, defending the Reagan administration's policies, said Monday that lax supervision - not deregulation - fueled the collapse of the nation's savings and loan industry.

''I believe that the root causes of the S&L debacle, and even the current weakness in the banking industry, are to be found in the regulatory policies this country has followed with respect to banks and thrifts for most of this century,'' Regan told the House Banking Committee, which is examining the causes of the thrift crisis.

The federal bailout of the savings and loan industry is expected to cost taxpayers as much as $500 billion and has evolved into a political weapon in several campaigns.

Regan also launched an attack on Edwin Gray, former chairman of the Federal Home Loan Bank Board. The animosity between the two men is no secret. Gray blames Regan for forcing him out of office. Regan told the panel Gray was an ineffetive regulator.

''In 1985, when I became (White House) chief of staff, I began hearing rumors that this man wasn't paying attention. That he was part of the problem, not part of the solution. I began hearing that he was a front for the industry,'' said Regan, who moved from his job as secretary of treasury to the White House post for President Reagan's second term.

Gray is scheduled to appear before the panel Wednesday.

Much of the hearing was filled with political finger-pointing.

Regan went so far as to pin the foundation of the crisis on the economic policies of the Carter administration, saying the thrift industry was losing money at a ''frightening pace'' at the beginning of the Reagan presidency.

''As the new administration took office in 1981, it was clear that either the basic structure of the thrift industry would have to change or the industry faced inevitable collapse,'' Regan said.

The thrift industry's apparent salvation came one year later with the passage of the Garn-St. Germain Act, which gave thrifts powers closer to those of banks. One of the law's provision allowed thrifts to invest up to 40 percent of their assects in commercial real estate loans.

Several thrift observers say the legislation gave thrifts a much needed boost, but at the same time made savings and loans susceptible to real estate speculators.

''It is obvious that the Reagan administration put much faith in a deregulatory policy which handed the savings and loan industry new powers and a greater array of permissible investments for insured deposits - policies which the high fliers interpreted as a green light for risky ventures that are now costing the taxpayers so heavily,'' said Rep. Henry Gonzalez, D-Texas.

Regan disagreed, however, placing much of the blame for the thrift crisis on ineffective federal regulation.

''The changes in the S&L investment powers authorized by Garn-St Germain did not cause the S&L debacle,'' Regan said. ''Supervision and regulation could have been much more effective, and might have reduced the losses to some degree, but by itself could not have prevented the scope of the problem.''

#90274u1616 10/01/1990 ~United Press International

RENO, Nev. (OCT. 1) UPI - A large high-grade deposit of the industrial mineral wollastonite has been discovered by a Canadian mining firm that was prospecting for gold near Tonopah, the Bureau of Land Management said Monday.

The discovery on BLM land was by the White Plains Resources Corp., of Vancouver, B. C., which estimates the deposit may contain 100 tons of the mineral used as a safe replacement for asbestos and as a filler in ceramic tile, paint and plastics.

The discovery covers 2,100 acres in Central Nevada and is believed to be 20 times larger than the only two wollastonite mines operating in the United States in Essex and Lewis counties in New York. The BLM said these two mines produce more than half of the world's output.

The BLM said White Plains Resources would build a $9 million dollar plant if further exploration drilling and feasibility studies are favorable.

#90274u1620 10/01/1990 ~United Press International

CAPE CANAVERAL, FL (OCT. 1) UPI - Engineers readied a Delta 2 rocket for a third launch try Monday to boost a $65 million military navigation satellite into space, the ninth in a global network that is proving especially useful in the Persian Gulf.

The 126-foot, blue-and-white Delta 2 was scheduled for liftoff at 5:31 p.m. EDT from the Cape Canaveral Air Force Station, four days behind schedule because of stormy weather that blocked launch tries Friday and Saturday. Forecasters predicted a 60 percent chance of good weather Monday.

The rocket's payload was a Global Positioning System ''Navstar'' satellite, the ninth in a planned network of such spacecraft that ultimately will allow military forces on the ground, at sea and in the air to determine their location and altitude to within 53 feet anywhere in the world.

The flight plan called for GPS No. 9 to be ejected into a preliminary elliptical orbit about 25 minutes after blastoff. On-board rockets were

scheduled to fire later to boost the satellite into a circular 12-hour orbit 12,500 miles up.

Prior to Monday, the Delta record stood at 20 successes in a row dating back to May 3, 1986, and a perfect 12 straight for the upgraded Delta 2, including five commercial launches.

While the GPS system is not yet complete, officials say it is nonetheless proving especially useful to troops stationed in the Persian Gulf, where maps are not always accurate and where clearly distinguishable landmarks are few and far between.

''That (the GPS system) is proving to be an extra ordinarily valuable resource and the troops in the field are crying for more receivers,'' Lt. Gen. Thomas Morrman Jr., commander of Air Force Space Command, told reporters Monday.

GPS satellites originally were to be launched from NASA's space shuttle.

But after the 1986 Challenger disaster, which grounded the shuttle program for 32 months, the Pentagon embarked on an unprecedented rocket construction program to guarantee independent access to space.

McDonnell Douglas Space Systems Co. of Huntington Beach, Calif., was awarded a $316.5 million contract Jan. 21, 1987 to build seven Delta 2s for the GPS program. The contract included options, however, for 13 additional vehicles for a total contract value of $669 million.

The Air Force plans to launch 21 upgraded ''block 2'' GPS satellites - one from a shuttle - to join seven older and less sophisticated ''block 1'' spacecraft already in space.

The satellites are built by Rockwell International's Satellite Systems Division in Seal Beach, Calif., under a $1.2 billion contract.

Eighteen block 2 satellites are required to complete the global navigation network. Three of the 21 bound for orbit will serve as spares with another seven available on the ground for launch as needed.

Additional satellites are planned and through the end of the century, the GPS program is expected to run some $8.5 billion.

Equipped with sensitive atomic clocks, four such satellites will be ''visible'' at any given time from anywhere on Earth. Military forces on the ground, at sea or in the are will be able to use radio signals from the satellites to pinpoint their locations to within about 53 feet.

#90274u1639 10/01/1990 ~United Press International

LIMA, PERU (OCT. 1) UPI - Inflation in Peru dropped to 13.8 percent from an all-time high of 397 percent in August, the president of the National Institute of Statistics said Monday.

The cost of living rose 11,090 percent in the 12-month period ending Sept. 30, said Felix Murillo, the institute president.

Financial circles consider the sharp fall a sign of success for the free market economic policies of President Alberto Fujimori, who has ended price and foreign exchange controls since taking office July 28.

A recent public opinion poll by the respected Apoyo firm said a majority of Peruvians supports the so-called ''shock'' anti-inflationary plan of Fujimori and his prime minister, Juan Carlos Hurtado Miller, who holds the dual post of economy minister.

The cost of living soared in August to its highest monthly rate in Peruvian history after Fujimori sharply raised the price of gasoline and other public services to close the deficit of state-run companies.

According to Fujimori's economic plan, considered an orthodox approach by international economists, the sharp price hikes were expected to lead to an inflationary surge to be followed by stability, as merchants were forced to reduce prices to accommodate falling demand.

In the final months of the administration of President Alan Garcia inflation deteriorated into ''hyperinflation,'' a rising rate of more than 50 percent a month. Garcia favored price and wage controls, government subsidies to food and gasoline and lavish public spending.

#90274u1646 10/01/1990 ~United Press International

HAMBURG, West Germany (OCT. 1) UPI - Chanting ''Helmut, Helmut,'' East and West German conservative Christian Democrats merged into a single dominant party Monday under the leadership of Chancellor Helmut Kohl.

''From now on we are one party again, one CDU for all of Germany,'' Kohl told cheering delegates. ''This is a party on its way to victory.''

Kohl voiced the Christian Democratic Union certainty of winning the first all-German elections Dec. 2, a confidence amply supported by voter opinion polls.

Lothar de Maiziere, the prime minister of East Germany, became deputy party chairman.

''The dream of German unity is becoming reality,'' de Maiziere told the CDU congress. ''One man never took his eyes off this goal. For that I thank you, Helmut Kohl.''

The political merger two days before German reunification was effectively a takeover by Kohl's CDU of its smaller East German sister party - the 1,000 delegates consisted of 750 West Germans and 250 East Germans.

The action, carefully timed to coincide with the Oct. 1, 1982, anniversary of Kohl's election to the chancellorship, was a personal triumph for the West German leader, the moving force behind German reunification.

''This is a party on its way to victory,'' Kohl told cheering delegates, who adopted a 16-point Christian Democratic Union manifesto for the first post-unification German elections.

''A vision has become reality, a vision which at our past 37 congresses seemed to be far in the future,'' Kohl said.

Pending the elections, the enlarged party, together with its Free Democrat coalition partner, will have a solid majority in the new single German Parliament, 354 out of a total 663 seats.

The West German CDU began the day Monday with its own annual congress - the 38th - but concluded that meeting after just 75 minutes to get on with the joint merger session with the East German party.

Kohl, 60, was the only candidate for chairman of the united CDU. Delegates nominated de Maiziere as deputy party leader.

The CDU executive presidium was increased from seven to 10 members to accommodate new members from East Germany.

The Eastern party becomes part of the Western party in the same way that the Eastern German Democratic Republic joins West Germany on Wednesday as a single nation, the Federal Republic of Germany.

West German Christian Democrats broke with the East German CDU in 1948 on grounds it was collaborating with the communists.

Kohl, in an address Monday, said there had been ''many tragic and bitter times '' but that Western Christian Democrats had enjoyed freedom ''and should not make judgments or accusations.''

#90274u1647 10/01/1990 ~United Press International

EAST BERLIN (OCT. 1) UPI - With the pealing of a bell cast in the image of

America's Liberty Bell, divided Germany will become a single, sovereign state for the first time since the Allies crushed and quartered Hitler's Third Reich.

Germany reunifies one moment after midnight Tuesday (7 p.m. EDT), when economically devastated East Germany effectively will be absorbed by the hugely prosperous western Federal Republic.

The East German state - including its army, government and Parliament - will cease to exist almost 41 years after it was founded and declared ''the first state of German workers and farmers on German soil.''

The merger of the Germanys, considered no more than a pipe dream less than a year ago, is the culmination of an astonishing series of events that began late last year with the spontaneous exodus of thousands of East Germans to the West.

Within months, the Communist government had fallen, the hated Berlin Wall was breached and the headlong rush to unification began.

The merger of the German states will lead to wrenching economic, political and social adjustments in both halves of the new nation, but the joy of the moment - not the difficulties of the future - will be the focus Tuesday night.

''We hope to turn the ... stretch from the Brandenburg Gate to the Alexander Platz into a gigantic street festival,'' said Ulrich Zawatka, a spokesman for West Berlin's Department of Culture, speaking of the two historic sites about 2 miles apart.

Berlin has particular cause to celebrate, as the long-divided city will regain its status as Germany's capital amid jubilation by some 3.4 million Berliners and an estimated 1 million visitors.

West Berlin authorities said ''many thousands'' of police and other security forces would be deployed Tuesday night because of fears of violence between dropout leftist ''chaotics'' and neo-Nazi skinheads.

When the black, red and gold flag is hoisted in front of West Berlin's Reichstag, the former German parliament, the postwar map of Europe will change. The Federal Republic of Germany - until now only West Germany - will expand its territory by about one third, to 131,851 square miles and its population will total almost 80 million.

The four Allied powers that defeated Germany in World War II, creating four zones of occupation that became East and West Germany, were making final preparations Monday to surrender their occupation rights and restore full sovereignty to the enlarged Federal Republic of Germany.

The U.S. Command Berlin, with 6,000 troops, announced it was ''formally

inactivated'' Monday, with Maj. Gen. Raymond E. Haddock relieved of his duties as commander of the American sector of the long- divided city.

But the U.S. announcement noted that ''elements of the Berlin Brigade will remain, based on the German request for a U.S. presence.''

Although Britain, France, the Soviet Union and the United States agreed Sept. 12 to relinquish occupation rights in Germany on unification day, the West German government made clear it wanted the Western allies to remain in Berlin until the planned withdrawal of Soviet troops from East Germany is completed within four years.

The U.S. command said the Allies also will hand over control of Berlin's airspace to Germany, but added, ''The United States will provide personnel to staff these facilities until German technicians become available.''

The four wartime Allies planned a special ceremony in Berlin Tuesday morning to mark the end of their control over the city.

As the Allies prepared to give up their rights, East Germany's 98,000 troops started discarding their uniforms.

For about half of those troops, unification probably also marks the end of their military career. Only about 50,000 of them will be incorporated in the Bundeswehr, the West German armed forces. The last 24 East German generals were relieved of their duties Friday.

A few East German troops will be wearing their new Bundeswehr uniforms when they attend unification celebrations, which also will include the ringing of the ''freedom bell'' - cast in Great Britain, bought with U.S. donations and a copy of Philadelphia's Liberty Bell.

The bell, installed in a tower of the West Berlin city hall, bears the words - in English: ''That this world under God shall have a new birth of freedom.''

At the stroke of midnight Tuesday, the bell will ring as 14 young athletes hoist the German flag on the western lawn of the Reichstag, the former German Parliament building near the Brandenburg Gate.

The main celebrations will take place in the eastern part of the city, cut off from West Berlin Aug. 13, 1961, when Soviet-backed East German troops erected the hated Berlin Wall.

Departing East German Prime Minister Lothar de Maiziere will open official celebrations Tuesday at East Berlin's 19th century Theater House. Tuesday evening, Kurt Masur, the East German conductor of the New York Philarmonic, will lead the Leipzig Gewandhaus Orchestra and the East German State Opera in a performance of Beethoven's Ninth Symphony.

Wednesday begins with a televised church service from the baroque Marienkirche in East Berlin, followed by a formal state ceremony including a speech by President Richard von Weizsaecker at the concert hall in West Berlin.

Even as the preparations for reunification were completed, political maneuvering for control of the new Germany was under way.

In the West German port of Hamburg, the Christian Democrats of Chancellor Helmut Kohl merged with their smaller East German sister party Monday and adopted a joint manifesto for the first all-German elections, slated for Dec. 2.

The 750 West German and 250 East German delegates chanted ''Helmut, Helmut,'' making it a personal triumph for the 60-year-old Kohl, who at the same time marked the completion of eight years as chancellor.

MOSCOW (OCT. 1) UPI - A regional council, under pressure from local

residents concerned about the effects of radiation, declared a ban Monday on nuclear tests at the Soviet Union's primary test site.

The action came as the international environmental group Greenpeace charged that the Soviet Union has had a nuclear device in an underground shaft on the Arctic island of Novaya Zemlya since December in anticipation of testing there.

It was unclear what effect the ban by the Semipalatinsk council in the republic of Kazakstan, about 2,000 miles southeast of Moscow, would have on the national government's test program, but Moscow has been considering closing its prime test site for years.

Hundreds of nuclear tests have been conducted during the past 40 years at the Semipalatinsk test range, mostly underground but with some in the air.

There has been increasing pressure by local residents on the Soviet government to close the test range. The number of tests has declined in recent years during temporary unilateral test bans and plans made to open a new test site.

The official Tass news agency, reporting the decision of the Semipalatinsk regional council in a two-paragraph dispatch, said the tests at Semipalatinsk had subjected more than 500,000 people to ''the harmful effects of radiation.''

Greenpeace said in a telex from a delegation visiting the northern Soviet port of Arkangelsk that a ship carrying environmental activists would sail to Novaya Zemlya on Tuesday in an effort to ensure that a nuclear test is not conducted there.

Greenpeace did not say how it had confirmed that the Soviet Union was planning a nuclear test at Novaya Zemlya.

''We have learned that it (the test) has been postponed several times in the last year,'' Greenpeace coordinator Steve Shallhorn said in the telex. ''Our ship will be sailing to Novaya Zemlya in the hope of stopping nuclear testing forever.''

WASHINGTON (OCT. 1) UPI - Farm-state congressmen Monday unhappily faced the prospect of making huge changes in federal farm programs - a 24 percent cut in spending - although they knew for months that cuts were inevitable.

The budget agreement between the White House and congressional leaders calls for $13 billion in reductions in farm program spending over the next five years. The total was somewhat larger than some congressmen expected but jibed with repeated rumors in the days leading to the agreement.

By comparison, the House and Senate voted last summer for farm policy bills that would spend about $55 billion on farm supports through 1995, or about as much as if current law were unchanged.

For months, agricultural leaders said they would adjust the farm bill once budget negotiators agreed on spending levels. Two weeks ago, for instance,

Senate Agriculture Committee Chairman Patrick Leahy, D-Vt., said ''American agriculture is going to do its share.''

When a compromise finally was unveiled, however, some congressmen and farm groups said it was unfair. Along with the cut in federal support, the package calls for a 10-cent-a-gallon increase in fuel taxes.

Farmers spent from $5 billion to $7 billion on fuel and oil this year, along with at least $12 billion on pesticides and fertilizer - two crop ''inputs'' often derived from petroluem.

''I think the cuts were excessive, particularly in the 'out' years,'' said Rep. Dan Glickman, D-Kan., referring to the outline of $1.3 billion in cuts in fiscal 1991 and the remaining $11.7 billion the following four years.

The American Farm Bureau Federation, the nation's largest farm organization, said it opposed the budget package. The Farm Bureau dislikes higher fuel taxes and has spoken against further cuts in crop subsidy rates, which have been pared by more than 9 percent since 1985.

In a statement, Leahy said there would be ''deep and painful cuts in many important programs.''

The National Association of Wheat Growers said the methods offered for making the farm cuts were directed more heavily at some commodities than others.

''The scope of budget savings measures should include all crops and all farm spending programs,'' said NAWG President Del Wiedeman. ''The 1990 farm bill authorizes six new spending programs for crops, requires no cut in spending for a number of others and actually increases spending for still others.''

Budget negotiators suggested three ways to make the reductions. One was to cut target prices by 2 percent a year and each year declare an additional 3 percent of wheat, feed grains, cotton and rice land ineligible for payments.

The second was a one-time cut of 2 percent in target prices and a one-time ''triple base'' program under which 15 percent of of wheat, feed grains, cotton and rice land would be ineligible for support payments. The third was a one-time ''triple base'' program covering 25 percent of the land but no cut in target prices.

The package presented by budget negotiators did not mention action against the dairy, peanut or sugar programs. Those programs rely on a guaranteed government price to set a minimum price for the products.

For many weeks, leading members of the House Agriculture Committee have spoken in favor of using the triple base as the way to accommodate budget cuts. An aide to Sen. Richard Lugar, R-Ind., the Republican leader on the Senate

Agriculture Committee, said last week that Lugar preferred the approach of a five-year cut in target prices and payment acres.

Rep. Charles Stenholm, D-Texas, an orginator of the triple base idea, said the cuts proposed for agriculture were ''doable'' but, ''My only regret is we did not get equal cuts in other programs.''

CHICAGO (OCT. 1) UPI - Midway Airlines began non-stop service Monday between Midway Airport and both John Wayne Airport in Orange County, Calif., and Lambert Field in St. Louis.

Midway will operate five flights daily between Chicago and St. Louis and two flights daily between Chicago and Orange County.

The Chicago-based airline also initiated non-stop service to between Philadelphia International Airport - its second hub - and Las Vegas, with continuing service from Las Vegas to Los Angeles International Airport.

The addition of the flights brings to 61 the number of destinations served by Midway - which began operations on Nov. 1., 1979, with just four Midwest cities on its flight schedule.

#90274u1741 10/01/1990 ~United Press International

JERUSALEM (OCT. 1) UPI - Israel announced Monday the military would distribute gas masks to its more than 4.7 million citizens but denied Iraqi President Saddam Hussein's recent threats against the country sparked the move.

Defense officials said there was no indication a chemical weapons attack was imminent. Israeli officials, including Prime Minister Yitzhak Shamir, have repeatedly said they would strike a massive blow against any aggressor.

''There is no worsening of the situation and this decision was taken some time ago and also it's going to be applied over a period of time,'' said Shamir aide Avi Pazner. ''This is a precautionary measure that we are taking in light of the overall situation in the last few months in the area.

''It would be a big mistake to see anything in (the decision) which would point to a changing of the situation or a worsening of the situation,'' he said.

Israel also is purchasing gas masks for the estimated 1.7 million Palestinians in the occupied West Bank and Gaza Strip. But the Palestinians will have to buy the gas masks - estimated to cost less than $100 each - unlike Israelis who will receive them without charge because their national insurance payments already cover the cost, military sources said.

The phased distribution of gas masks to Israeli citizens, Arab and Jewish, will begin next week in three towns, the military said. Since the government considers Arabs of East Jerusalem Israeli residents, those Palestinians also will receive gas masks without charge.

Brig. Gen. Nahman Shai, the army spokesman, urged the public not to panic and said the distribution, expected to take several weeks, was consistent with previous Cabinet decisions. In interviews on television and radio, Shai explained that Israel began experimenting with gas mask distribution 1 1/2 years ago in two Israeli communities.

''The masks are being distributed in a relatively calm period,'' Shai told Army Radio. ''The distribution of the masks is not at all urgent presently.''

The reason behind the decision was to transfer the kits to citizens' homes in order to shorten the time of distribution if it became necessary to pass them out, the army said.

''The distribution of gas masks in no way whatsoever constitutes a change to an emergency status,'' the army said in a statement.

During the weekend, Chief of Staff Lt. Gen. Dan Shomron said that an Israeli distribution of gas masks would not be linked to Saddam's threats. As late as last week, Saddam threatened to attack Middle East oilfields, Israel and Saudi Arabia if tough economic sanctions against Iraq began to strangle his country's economy.

Before Iraq's invasion of Kuwait Aug. 2, Saddam had threatened to wipe out half of Israel with chemical weapons if Israel attacked Iraq or any other Arab nation.

Last month, a high-ranking Israeli civil defense official contended that delaying the distribution of protective kits against chemical weapons might exact ''a very high price'' from Israel.

''The feeling that the civilian population in the country is guarded and that the Israel Defense Force will prevent the enemy from reaching the civilian population has become a national asset,'' wrote Col. Dov Peled in the September issue of the civil defense magazine ''Ha-Oref.'' ''A strike on the civilian population will destroy this myth and is likely to cause serious harm to the morale of the citizens and the morale of the fighters on the frontline.''

After next week's initial distribution, the military would concentrate on urban centers before proceeding with other areas and citizens would receive notification by mail on when to report to distribution centers. Hotels would receive the protective kits for tourists.

Shai said a Cabinet subcommittee gave the army the power two weeks ago to go ahead with country-wide distribution.

On the issue of selling gas masks to Palestinians, the military sources said Israel earlier had not considered distribution because residents of the territories had not been considered potential targets as they were now.

''The important thing to understand is we are responsible for the security of the Palestinian residents in the territories and we're not shirking that responsibility even though they have expressed their fervant support for Saddam Hussein,'' one military source said.

After the Iraqi invasion of Kuwait, many Israelis fearful of a chemical weapons attack purchased their own gas masks despite reassurances from

government and military officials.

#90274u1755 10/01/1990 ~United Press International
WASHINGTON (OCT. 1) UPI - The Supreme Court agreed Monday to review the decision of a federal appeals court that a person arrested without a warrant must be granted a probable cause hearing within 36 hours of incarceration.

The case stemmed from a 1987 class-action suit filed by Donald Lee McLaughlin against Riverside County, Calif., claiming the civil rights of prisoners at the Riverside County Jail were being violated because they were being detained without a ''prompt'' probable cause hearing after arrest.

The suit asked that a probable cause hearing be held within 36 hours of the warrantless arrest of a suspected criminal.

It claimed the county normally waited 48 hours for such hearings, but contended that depending on weekends and holidays a person could be incarcerated more than 100 hours without a finding of probable cause.

On April 19, 1989, a federal court issued a preliminary injunction ordering such hearings within 36 hours. The 9th U.S. Circuit Court of Appeals upheld the 36-hour time limit.

In asking the high court to reverse the rulings, Riverside County argued that eliminating the uniform 48-hour time period used under state law ''will likely result in different time periods being applied in each of the 58 counties of the State of California - time periods set only after extensive litigation in federal and state trial courts within each county.''

#90274u1759 10/01/1990 ~United Press International
JOHANNESBURG, SOUTH AFRICA (OCT. 1) UPI - Police have arrested three black men in connection with a bloody attack on a commuter train last month that killed 26 blacks and injured at least 100, Law and Order Minister Adriaan Vlok said Monday.

Vlok said in a statement police also confiscated weapons including a range of firearms, ammunition, pistols, axes, spears, iron rods, and ammunition, but did not indicate when the arrests were made.

He said the police investigation could lead to more arrests but said the probe had been hampered by the indiscriminate nature of the killings, which occurred at the peak of a wave of factional black violence.

The train attack on the outskirts of Johannesburg on Sept. 13 shocked South

Africans and was one reason why President Frederik de Klerk imposed a tough security clampdown - dubbed Operation Iron Fist - in the hardest-hit townships surrounding the city.

The steps largely restored peace after more than six weeks of strife had killed nearly 800 people, but the African National Congress said ''Iron Fist'' did not address the root causes of the conflict.

The ANC also asserted a shadowy and well-trained ''third force'' was taking advantage of the fighting to sow discord among blacks, referring particularly to the apparent professionalism of the train attack.

But Vlok did not link the three arrested to any movement or indicate if police had learned the motive for the attack.

BRUSSELS, Belgium (OCT. 1) UPI - The European Community on Monday granted the equivalent of $31 million for protection of tropical rainforests in Africa its largest-ever environmental grant for projects outside the EC.

The grant approved by the EC executive Commission will go to seven countries at the heart of the African Tropical Rainforest, including Guinea, Cameroon and Zaire.

Specific projects in each country will be carried out over a three- year period, including development of activities by the existing population compatible with rainforest maintenance.

The tropical rainforest in Africa is the world's largest after the Amazon basin in South America.

#90274u1812 10/01/1990 ~United Press International

WASHINGTON (OCT. 1) UPI - Senior citizen groups charged Monday President Bush and Congress have ''declared budget war on the elderly'' by proposing the largest-ever increases in Medicare patient payments. They promised retribution on Election Day.

Reaction to the deficit reduction budget package proposed by White House and congressional negotiators Sunday was swift and angry from groups representing the 33 million elderly and disabled Americans served by the Medicare health insurance program.

''President Bush and the budget summiteers are asking one-eighth of the

population to shoulder one-half of the cuts in domestic spending, and that eighth represents the oldest, the sickest, the poorest adults - those least able to pay,'' said Ron Pollack director of Families USA, a national advocacy group for seniors.

''By unfairly and disproportionately singling out seniors for these enormous cuts, the summiteers (negotiators) have declared budget war on the elderly,'' Pollack told a Capitol Hill news conference. ''Those that wage this war shouldn't expect older Americans to be pacifists on election day.''

The budget compromise, still to be approved by Congress, would raise $30 billion from Medicare beneficiaries over five years by raising the monthly premium and the annual deductible paid for doctors' services. An additional $30 billion cut in payments to doctors and hospitals would make for a total budget savings of $60 billion coming from the Medicare program.

Arthur Fleming, chairman of the Save Our Security Coalition of organizations for seniors and the disabled, said the overall effect of planned and proposed increases will mean a 366 percent increase in the share paid by Medicare beneficiaries.

The major changes on the budget proposal would come under Medicare's Part B program, which pays doctors' bills. The annual deductible, before Medicare covers 80 percent of physician bills, would increase from the current $75 to $100 in 1991, $125 in 1992 and $150 in 1993-'95. The deductible last rose, from $50, in 1982.

In addition the Part B premium would rise 5 percent to cover costs, increasing from $28.60 per month to about $34 in 1991 and about $55 per month in 1995. The budget compromise proposal would also require beneficiaries to pay 20 percent of laboratory costs which are currently paid entirely by the Medicare program.

''A $300 plus increase in annual premiums coupled with a $75 increase in the deductible will force millions of seniors to eat less food, to skip their presecriptions and to fall behind in their rent or utility bills,'' Pollack said.

The budget proposal sets aside a new $2 billion fund to help seniors just above the poverty line pay the increased costs, but Pollack called the amount ''wholly inadequate toward what needs to be done.''

Rep. Edward Roybal, D-Calif., chairman of the House Select Committee on Aging, called the budget proposal ''unacceptable.''

''I predict that the senior citizens of this nation are going to be heard, not only here in Washington, but also across the nation,'' Roybal said.

Several seniors groups said they favored a shift in income tax rates that would put a greater burden on the wealthy as the most equitable way to trim the mammoth federal deficit.

''The best approach is a progressive income tax system,'' said Larry Smedley, director of the National Council of Senior Citizens. ''Older Americans didn't cause the deficit and they shouldn't be asked to pay more than their fair share of the costs.''

-30- 3756

#90274u1825 10/01/1990 ~United Press International

NEW YORK (OCT. 1) UPI - Financial News Network said Monday it may face ''a very substantial non-cash loss'' for the fourth quarter and the year if auditors decide its $28 million investment in a new financial information service must be charged against current earnings.

If FNN reports such a loss, it may be placed in default on approximately $48.5 million in bank loans, the company said in a statement.

The cable business news company said it is beginning discussions with its principal bank to seek appropriate waivers to prevent default.

Saying auditors had not completed their independent examination, FNN sought a two-week extension to file its annual report, known as a 10-K, with the Securities and Exchange Commission. The deadline for filing was Sept. 28.

The key accounting issue is how the approximately $28 million FNN invested in the new FNN:PRO product should be treated - as a charge against current earnings or amortized over a longer period of time.

FNN:PRO, which features financial information, news and a video service, was introduced in July.

If the auditors determine that FNN must take a one-time charge against fourth-quarter results for its investment in the real-time financial news service, FNN said it would be forced to report a ''very substantial non-cash loss for at least the fourth quarter of 1990 and the year.''

The loss and possible default would occur ''should these accounting issues ultimately be resolved contrary to FNN's position,'' the company said.

''We followed what we thought were appropriate procedures to treat the start-up cost as an investment and in recent days auditors have taken the position this should be written off as opposed to capitalized, '' said Dr. Earl Brian, chairman of Infotechnology Inc., which owns 47 percent of FNN.

''If you do that, you end up with a big loss for FNN's fourth quarter and the

potential of that is to change a lot of balance sheet ratios, which in turn causes your bank agreements to be in default, so you try to get waivers,'' he said.

''The $64,000 question is, 'Will they give them?' and the answer is nobody knows for sure,'' he said.

If the FNN:PRO investment were fully written off, FNN would take a $28 million charge against earnings, Brian said. The company and auditors have not yet discussed a compromise write-off, he said.

In fiscal 1989 FNN reported operating earnings of $6.5 million, or 36 cents a share, on revenues of $44.5 million.

Infotech said in a separate statement it could not file its annual report with the SEC until it obtained FNN's completed financial statements. Infotechnology also owns United Press International.

FNN stock held by Infotech serves as collateral for Infotech's primary bank credit agreements under which about $20.7 million is outstanding.

Due to recent declines in FNN's stock price, Infotech said it has been engaged in discussions with its bank lenders about restructuring the credit facility.

Trading in FNN and Infotech was delayed in opening on the over-the- counter market Monday.

FNN stock closed down $2.50 to $2.75 a share. FNN's stock price hit a 52-week low Thursday before edging up slightly Friday.

Infotech stock finished the day off $2.75 to $3 a share.

In seeking its extension with the SEC, FNN said it ''is not able to complete its financial statements for the fiscal year ended June 30, 1990 at this time because its independent auditors have not yet completed their examination.''

Auditors for FNN also were reviewing the valuation of data receivers provided to customers of FNN:Data Broadcasting, which is FNN's stock quote and market information service; accounting for the sale and leaseback of the receivers; and FNN's property accounts, the company said.

FNN said it ''believes it has properly accounted for both the FNN:PRO development costs and the data receivers.''

In addition to the bank loans, FNN said it had about $73 million in lease agreements as of June 30.

Its bank and lease payments are current, the company said.

In Washington, UPI spokesman Milt Capps said: ''These matters will not have a direct impact on UPI inasmuch as UPI is itself operating profitably.''

He said UPI ''has in the past two years restructured and reoriented its editorial operations, placed tremendous emphasis on attaining profitability and at this point on Oct. 1 is overall operating on a very self-sufficient basis.''

Brian said UPI's ''well-being is tied to how well products sell at UPI, not this situation.''

#90274u1947 10/01/1990 ~United Press International

DETROIT (OCT. 1) UPI - Luxury automakers, concerned over a proposal to add an excise tax to cars costing $30,000 or more, insisted Monday their automobiles should not be viewed in the same light as expensive furs or jewelry.

Instead, they should be viewed as cars that have benefited the entire auto industry by bringing technological advances - notably in the area of safety - to lower priced models, according to these automakers.

The proposal, which has yet to be approved by Congress, seeks to place a 10 percent tax on cars costing over $30,000, with the tax mostly likely figured on the transaction price, not the sticker amount.

It is part of a package to reduce the federal budget deficit by $500 billion over the next five years.

Through the first eight months of 1990, luxury cars have accounted for about 10 percent, or 940,000 units, of the entire U.S. auto market, although cars costing $30,000 or more make up only about 2 percent of total sales, industry figures show.

European automakers, as well as some Japanese carmakers such as Nissan Motor Co.'s Infiniti and Toyota Motor Corp.'s new Lexus divisions, would most likely be initially affected by the proposed tax because most U.S. nameplates are not yet in the $30,000 range, except for Cadillac.

Germany's Porsche, whose cars now range in price from over $43,000 to $95,000, expressed concern about the luxury-car tax.

''Even with those high prices, we don't consider our cars luxury items in the same sense as minks or jewels,'' said Porsche spokeswoman Martha McKinley, from the company's Reno, Nev., U.S. headquarters.

''The reason for the high price is advanced automotive technology that goes

into the development of the product, like driver- and passenger-side air bags and anti-lock brakes,'' she said. ''This kind of safety, technology and engineering is of benefit to the entire auto industry.''

''Our main reaction is the labeling of expensive cars as luxuries,'' said Thomas McGurn, a spokesman for German carmaker BMW. ''We feel our cars bring good technology into the marketplace. ... They play very important roles in the marketplace that is apart from just the owners rewarding themselves.''

About two thirds of BMW's cars cost over $30,000, McGurn said

''Of course we would go along with it. But we would have preferred a lower threshold, say $20,000,'' said Kurt von Zumwalt, a spokesman for German carmaker Mercedes-Benz. ''It's just one more thing that is certainly going to cause some further hesitation on the buyer's part.''

Nissan's newly created Infiniti division also expressed concerned about the proposed luxury-car tax but said it was too early to tell how the company would be affected.

The Infiniti Q45 sedan sells for $39,000 and is expected to account for over half of the division's anticipated sales of 40,000 for 1991, company spokeswoman Debra Sanchez Fair said.

Toyota's Lexus division had no immediate comment.

General Motors Corp.'s Cadillac division, whose cars have all crossed the $30,000 barrier for 1991, could also be affected. But while company spokesman William O'Neill acknowledged that the transaction price for some Cadillac may be at or close to the $30,000 mark, he did not think the proposed tax may have a great affect on sales.

Still, industry observers say such a tax is bound eventually to broadside nameplates like Cadillac or Lincoln if it becomes law.

''It's really academic,'' said one analyst. ''If some carmakers are not there in price now, they will be there a year or two from now.''

#90274u1995 10/01/1990 ~United Press International

(OCT. 1) UPI - President Bush tried to calm war fears today with talk of a peaceful outcome of the Persian Gulf crisis. Speaking before the U-N General Assembly, Bush dangled ''true opportunities'' before Iraq if it would pull out of Kuwait.

The General Assembly applauded Bush for declaring that the world is united behind his view that the annexation of Kuwait- in his words- ''will NOT be permitted to stand.'' He said aggression will NOT be tolerated or rewarded.

Former Treasury Secretary Donald Regan says deregulation of the nation's savings and loan industry is NOT to blame for the current thrift crisis. Regan told the House Banking Committee that lax supervision is the root cause of the s-and-l debacle.

The U-S Supreme Court is stepping into the savings and loan fray. The high court agreed today to decide whether the financial institutions can deduct Millions of dollars as losses by essentially swapping mortgage loans of near identical value.

The nation's major submarine builder is cutting back its work force because of cuts in defense spending. The Electric Boat Division of General Dynamics Corporation announced that 582 workers will be laid off and warned of more job reductions next month.

The Energy Department says it will NO longer make nuclear weapons at its uranium processing plant near Fernald, Ohio. Officials say they plan NO

layoffs of the plant's 790 workers, who will focus efforts on environmental cleanup.

WASHINGTON (OCT. 1) UPI - Bone marrow transplants failed to help men infected with the deadly AIDS virus who underwent the experimental treatment in a new government study, researchers reported Monday.

Despite previous reports indicating a similar approach may be encouraging, the study found no long-term benefit in the study involving 16 men who received bone marrow donations from their identical twin brothers.

The researchers acknowledged, however, that variations of the approach may produce better results.

''Although the study showed no long-term benefits, the approach gives us something to build on in our campaign against AIDS,'' said Health and Human Services Secretary Louis Sullivan in a statement.

''Ultimately we believe such innovative combination therapies, which attempt to attack HIV infection and rebuild the patient's immune system, will offer the most hope to persons with AIDS,'' he said.

The approach is aimed at boosting the weakened immune systems of patients infected with the AIDS-causing human immunodeficiency virus or HIV.

In a report published in the Annals of Internal Medicine, Dr. H. Clifford Lane of the National Institute of Allergy and Infectious Diseases and his colleagues said they tried the approach on nine men with AIDS and seven men infected with the virus who had not yet developed the full-blown disease.

All the men and their twins took the drug AZT, which inhibits the ability of the AIDS virus to reproduce, for 12 weeks to suppress the virus and build up a supply of the drug in the donor's blood.

After nine weeks, each infected twin received infusions of white blood cells called lymphocytes taken from his twin brother and underwent bone marrow transplants three weeks later. Identical twins were used because their blood types match perfectly, reducing the risk of rejection.

After receiving the bone marrow transplant, the twins infected with the virus received either more AZT or a dummy drug for the next 12 months.

Although the patients seemed to tolerate the treatment well and their immune systems seemed to be enhanced, the benefits only lasted several months and the disease progressed in all but one patient, the researchers said.

''Our results show that any benefits from such combination therapy are at best transient,'' the researchers wrote.

However, the researchers said that the approach still had promise and could be improved to produce benefits.

In fact, three additional sets of twins are participating in a new study in which the donor's immune system will be boosted with an experimental AIDS vaccine before the bone marrow is removed for transplantation.

''We believe that combination therapy has a great deal of promise and we are continuing to look for the optimal combination,'' said NIAID Director Dr. Anthony Fauci in the statement.

In June 1989, doctors at Johns Hopkins Hospital in Baltimore reported they apparently had cleared the AIDS virus from one patient who had the bone marrow destroyed with radiation and drugs, and then underwent a bone marrow transplant while receiving high doses of AZT.

No signs of the AIDS virus were found in the patient's tissues after treatment but he went on to die of an AIDS-related cancer that afflicted him before the experimental treatment.

''Ours is more a total replacement of the immune system, while theirs is a small boost, an augmentation,'' said one Johns Hopkins researcher who asked not to be named.

In the past two years, Johns Hopkins has performed its procedure on six AIDS patients and four are still alive, he said. The hospital is continuing to perform the procedure, he said.

The government researchers acknowledged total destruction of the old immune system may result ''in a better clinical outcome.''

But Lane said in a telephone interview he was skeptical that every infected cell could be destroyed and he was concerned such an approach posed the danger of patients being even more susceptible to deadly infections.

(OCT. 1) UPI - Iraq further raised hopes that it wants to pursue a French peace proposal with a pledge Monday to release nine French hostages, while President Bush, embracing some aspects of the plan, told Saddam Hussein that pulling out of occupied Kuwait might lead to new ''opportunities.''

Meanwhile, Israel said it would distribute gas masks to its more than 4.7 million citizens, but played down linking the decision to Iraqi threats. Israel has pondered distributing the masks since Saddam threatened to destroy ''half of Israel'' with poison gas before his Aug. 2 invasion of Kuwait.

The phased distribution of gas masks to Israeli citizens, Arab and Jewish, will begin next week in three towns, the Israeli military said.

''This distribution is in conjunction with previous Cabinet decisions on this issue. The distribution of gas masks in no way whatsoever constitutes a change to an emergency status,'' the statement said.

Israel also is purchasing gas masks for the estimated 1.7 million Palestinians in the occupied West Bank and Gaza Strip. But the Palestinians will have to buy the approximately $100 gas masks, while Israelis will receive them without charge because their national insurance payments already covered the cost.

The official Iraqi News Agency said Saddam had ordered the nine Frenchmen released and said they could leave Iraq with a delegation from the France-Iraq

Friendship Association now in Baghdad.

INA did not say when the released Frenchmen, part of a larger group of Western nationals described by Iraq as ''foreign guests'' and held in the country as human shields against attack, would leave Baghdad.

The Iraqi government has detained citizens of Western countries near key military and other installations as a response to the U.S.-led military deployment in Saudi Arabia.

The French government estimates some 350 French nationals are being detained against their will by Saddam, 85 of them in Kuwait. It believes 67 are being used to discourage a U.S. bombing attack.

A spokesman for President Francois Mitterrand confirmed the release would take place, but insisted there had been no negotiations between Paris and Baghdad.

''Nine persons are free, who would not be happy?'' spokesman Hubert Vedrine said. ''But that does not change anything. What is expected from Iraq is the liberation of all the hostages, French and foreigners, without exception.''

He said ''routine'' conversations between Iraqi and French diplomats involved only the issue of French hostages being held in Iraq and Kuwait.

Saddam said in a statement read on Iraqi television Sunday he was interested in discussing a French proposal calling for the opening of a dialogue in return for Iraq's statement of ''intention'' to withdraw from Kuwait and free Western hostages.

The French proposal left open the possibility for free elections in Kuwait after the withdrawal - a marked difference from the Bush administration's insistence that Kuwaiti Emir Jaber al-Ahmad al-Sabah be returned to power and Iraq actually withdraw from Kuwait before discussions with Baghdad begin.

But Bush, in language that embraced elements of the French overture to Saddam, told the U.N. General Assembly Monday that ''there may be opportunities'' for Iraq in leaving Kuwait, including a permanent resolution of their longtime disputes over territory, money and oil, as well as settlement of ''the conflict that divides the Arabs from Israel.''

Bush insisted, however, that the world remains united behind the U.S. position that ''the annexation of Kuwait will not be permitted to stand.''

''But the world's key task - now, first and always - must be to demonstrate that aggression will not be tolerated or rewarded,'' Bush said.

U.S. officials denied Bush's speech represented any significant change in policy. But the mere mention of the Arab-Israel conflict signaled a shift in

approach.

Soviet Foreign Minister Eduard Shevardnadze said he would not call Bush's address to the General Assembly ''conciliatory.''

''I would not use the word conciliatory, but it is a very good speech which gives strong support to the positive trend (toward peace) in the world,'' Shevardnadze said.

Iraqi U.N. Ambassador Abdul Amir Al-Anbari said, ''We disagreed on everything he (Bush) said.''

''We remain hopeful that the crisis will be solved in a peaceful means,'' he said.

In other developments:

-Egyptian President Hosni Mubarak said in an interview published by a French newspaper that if the U.N. embargo against Iraq fails, there will be no option to war.

-In Washington, the House debated a resolution supporting the Bush administration so far in the Persian Gulf. The measure applauds the deployment of troops and urges Bush to ''continue to emphasize the use of diplomatic and non-military means'' to end the crisis.

-The U.S. military identified two U.S. airmen killed Sunday in the gulf region as Maj. Peter Samuel Hook, 36, of Bishop, Calif., and Capt. James Bernard Poulet, 34, whose hometown was not released. They were killed when an Air Force F-15E fighter crashed during a training mission.

-In the Vatican, Pope John Paul II warned that wars ''never settle problems definitively.'' ''Only dialogue, respect for the rights of persons and peoples and collaboration among political leaders are capable of creating confidence and therefore security.''

-A ship left Elizabeth, N.J., with non-alcoholic beer for U.S. forces in Saudi Arabia. The Pentagon has barred U.S. troops in Saudi Arabia from having beer because of the Islamic prohibition against drinking.

#90274u2034 10/01/1990 ~United Press International

MANAGUA, NICARAGUA (OCT. 1) UPI - Thousands of Sandinista workers took a day off from work Monday to march through the streets to protest government economic policies, but the demonstrations were much smaller and more tranquil than what had been threatened.

Burning tires, a popular sign of Sandinista protest, marked intersections throughout the capital as some 2,000 workers marched to the Presidential House.

Protests and minor confrontations with police were also reported in various Managua neighborhoods and other parts of the country.

The protests, however, were scaled-down, apparently on the orders of the Sandinista leadership after meetings late last week with aides of President Violeta Chamorro, who is out of the country on a visit to the United Nations.

Thousands of police armed with riot gear and tear-gas guns formed a cordon around the Presidential House Monday, outnumbering the protesters who threw firecrackers and small noise bombs.

Like the protesters, the police are Sandinista supporters, and union chief Lucio Jimenez scolded some marchers for taunting the officers.

''They are not our enemies. They are our brothers,'' he told the crowd.

Other speakers called on the government to halt its plans to privatize industries, fire thousands of government workers and reduce the salaries of thousands of others.

''If there is not a national dialogue, we are going to have an insurrection,'' one speaker shouted.

A week earlier, the powerful Sandinista labor union proclaimed Oct. 1 a ''national day of protest,'' and rising tension in the country led to fears of renewed violence between Sandinista workers and supporters of Chamorro's National Opposition Union, or UNO.

But meetings between Presidential Minister Antonio Lacayo, Chamorro's top policy-maker, and former Sandinista President Daniel Ortega resulted in an agreement that the Sandinista Front would not allow the protests to escalate, observers said.

In return, the government agreed to postpone the lay-offs, temporarily cut utility prices and help ''create a climate'' that would bring the Sandinistas to a national dialogue that Chamorro proposed. The aim of the dialogue would be to find ways to reduce the impact of the austerity measures the government is implementing to boost the staggering economy.

Among the Sandinista Front's demands are a freeze on utility prices for three months, a halt to privatization of industries and lay-offs of state workers, and the creation of a fund to help the poor.

The Monday crowds chanted ''Popular power'' and carried banners reading ''We want an end to the exploitation of workers.''

On Sunday, the transmitter for the pro-Sandinista radio station La Primerisima was set on fire and destroyed, silencing the popular station.

In a small effort to make up for the loss, one Sandinista supporter marched through the streets Monday broadcasting news from a portable PA system, wearing a sombrero with the letters of the Sandinista Front and calling himself ''Backpack Radio.''

#90274u2042 10/01/1990 ~United Press International

NEW YORK (OCT. 1) UPI - The dollar weakened Monday in New York trading as currency market players concluded that the Washington accord on cutting the U.S. budget deficit could hasten the lowering of short-term interest rates.

Currency traders said the dollar also fell on a report by purchasing managers showing the U.S. manufacturing economy at low ebb.

The budget accord ''has given the market some feeling that the Fed will have further room to ease,'' said Barclays Bank trader David Jaques. Yet, he added, ''the market has been relatively conservative about it.''

The Federal Reserve chairman, Alan Greenspan, links Congressional passage of ''credible and enforceable'' deficit-reducing legislation to a lowering of a key short-term interest rate the Fed indirectly controls.

In late New York trading, the dollar was quoted at 1.5575 German marks, down from 1.5660 marks Friday, and 136.60 Japanese yen, off from 138.53.

Lower interest rates tend to weaken the dollar by sending investors to other currencies in which higher yields are available. Yet traders and analysts said the market reaction was not entirely dollar-bearish.

Added Jim Merrill, senior international economist for the McCarthy, Crisanti & Maffei investment bank, ''I think the currency market is not clear on what the budget deal will mean for the dollar.''

On the one hand, Merrill said, the deficit pact could reduce domestic demand and lower interest rates, hurting the dollar. But it could boost the dollar by restoring confidence in management of the U.S. economy.

But Merrill said the immediate effect is more likely to be dollar- bearish.

The British pound ended at $1.8840, ahead from $1.8770.

Other New York dollar rates: 1.2960 Swiss francs, off from 1.2975; 5.2190 French francs, down from 5.2400; and 1,167.25 Italian lire, off from 1,170.

In Europe, the dollar ended lower against the main currencies as participants looked for U.S. short-term interest rates to come down following the striking of the White House-Congress budget-cutting deal.

''The market is looking at a softer dollar because of the agreement,'' Midland Bank currency analyst Michael Janes said, adding that the dollar also fell in response to the poor U.S. manufacturing data.

In London, the pound moved up to $1.8890 vs. $1.8690 Friday.

The dollar closed lower in Frankfurt, at 1.5511 German marks vs. 1.5665, and in Zurich, at 1.2865 Swiss francs compared with 1.2980.

The dollar lost ground in Paris, Brussels, and Milan, at 5.1945 French francs vs. 5.2365, 31.93 Belgian francs vs. 32.25, and 1,162.55 lire vs. 1,170.70.

In Tokyo, the dollar fell against the yen as dollar-selling was fueled by the budget deficit agreement. It ended at 137.15 yen vs. 137.95.

Gold closed sharply lower in Zurich at $395.50 an ounce vs. $406.50, and was also off in London at $396.50 an ounce vs. $404.75.

Silver declined in Zurich to $4.75 an ounce vs. $4.80. It also lost ground in London, ending at $4.80 an ounce compared with $4.81.

Republic National Bank in New York closed cash gold at $387 an ounce, down a whopping $16.75 an ounce from $403.75. The New York Commodity Exchange settled contract gold at $386.60 an ounce, off $15.90 from from $402.50.

Silver remained unchanged in Zurich at $4.80 an ounce, but was slightly lower in London at $4.81 an ounce compared with $4.82.

Republic closed cash silver at $4.665 an ounce, off from $4.785. Comex silver finished trading at $4.61 an ounce, down from $4.761.

#90274u2088 10/01/1990 ~United Press International

WARSAW, POLAND (OCT. 1) UPI - President Wojciech Jaruzelski Monday signed into law measures that will effectively end his political life in Poland by providing for a new presidential election.

The action opens the way for the speaker of the lower house or Sejm to call a new election, expected to be held Nov. 25.

Gen. Jaruzelski, the former Communist Party chief and prime minister who is nevertheless remembered by most Poles as the man who imposed martial law in

1981, had been under heavy pressure to step down despite the fact his term did not expire until 1994 on grounds he was out of step with the times.

''I accept this as an act of relief,'' Jaruzelski said when asked by the Polish news agency PAP how he felt about signing the bills. ''I am happy that I could do this.''

Asked what kind of president he saw in his place, he replied, ''This should be a man who would unite the nation.''

''This should be a wise man and at the same time an energetic one, a bold and considerate man who would be capable of pursuing difficult tasks in these difficult times,'' he said.

Solidarity leader Lech Walesa announced his candidacy for president even before parliament debated the new election bills.

Solidarity Prime Minister Tadeusz Mazowiecki, who has come under increasing criticism by Walesa, may also run but has not yet announced his decision.

There had been growing dissatisfaction with the current political setup, which was a result of the historic round-table agreement in the spring of 1989 in which the ruling Communist Party and the then-illegal Solidarity union agreed to hold partially free elections.

The elections that June produced a stunning victory for Solidarity- backed candidates, but they were able to run for only 35 percent of the seats in the lower house or Sejm, and the presidents chair was reserved for Jaruzelski.

Walesa Monday received an honorary doctorate degree during a ceremony inaugurating the new academic year at the Nicolas Copernicus University in Torun.

That was followed by a rally in the medieval Old Market Place in which about 6,000 people cheered his candidacy.

''Free elections will tell me where I am,'' he told the crowd. ''It will put me into the (presidential) post, or will tell me, stop.''

Someone in the crowd asked whether Walesa would ''free Poland from the red spiders,'' referring to the communist bureaucrats who remain in office.

''If somebody took something, he will have to give it back, but there will be no general responsibility,'' he said, indicating that communists with good records will not be sacked.

#90274u2090 10/01/1990 ~United Press International

NEW YORK (OCT. 1) UPI - The Dow industrials surged back above the 2500 level in heavy trading Monday, riding a wave of bullish factors to post their second-biggest gain of the year.

The Dow Jones industrial average, which jumped 25.00 Friday, soared 63.36 to close at 2515.84. The biggest gain of the year came Aug. 27, when the blue-chip average surged 78.71.

A gain of more than 50 points at late morning triggered the New York Stock Exchange's rule curbing program buying. Under the rule, computerized trades in stocks can only be made at a price equal to or lower than the previous trade.

Among broader market gauges, the NYSE composite index jumped 4.37 to 172.22 and Standard & Poor's 500-stock index bolted 8.89 to 314.94. The price of an average share surged 76 cents.

Advances pounded declines 1,197-435 among the 1,998 issues crossing the NYSE tape. Volume amounted to 202,210,000 shares, compared with 201, 037,360 shares Friday.

Analysts said a myriad of factors weighed in the stock market's favor Monday:the accord on cutting the federal budget deficit reached over the weekend, a plunge in crude oil prices, a rally in Treasury bonds and, perhaps most importantly, its very depressed levels before the opening bell.

Before scoring a narrowly based 25-point rally Friday, the Dow had plunged to 2427.48 - its lowest level since May 11, 1989 - largely because of the runup in oil prices since Iraq invaded Kuwait Aug. 2.

''The market was up because we had the preconditions for a good rally,'' said Alfred Goldman, market strategist at A.G. Edwards & Sons Inc. in St. Louis.

''As of Friday, the Dow was down 22 percent in 10 weeks (from mid- July highs near 3000), and many big-name, big-capitalization stocks were down 30 to 35 percent,'' Goldman said. ''We had a washout in the market, and that set us up for this knee-jerk bounce.''

Goldman dismissed the effect of the budget-cutting compromise reached by theBush administration and congressional leaders over the weekend on Monday's rally, saying: ''There's nothing to like about the budget. If you smoke, drink or drive you're in trouble.''

He was referring to the proposed tax increases contained in the plan, specifically higher levies on tobacco, alcohol and gasoline. ''People would have been upset with the budget if the market were up,'' Goldman said.

Other analysts said the market responded to what has driven it for the last

two months - oil prices. After closing in on $40 a barrel last week, November crude oil futures plunged $2.42 to $37.09 a barrel, pressured by new hints of a possible peaceful solution in the Mideast.

President Saddam Hussein said in a statement read on Iraqi television Sunday that he was interested in discussing a French proposal calling for the opening of a dialogue in return for Iraq's statement of ''intention'' to withdraw from Kuwait and to free Western hostages.

Crude's move downward took Treasury bond yields with it, which also bolstered stocks, traders said.

''The main thing was the lower oil prices,'' said Ron Doran, director of institutional trading at C.L. King & Associates in Albany, N.Y. He also mentioned that many money managers typically choose the first day of a new quarter to begin putting funds to work.

''I think the budget was really only a small portion of the upside here today '' said Doran, ''and only because there was some agreement, averting the Gramm-Rudman, across-the-board, 'Where's the unemployment line?'-type cuts.''

Sharp automatic spending cuts called for by the Gramm-Rudman balanced budget law would have taken effect Monday if there were no agreement.

On the trading floor, Philip Morris was the most active issue, rallying 2 1/2 to 47 3/4.

Pepsico followed, up 1 5/8 to 24 5/8. General Electric was third, up 1 3/4 to 56 1/4.

Among the other blue chips, AT&T jumped 1 3/8 to 32 1/4, IBM rallied 2 5/8 to 109, American Express climbed 1 1/2 to 22 3/8, Eastman Kodak rose 1 1/8 to 39 5/8, Merck surged 4 1/8 to 80 1/4, Coca-Cola jumped 2 1/8 to 41 5/8 and McDonald's advanced 1 1/8 to 27.

Not surprisingly, oil issues were one of the market's few generally declining stock groups. Texaco fell 7/8 to 60 3/8 and Chevron lost 3/8 to 73 5/8, but Exxon rose 5/8 to 49 5/8, among the Dow components. Elsewhere, Amoco lost 1 to 55 3/4, Mobil edged up 1/4 to 63 1/8 and Amerada Hess tumbled 1 to 50.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 235,957,110 shares, compared with 236,925,440 shares traded in the previous session.

Prices rose in heavy trading on the American Stock Exchange.

The Amex Market Value index added 0.71 to 308.44. Advances led declines 322-265 among the 811 issues traded. The price of an average share rose 2

cents. Composite volume totaled 19,388,730 shares, compared with 20,714,930 traded Friday.

Salomon's put warrants on the Tokyo Stock Exchange's Nikkei index led the Amex issues, down 1/2 to 20 5/8.

The National Association of Securities Dealers composite index soared 10.15 to 354.66.

#90274u2093 10/01/1990 ~United Press International

WASHINGTON (OCT. 1) UPI - Conservative House Republicans revolted Monday against President Bush and the $500 billion deficit reduction plan he struck with congressional leaders, with one conservative saying Democrats ''extorted'' Bush into the deal.

''I have looked at the package ... and it is my conclusion that it will kill jobs, weaken the economy, that the tax increase would be counterproductive and that it is not a package that I could support,'' said assistant House Republican leader Newt Gingrich of Georgia after Republicans were briefed on the plan by top administration officials.

''I think that we need to do better than this,'' said Gingrich, surrounded by like-minded colleagues.

But while conservative House Republicans were abandoning the deficit reduction ship, Senate Republicans were climbing aboard and predicting passage despite the plan's call for $134 billion in new taxes over five years and its lack of a capital gains tax cut.

''We'd be damn fools is we didn't approve this - the alternative is worse,'' said Sen. Ted Stevens, R-Alaska, after he and about 25 other Senate Republicans were briefed on the plan's details by administration officials.

White House chief of staff John Sununu said after briefing GOP senators that ''I think we'll get well over the majority'' to support the plan. Senators said the same thing.

''It's like drinking a gallon of castor oil but we're going to pass it,'' said Sen. John Warner, R-Va. ''No one got up and shook his fist at it.''

''Does everybody dislike something in this package? Yes, but nobody has anything better,'' added Sen. Pete Domenici, R-N.M.

The alternative to a successful budget deal is imposition of up to $105.7 billion in automatic Gramm-Rudman law spending cuts.

The cuts, which had been set to begin taking effect Monday, were at least temporarily avoided when Bush and congressional leaders announced Sunday a deal to raise taxes and cut spending to slash the deficit by $40 billion in fiscal year 1991, which began Monday, and $500 billion over five years.

It was unclear Monday if Gingrich's view was shared by the majority of House Republicans or if the package was in danger of failing there when a vote is taken later in the week.

Budget negotiators decided a deal must be backed by a majority of both parties in both houses to prevent one from blaming the other a month before the election for the painful political choices in the plan.

Vice President Dan Quayle lobbied for support at the House GOP meeting.

''I felt a little bit like your friendly dentist, applying a lot of novacaine and trying to extract a few votes,'' Quayle said afterwards. ''We're not there yet but I believe when all the details are known that you will find support in the Republican caucus for the budget compromise.''

Conservatives felt otherwise.

Rep. Bill McCollum, R-Fla., who said he would oppose it, called the plan ''a pro-Democrat negotiated budget deal'' and said Bush ''got the short stick in this whole process.''

''I think the Demcrats basically extorted the president into accepting a recession pacakge,'' said Rep. Duncan Hunter, R-Calif. ''That's precisely what it is and we should vote it down.''

Conservative Sen. Phil Gramm, R-Texas, said he spoke on Monday to some House conservatives to try to rally support and to get them to ask themselves, ''Are you here to protest or are you here to govern?''

''I don't want to tell my grandchildren that America went to hell but I voted against it every step of the way,'' Gramm said.

Rep. Silvio Conte, R-Mass., said Bush, in New York, was phoning House Republicans seeking support.

There was Democratic dissention as well Monday.

''This tax deal stinks,'' Rep. James Traficant, D-Ohio, said on the House floor. ''Let me remind this body that mom and dad, the beer drinkers, didn't get us into this mess. It was champagne guzzlers in the Pentagon and today they're laughing their brass off.''

He was referring to the sharp increase in taxes on alcoholic beverages

containined in the deficit plan.

''I do not think the agreement meets the fairness test and I will have to oppose the agreement'' said Rep. Joseph Brennan, D-Maine. ''It results in an unfair burden being placed on the backs of working class Americans and is especially tough on our older citgizens.''

Sen. Sam Nunn, D-Ga., said he would be surprised ''if this package isn't defeated at least once. But I'll also be surprised if, at some point, it isn't passed.''

Senate Democratic leader George Mitchell of Maine urged President Bush to address the nation ''to prepare the public for the difficult'' consequences of the budget agreement and to spur grassroots pressure on Congress.

Mitchell said he was working ''virtually full time'' convincing Democrats to back the deal.

He said some Democrats felt they party was ''giving away too much'' in the deal.

House Speaker Thomas Foley, D-Wash., said opposition in his party produces ''some degree of concern'' about the plan's chances in the House.

In Chicago, Chairman Dan Rostenkowski, D-Ill., of the House Ways and Means Committee said he would seek unspecified amendments to the plan.

#90274u2103 10/01/1990 ~United Press International
HOLLYWOOD (OCT. 1) UPI - The landlord nightmare-thriller ''Pacific Heights'' took a lease on first place at the nation's box office in its debut, taking in $6.9 million over the weekend at 1,278 screens.

But Columbia's ''Texasville,'' a sequel to the critically acclaimed 1971 hit ''The Last Picture Show,'' opened weakly with a weekend gross of $823,534 at 354 screens.

''Pacific Heights,'' a kind of ''Fatal Attraction'' of the real estate

business, boasts considerable star power with Melanie Griffith and Matthew Modine as the landlords and Michael Keaton as the tenant from hell.

Twentieth Century Fox may score another No. 1 hit next weekend with the release of the newest Steven Seagal action film, ''Marked for Death.'' Seagal's last movie, another slam-banger called ''Hard to Kill, '' was a surprise hit this spring.

The gritty mobster drama ''GoodFellas,'' which debuted last weekend at the No. 1 spot, came in second at the box office with a strong $5.9 million weekend at 1,291 screens. Long-term prospects for the film, starring Robert De Niro and Ray Liotta, look healthy as its gross fell off only moderately after its $6.4 million debut weekend.

''GoodFellas'' has lifted $14.9 million from moviegoers in 10 days for Warner Bros.

''Ghost,'' due to become the year's biggest hit, continued to hover at the No. 3 spot with $5.4 million at 1,766 screens over the weekend, an impressive 6 percent improvement from last weekend's gross.

''Ghost'' has scared up $155.3 million in 12 weeks for Paramount and trails only Disney's ''Pretty Woman'' among this year's top movies. ''Pretty Woman'' has grossed $173.5 million in 29 weeks and was still showing at 851 screens last week.

''Postcards From the Edge,'' which opened at No. 1 two weeks ago, delivered $4.1 million at 1,323 screens for the No. 4 spot. The show-biz comedy, starring Meryl Streep and Shirley MacLaine as a chemically- dependent daughter and mother, has taken in $23.2 million in less than three weeks for Columbia.

Columbia's train thriller ''Narrow Margin,'' starring Gene Hackman and Anne Archer, derailed in its second weekend with a sharp decline to $1.96 million at 1,253 screens and wound up in fifth place. It has grossed $6.6 million in 10 days.

Outer-space cop movie ''I Come in Peace'' received a chilly welcome in its debut weekend, with $1.95 million at 1,013 screens for Triumph, and landed in sixth place.

MGM/UA's ''Death Warrant'' slugged its way into seventh with $1.88 million at 1,077 screens to bring its three-week gross to $11.8 million.

Life-after-death drama ''Flatliners,'' starring Julia Roberts and Kiefer Sutherland, descended from seventh to eighth with $1.67 million at 1,435 screens. Its eight-week total has hit a lively $53.7 million for Columbia.

Gene Wilder's latest comedy ''Funny About Love'' nearly disappeared in its

second weekend with a tepid $1.64 million take at 1,213 screens, giving it a 10-day gross of $5.3 million for Paramount.

Courtroom drama ''Presumed Innocent'' fell to No. 10 from No. 8 with $1.4 million over the weekend at 1,097 theaters. ''Presumed'' performed persuasively in the late summer for Warner, and has grossed $80.6 million in 10 weeks.

The top 10, weekend gross, total gross and weeks in release:

1. ''Pacific Heights,'' $6.9 million, 1 week.
2. ''GoodFellas,'' $5.9 million, $14.9 million, 2 weeks.
3. ''Ghost,'' $5.4 million, $155.3 million, 12 weeks.
4. ''Postcards From the Edge,'' $4.1 million, $23.2 million, 3 weeks.
5. ''Narrow Margin,'' $1.96 million, $6.6 million, 2 weeks.
6. ''I Come in Peace,'' $1.95 million, 1 week.
7. ''Death Warrant,'' $1.88 million, $11.8 million, 3 weeks.
8. ''Flatliners,'' $1.67 million, $53.7 million, 8 weeks.
9. ''Funny About Love,'' $1.64 million, $5.3 million, 2 weeks.
10. ''Presumed Innocent,'' $1.4 million, $80.6 million, 10 weeks.

UNITED NATIONS (OCT. 1) UPI - President Bush said Monday he supports U.N. membership for South Korea and would not object if North Korea also enters the United Nations simultaneously with the south.

In the first indication that Washington would not use its veto in the Security Council against North Korea, Bush told the U.N. General Assembly that he

believed in the ''universal U.N. membership'' for all states to reduce regional tension.

''The United States fully supports U.N. membership for the Republic of Korea '' he said.

''We do so without prejudice to the ultimate objective of reunification of the Korean peninsula, and without opposition to the simultaneous membership for the Democratic People's Republic of Korea.''

South Korea's Foreign Minister Choi Ho-Joong told United Press International during a break in the General Assembly session, ''We cannot expect a better speech from President Bush.''

Any countries wishing to enter the United Nations must be approved first by the 15-nation Security Council where the five permanent members - the United States, the Soviet Union, Britain, China and France - can veto their applications. A favorable recommendation by the council would be automatically approved by the General Assembly's 160 member states.

South Korea has sought U.N. admission for years, but it was opposed mostly by China. North Korea opposed separate admissions and insisted that Korea becomes a U.N. member after reunification of the peninsula, divided since 1945.

#90274u2113 10/01/1990 ~United Press International

(OCT. 1) UPI - Prices for crude oil plunged by more than $2 a barrel and for gasoline by nearly 5 cents a gallon Monday after Iraq indicated over the weekend it would like to explore a resolution of the Persian Gulf crisis.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate crude for November delivery ended the day down $2.42 from Friday's close to $37.09 a barrel after trading as low as $35.85 a barrel.

As a result, stock prices closed sharply higher on the New York Stock Exchange with the Dow Jones industrial average rising by 63.36 points.

Unleaded gasoline for November delivery fell 4.8 cents to 93.91 cents a gallon after trading as low as 91.5 cents a gallon and declined the Merc's 3 cent limit for later-month contracts.

Unleaded is still 29.6 cents, or 46.1 percent, higher than it was prior to Iraq's Aug. 2 invasion of oil-rich Kuwait.

November-delivery home heating oil dropped 5.89 cents to $1.0003 a gallon, still 38.84 cents, or 63.5 percent higher than its Aug. 1 price. It also fell the 3 cent limit for later-month contracts.

On the European spot market, where crude is bought and sold for cash, Britain's widely traded North Sea Brent dropped $2.30 to $38.50 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - declined $1.55 to $33.80 a barrel.

On the U.S. Gulf Coast spot market, prompt-delivery WTI was down $2.45 to $37.05 a barrel.

Since the start of the Persian Gulf crisis triggered by the Iraqi invasion, traders have been in the habit of moving heavily to buy positions on Friday in fear a war might break out over the weekend.

Prices fell as the result of ''another weekend without war and a few whispers of a potential peaceful solution in the Persian Gulf,'' said Kirk Kinnear of Salomon Brothers' Phibro division in Greenwich, Conn.

A statement by President Bush that oil prices are too high also helped, the trader said.

''That's been the pattern for Mondays - we relax after Friday's rumors of a war starting over the weekend,'' said James Steel of Refco Inc. in New York.

''I'd like to see market forces determine it (the price of oil), rather than excessive speculation, and I'm confident that in the long run supply and demand will set the price,'' Bush said.

''There's speculation in some futures markets, but I have no plans to intervene in the market or anything of that nature,'' Bush told reporters following a U.N. speech.

In the speech, Bush held out the prospect of a peaceful outcome to the Persian Gulf crisis in an offer of political and economic incentives for Iraqi leader Saddam Hussein to get out of Kuwait.

''Just the fact nothing happened over the weekend, plus the fact Iraqi President Saddam Hussein made more peaceful statements, plus the possible approval by Congress of the release of 15 million barrels of crude from the Strategic Petroleum Reserve, is moving the market down,'' said Tom Bentz, trading director of United Energy Inc. in New York.

The downward move, however, was seen by Bentz as ''only a temporary correction in the market.''

Saddam said Sunday that Iraq would seek to open discussions with France on the basis of settlement terms French President Francois Mitterrand offered last week in a U.N. speech.

In Paris, however, the French government denied Saddam's assertion that Baghdad and Paris had established special contacts to discuss the crisis.

In his U.N. speech, Mitterrand had said all the issues brought up by Saddam, including demands for setting up a Palestinian homeland, could be discussed once Iraq withdrew from occupied Kuwait.

The official Iraqi News Agency Monday said that Saddam had ordered nine French hostages released and that they could ''leave Iraq together with a delegation of the French-Iraqi friendship society'' now in Baghdad.

Last week, the oil market only shrugged when Bush announced he would use the power of new legislation to release 5 million barrels of crude to test the nation's reserve.

Congress is now expected, however, to approve the release of 15 million barrels after Energy Secretary James Watkins testified Thursday that 5 million barrels was not sufficient to test the system.

Analysts have said such a release would be enough to affect prices on oil markets.

#90274u2119 10/01/1990 ~United Press International

(OCT. 1) UPI - The U-S Supreme Court agreed today to rule in a California case limiting the time a person can be detained by police without probable cause. At issue is whether the civil rights of a person arrested without a warrant are being violated because they are being detained without a ''prompt'' probable cause hearing. The case stemmed from a 1987 class- action suit filed by Donald Lee McLaughlin against Riverside County. .

In another action today, the high court decided NOT to intervene in a case blocking inter-racial adoption. At issue is whether state agencies may consider race as a factor in making adoption placement decisions without violating equal protection laws. The court rejected arguments by Lisa and Ronald Wilson, who contended that Kentucky's Cabinet for Human Resources rejected their request to adopt a child of mixed race because they are white.

A judicial inquiry opened in Scotland today into the 1988 terrorist bombing of Pan Am Flight 103. Air traffic controller Alan Topp testified that the last tragic seconds of Flight 103 were recorded as a blip on a radar screen that split into ''four or five'' pieces, then disappeared. The Boeing-747 was blown out of the sky while en route to New York from Frankfurt, West Germany. All 259 people aboard and 11 on the ground were killed.

-30- 1480
#90274u2124 10/01/1990 ~United Press International
(OCT. 1) UPI - Prosecutors in Santa Monica, California, today sought to delay the murder trial of actor Marlon Brando's son, Christian, saying they need more time to subpoena his half sister in Tahiti to testify against him. The trial is scheduled to begin next week. Deputy District Attorney Steven Barshop told reporters- quote- ''We need the additional time to get Cheyenne Brando to return to the U-S by all legal means.''

The man who commanded the U-S nuclear deterrent during the height of the Cold War is dead at the age of 83. A spokesman says Air Force General Curtis LeMay died this morning of cardiac arrest at the 22nd Strategic Hospital at California's March Air Force Base. LeMay was regarded as the father of the Strategic Air Command. He was at the helm of SAC when its nuclear-armed bombers were aloft around the clock in the 1950's and '60's. He also ran unsuccessfully for vice president on a ticket headed by Alabama Governor George Wallace in 1968.

#90274u2155 10/01/1990 ~United Press International
TILLAMOOK, Ore. (OCT. 1) UPI - U.S. and Canadian naval ships aided by the Coast Guard found more debris Monday but no sign of three missing crewmen from a U.S. Navy helicopter that crashed into the Pacific Ocean off the Oregon coast.

The SH-60B Lamps Mark III helicopter plummeted into the ocean about 30 miles west of Tillamook at 7:36 p.m. Sunday as it was making an emergency approach for a landing aboard its ship, the guided missile frigate USS Crommelin, Navy officials said.

Missing at sea were pilot Lt. Cmdr. Paul K. Miller, 36, a native of Elgin, Ill.; co-pilot Ens. Timothy E. Hanusin, 27, of Niagra Falls, N.Y.; and aviation anti-submarine warfare Operator 2nd Class William R. Nolte, 25, of Minneapolis. All three were San Diego-area residents, the Navy reported.

The helicopter was part of Light Helicopter Anti-Submarine Squadron 43, based at North Island Naval Air Station in San Diego, and was assigned to the Crommelin, based at Long Beach, Calif. They were taking part in a joint U.S.-Canadian anti-submarine warfare exercise.

The cause of the crash was under investigation, authorities said.

Low clouds hampered visibility as the search for the crew continued through the night. The effort involved four U.S. Navy ships, one Canadian Navy vessel and a Coast Guard helicopter, joined Monday by more Coast Guard units.

Some debris was found Sunday night and more Monday but no trace of the crew,

said Coast Guard Cmdr. Ron Larsen in Tillamook. Visibility was reported at just 200 feet in places and a mile in others overnight, he said.

''They are picking up quite a bit of debris,'' said Coast Guard Petty Officer Chris Buell. ''They will keep searching at least until dark.'' Intermittent storm fronts were moving through the area, Buell said.

#90274u2162 10/01/1990 ~United Press International

BUCHAREST, Romania (OCT. 1) UPI - Romanian students returned to universities in the capital Monday, but for many of them the burdens of academia will have to take a back seat to the more pressing problem of finding a place to live.

At least 10 percent of the city's 30,000 university students are virtually homeless because of a lack of dormitories and a critical shortage of other housing in the capital, government and university officials said.

The housing crunch is especially severe this year because of the opening of several new schools, including one that bills itself as the first ecological university in Europe.

Despite the official start of the fall term Monday, a university governing board has announced that classes would be postponed a week, until Oct. 7, partly because of the housing crisis.

Student unions are threatening to call a boycott of classes next week to protest the lack of adequate dorm space. The government, meanwhile, is anxious to avoid a resurgence of student unrest that sparked some of the worst crises since the overthrow of communist dictator Nicolae Ceausescu.

After leading the revolt against Ceausescu in December, students played a key role in a 7-week-long anti-government demonstration in Bucharest in the spring. Many students also were involved in two days of anti-government violence after police broke up the marathon protest June 13.

The police crackdown has caused some to be cynical about the government and skeptical of the value of further protests.

''Our dreams were broken in June,'' said Emil Tudor, 23, a languages student.

''We're tired. In the beginning we hoped things would change a lot. Now we're confused. Not much has changed,'' said a medical student, Ioana Draghici, 22.

-30- 1940

#90274u2169 10/01/1990 ~United Press International

DUMFRIES, SCOTLAND (OCT. 1) UPI - The last tragic seconds of Pan Am Flight

103 were recorded as a blip on a radar screen that split into ''four or five'' pieces, then disappeared, an air-traffic controller said Monday.

''I remember that period extremely well in terms of emotion,'' said Alan Topp. ''I was worried at the time. But I couldn't prove one thing or another.''

Topp testified on the first day of a Scottish judicial inquiry into the terrorist bombing nearly two years ago of the Boeing 747 en route from Frankfurt, West Germany, to New York after stopping in London.

The Fatal Accident Inquiry will not seek to determine criminal responsibility for the deaths of the 259 people who were aboard the plane and 11 people on the ground in Lockerbie, Scotland. That issue is being handled by police and various international agencies.

The panel will consider events leading up to the attack, including whether proper security precautions were carried out at London's Heathrow Airport.

The inquiry is being held at Easterbrook Hall on the grounds of Crichton Royal Hospital, Dumfries, 12 miles from where the plane fell to the ground in chunks of tangled metal.

Nine American attorneys, representing the relatives of some of the 188 U.S. citizens who were killed, were among the more than 45 lawyers present at the hearing.

Among the other attorneys were ones representing Pan American World Airways, the British Airport Authority, the Civil Aviation authority, the Department of Transport, Hull War Risks Insurance, which insured the aircraft, and George Esson, chief constable of Dumfries and Galloway, who is in charge of the separate criminal investigation.

Topp, a controller for 24 years, was on duty at the Scottish Air Traffic Control Center at Prestwick, on Dec. 21, 1988.

Just before 7 p.m., Topp said he knew Pan Am Flight 103 was coming into his air space - he had been warned 15 to 20 minutes earlier. The plane climbed to 31,000 feet just north of Manchester, then was handed over to him by another controller.

Topp said it was normal for a New York-bound aircraft to fly over south Scotland to take advantage of favorable winds across the Atlantic Ocean.

''When I first saw the aircraft on radar it was at 31,000 feet. I asked the captain to identify himself. There was nothing amiss. I gave him his routing which had already been defined by Oceanic Control.''

Topp said he watched the aircraft intently as there was other traffic in the

area.

''Suddenly, the response disappeared off the screen,'' he said. ''Instead, there were four or five contacts.''

The air-traffic controller said he thought the disintegration - at 7:03 p.m. - was an effect that could occur on a radar screen when an aircraft was flying directly above a radar station.

Topp said he tried several times to make voice contact with the aircraft without success. He also tried to make contact though a KLM aircraft in the area, but there was no response.

Topp said he called Galloway Radar, in the same building, and spoke to a controller, asking him, ''You see my clipper 103 in all that melee?''

A transcript of the conversation, produced in evidence, ended with Topp saying ''Oh dear!''

The last person to speak to the crew was Thomas Fraser, an air traffic services assistant. He called the aircraft to respond to a request for clearance. The flight's planning controller replied, '''Go ahead,' in a perfectly normal voice,'' Fraser testified.

Fraser then provided the clearance.

''At that point he would normally have come back to acknowledge and, of course he did not. It's not unusual for aircraft to have a radio blind spot. I tried three times and asked another aircraft to try. I then learned from another air traffic controller there was a problem.''

The court was shown a videotape of the flight's progress on the radar screen, appearing as a small square. A cross in the square disappeared, meaning the plane's transponder signal had stopped working. The original square then reappeared as four or five squares.

''The loss of the signal is a fairly common thing,'' said Topp. ''And primary responses can appear on the screen when there is nothing wrong. I was aware something was not going quite right but I wasn't aware of the disaster at this stage.

''I can remember I was extremely worried about the status of 103. I had my eyes on the tube all the time. ... I had never seen anything like this before. I now know the aircraft was separating.''

(OCT. 1) UPI - Falling oil prices, prospects for lower short term interest rates and speculation of a peaceful solution to the Middle East crisis sent stock prices surging Monday on most major global stock exchanges.

Analysts in New York said stocks climbed on key world markets shortly after President Bush denounced Iraqi president Saddam Hussein as an international outcast who plundered Kuwait.

But the President also offered Baghdad hope that relinquishing its grasp on its Persian Gulf neighbor could spur negotiations for Israeli withdrawal from land once held by the Arabs.

The president's speech to the United Nations General Assembly sent oil and gold prices lower and stocks higher, analysts said. However, stocks dropped on the world's largest stock exchange in Tokyo, reaching their lowest level in over 3 1/2 years.

Oil prices had risen almost 80 percent since the Iraq's Aug. 2 invasion of Kuwait.

Analysts also said world oil prices fell amid speculation the U.S. Congress will release more oil from the U.S. reserve.

Market watchers in New York said stocks also benefited from speculation of lower short term interest rates following Sunday's agreement by Bush and congressional leaders to trim $500 billion from the federal deficit over the next five years.

The plan fueled expectations in markets of lower interest rates, analysts said noting the deficit cut would theoretically lead to fewer borrowers in the marketplace, a factor that should lower short-term interest rates.

Dennis Jarrett, chief market strategist at Kidder, Peabody & Co. in New York said ''we're starting to see a little enthusiasm again ... certainly the market is suggesting in the short term that the pressure is to the upside.''

In New York, stocks closed broadly higher on the New York Stock Exchange and the American Stock Exchange. The Dow Jones industrial average, which gained 25.00 points Friday, surged 65.36 points to 2515.84.

In Europe, stocks closed sharply higher on the London International Stock Exchange, boosted largely by institutional investors purchasing blue-chip stocks.

The Financial Times 100-stock index, which fell 18.9 points Friday, surged 40.6 points to 2,030.8.

In Frankfurt, the closely watched German Stock Index, which tumbled 19.19

points Friday, closed up 85.84 points - or 6.43 percent - to 1, 420.73.

Traders in Frankfurt said stocks surged amid speculation Saddam may be looking for a peaceful way out of the gulf crisis.

In Stockholm, the Swedish Affarsvarlden General Index, which tumbled 15 percent last week, rebounded 47.3 points - or 5.2 percent - to 957.3.

In Paris, the CAC-40 Index climbed 3.29 percent.

Elsewhere in Europe, stocks climbed in Zurich, Amsterdam, Madrid, Milan and Brussels.

In Asia, stocks closed higher on the Hong Kong Stock Exchange. The Hang Seng Index climbed 30.44 points to 2,791.26.

In Bangkok, stocks closed higher on the Thailand Stock Exchange. The Stock Exchange of Thailand Index gained 12.83 points to 654.39.

Stocks also closed higher in Singapore, as bargain hunters pushed the Straits Times Industrial Index up 4.76 points to 1,103.44.

But stocks continued to nosedive in Tokyo as panic-stricken investors unloaded investments for the fifth consecutive session.

The Tokyo Stock Exchange's Nikkei Average, which plunged 788.41 points Friday, lost another 761.64 points, or 3.6 percent, to 20,221.86 points - its lowest close since Feb. 25, 1987.

Only a promise from Japan's Ministry of Finance to ease margin requirements - the deposit required to purchase stocks - saved the Nikkei from closing below 20,000 points, analysts said.

Stocks also fell sharply in the Philippines as prices on the Manila Stock Exchange fell to their lowest level in 3 1/2 years.

The Philippine Composite Price Index fell 11.05 points, or 2 percent, to 535.5 points - its lowest close since April 8, 1987.

#90274u2179 10/01/1990 ~United Press International

MEXICO CITY, Mexico (OCT. 1) UPI - A Cuban prisoner serving 30 years for arms theft, kidnapping and assault charges escaped from a hospital and took refuge in the Canadian Embassy in Havana, the official Cuban news agency said Monday.

In a dispatch monitored in Mexico City, Prensa Latina said Orlando Dominguez

was recovering from an operation at an orthopedic clinic near the embassy when he eluded security over the weekend and entered the diplomatic mission.

Prensa Latina said Dominguez had injected petroleum into his arm to feign illness, and that doctors had been forced to amputate the infected limb.

The agency said the Cuban foreign ministry was negotiating with Canadian officials and expected Dominguez to be turned over to Cuban authorities.

Dominguez had been in jail since 1983 after a death sentence for his part in the kidnapping of two American tourists was reduced to a 30-year prison term. The agency described his offenses as ''counterrevolutionary crimes.''

Prensa Latina said members of the group stole weapons from a shooting range and used them to kidnap the two tourists in central Cuba, demanding permission to leave the country. Dominguez shot and wounded one of the tourists when Cuban authorities rejected the group's demands.

#90274u2185 10/01/1990 ~United Press International

WASHINGTON (OCT. 1) UPI - The House, spurred by the memory of the bombing of Pan Am Flight 103, passed legislation Monday to reinforce the fight against airline terrorism with more security, intelligence activities and money.

''This bill is a monumental step forward'' in the U.S. fight against terrorism Rep. James Oberstar, D-Minn, told a nearly vacant House.

But a woman whose 21-year-old son was killed when the PanAm jumbo jet was blown out of the skies over Lockerbie, Scotland, pronounced the legislation little more than ''a start'' toward ensuring an end to terrorism aboard U.S. airliners.

The bill, passed on a voice vote without dissent, was sent to the Senate, where approval was expected.

The measure is an outgrowth of a presidential commission's findings in May that the Dec. 21, 1988, bombing of Flight 103 ''may well have been'' prevented had stricter security precautions been in effect at airports in Frankfurt, West Germany, where the flight originated, and London, where passengers changed to a bigger plane for the trans- Atlantic leg.

All 259 passengers and crew aboard the Boeing 747, many of them students returning home for Christmas, died when about a pound of Semtex plastic explosives hidden in a suitcase detonated. Another 11 people died on the ground.

The 747 exploded two weeks after the State Department warned of a terrorist

strike against a Pan Am flight from Frankfurt. The warning came six months after the U.S. cruiser Vincennes mistakenly shot down an Air Iran Airbus A-300 as it flew over the Persian Gulf, killing all 290 people abaord.

The Pan Am bomber has not been found.

The House bill adopts many of the commission's recommendations, authorizing $7 million for aviation anti-terrorism measures, seeking public notification of terrorist threats, bolstering anti-terrorism intelligence activities and providing monetary compensation to the victims of terrorism.

It does not authorize the death penalty for those who commit air terrorism, which prompted Rep. Porter Goss, D-Calif., to complain on the House floor that ''it's not fair to say this bill does everything it could do'' to prevent air terrorism.

An 11th hour compromise with the Bush administration over the naming of a new official to head up air security efforts helped the measure to passage.

Originally, the bill sought the creation of an assistant transportation secretary of security and intelligence to deal with all government intelligence agencies about terrorism.

But Transportation Secretary Samuel Skinner already had appointed retired Coast Guard Adm. Clyde Robbins as his director of security and intelligence with the same powers. Skinner opposed the bill's provision for an assistant secretary because, Obestar said, he viewed it ''as undermining his prerogatives as secretary.''

Rep. William Clinger Jr., R-Pa., worked out the compromise in which the directorship now held by Robbins will be made a permanent position that will report directly to the transportation secretary, officials said.

''It's only because of those changes that (Skinner) agreed'' to drop his opposition, an administration official said, speaking on condition of anonymity.

Kathleen Flynn of McLean, Va., and Rosemary Wolfe of Alexandria, Va., sat in the House visitors' gallery to watch the proceedings. They had tracked the bill from its inception. John Flynn, 21, and Miriam Wolfe, 20, were passengers on Pan Am 103.

''I don't think it does enough, but it's a start,'' Flynn said of the bill.

''One thing that's needed is public oversight,'' Wolfe said. ''The ideal would be to have one person in charge'' so that all of the information about terrorist threats and security systems would be centrally located.

Sixteen days before the flight, an anonymous caller to the U.S. Embassy in Helsinki warned that a Finnish woman would carry a bomb aboard a Pan Am plane flying from Frankurt to the United States.

The State Department distributed a bulletin to its embassies worldwide, but the information was posted publicly only in the Moscow embassy.

#90274u2236 10/01/1990 ~United Press International

WASHINGTON (OCT. 1) UPI - Nearly two months after Iraq invaded Kuwait and President Bush ordered American troops to Saudi Arabia, the House went on record Monday in support of the administration's actions so far in the Persian

Gulf.

By a 380-29 tally, with Democrats casting all the dissenting votes, the House approved a resolution applauding the deployment of troops in response to Iraqi aggression and urging the president to ''continue to emphasize the use of diplomatic and non-military means'' to resolve the crisis.

The resolution, like a similar one to be considered by the Senate Tuesday, reflects the desire of many in Congress to do something about the Persian Gulf crisis without doing too much - namely, authorizing future military action.

Congress has the power under the Constitution to declare war and it has the ability under the War Powers Act to force the president to bring troops home. In this case, the House opted to show its support but keep its options open.

''The legitimate question could be asked: 'What's next? What about tomorrow?' This resolution does not address that,'' said Rep. Dante Fascell, D-Fla., House Foreign Affairs Committee chairman.

''The purpose of the resolution is to show that the Congress has acted affirmatively,'' he said. ''The hottest places in hell are reserved for those who in times of crisis remain silent. Congress chooses not to remain silent.''

Fascell said Congress could have shown its support for Operation Desert Shield simply by continuing to finance it, but that the responsible course was to also join with the president in taking responsiblity for the deployment.

''There was a time when I was concerned that Congress would be the only institution in the world outside of the governments of Libya and Cuba that would fail to support the president's policies in the gulf,'' said Rep. William Broomfield, R-Mich., ranking Republican on the Foreign Affairs Committee.

But Rep. Peter DeFazio, D-Ore., maintained that it would be irresponsible for Congress to adopt the resolution, saying, ''I oppose it not so much for what it says, but for what it doesn't say.''

What it does not say is that hostilities in the gulf are ''imminent,'' a situation that would trigger provisions in the War Powers Act under which Congress can act to continue or to end a deployment of troops.

Bush also said hostilities were not imminent in his Aug. 9 letter to Congress informing it that he was sending troops, and DeFazio accused his colleagues of joining with the White House in deceiving the American people.

''Go home and ask your constituents. They believe hostilities are imminent. Only here in the halls of Congress and down the street at the White House do we try and ignore the reality of the Persian Gulf confrontation,'' he said.

Criticism of administration policies in the Middle East also was voiced by members who supported the resolution.

''This is one member of Congress that is not voting for a long-term commitment of our ground forces in that region,'' said Rep. Marcy Kaptur, D-Ohio.

Rep. Mel Levine, D-Calif., who has faulted plans for weapons sales to Saudi Arabia, said, ''We would be remiss if we did not question the lenses through which this administration has viewed the Mideast.''

#90274u2247 10/01/1990 ~United Press International

(OCT. 1) UPI - President Bush says after discussing the Persian Gulf crisis with foreign leaders, he's ''a little encouraged'' that the isolation of Iraq is ''having a strong effect.'' He says that would, for the time being, make military action UNnecessary. Earlier in a speech to the U-N General Assembly, Bush said there may be political and economic ''opportunities'' for Iraq if it withdraws from Kuwait. But he denied any intent to signal ''flexibility or shift'' in U-S policy.

The House today began debating a resolution supporting the administration's actions so far in the Persian Gulf. The measure applauds the deployment of U-S troops in response to Iraqi aggression and urges President Bush to ''continue to emphasize the use of diplomatic and non-military means'' to end the crisis. The Senate will begin consideration of a similar resolution tomorrow.

Israel says it will distribute gas masks to all of its citizens as a ''precautionary measure'' in light of the situation in the Persian Gulf. Officials deny that the move was a result of Saddam Hussein's recent threats to wipe ot half of Israel with chemical weapons. Defense officials said there's NO indication that a chemical weapons attack is imminent.

A 30 Million dollar Delta 2 rocket thundered toward space today from Cape Canaveral. The rocket will boost a 65 Million dollar military navigation satellite into orbit, the ninth in a global network that is proving especially useful in the Persian Gulf. The flight was grounded on Friday and Saturday by bad weather. The launch came 25 minutes late because of an airplane in the launch zone and because of trouble with a radio transmitter on the ground.

#90274u2254 10/01/1990 ~United Press International

WASHINGTON (OCT. 1) UPI - The Supreme Court agreed Monday to decide whether nude barroom-style dancing is a form of ''speech'' protected by the First Amendment.

The court agreed to hear an Indiana case that originated when a number of dancers and nightclubs where they worked sued the city of South Bend and state officials after dancers were arrested for violating the state's public indency law.

The dancers claimed the law requiring them to wear ''pasties'' and ''G-strings'' while dancing violated their constitutional right to freedom of speech.

In 1985, a district court ruled in favor of the dancers, saying the law was too broad, but a federal appeals court reversed that decision.

On rehearing, the lower court then held the law did not violate the First Amendment.

But the 7th U.S. Circuit Court of Appeals last year ruled that all

non-obscene nude dancing performed for entertainment is ''expression'' protected by the First Amendment.

Local and state officials in Indiana asked the high court to uphold its interpretation of state law.

Arizona, Connecticut, Missouri, North Carolina and Pennsylvania all have similar ''public indecency'' statutes and urged the high court to accept the case to help clarify how the laws can be enforced.

#90274u2256 10/01/1990 ~United Press International
(OCT. 1) UPI - Reaction was swift and angry today from senior citizens groups to the new budget reduction package proposed by White House and congressional negotiators. They charged that President Bush and Congress have ''declared budget war on the elderly'' by proposing the largest-ever increases in Medicare patient payments. And they promise retribution on Election Day.

The four World War Two allies NO longer have occupation rights in Germany. Secretary of State Baker joined his counter-parts from Britain, France and the Soviet Union today in a brief United Nations ceremony to sign a declaration giving up their nation's occupation rights. The foreign ministers of East and West Germany witnessed the signing that makes Germany a sovereign nation upon re-unification Wednesday.

MINNETONKA, Minn. (OCT. 1) UPI - A group led by Malcom I. Glazer filed documents with the Securities and Exchange Commission Monday saying it holds an 8.6 percent stake in Tonka Corp. and may seek controlling interest.

The group's 13-D filing with the SEC also said it might seek a seat on the Tonka Corp. board.

Joseph M. Joyce, the company's general counsel, declined comment on the filing but said Tonka Corp. has one other shareholder with a stake of more than 10 percent.

Joyce said the toy company has a shareholder rights plan that could deter a hostile takeover attempt.

#90274u2314 10/01/1990 ~United Press International

NEW YORK (OCT. 2) UPI - Dividend increases are expected to drop more than 20 percent this year as a result of to the risk of recession, interest costs and tougher borrowing conditions, Standard & Poor's Corp. said Monday.

S&P projected only 1,300 dividend increases will be reported by the end of 1990, compared with 1,656 increases registered last year.

This year's projected increases are the smallest number of hikes since 1971, when the Nixon administration proposed corporations implement a voluntary dividend freeze, S&P said.

At the same time, dividend cuts and omissions will reach their highest levels since 1982, according to the S&P forecast.

S&P blamed the drop in dividend increases on the growing risk of recession, hugh interest costs corporations assumed in leveraged buyouts and tough borrowing conditions.

''The corporate profit trough continues to be pushed back,'' said Arnold Kaufman, editor of the S&P Outlook investment advisory newsletter.

''We're now estimating earnings will not bottom out until the second quarter of 1991,'' Kaufman said. ''Given the considerable corporate financial leveraging of the past several years and the corresponding jump in debt-service charges to achieve the highest level of available cash flow in modern history, the current dividend frugality is hardly surprising.''

Current market conditions do not indicate much more generous dividend actions next year either, he added.

For the first three quarters of 1990, the total number of dividend increases

was 960, down from 1,236 for the first nine months of 1989.

Total favorable actions, including extra, increased and resumed dividends, dropped to 1,193 from 1,585, while negative actions, which represent decreased or omitted dividends, rose to 278 from 164 in the same period.

Companies reporting their dividned actions to S&P comprise a substantial number of the public companies in the U.S., including all stock exchange-listed companies, according to the debt-rating agency.

STRATFORD, Conn. (OCT. 1) UPI - Textron Inc. said a subsidiary won a $1 billion contract extension for U.S. Army tank engines.

The work is for ''gas turbine engine equivalents'' used in the Army's M1 tanks and for foreign sales, the company said.

Spokesman Louis P. Savenelli said the company hopes the contract will enable it to maintain employment at Textron Lycoming's Stratford plant at the current level of slightly more than 4,100.

#90274u2399 10/01/1990 ~United Press International

ANAHEIM, Calif. (OCT. 1) UPI - Walt Disney Co., planning to open its second West Coast theme park later this decade, said Monday it has shaken up the management of Disneyland by creating two new positions for veteran executives.

''We are making these shifts because of the major expansion coming to this region,'' said Disneyland spokesman Bob Roth. Disney is planning to open either an acquatic-themed park in Long Beach next to the Queen Mary and Spruce Goose or an EPCOT-style ''gateway'' to Disneyland at Anaheim.

The new post of president of Disneyland will be filled by Jack Lindquist, who has been an executive vice presidents with Walt Disney Attractions, which operates both Disneyland and Walt Disney World in Florida. In his new post, Lindquist will be responsible for all West Coast Disney attractions.

Ron Dominguez, who has been executive vice president of Disneyland, will become executvie vice President, Walt Disney Attractions/West Coast.

Both Lindquist and Dominguez have worked for the company since 1955, the year it opened Disneyland.

Norm Doerges, a 23-year Disney veteran who has been vice president at EPCOT, was named to Dominguez' former post.

The appointments were announced by Dick Nunis, who continues as president of Walt Disney Attractions.

#90274u2413 10/01/1990 ~United Press International

(OCT. 1) UPI - Wall Street economists reacted coolly to the 500-BILLION-dollar deficit reduction deal struck by White House and congressional negotiators. They faulted the relatively small size of reductions... 40- BILLION dollars... to be effected in fiscal 1991, which began today. They question whether Congress will be able to meet its schedule for deeper cuts in later years. But they concede it's a positive prescription for ailing U-S financial markets.

Iraq's ambassador to the United Nations was predictably negative on President Bush's speech today to the U-N General Assembly. Ambassador Abdul Al-Anbari looked UNperturbed as the world body applauded Bush's call for Iraq's UNconditional pullout from Kuwait. Bush talked of a peaceful outcome to the Persian Gulf crisis, saying there are ''opportunities'' for Iraq to end its occupation. But the Iraqi ambassador said- ''We disagreed on everything he said.''

After three tries, the Air Force finally got its 30-Million-dollar Deltafoot rocket streaked toward space this evening... boosting a 65-Million-dollar military navigation satellite into orbit. The launch, which was postponed twice, was 25 minutes late because of an airplane in the launch zone and because of trouble with a radio transmitter on the ground.

Government researchers say an experimental treatment involving bone marrow transplants failed to help 16 AIDS victims who took part in the study. Each of the men received the transplants from their identical twin brothers. Previous reports had indicated a similar treatment may be encouraging, but the latest study showed NO long-term benefits. But the researchers say variations of the treatment may produce better results.

-30- 1875

#90274u2416 10/01/1990 ~United Press International

(OCT. 1) UPI - 22-year-old Charles Stressler went on trial today in Brooklyn, New York, on murder and manslaughter charges in the racial killing of a black teen-ager in the predominately white neighborhood of Bensonhurst. Prosecutor Douglas Nadjari charged in opening statements that Stressler turned a group of white youths into an armed mob when he passed out baseball bats to them in the summer of 1989. The mob attacked 16-year- old Yusuf Hawkins and three friends... shooting Hawkins to death in the melee.

The western portion of Sudan today received the first of several daily

emergency relief flights for an estimated 50-thousand starving refugees. But agencies now warn that famine is threatening all of the African nation's 23-Million people. The relief efforts begun today will send about 18-hundred metric tons of food, seeds, agriculture tools and fuel. Years of civil war and drought have combined to cause the famine.

#90274u2460 10/01/1990 ~United Press International

CAIRO, Egypt (OCT. 1) UPI - Saudi Arabian Oil Minister Hisham Nazer officially confirmed for the first time Monday that his country was pumping an extra 2 million barrels of crude a day to make up for a shortfall on world markets caused by sanctions on Iraq and Kuwait, Riyadh Radio said.

The state-run radio quoted Nazer as saying the oil-rich kingdom increased production after Iraq's Aug. 2 invasion of Kuwait to 6.3 million barrels a day from its OPEC-decreed quota of 4.3 million barrels a day.

But Nazer said the world market still needed an extra 2.5 million barrels a day to meet its crude requirements, adding that about 2 million barrels a day from the strategic reserves of industrialized nations were also being used to make up for the Iraqi and Kuwaiti shortfall.

''The world's consumption of oil is estimated at 54.5 million barrels a day,'' Radio Riyadh, monitored in Cairo, quoted Nazer as saying. ''What is produced now is 52 million barrels, and the shortfall is probably being met by strategic reserves.''

Nazer made the comments during a Saudi Cabinet meeting chaired by King Fahd.

Nazer also warned in his comments to the Cabinet that further hikes in oil prices would have dire consequences on industrialized and developing nations alike.

''If prices continue to go up, this will have bad consequences for both industrialized and developing nations,'' Nazer said.

Saudi newspapers said soaring oil prices were not in the interests of oil-producing nations because they fueled inflation, weakened the dollar - the currency in which oil is traded around the world - and sparked recessions, which in turn decreased demand for crude and lowered long- term revenue prospects.

Kuwait before the Iraqi invasion sided for the most part with Saudi Arabia on its policy of ''trying to achieve a balance between oil production and oil prices.''

But while Kuwait and the United Arab Emirates also spearheaded campaigns for

increased production within OPEC even if this meant lower prices, countries such as Iraq, Libya and Iran have sought higher oil prices whatever the long-term consequences for the world economy.

''The Saudi idea was and to an extent still is that a world recession should be avoided because it harmed Saudi Arabia as well as industrialized nations,'' said Peter G. Tikejarian, a Gulf-based oil industry executive.

Tikejarian said Iran, Iraq and Libya were keen however to secure the highest possible prices, ''whatever the consequences to the world economy ... this is because their economies are in such bad shape that they need the cash now, and tomorrow is another problem.

#90274u2488 10/01/1990 ~United Press International

LOS ANGELES (OCT. 1) UPI - CalMat Co. said Monday it has sold its California Portland Cement Co. operation to Onoda Cement Co. Ltd. of Japan in exchange for $316 million of CalMat stock that Onoda bought two years ago.

The deal incoludes two Southern California cement manufacturing plants in Colton and Mojave and one in Rillito, Ariz., three cement transfer terminals, 13 ready-mixed concrete batch plants and a half interest in a cement import terminal in Los Angeles harbor. The company employs about 1,000 workers.

The three plants have an annual capacity of 2.75 million tons. The Colton plant, which opened in 1893, is the oldest cement plant west of the Mississippi River.

The deal had been expected. Onoda, one of the largest cement manufacturers in Japan, acquired a 19 percent stake of CalMat stock in August 1988, along with an option to exchange the stake for California Portland Cement Co. after Sept. 1, 1990.

Ronald E. Evans, a 29-year veteran of the company, was named president of California Portland Cement.

CalMat, which has annual revenues of more than $650 million, said it will continue as one of the major suppliers of sand, gravel, asphalt and ready-mixed concrete.

#90274u2614 10/01/1990 ~United Press International

(OCT. 1) UPI - President Bush appeared to soften his rhetoric toward Iraq today during a speech to the United Nations... saying that withdrawal from Kuwait could lead to new ''opportunities'' for Iraq. But Bush insists the United States is NOT changing its position.

The House today went on record as supporting the president's order to send U-S troops to Saudi Arabia. By a vote of 380-29, lawmakers overwhelmingly approved a resolution applauding the response to Iraqi aggression in the Persian Gulf.

Conservative House Republicans are turning their backs on a 500-BILLION-dollar deficit reduction deal struck between President Bush and congressional leaders. But Senate Republicans predict that the plan will pass.

Diplomats meeting in New York today say the United States and Soviet Union have cleared a final major hurdle to an agreement on slashing military forces in Europe. The superpowers resolved a dispute over the types and numbers of aircraft that could be based in Central Europe.

The latest term of the Supreme Court got under way today with the justices deciding which cases they'll hear. The court will tackle a civil rights issue... deciding if civil rights laws cover U-S companies and workers overseas.

Radio and hospital reports out of Lebanon say 25 people were killed today when troops opened fire on thousands of people protesting a four- day siege around the enclave of rebel Christian General Michel Aoun . 82 others were wounded in the violence.

Poland's president today signed into law measures that will put him out of office. President Wojciech Jaruzelski inked a bill providing for a new presidential election... expected to be held November 25th.

-30- 1864

#90274u2615 10/01/1990 ~United Press International

(OCT. 1) UPI - Seven decades of state atheism ended today in the Soviet Union. Members of the Supreme Soviet approved a broad-based religious bill that gives churches in the communist nation the right to establish their own schools and engage in charity work.

The House today took steps to protect against terrorist attacks such as the bombing of Pan Am Flight 103. Lawmakers passed legislation to provide more security, intelligence activities and money to the fight against airline terrorism.

An aviation magazine says the Air Force may be testing advanced super-speed aircraft at remote flight centers in the southwest. The report says the jets may be prototypes for the next generation of attack aircraft.

Doctors at Baltimore's Johns Hopkins Hospital report that the first leukemia patient to undergo an experimental umbilical cord blood transplant is doing well. They say there's a chance that the therapy could some day prove useful

for cancer, AIDS and other diseases.

A stockbroker, a sports agent and a former professional soccer player were indicted today in New York for a phony investment scheme that cheated several professional athletes out of a half-Million dollars. Each man could face up to 10 years in prison.

About 60 wheelchair-bound demonstrators occupied Morehouse College's president's office today to demand that school officials set up a meeting with Health Secretary Louis Sullivan. Sullivan is a former president of the Morehouse School of Medicine.

-30- 1656
#90274u2733 10/01/1990 ~United Press International
(OCT. 1) UPI - Tax policy experts say the burden of the new budget deal will fall harder on low- and middle-income Americans. Robert McIntyre, director of Citizens for Tax Justice, says the poorest Americans would pay the largest percentage of their income as a result of the new excise taxes... which he says ''pretty much leave the rich alone.'' The budget plan calls for tax increases on gasoline, cigarettes, beer, wine and liquor and on luxury purchases such as high-priced cars, boats, jewelry and furs.

Diplomats say the superpowers have resolved the last major obstacle holding up agreement on military force cuts in Europe. The United States and Soviet Union had been at odds over types and numbers of aircraft that could be based in Central Europe. The breakthrough clears the way for a European summit in Paris next month. The diplomats say an announcement could come Wednesday after Secretary of State Baker meets with his Soviet counterpart.

Lebanese radio and hospital reports say 25 people were killed and 82 others wounded today when troops opened fire on thousands of demonstrators protesting a four-day siege around renegade General Michel Aoun's enclave. A Western cameraman told U-P-I that one Beirut hospital was packed with victims, including wounded girls. The Lebanese Radio station said the attack was carried out by troops loyal to Samir Geagea and pro-Syrian President Elias Hrawi.

Doctors say Johns Hopkins Hospital in Baltimore reports encouraging results from an experimental transplant on a leukemia patient using blood from the umbilical cord. Doctors say four-year-old Michael Sancilio is doing well after receiving about six tablespoons of umbilical cord blood collected from his baby sister at birth. The boy suffered from a rare, deadly form of leukemia. The results indicate the therapy may someday prove useful for cancer, AIDS and other diseases.

Members of East and West Germany's conservative Christian Democratic Union today formally merged into a single dominant political party. West German

Chancellor Helmut Kohl told Christian Democrats gathered in Hamburg, West Germany, that the party is poised for victory in the December 2nd all-German elections. Voter opinion polls support Kohl's claim.

#90275b0021 10/02/1990 ~Business Wire

PLEASANTON, CA (OCT. 2) BUSINESS WIRE - Endosonics Corp. announced Tuesday that it has received permission from the U.S. Food and Drug Administration to begin marketing its combined ultrasound-angioplasty catheter for the treatment of atherosclerosis of the legs.

This new catheter will be called the HORIZON PTA balloon dilatation catheter.

The HORIZON catheter combines Endosonics' patented ''Computed Intraluminal Sonography'' technology and a ballon angioplasty device on the same catheter. The balloon device at the tip of the catheter is used to open blockages within the leg arteries.

The Cathscanner miniaturized integrated circuitry, also positioned at the catheter tip, communicates with the Cathscanner System electronics outside the patient. The Cathscanner System then produces an image of the inside of the artery on a television monitor.

This computerized image can provide the physician with information about the success of the balloon angioplasty treatment not available with current balloon angioplasty products. Endosonics is the first firm to combine these diagnostic and therapeutic technologies in a marketable device.

Balloon angioplasty (percutaneous transluminal angioplasty-PTA) is a non-surgical alternative to leg bypass surgery. As a treatment for atherosclerosis, balloon angioplasty products have become one of the fastest growing segments of the medical device industry. On a worldwide basis, over 400,000 balloon angioplasty procedures are performed each year in the legs and the heart.

The worldwide dollar market for balloon angioplasty catheters and accessory products is currently estimated to be $750 million. Approximately 25 percent of this market is in the treatment of peripheral leg vascular disease.

The HORIZON PTA catheters will be marketed on a limited basis in the United States and foreign countries in January 1991. The ORACLE PTCA catheters will be marketed in foreign countries in early 1991, with U.S. marketing scheduled to begin in 1992.

Endosonics is a privately held company with facilities in Rancho Cordova and Pleasanton, Calif.

SAN DIEGO (OCT. 2) BUSINESS WIRE - Kyocera International Inc. Tuesday announced the consolidation of its electronic equipment operations.

Kyocera Electronics Inc. and Kyocera Unison Inc. have merged as a result of the consolidation, which was enacted to unify marketing and customer service capabilities.

The merged operation will continue under the name Kyocera Electronics Inc., with headquarters in Somerset, N.J.

Kyocera Electronics' line of computer peripheral products and communications equipment now encompasses its own brand of laser printers, 3.5-inch hard disk drives and optical scanners, the Unison World line of PC software applications and communications equipment and laptop computers sold on an OEM basis.

Mike Okuno will continue in his capacity as president of Kyocera Electronics. Hong Lu, formerly president of Kyocera Unison, will serve as vice president/Unison World Software and will continue to manage the software division in Alameda, Calif. Gerald Rittenbery, formerly vice president of Kyocera Unison, will serve as vice president/Computer Peripheral division of the merged operation.

''The objective of this merger is to enhance service to customers both now and into the future,'' Okuno said.

Kyocera Electronics Inc. is a member company of the Kyocera Group. Kyocera is a diversified global producer of technical ceramic materials, components, electronic equipment and network services.

SEATTLE (OCT. 2) BUSINESS WIRE - Alaska Airlines, a subsidiary of Alaska Air Group Inc. (NYSE, PSE: ALK), reported Tuesday that its September traffic increased 9 percent to 365.2 million revenue passenger miles (RPMs) from the 335.2 million flown a year earlier.

The passenger load factor (the percentage of available seats occupied by fare paying passengers) for the month was 55.7 percent, down from 56.3 percent in

September 1989.

Capacity during September was 655.5 million available seat miles (ASMs), 10 percent above the 595.7 million in September 1989. The airline carried 451,100 passengers in September, compared to 416,700 in September 1989.

For the nine months ended September 1990, revenue passenger miles totaled 3.403 billion, a 12 percent increase from the 3.027 billion recorded a year earlier. The passenger load factor for the nine months ended September 1990 was 54.2 percent, down from 55.8 percent for the prior year.

Capacity for the nine months ended September 1990 increased 16 percent to 6.280 billion, up from 5.428 billion in 1989. The airline carried 4,119,000 passengers, compared to 3,755,000 in 1989.

WASHINGTON (OCT. 2) BUSINESS WIRE - US Sprint Tuesday announced that it has received a five-year, $35 million agreement to provide public pay phone service for the General Services Administration's (GSA) 3,500 pay telephones nationwide.

US Sprint will serve as an integrator for the GSA by managing every aspect of the pay phone service, including local and long distance services, access and pay phone maintenance.

US Sprint will work through subcontractors to negotiate and manage local telephone services with the more than 45 regional Bell operating companies and local telephone companies that support the pay phones nationwide. US Sprint's role as the only point of contact for the GSA will reduce the administrative support needed for separate contracting arrangements with multiple vendors.

Through US Sprint's pay telephone service, PublicFON, GSA pay telephone users will receive comprehensive operator services, international service and the quality of the US Sprint all-fiber optic network. Additionally, PublicFON service can provide GSA with highly competitive commission rates, prompt monthly payment, customized account detail reports and dedicated customer support.

US Sprint expects to complete the transition of the GSA pay telephone system within 30 days.

US Sprint is a unit of United Telecommunications Inc., a diversified

international telecommunications company headquartered in Kansas City, Mo.

#90275b0044 10/02/1990 ~Business Wire

CANTON, MA (OCT. 2) BUSINESS WIRE - Corporate Software Tuesday announced that Steve Moore has been named vice president of the company's European operations.

Moore, previously managing director of Corporate Software's U.K. subsidiary International Software Ltd. (ISL), replaces David Skok who resigned in order to pursue new business opportunities.

''Steve has done an outstanding job of managing business in the U.K. and is one of the reasons why ISL continues to be a leading reseller in the U.K.,'' said Mort Rosenthal, the company's chairman, president and chief executive officer. ''We look forward to the added contributions he will make to our operations in France and Germany.''

Moore has extensive knowledge of the information technology industry and has more than 18 years of experience in software and hardware distribution, field sales and sales management.

Prior to joining ISL in April, Moore was managing director of Softsel Computer Products Ltd., the leading retail distributor of software and hardware products in the U.K. During his two years at Softsel, Moore helped the company rebound from problems that adversely affected profitability, to post substantial year-over-year revenue and profitability gains by the end of 1989.

Moore was also responsible for investigating new market opportunities in the Scandinavian and Benelux countries.

Corporate Software sells and supports more than 1,000 software products and hardware add-ins for IBM, IBM-compatible and Apple Macintosh personal computers. The company provides a comprehensive array of services to assist large organizations in the evaluation, acquisition, support, and maintenance of personal computer products in the management of end user computing resources. Founded in 1983, Corporate Software has operations in the U.S., Canada, the United Kingdom, West Germany, and France.

WASHINGTON (OCT. 2) BUSINESS WIRE - US Sprint Tuesday announced the appointment of Eric F. Santiago to the position of general manager for telecommunications services, Puerto Rico and the Caribbean, for its global telecommunications and private networks subsidiary, Sprint International.

Santiago joins US Sprint from AT&T, where he has represented the Puerto Rico/Caribbean region since 1987. Before AT&T, Santiago spent thirteen years in the Caribbean in a number of consumer and business marketing and sales positions for All America Cables and Radio, Inc., an ITT subsidiary.

''We view the addition of Eric Santiago to our staff as a real asset to US Sprint's marketing efforts in the Caribbean,'' said John Cahill, Sprint International regional vice president for the Americas. ''We are confident that Santiago's telecommunications experience will complement our International objectives.''

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

SAN FRANCISCO (OCT. 2) BUSINESS WIRE - Microsoft Corp. Tuesday announced the Microsoft Windows Supplemental Driver Library (SDL), a collection of device drivers for printers, video displays, pointing devices and other hardware peripherals that run under the Windows graphical environment version 3.0.

Included in the SDL are LaserJet Series II and III printer drivers that offer dramatically improved printing performance from Windows version 3.0; support for the LaserJet Series 3D; support for more than 12 additional PostScript printer models; improved display support including several Super VGA devices; and support for the Canon Bubble-Jet printers including the laptop model.

The SDL is the first in a series of periodic releases of additional Windows device drivers. While most popular peripheral devices are supported by Windows version 3.0 itself, the SDL gives users compatibility with an even wider range of peripherals. Device drivers included in the SDL were developed by independent hardware vendors (IHVs), then tested and certified by Microsoft. They are the first third-party device drivers for Windows to be certified by Microsoft.

Future versions of the Windows environment will continue to include the most commonly used drivers, while future releases of the SDL will make available

remaining Microsoft-certified drivers. As new device drivers are developed, Microsoft will employ the SDL to make them available to Windows users.

The SDL has a broad distribution scheme to give users fast, easy access to the drivers they require. Moreover, the SDL disks can be freely copied and distributed among licensed Windows users within a company. Customers can download the SDL from online services such as Microsoft OnLine, CompuServe and GEnie at no charge. Device manufacturers may also provide specific drivers free of charge. Windows OEMs will receive the SDL from Microsoft for redistribution. Optionally, customers can order the SDL from Microsoft directly by calling 800/426-9400; there is a nominal $20 charge to cover the cost of the four 5.25-inch disks or seven 3.5-inch disks the SDL is distributed on. The SDL will be available Oct. 15, 1991.

Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems, network products, languages and application programs, as well as books, CD ROM products and hardware for the microcomputer marketplace.

HUNTINGTON BEACH, CA (OCT. 2) BUSINESS WIRE - Wes Baumgardner, chairman of Standard Logic Inc. (''SLI'')(NASDAQ: STDL) and Larry Dingus, chairman of TouchStone Software Corp. announced Tuesday a preliminary agreement under which the two companies agreed to a form of business combination.

The combination would be effected through the issuance of SLI common stock in a tax-free exchange for all the issued and outstanding common shares of TouchStone.

Upon the successful completion of the merger, the shareholders of TouchStone would become the majority shareholders of SLI. Immediately thereafter the combined company would change its name to TouchStone Software Corp. with its principal business the development and marketing of computer software utility products.

As a further component of the combination, a group comprised of SLI management may be required to purchase certain of the assets and operations of SLI at fair market value leaving the resultant company exclusively a computer software publisher.

The completion of the merger is subject to, among other things, the final approval of both boards of directors, signing of a definitive merger agreement filing of a registration statement with the appropriate government agencies and stockholder approval.

TouchStone Software designs, develops and markets a line of computer software programs used for troubleshooting hardware and software problems on IBM-compatible PCs. The company's bestselling program, CheckIt, is featured by major software retailers in the United States and was recently introduced in Europe. The company also markets a series of programs which facilitate communication and compatibility between different types of computers.

Standard Logic is engaged principally in providing products and services to the electronic packaging industry. The company's electronic products include integrated circuit packaging systems, logic panels, back planes, contract engineering and manufacturing. In addition the company provides software and wire-wrapping services for its in-house products and to numerous commercial and military customers.

For further information on either company, they may be contacted at their respective offices.

TouchStone Software Corp., 2130 Main St., Suite 250, Huntington Beach, Calif. 92648.

NEW YORK (OCT. 2) BUSINESS WIRE - American International Petroleum Corp. (NASDAQ:AIPN) announced Tuesday that it has been awarded a contract by Empresa Colombiana De Petroleos (Ecopetrol), the Colombian National Oil Co. for petroleum exploration, of 180,000 acres in the Middle Magdelena Valley of Colombia, South America, known as the ''Viani Area.''

This new contract area borders the northeastern quadrant of the company's existing Puli concession.

The Viani Area contract provides for an initial exploration period of 6 years which can be extended for an additional 22 years pending the discovery of a commercial field.

The company has committed to post a letter of credit for $500,000 and to meet certain minimum seismic and drilling requirements in order to obtain the

contract, including drilling at least two wells during the first two years of the agreement.

The company was selected from among a number of oil companies that applied for the concession.

American International Petroleum Corp. is engaged in refining, oil and natural gas exploration, production, transportation, and marketing activities in Louisiana and Kentucky, as well as Colombia.

SEATTLE (OCT. 2) BUSINESS WIRE - Horizon Air, a subsidiary of Alaska Air Group Inc. (NYSE, PSE), reported Tuesday that its September traffic increased 14 percent to 30.6 million revenue passenger miles (RPMs) from the 26.8 million flown a year earlier.

The passenger load factor (the percentage of available seats occupied by fare paying passengers) for the month was 50.2 percent, compared to 52.4 percent in September 1989.

The airline carried 157,192 passengers in September, a 15 percent increase from the 136,981 carried in September 1989. Capacity during the month was 61.0 million available seat miles (ASMs), compared to 51.1 million in September 1989.

For the nine months ended Sept. 30, 1990, revenue passenger miles totaled 265.5 million, a 14 percent increase from the 233.7 million recorded a year earlier. The passenger load factor for the nine months ended Sept. 30, 1990, was 49.6 percent, down from 52.5 percent for 1989.

Capacity (ASMs) for the nine months ended Sept. 30, 1990, increased 20 percent to 535.0 million, up from 445.0 million flown in 1989. The airline carried 1,350,608 passengers through September 1990, up 15 percent from the 1,176,974 in 1989.

Horizon serves 34 cities in five states and Canada.

PALO ALTO, CA (OCT. 2) BUSINESS WIRE - For the first time, business teams can use the power of Xerox Corp.'s workgroup computing applications on UNIX, OS/2 and DOS industry-standard desktop computers.

This capability is now available with the new Xerox GlobalView network computing environment, the company announced Tuesday.

The Xerox announcement, made at the Xerox Palo Alto Research Center (PARC), includes the introduction of two major hardware products and one workgroup software package: the Xerox 6520 workstation, based on SPARC/UNIX technology from Sun Microsystems Inc.;

GlobalView-for-the-PC, a coprocessor board that turns DOS and OS/2 personal computers into multitasking, networked workstations; and a sophisticated new workgroup software product called DocuTeam, which represents one of the first network-based products designed to integrate individual users into productive business teams.

The two new hardware products, part of a strategic move by Xerox to make its workgroup software usable on industry standard desktop computers, have the potential to link over 30 million installed desktop computers into enterprise-wide environments.

Xerox GlobalView is a networked desktop environment that integrates functions previously available only as isolated features. The purpose of GlobalView is to improve white-collar productivity by making computers easy to use and interconnected so that individuals in the same office or in locations around the world can work together.

GlobalView is specifically designed to help business teams collaborate across computer networks, providing the foundation for a broad range of applications including integrating text, graphics and data into compound ducuments; managing projects and teamwork; accessing and sharing documents across networks; and supporting enterprise-wide communications.

Applications built upon GlobalView also support more than 100 foreign languages and dialects, rich graphics capabilities and trasparent access to corporate data on host or departmental computers.

Through the Xerox icon-based graphical user interface (GUI), GlobalView makes it easy for non-technical professionals to perform complex tasks that would normally require the expertise of a management information systems (MIS) professional. Applications running under GlobalView share the same consistent GUI, and users benefit from the high degree of integration that it provides.

SAN MATEO, Calif. (OCT. 2) BUSINESS WIRE - Franklin Multi-Income Trust (NYSE:FMI) and Franklin Resources Inc. (NYSE:BEN) announced Tuesday that Franklin Resources presently intends to purchase, from time-to-time in open market or privately negotiated transactions, shares of beneficial interest of Franklin Multi-Income Trust, a diversified, closed-end registered investment company.

FMI invests primarily in high yielding, fixed-income corporate securities as well as dividend-paying stocks of public utility companies.

An affiliate of Franklin Resources, Franklin Advisers Inc., acts as the investment manager to the Fund.

Franklin's purchases will be for investment purposes. Depending on market and business conditions and other factors, however, Franklin may acquire a significant equity position in FMI, may seek to acquire control of FMI through acquisition of a majority interest of shares or otherwise, or may dispose of all or a portion of the shares it acquires.

Franklin Resources' primary business is the 56-member Franklin Group of Funds with approximately $44 billion in assets owned by over 1.7 million shareholders nationwide. The company is headquartered at 777 Mariners Island Blvd., San Mateo, CA 94404.

SAN FRANCISCO (OCT. 2) BUSINESS WIRE - Nikkei Business Publications Inc. and Macworld Communications/Japan Tuesday announced a partnership to publish the first magazine for professional and business Macintosh users in Japan.

Called Nikkei-Macworld Japan, the publication targets a Macintosh market that

Apple Computer projects will top $1 billion by 1994.

The premiere issue, to be published on Nov. 19, will be a special edition. Regular publication will be announced in February of 1991. Nikkei is Japan's largest publisher of business and computer-related magazines. Macworld Communications/Japan is a member of IDG Communications, the world's largest publisher of computer-related information.

Unlike current Japanese Macintosh publications that target enthusiasts, Nikkei-Macworld Japan will focus on the emergence and growth of business and professional Macintosh users.

According to David Ushijima, president of Macworld Communications/Japan: ''Japanese corporations are rapidly embracing the Macintosh as a powerful and effective business tool. As the first publication to address the growing number of Macintosh business users, Nikkei-Macworld Japan will be the exclusive resource for in-depth information relevant to this community.''

Nikkei-Macworld Japan marks the eighth international addition to the Macworld global network of publications.

Nikkei-Macworld Japan will feature exclusive product reviews, coverage of issues in the Japanese Macintosh market and in-depth analysis of key business technologies such as desktop publishing, CAD/CAM, multimedia, graphics and networking.

Macworld (United States), with a total average qualified circulation of 375,000, is the world's leading resource on Macintosh computing. The magazine is published in local language editions in eight countries including Australia Denmark, Germany, Japan, Norway, Sweden, Switzerland and the United Kingdom, reaching more than one million Macintosh users.

Macworld has set a goal of introducing at least eight more international publications by the end of 1991. Macworld is a member of IDG Communications, the world's largest publisher of computer-based information.

IDG Communications publishes over 150 computer publications in more than 50 countries. Sixteen million people read one or more IDG publications each month.

HOUSTON (OCT. 2) BUSINESS WIRE - Kirby Corp. announced Tuesday that its board of directors had authorized Kirby to purchase up to 1 million additional

shares of its own common stock as a supplemental authority to the existing 2 million share authorization.

This interim authorization will enable Kirby to continue its repurchase program until the regular quarterly board meeting on Oct. 16 when the matter of stock repurchase will receive further review and deliberation. Through Oct. 1, 1990, Kirby has repurchased 1,858,401 shares under the existing authorization.

Purchases will be made on the American Stock Exchange and in privately negotiated transactions. Purchases will be subject to price, trading volume, and other market considerations. Shares repurchased may be used for reissuance on the exercise of stock options, on the conversion of outstanding debentures, or in future acquisitions for stock.

Kirby is engaged in marine transportation, diesel repair, and property and casualty insurance.

SCOTTSDALE, ARIZ. (OCT. 2) BUSINESS WIRE - Transform Logic Corp. (NASDAQ:TLOG), the Scottsdale-based developer of CASE software productivity tools, Tuesday announced positive third quarter results.

For the third quarter ending July 31, 1990, revenues were $3,097,400 and earnings were $54,500. This compares to revenue of $3,815,900 and a loss of $1,049,000 for the same quarter last year.

''This marks our second consecutive quarter of profit and primarily reflects the profit improvement and consolidation expense reduction that occured last quarter,'' said Jim Campbell, president of the company.

''In addition, while total revenue for the quarter was down, our newly released product DesignAid II showed strong sales gains. Our workgroup focus backed by a strong promotional campaign, has increased our penetration into the CASE front-end design and analysis market.''

The decrease in revenues from $3,815,900 in the third quarter 1989 to $3,097,400 in the third quarter 1990 is mainly attributed to IBM contract development revenues, which decreased 29 percent. However, IBM contract revenue is up 49 percent for the nine month period ending July 31, 1990, compared to the same period in 1989.

The company continues to build upon its IBM development partner relationship.

A renewed Master Services Agreement contract was signed last quarter which will extend the current contract through November 1991.

''The recent release of our DesignAid II product should spur product sales,'' Campbell stated. ''We will follow up with a PC-based applications generator product. This new product will help complete our suite of PC-based productivity tools and facilitate our CASE workgroup approach, and also further our commitment to the IBM AD/Cycle.''

Transform Logic is a CASE workgroup focused company, in IBM-based analysis, design and application development and maintenance. The company provides a nationwide direct sales and support organization and a worldwide network of distributors.

Among its major customers are American Express, Milliken, Kodak, Federal Reserve Bank, Internal Revenue Service and McDonnell Douglas Corp. Corporate headquarters is located at 8502 East Via de Ventura, Scottsdale, Ariz. 85258-3220. Telephone: 800/825-6442 or 602/948-2600.

#90275b0110 10/02/1990 ~Business Wire

DALLAS (OCT. 2) BUSINESS WIRE - The Taiwan government National Quality Award Committee has selected Texas Instruments Taiwan as winner of its first National Quality Award.

The award ceremony was held Sept. 29 at the Taipei International Convention Center with more than 3000 in attendance.

The Taiwan National Quality Award uses selection and measurement criteria and judging processes which resemble those of the U.S. Malcolm Baldrige National Quality Award and Japan's Deming Prize. The award was instituted by the Republic of China government as part of a program to increase the quality awareness for products made in Taiwan.

TI Taiwan was selected as the only winner in the enterprise (company) category in a ceremony attended by the president of the Republic of China, who presented a keynote speech. Other attendees included the Minister of Economic Affairs and other government officials, as well as representatives from business and academia. Major TI customers and suppliers in Taiwan were special guests at the ceremony.

Since 1969, TI Taiwan has been manufacturing semiconductor products for the Taiwan and world marketplace. Over the past 20 years, TI's activities have expanded to include the design, manufacture and test of increasingly sophisticated integrated circuit (IC) devices, as well as IC package design and manufacturing process development. Local marketing and support activities include custom IC design services, applications laboratory capabilities, and marketing support for TI's entire product line. Today, TI has over 2600 employees in Taiwan.

In addition, a state-of-the-art wafer fabrication plant for memory and VLSI ICs is under construction by the TI-Acer semiconductor joint venture at Hsin Hsu Science Park with production scheduled to begin the second half of 1991.

The Taiwan National Quality Award is one of several international quality awards TI has received in recent years. In 1985 TI Japan was awarded Japan's most prestigious quality award, the Deming Prize. This was the first time a U.S. wholly owned company received this award. TI Malaysia won the 1989 National Award for Excellence in Manufacturing Practice, presented by the Standards Industrial Research Institute of Malaysia. In May 1990 TI was awarded the Best Worldwide Supplier Award by the Standard Computer Komponenten GmbH (Stack), the largest international electronic component user group in the world.

SANTA BARBARA, CALIF. (OCT. 2) BUSINESS WIRE - Having a strategic vision toward expansion of its guest services, Hyatt Hotels Corp. is upgrading its wide-area network under the guidance of the technical support team at Infonet Inc.

The revamped reservation system links over 100 Hyatt hotels using routers from Advanced Computer Communications (ACC).

''The bottom line is providing our guests with imporved services,'' said Hyatt's Assistant Vice President Dan Amedro. ''By delivering new guest services, we increase customer satisfaction, which in turn enhances revenues.

Computers at each Hyatt location, office or hotel, communicate with computer centers located in Oakbrook Terrace, Ill., and Omaha, Neb. The internetwork that is created using ACC's Series 4000 two-port and multiport hardware platforms configured as IP routers, delivers up-to-the-minute vacancy information to clients calling for reservations or information.

''Every reservationist, no matter where they are located, is accessing the same information,'' added Amedro. With hotels linked to corporate databases, reservationists can obtain relevant customer information, such as guest history, special requests and award program balances.

For example, as data is entered from its San Jose property, databases in the Omaha computer center are immediately updated and the information can be shared between remote sites.

ACC is a privately held company that reported approximately $20 million in revenues for the fiscal year ended December 1989. Maintaining corporate offices in Santa Barbara, the company is a recognized leader in designing, manufacturing and marketing of adaptive bridge/routers and network management systems.

Since its incorporation in 1975, ACC has been developing and manufacturing data communications hardware and software products that focus on customer needs. Its internetworking products were introduced in 1988. Since that time, ACC has become a market leader in the remote bridge/router and network management arena. Worldwide, ACC products are connecting local and wide-area networks in government and commercial industries.

#90275b0121 10/02/1990 ~Business Wire

OAKLAND, CA (OCT. 2) BUSINESS WIRE - On Nov. 15, Southwest Airlines, American's 8th largest independent airline, will add new service from Oakland to Reno, Nev.

Southwest will offer six daily nonstop roundtrip flights to Reno on the newest pure jet fleet in the industry. Regular unrestricted coach fares will be $49 to Reno.

''This will be our highest fare and yet it is less than half the amount of other airlines,'' said Jim Wimberly, vice president, ground operations for Southwest. Unrestricted coach fares on other airlines are $174 from Oakland to Reno. Southwest will also offer lower advance purchase ''Fun Fares'' on a restricted basis starting as low as $29 for a 21-day advance purchase fare to Reno.

Not only is Southwest slashing fares by as much as 70 percent with the new service to Reno, its ''$20 Take Along Fare,'' which is already available on other Southwest flights leaving Oakland, will apply to flights to Reno.

For just $20 one way, a regular fare customer can ''take along'' a companion to any Southwest Airlines destination -- no matter how far away -- when both tickets are purchased with the American Express Card. Some restrictions apply and the offer is good for travel through Dec. 19, 1990.

''Our streamlined operating procedures and dedicated employees allow Southwest Airlines to enjoy the lowest operating cost of any major airline in the country. We simply pass those cost savings on to our customers,'' Wimberly noted.

Southwest Airlines has become known as the ''price policeman,'' leading the airline industry in low fares while maintaining its service level at the top of the nation's air carriers. Among its cost-saving measures are a quicker ticketing process, boarding passes on a first-come, first-served basis and no meal service.

Employees have also become known for wearing ''Fun'' uniforms and bringing humor to the flight experience -- an extension of CEO Herb Kelleher's philosophy that work should be fun.

Flights to Reno will begin at 9:30 a.m. with the last return flight leaving Reno at 7:30 p.m. Weekend flights are also available. In addition to the new service to Reno, Southwest will be adding new flights from Oakland to Ontario, Phoenix, Ariz., Burbank, Calif., and San Diego, Calif.

Between Oakland and Ontario, the carrier will add three new roundtrips to its

daily schedule, which brings to nine the number of roundtrip flights between Oakland and Ontario daily. Between Oakland and Burbank, Southwest will add three flights bringing to 13 the number of daily roundtrips between the two cities.

Between Oakland and San Diego, Southwest will add one flight, which brings to eight the roundtrips between these two cities daily; and between Oakland and Phoenix, Southwest will add one new roundtrip daily, which brings to four the number of roundtrips daily.

''Southwest is the only airline to be rated the monthly best in all three categories of service levels -- on-time performance, customer complaints and baggage service, and we've won the coveted 'Triple Crown' four times,'' Wimberly concluded.

Southwest Airlines' advertising campaign for the new service uses the themeline ''Happy Days Are Here Again.'' Don Valentine, vice president-sales and marketing for the airline, noted that ''this advertising delivers the message that low fares and lots of flights are back.''

He continues, ''We have a good solid schedule to offer our customers, but the big kicker is that Southwest fares to Reno are 60 to 70 percent off the current market prices. And these will be our regular fares, not some special introductory promotion.''

With the new service, Southwest Airlines will serve a total of 33 airports in 31 cities and 14 states from California to Alabama and from the Canadian border to the Mexican border.

For reservations or information in Oakland, the phone number is 415/465-3655.

ANAHEIM, CA (OCT. 2) BUSINESS WIRE - Cable & Computer Technology Inc. (CCT) has received a $13.9 million Navy contract to replace and update the A-6E aircraft's mission computer.

The current CP-1391 ballistic computer set will be upgraded for higher speed and increased performance capabilities. Issued by The Naval Weapons Center at China Lake, the 4 1/2-year contract covers development, test and production of 110 Airborne MIL-SPEC replacement computers and associated support equipment.

According to Kirk A. Hollingsworth, vice president, CCT's technical approach for the A-6E replacement computers represents a negligible risk for the Navy. CCT will provide operating hardware on schedule with all necessary documentation and support. The contract will require CCT to increase its technical staff over the life of the program.

Cable & Computer Technology was formed in 1980 with the sole purpose of designing and manufacturing products to emulate older, unsupportable systems and emulations of Mil Spec products with equivalent commercial devices.

CCT has designed and installed hundreds of emulation systems worldwide and has several years' experience building peripheral controllers and emulators for NTDS (Mil-STD-1397) interfaces.

Holligsworth indicated the company had also recently received a $5.3 million Air Force contract for emulators to replace IBM 1800 computers used in the maintenance of guidance systems for the Minuteman missile.

For further information, contact Cable & Computer Technology Inc., 1560 S. Sinclair St., Anaheim, Calif. 92806; phone 714/937-1341; fax 714/937-1225.

SAN FRANCISCO (OCT. 2) BUSINESS WIRE - Bank of San Francisco Co. (ASE:BOF), proudly announced that it Tuesday declared its first cash dividend on its Class A Common Stock of 5 cents per share payable on Oct. 23, to shareholders

of record on Oct. 12.

This cash dividend is the first of regular quarterly cash dividends to be paid on the Class A Common Stock, initially at an annual rate of 20 cents per share.

The board of directors will periodically review this dividend policy in light of current conditions. The company's 8 percent Series B Convertible Preferred Stock will participate equally, share for share, in cash dividends paid on the Class A Common Stock in addition to receiving the cash dividends to which it is entitled.

The company is proud of the growth which has made this dividend possible and anticipates that it will be able to continue its cash dividend policy.

Bank of San Francisco Co. is the parent of Bank of San Francisco. The 11-year-old financial services company provides a broad array of credit and investment services to professionals, successful business people, and affluent individuals and to their enterprises throughout the San Francisco Bay Area.

SAN FRANCISCO (OCT. 2) BUSINESS WIRE - Bank of San Francisco Co. (ASE:BOF), announced that it Tuesday declared a 19 cent per share dividend on its 8 percent Series B Convertible Preferred Stock payable on Oct. 23 to shareholders of record on Oct. 12.

Of this amount, 14 cents represents accrued interest from July 13, the record date for the last payment of interest on the Preferred Stock. The balance of this dividend, 5 cents, represents the participation rights of the Preferred Stock in cash dividends paid on the company's Class A Common Stock.

The company currently expects to pay regular cash dividends on its Class A Common Stock at the initial annual rate of 20 cents per share, in which dividends the Preferred Stock would participate equally. The board of directors will periodically review the dividend policy on the Class A Common Stock in light of current conditions.

Bank of San Francisco Co. is the parent of Bank of San Francisco. The 11-year-old financial services company provides a broad array of credit and investment services to professionals, successful business people, and affluent individuals and to their enterprises throughout the San Francisco Bay Area.

PROVO, UT (OCT. 2) BUSINESS WIRE - Novell Inc., developer of NetWare systems software products, Tuesday announced the acquisition of 100 percent of Toronto-based Indisy Software Inc., a connectivity and electronic messaging software company in which Novell has held a 60 percent interest, on a fully diluted basis, since July 1988.

Effective immediately, Indisy's 42 development, sales and administration employees will be fully integrated with Novell, and Indisy will operate as part of Novell. Financial terms of the acquisition were not disclosed. Indisy president A. L. Frank will continue to work with Novell as a sales and marketing consultant for the immediate future.

Indisy is a developer of comprehensive desktop-to-host E-mail applications for the Fortune 500 and government institutions, as well as vertical markets such as banking and investment firms. Its primary product is OfficeWare, a LAN and host-based E-mail package that bridges PC LAN platforms and offers connectivity to IBM mainframe environments via IBM's SNA architecture.

OfficeWare is compatible with standard messaging protocols such as MHS and X.400. Indisy has also announced a NetWare Loadable Module version of OfficeWare for the NetWare 386 environment. As such, Indisy's technology complements Novell's MHS-based electronic mail engine and offers added connectivity options into internets and proprietary architectures, such as SNA and DECnet.

''Customers have increasingly sophisticated wide-area networking needs, and Indisy's expertise in mainframe connectivity and E-mail product development makes them a valuable addition to the Novell family,'' said Kanwal Rekhi, Novell executive vice president of product development. ''We felt the best way to ensure that these important technologies continue to thrive was to bring Indisy into Novell.''

Novell Inc. (NASDAQ:NOVL) develops NetWare systems software products that manage and control the sharing of data across a variety of network computing environments, including computer workgroups, departmental networks and business-wide information systems.

SACRAMENTO, CA (OCT. 2) BUSINESS WIRE - Donald R. Beall, chairman and chief executive officer of Rockwell International Corp., has been selected to receive the California Manufacturer of the Year Award, the highest honor bestowed by the California Manufacturers Association, announces CMA president William Campbell.

CMA, with headquarters in Sacramento, has represented industry before state government for more than 72 years. Member companies employ approximately 70 percent of the California industrial work force.

Leaders in California business, industry, government and civic affairs will witness Beall accept the award during a celebration luncheon to be held Dec. 6 at the Los Angeles Hyatt Regency. Sponsors of the event purchase tables of 10 for $750. Individual luncheon admission is $75. For more information, contact CMA's Kim Wright at 1/800-824-2640.

To receive the award, the recipient must be an outstanding leader of industry, a major contributor to industrial progress, have demonstrated an active interest in civic affairs, worked for the betterment of relations between employers and employees, and have an outstanding record in furthering the free enterprise system.

Rockwell has evolved into a $12 billion, multi-industry international company from a collection of separate companies.

A number of Rockwell businesses, founded by pioneers in their respective fields, can trace their heritage to the formative years of such industries as high-speed newspaper printing, radio, aircraft, trucking, rockets and space exploration. Today, Rockwell applies advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

Beall was elected chairman and chief executive officer of Rockwell International Corp. in 1988. Previously he served as president and chief operating officer from 1979 to 1988 and as corporate executive vice president from 1977 to 1979. He was first elected to the Rockwell board of directors in 1978.

TORONTO (OCT. 2) BUSINESS WIRE - NHI Nelson Holdings International Ltd. (ASE/ToSE/VcSE:NNH) (the ''company'') Tuesday announced that it has been agreed with Laing & Cruickshank, London, the purchaser of the company's $20 million (U.S.) principal amount of underwritten secured convertible debentures (the ''debentures''), which have already been issued pursuant to a previously announced financing, that the date of scheduled public availability of these debentures has been extended to Mar. 29, 1991.

The vesting of certain equity rights pursuant to these debentures as described below has also been extended to Mar. 29, 1991.

Under the amended terms of the debentures, the convertibility feature of the debentures and the issuance of warrants pursuant to the underwriting commitment will now become effective on Mar. 29, 1991, prior to which time the company may redeem the debentures in which case the equity structure of the company would remain unchanged.

In addition, the debenture conversion and warrant exercise prices have been modified so that they will be fixed based on a weighted average trading price formula determined prior to Mar. 29, 1991, with a minimum price of $5 (U.S.) and a maximum price of $12 (U.S.).

The cumulative number of common shares issuable between the conversion of debentures and the exercise of warrants will remain the same as the cumulative number of such shares that would have been issuable under the previous debenture terms.

The debentures will continue to mature on Mar. 31, 1992. The debentures bear interest up through Mar. 28, 1991, at LIBOR plus 2-1/2 percent and thereafter at 12 percent per annum.

NHI Nelson Holdings International Ltd. is the holding company for the Nelson Entertainment Group and for 69 percent-owned Nelson Vending Technology Ltd.

DALLAS (OCT. 2) BUSINESS WIRE - Jess Hay, chairman and chief executive officer of the Lomas Financial Group, announced Tuesday that Gene H. Bishop

has been elected vice chairman of the board and chief financial officer of Lomas Financial Corp. and president and chief operating officer of its mortgage banking division, Lomas Mortgage USA.

Bishop has been a member of Lomas Financial Corp.'s board of directors since 1969. He will remain on its board. As president of Lomas Mortgage USA, Bishop succeeds Paul M. Low, who is retiring after a tenure of 32 years with the company.

Commenting on Low's retirement, Hay said that, ''Paul Low has been a creative force in the development of Lomas Mortgage USA throughout his tenure. He has served us well, and will be missed.''

Bishop, who recently retired as chairman and chief executive officer of MCorp, was president of Lomas Financial Corp. from 1969 to 1975. He left Lomas in 1975 to become chief executive officer of Mercantile National Bank of Dallas and Mercantile National Corp., the predecessor company to MCorp. He retired from MCorp in July 1990.

''Gene Bishop's management skills, knowledge of the mortgage industry and expertise in the disciplines necessary to achieve the aggressive goals set forth in our five-year business plan will prove of great value to our company in the months and years ahead, Hay said. ''He adds an important dimension to our management team. We are very pleased to have him back.''

Bishop said that he sees tremendous opportunity for growth in Lomas' mortgage businesses.

''We see a substantial amount of mortgage servicing business coming available over the next several years,'' Bishop said.

''Lomas Mortgage USA and Lomas Information Systems are outstanding organizations with staffs of extremely talented people. As one of the industry's lowest cost producers, with the finest, most sophisticated computer system available, Lomas is in an extremely strong position to take advantage of opportunities for growth.''

Hay said that he began talking with Bishop about coming back to Lomas in a senior management position upon learning of Bishop's decision to retire from MCorp.

In addition to Lomas Financial Corp., Bishop currently serves on the boards of Lomas & Nettleton Mortgage Investors, MCorp, Republic Financial Services Inc., Southwest Airlines Co., Southwestern Public Service Co. and VISystems Inc.

LOS ANGELES (OCT. 2) BUSINESS WIRE - The board of directors of Pacific Enterprises (NYSE:PET) elected Harry L. Lepape executive vice president, the company announced Tuesday.

As executive vice president, Lepape is responsible for managing PE's interests related to interstate pipeline activities and gas supplies with particular emphasis on Canada. He is also responsible for Pacific Enterprises Oil Co.'s Canadian and Dutch North Sea interests.

Lepape, who assumed his responsibilities on Oct. 1, will report to PE President Willis B. Wood Jr., as will Ronald E. Rinard, recently named president of PEOC's domestic oil and gas operations.

In addition to the oil and gas subsidiaries, Pacific Enterprises owns Southern California Gas Co., the nation's largest natural gas distribution utility. It also owns Thrifty Corp., a drug and sporting goods chain retailer with more than 1,000 stores.

''Harry Lepape brings to this post a wealth of knowledge and years of experience in the oil and gas and utility businesses,'' said PE Chairman James R. Ukropina.

Lepape, 59, joined Pacific Enterprises in 1961 as an assistant general counsel. Since then, he has held a number of positions, which include president of Pacific Lighting Exploration Co.; assistant to the chairman, vice president and senior vice president at SoCalGas; and vice president at Pacific Enterprises.

He was named chairman and chief executive officer of PEOC in 1983, and chairman, president and chief executive officer of its pipeline affiliate, Pacific Interstate Co., in 1981.

Lepape received both an undergraduate degree in engineering in 1952 and a law degree in 1956 from Stanford University.

He is a member of the American Petroleum Institute; the American, Southern and Pacific Coast Gas Associations; the American California and Los Angeles County Bar Associations; and director of Foothills Pipe Lines (South B.C.) Ltd. and the Independent Natural Gas Association of America.

Lepape and his wife, Marilyn, live in Rancho Palos Verdes.

MANHATTAN BEACH, CA (OCT. 2) BUSINESS WIRE - Hughes Aircraft Co. has been awarded a $77.8 million contract for the first year of a multiyear program to produce 1,398 TOW 2 Weapon Subsystems for the U.S. Army's Bradley Fighting Vehicle.

The contract to Hughes, a unit of GM Hughes Electronics (GMH), was the result of a competitive procurement between Hughes and Texas Instruments.

Hughes Electro-Optical Operations Inc., a subsidiary with headquarters in Manhattan Beach, is scheduled to begin deliveries of the subsystems in August 1991. Total value of the contract is estimated to be about $108 million, with options for an additional 710 subsystems that would give the program a potential total value of about $160 million.

Hughes developed the subsystem, which includes an integrated day/night sight, and has produced about 6,000 to date. In addition to accurately guiding the TOW antitank missile, the subsystem also is used by gunners to direct cannon and machine gun fire.

Preliminary production work will be accomplished at various Hughes sites in California, Illinois and Alabama, with final assembly of the sight unit being done at Hughes Georgia Inc., a subsidiary located in La Grange, Ga.

PHOENIX (OCT. 2) BUSINESS WIRE - Nix-O-Tine Pharmaceuticals Ltd. (NASDAQ:NIXXF; VSE:NIX.V) Tuesday announced the commencement of clinical laboratory operations by its fifty percent-owned subsidiary, Laboratory Sciences International Ltd. (LSI).

The new laboratory was constructed at Nix-O-Tine's Phoenix corporate office pursuant to a joint venture with Jon V. Eylands, M.D., president of LSI. The joint venture terms included the contribution of existing pathology contracts and capital by Dr. Eylands and Nix-O-Tine's contribution of certain assets and technology.

The opening of the new clinical laboratory provides in-house capability to process the Nix-O-Tine LungCheck test. LungCheck is a nationally distributed take-home test that uses quantitative sputum cytology for early evaluation of lung health assessment and as a motivational aid for smoking cessation.

''The Nix-O-Tine LungCheck test can detect cell changes that could lead to lung cancer three to five years before it shows on X-rays,'' said Dr. Eylands. ''This test should be a vital part of America's preventive medicine program. Just like the pap smear, the Nix-O-Tine LungCheck test helps identify abnormal cells before cancer is discovered.''

Dr. Eylands stated: ''We are excited about LSI's growth prospects in the current clinical laboratory marketplace. I will be devoting a major portion of my time to expanding the market for LungCheck testing and other laboratory services performed by LSI. We commence operations with nine experienced employees and anticipate growth to over 20 during the next 12 months.''

Nix-O-Tine is a public company that owns a patented drug treatment method and a physician-directed behavioral modification program for nicotine addiction and smoking withdrawal. The company announced on July 13 the proposed acquisition of Behavioral Sciences of America, which through its RxFast subsidiary offers a proprietary physician-supervised weight loss program.

SAN JOSE, CA. (OCT. 2) BUSINESS WIRE - Due to a significant shortfall in new orders, KLA Instruments Corp. (NASDAQ/NMS:KLAC) reported Tuesday that sales and earnings for its first fiscal quarter ended Sept. 30, 1990, would be reduced from the previous sequential quarter and from the previous year's first quarter. e The company estimates that sales will be approximately $36 million resulting in operating earnings which will be only slightly profitable.

The company attributed the shortfall in orders primarily to capital investment delays by U.S. semiconductor manufacturers. All of KLA's business units were affected except for its RAPID Division, which recorded strong results.

The company expects a continuation of some customer order deferrals through the current quarter or until a clearer economic environment exists.

KLA reported that its investments in R & D activities have been at historically high levels for the last several quarters and are expected to continue at high levels. The company anticipates a major new product accouncement in the near future and has scheduled a news conference for Oct. 10, 1990.

KLA Instruments Corp. is a leading innovator of industrial image automation systems.

ALBANY, N.Y. (OCT. 2) BUSINESS WIRE - John R. Tomassi was recently promoted to vice president and chief financial officer of Lawrence Management Group Inc., which is the management company for Lawrence Insurance Group Inc. (ASE:LWR), a public property/casualty and reinsurance company.

Tomassi will report directly to Albert W. Lawrence, chairman of the board.

As vice president and chief financial officer, Tomassi will oversee all financial operations of the public company. Additionally, he will be responsible for the accounting departments of Lawrence Insurance Group Inc. and Lawrence Agency Corp., the 16th largest insurance brokerage in the country and a subsidiary of Lawrence Group Inc.

Tomassi said: ''As the corporation continues to complete its goal of becoming licensed in all 50 states and looks forward to expanding into the international market, my goal is to emphasize increased earnings per

share and corporate financial well-being while maintaining superior customer service.''

Prior to his promotion, Tomassi held the positions of executive vice president and chief operating officer of Lawrence Agency Corp.; president

of Lawrence United Corp., a division of Lawrence Agency Corp. consisting

of traditional independent insurance agencies writing business in states across the country; and president of ADAPT, a subsidiary of Lawrence Agency Corp., which acquires medium to large independent insurance agencies.

Tomassi has an extensive background in insurance and business administration. As president of ADAPT and Lawrence United Corp., he was in charge of all acquisitions including the financial analyses, planning, and forecasts, as well as accounting and financial operations for Lawrence Agency Corp.

Prior to joining the Lawrence Group in 1988, Tomassi held various management positions at CNA and Hartford Insurance Group.

Tomassi holds a masters in business administration from the University of Connecticut and a bachelor of science degree from the University of Dayton. He is a Chartered Property Casualty Underwriter and an active member of the CPCU Society. Tomassi and his wife, Diane, reside in Clifton Park, N.Y., with their two children, Jessica and Mark.

Lawrence Group Inc. is a vertically integrated, multiline, national insurance corporation headquartered in Schenectady, N.Y. Through its subsidiaries, Lawrence Insurance Group Inc. is licensed or accredited in 45 states and the District of Columbia.

The company is comprised of United Community Insurance Co., United Republic Reinsurance Co., Senate Insurance Co., and Commercial Resources Insurance Co. Executive offices of Lawrence Insurance Group Inc. are located at 500 Fifth Avenue in New York City, while operating headquarters is at 33 Elk Street, Albany, N.Y.

SAN JOSE, Calif. (OCT. 2) BUSINESS WIRE - Citing expected third quarter losses due to lower revenues and high inventory levels, Microscience International Corp. (NASDAQ:MSIC), San Jose, has announced a workforce reduction at its San Jose headquarters.

Microscience, a manufacturer of 5.25 inch and 3.5 inch high-performance

Winchester disk drives, will lay off approximately 110 employees at the San Jose facility effective Tuesday, according to the company's President and Chief Executive Officer Kevin Nagle. The company has 1,443 employees worldwide prior to the workforce reduction.

The majority of those affected by the workforce reduction are hourly employees involved in product manufacturing at the San Jose facility. Microscience has three manufacturing facilities which are located in San Jose, Taiwan and Singapore. The company is working with the affected workers on employment assistance programs.

Microscience reported net income of $9.7 million in the six-month period (June 30, 1990) with record revenues of $50 million. The third quarter of 1990 however, has been unfavorably affected by lower shipments of Microscience's 5.25 inch half-height and 3.5 inch products and lower average sales prices.

The workforce reduction will have no adverse affect in the company's ability to support its customer base in either the OEM or distribution markets nor will it affect the company's recently acquired line of high capacity disk drives, according to Nagle.

''There won't be any affect on our customers or on our mainstream product lines,'' said Nagle. ''We are very disappointed by the workforce reduction but our performance in the third quarter necessitated this action. We will continue to place emphasis on our high-capacity 5.25 inch products and our high-performance 3.5 inch drives.''

Microscience International Corp., founded in 1982, designs, develops and manufactures industry-leading, high-quality 3.5 inch and 5.25 inch half-height Winchester disk drives for the desktop computer and workstation industries.

SAN JOSE, CA (OCT. 2) BUSINESS WIRE - In response to recent world events and the continued sluggish demand for semiconductor capital equipment, Silicon Valley Group Inc. (NASDAQ/NMS:SVGI) announced a modest workforce reduction.

According to Papken Der Torossian, president and chief executive officer, the reduction impacts approximately six percent of SVG's total worldwide employees as well as contracted and temporary personnel.

This reduction principally affects manufacturing and indirect personnel and will balance staffing levels within those areas with requirements for the company's sophisticated wafer processing systems.

''We believe these preparations are necessary to help SVG remain healthy and stable in the months to come,'' stated Der Torossian. ''In this way, we will be well positioned for the inevitable industry upturn with both new products and strong applications advances.''

Der Torossian indicated that the company's strong R & D and customer support focus will not be affected. ''In this business, we need to tighten our belts from time to time. But it is also imperative to maintain our commitment to the development of next generation technology and customer support.''

Silicon Valley Group Inc. is a leading manufacturer of automated wafer processing equipment for the worldwide semiconductor industry. The company's product divisions are the Track Systems Division, focused on photoresist processing equipment, and the Thermco Systems Division, offering oxidation, diffusion, and low pressure chemical vapor deposition (LPCVD) processing systems.

SVG's newly acquired subsidiary, SVG Lithography Systems Inc. delivers photolithography exposure tools which utilize step-and-scan technology.

#90275b0617 10/02/1990 ~Business Wire
SUNNYVALE, CA (OCT. 2) BUSINESS WIRE - IKOS Systems Inc. (NASDAQ:IKOS) Tuesday announced that it expects fourth quarter revenues to be approximately $3.8M.

Net earnings are expected to be approximately $100,000. Revenue for the fiscal year is expected to be approximately $15.8M compared to $7.7M in fiscal 1989. Net earnings for the current fiscal year are expected to be approximately $1.6M, or 18 cents per share, in fiscal 1990 as compared to a loss of $2.0M, or 24 cents per share, for the prior fiscal year.

Gerald S. Casilli, chairman and chief executive officer, cited two primary reasons for the revenue and earnings in the fourth quarter to be less than originally expected by the company. ''Uncertainty in the current economic environment has caused several of our customers to defer their purchases into the next quarter.

''Also, our joint marketing agreement with Mentor Graphics did not produce the expected sales results. A recent series of modifications in the IKOS/Mentor business relationship, including integration of the IKOS 2800/2900 products into Mentor's Release 7.0 design environment, is expected to result in increased interest from Mentor's large installed customer base for Release 7.0.

''This integration of the IKOS 2800/2900 is expected to occur during the first quarter of 1991.''

Casilli also announced that the IKOS board of directors authorized the officers to explore a repurchase by the company of its common stock.

IKOS Systems Inc. designs, manufactures, markets and supports advanced hardware-assisted simulation systems for the application-specific integrated circuit (ASIC) and systems design markets. Headquartered in Sunnyvale, the company employs more than 100 people worldwide.

SAN JOSE, CALIF. (OCT. 2) BUSINESS WIRE - Xerox Imaging Systems (XIS) Tuesday announced a new Graphical User Interface, which provides easy, intuitive access to XIS's leadsing edge text recognition system, the Kurzweil 5200 (K5200).

The Graphical User Interface runs under Windows 3.0, making the K5200 compatible with the new industry standard of user interfaces for the PC environment.

The Graphical User Interface will be available at no additional cost to customers who buy or upgrade to the K5200 Scanning System. The new Graphical User Interface is scheduled to begin beta testing this month and to ship in the first quarter of 1991.

Increased Productivity

The new Graphical User Interface features Page Preview, which allows users to scan pages containing both text and graphics in one pass. Additionally, a new Tiff Queue feature allows users to create multiple batches of jobs for off-line processing, allowing the user to defer the recognition process to an off-peak time. Both of these features significantly increase user productivity and satisfaction.

The new Graphical User Interface will be available in five languages, English, French, Italian, German and Spanish.

The K5200 scanning system, which was introduced in June 1990, offers users up to a 400 percent increase in speed over previous products in the marketplace. This increase is achieved using a proprietary intelligent character recognition processing unit based on RISC (reduced instruction set computing) technology.

Greater speed, combined with features including improved ability to read dot matrix output; improved table, column and bold recognition; quick recognition and removal of halftone images; and Fastscan Mode for faster scan speed and recognition of simple documents, have helped make the K5200 scanning system unmatched in the PC marketplace.

Xerox Imaging Systems is an industry leader in desktop scanning, image processing and text recognition for IBM PC, PS/2 and Apple Macintosh Systems. XIS was formed by the merger of Datacopy Corp. and Kurzweil Computer Products.

MENLO PARK, CA (OCT. 2) BUSINESS WIRE - Recognizing the rapidly growing number of LANs being interconnected to remote LANs through Wide Area Networks, and the critical need for organizations to understand the impact of LAN applications on expensive WAN line costs, Network General (NASDAQ:NETG) Tuesday announced the WAN/Synchronous Sniffer Analyzer.

The need for the WAN/Synchronous Sniffer Analyzer is underscored by a recent survey of 50 Fortune 1,000 companies by Forrester Research Inc. of Cambridge, Mass., which reported that 62 percent are deploying WANs for LAN-to-LAN connectivity.

The WAN/Synchronous Sniffer Analyzer was designed to address this LAN-to-LAN connectivity market, providing customers an invaluable product to understand, manage and control line costs.

According to Saal, the WAN/Synchronous Sniffer Analyzer helps customers save on WAN line charges in several ways:

1) Reduced Line Traffic -- Many LAN applications and protocols are designed with the assumption that network bandwidth is ''free.'' Unlike LANs, WAN line costs are very expensive.

The WAN/Synchronous Sniffer Analyzer identifies unnecessary traffic and inefficient protocols and applications. With this information, users can then take the steps to dramatically reduce line traffic that consume costly bandwidth.

2) Reduced Line Upgrade Costs -- Many companies assume they need a faster line when applications performance degrades on their WANs. With the WAN/Synchronous Sniffer Analyzer, they can reduce the need to upgrade to more expensive, faster lines (for example, moving from a 19.2 kbps to 56 kbps) or to add additional lines by identifying inefficient use of existing facilities.

3) Improved Applications Performance -- Purchasing more hardware (bridges, routers, servers, etc.) is the most common approach to improving applications performance. The WAN/Synchronous Analyzer provides users with the ability to pinpoint applications performance problems and, thereby deal with the real bottlenecks instead of upgrading the entire network.

4) Reduced Network Downtime -- With its capability to quickly identify which network component caused the problem, the WAN/Synchronous Sniffer Analyzer allows customers to expeditiously put mission critical applications back on the air, or to avert downtime altogether.

Founded in 1986, Network General is an industry leader in designing, developing and marketing diagnostic systems for local and wide area networks.

MOUNTAIN VIEW, CA (OCT. 2) BUSINESS WIRE - ASK Computer Systems Inc. (OTC:ASKI) Tuesday announced that the waiting period required by the

Hart-Scott-Rodino Antitrust Improvements Act for the proposed acquisition of Ingres Corp. (OTC:RELY) by ASK terminated on Friday, Sept. 28 at midnight Eastern time.

As announced on Sept. 11, 1990, ASK and Ingres have signed a definitive agreement providing for the acquisition of Ingres for $110 million in cash, or $9.25 per share. The tender offer for this acquisition is presently scheduled to expire at 12 midnight New York time on Friday, Oct. 12, 1990.

ASK Computer Systems is a leader in enterprise-wide information systems for manufacturing companies. It completed its 1990 fiscal year in June with revenues of $207 million.

CUPERTINO, CA (OCT. 2) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) and Texas Instruments Inc. (TI), (NYSE:TXN), Tuesday announced a strategic relationship for the development and worldwide marketing of TI's Information Engineering Facility (IEF) for Tandem NonStop systems.

Users of the IEF Tandem product will be able to develop and run online transaction processing (OLTP) applications in an open environment, independent of a specific computer and operating system.

The IEF Tandem products will enable IEF users to create new and transport existing applications to the Tandem environment. IEF generated applications will take advantage of Tandem's high performance distributed database and fundamental strengths, including continuous availability and linear growth.

Roberta Henderson, Tandem vice president of OLTP development, said: ''We are

excited about the opportunity to offer our customers a full life cycle computer aided software engineering (CASE) product for Tandem NonStop systems. IEF Tandem users will be able to use a single product for application design, development and implementation.''

''TI and Tandem have a large number of mutual customers who want a single CASE solution for development of strategic systems for Tandem and other supported environments,'' said Mike Watters, vice president and general manager of the Advanced Information Management Division with responsibility for IEF business worldwide.

''The agreement we are announcing today provides a structure for joint development of the Tandem version of IEF and worldwide cooperation in marketing the IEF technology.''

The IEF products for the Tandem NonStop development environment will be released in two stages. The first stage requires IBM's OS/2 and MVS operating systems and will be available in 1991. The second stage will run on OS/2 and Tandem NonStop systems, independent of MVS, and will be available in 1992.

Texas Instruments, headquartered in Dallas, is a high-technology corporation engaged in semiconductors, defense electronics systems, computer and software systems, electrical controls, industrial automation systems, metallurgical materials and consumer computer products.

Tandem Computers Inc. manufactures and markets computer systems and networks for online transaction processing, large database and UNIX applications.

EINDHOVEN, NETHERLANDS (OCT. 2) BUSINESS WIRE - H. Bodt, at present chairman of the executive board of Oce-van der Grinten N.V., Venlo, the Netherlands, will be appointed a member of the group management committee of N.V. Philips' Gloeilampenfabrieken with effect from Dec. 1.

This was announced by Philips Tuesday.

Within the group management committee, Bodt, who will give up his position with Oce-van der Grinten as from Dec. 1. will be responsible for the professional divisions.

The Philips' Group management committee currently consists of the board of management and four other members. The members of the board of management are J.D. Timmer (president) K. Hubee (vice-president), Y.G. Bouwkamp (vice-president), Dr. S. Van Houten and H.H.A. Appelo. The other members of the group management committee are W. de Kleuver, J.J. Tuyt, T. Meyer and E. Kloster.

Henk Bodt was born in Renkum (the Netherlands) on April 30, 1938. He studied electrotechnics at the Technical University of Eindhoven. He joined Philips in the research laboratories in 1956. From 1965 onwards, he worked in several positions within Philips' science and industry product division. In 1976, he was appointed director of the corporate planning and marketing support department.

He became senior managing director of the electronic components and materials division in 1983. Bodt joined Oce-van der Grinten as a member of the executive board in 1986. He became chairman of the board in 1987.

WILMINGTON, CALIF. (OCT. 2) BUSINESS WIRE - Vector Aeromotive Corp. (NASDAQ:VCAR) has been invited to exhibit its American-made aerospace technology supercar, the VECTOR W8 TwinTurbo, at the SAE Aerotech '90 Aerospace Technology Conference and Exposition, being held at the Long Beach Convention Center, Long Beach, Calif., on Oct. 1-3, 1990.

This exhibition is attended by more than 4,000 key aerospace industry executives. Nearly 100 aerospace industry exhibitors, including major U.S. and international prime and system airframe and engine companies will be featured.

''We are proud to be the only automobile manufacturer invited to exhibit at this world class event,'' said Gerald A. Wiegert, chairman and founder of Vector Aeromotive Corp. ''The interest in the VECTOR by members of the aerospace community underscores the level of state-of-the-art aerospace design engineering and materials that have gone into the development and production of this American high performance supercar.''

The purpose of SAE Aerotech '90 is to promote the exchange of aerospace technical information between industry, government and academia. The meeting is a forum for individual presentations that discuss applied technology for the design, manufacture, testing and propulsion of air and space vehicles and their systems.

An educational exposition accompanies the technical presentations and offers attendees the opportunity to view new products, technologies and processes first hand.

Vector Aeromotive Corp. also announced that one of its VECTOR W8 TwinTurbo supercars was present at the entrance to the meeting of the Society of Experimental Test Pilots, held on Friday, Sept. 28, 1990, at the Beverly Hills Hilton, Beverly Hills, Calif. The VECTOR was test driven by a number of the foremost test pilots in the world.

Vector Aeromotive Corp. is headquartered in Wilmington, near the Port of Los Angeles.

NEWTOWN, PA (OCT. 2) BUSINESS WIRE - Tseng Labs (NASDAQ/NMS:TSNG) Tuesday announced that its Board of Directors authorized the repurchase from time to time and depending on market prices of up to 1.5 million shares of common stock in the open market or in privately negotiated transactions.

The repurchased stock is expected to be financed with available cash and will be held in the Company's treasury. As of June 30, 1990 Tseng had 18.2 million shares of stock outstanding.

Commenting on the stock repurchase, Jack H-N Tseng, President, said, ''The authorization to repurchase our stock reflects our Board's confidence in the long-term prospects of the Company and our belief that the repurchase of the Company's stock at current price levels is an attractive use of corporate assets.''

The Company also announced that it has been informed by a major OEM customer that it is incorporating Tseng's ET4000 based products into its broad-based product line. Tseng has received an initial purchase order from the OEM customer which will result in revenues beginning in the fourth quarter. The Company estimates that the total revenues from the OEM customer may exceed $8,000,000 for the twelve month period beginning December, 1990.

Commenting on general business conditions, Mr. Tseng noted, ''Sales in the third quarter of 1990 should exceed sales in last year's third quarter. We continue to have a strong backlog and positive customer response for our new VGA products based on the ET4000. Sales in the third quarter could have been

stronger. However, we received only part of the necessary delivery of chips from our semiconductor manufacturers. This situation is now behind us and we expect to receive enough chips to meet all of the demand for the fourth quarter which will be substantially ahead of last year's comparable period.''

Tseng Labs, Inc. is a manufacturer of custom VLSI graphics chips and board level add-on enhancement products for personal computers.

CHARLOTTE, N.C. (OCT. 2) BUSINESS WIRE - The newest product to join the Verbatim family, the DataLife 3-1/2 inch Extra High Density (ED) 4 MB microdisk, was introduced Tuesday.

The state-of-the-art in computer media technology, DataLife 3-1/2 inch ED 4 MB microdisks were designed to provide extra capacity, convenience and data continuity.

Its 4 MB capacity eliminates the need to stop and load additional disks to store information, ensuring data continuity. This ability to write, read and backup large data files makes DataLife 3-1/2 inch ED 4 MB microdisks perfect for attorneys, architects, engineers, hospital administrators etc., and in any application where large files are accessed on a daily basis.

Mark Welland, vice president for Verbatim North American Marketing and Sales, explains the company's enthusiasm for the microdisks. ''Any of our information storage products can be used with equal success in just about any situation.

''With the availability of DataLife 3-1/2 inch ED 4 MB microdisks, Verbatim is extending our reach to large capacity users. This product addresses their needs specifically.''

DataLife 3-1/2 inch ED 4 MB microdisks can be easily formatted for Macintosh and IBM systems. A number of manufacturers are developing compatible 4 MB disk drives which prompted Verbatim to make 4 MB media available now. DataLife 3-1/2 inch ED 4 MB microdisks are currently being used by several manufacturers in the testing of their disk drives.

DataLife 3-1/2 inch ED 4 MB microdisks are manufactured with a proven barium

ferrite formula to ensure superior signal integrity with maximum longevity. This means the disks will afford the user high reliability, read or write, time after time.

Finally, like all Verbatim products, DataLife 3-1/2 inch ED 4 MB microdisks are certified 100 percent error free from the factory and are backed with a lifetime guarantee.

The disks carry a suggested retail price of $14.77 each, or $147.70 per 10 pack box.

For more information on Verbatim DataLife 3-1/2 inch ED 4 MB microdisks, call 800/538-8589.

SANTA BARBARA, CALIF. (OCT. 2) BUSINESS WIRE - Culminating a full year of product develompent, Advanced Computer Communications (ACC) Tuesday announced it has added eight new features to its SNMP-based network management system that address the collective expectations of the marketplace.

Among the new features of Version 2.0 of the ACS 4800 Network Management

System are: an Application Programming Interface (API) to allow the addition of other management protocols, such as OSI's CMIP, without modifying the user interface; an MIB Utilities tool to make it simple for users to add private MIB extensions to the system to more effectively manage other vendors' devices; and a relational database to speed up user access and allow data to be stored for analysis and imported into any ANSI-compliant structured query language (SQL) application.

A report authored by Jill Huntington-Lee, an analyst with Datapro Research Group, Delran, N.J., found that users are hampered more by a lack of product features than the limitations of SNMP itself.

In a recent survey conducted by Datapro, respondents listed MIB extensibility, support for CMIP, and an SQL interface that can be integrated into an existing database as some of the capabilities they would like to have in their network management systems.

''Network administrators are looking for management systems that have the flexibility to operate in a multivendor environment, and this means more than just compatible protocols,'' says Gary Krall, ACC's director of marketing. ''In general, users want to take full advantage of SNMP's capabilities such as its open-ended architecture which made it so popular in the first place.

''Version 2.0 of the ACS 4800 addresses these issues.''

Since its incorporation in 1975, ACC has been developing and manufacturing data communications hardware and software products that focus on customer needs. Its internetworking products were introduced in 1988. Since that time, ACC has become a market leader in the remote bridge/router and network management arena.

Worldwide, ACC products are connecting local and wide-area networks in government and commercial industries.

EAST HANOVER, NJ (OCT. 2) BUSINESS WIRE - The Ultimate Corp. (NYSE:ULT), in a move designed to increase the synergy between its two pacesetting education and training operations, announced Tuesday that it is forming a Pick division within its Burlington, Mass.-based UNIX education subsidiary, Hands-On Learning Corp. (HOLC) by merging its industry-leading Pick training supplier, Ultimate University, into HOLC.

According to the announcement by Rick Dool, Ultimate Professional Services

Division senior vice president, the HOLC Pick Division will release two important new education products for Pick users before the end of this year.

On Nov. 1, the first comprehensive video-based self-study course for Pick users will be delivered, and in December a new leading-edge, computer-based self-study course on Pick will also be available.

Ultimate University personnel will form the nucleus of the new HOLC Pick division and will operate from facilities in New Jersey and Irvine, Calif.

The integration of Pick training under the HOLC banner also addresses the rapidly increasing demand for Pick and Pick/UNIX training generated by the growing acceptance of the marriage between the Pick and Unix environments.

The expansion of the UNIX-compatible base of Pick installations and the continued growth in both Pick and UNIX is creating a significant market opportunity for education, training and related services.

By combining Ultimate's education and training operations, the company is well positioned to cost-effectively leverage the resources of both operations and become the dominant supplier of education and training to the Pick and Pick/UNIX markets.

HOLC is a pacesetting and fast-growing provider of UNIX- and Pick-oriented education, including classroom and on-site training, seminars and advanced video-based and computer-based self-study programs.

The HOLC Pick division (formerly Ultimate University) has a 10-year record of leadership providing Pick classroom training and seminars to more than 10,000 users of systems supplied by Ultimate and other Pick-based system suppliers. HOLC UNIX training includes courses on the UNIX operating system, X-Windows and the ''C'' programming language.

Ultimate also provides Pick and Pick/UNIX education and training through its Hands-On Learning subsidiary, and the company provides consulting and field-maintenance services to customers across a wide range of vertical markets. In addition to its domestic operations, Ultimate has subsidiaries in the United Kingdom, Canada, France and Australia.

#90275b0653 10/02/1990 ~Business Wire

SAN FRANCISCO (OCT. 2) BUSINESS WIRE - Pacific Bell has proposed a $73.3 million rate reduction that would lower the average residence customer's bill by 28 cents a month beginning in January.

The proposal, part of the California Public Utilities Commission's (CPUC) ''incentive regulation'' plan adopted a year ago, includes a $13.5 million annual reduction based on a formula that accounts for the effects of inflation and is offset by a productivity factor.

The proposal, filed with the CPUC late Monday afternoon, includes several other adjustments that reflect both increases and decreases to 1991 revenues.

In all, the proposed rate reduction totals $73.3 million. However, if the proposal is adopted by the CPUC, the company expects little impact on net income since many of the items identified in the filing already have been recognized in the company's financial statements.

Besides the ''price cap'' reduction, the remaining $59.8 million in proposed rate reductions primarily reflects the impact of earlier CPUC decisions or issues that the CPUC directed Pacific Bell to address in this filing.

The CPUC will review the proposal and is expected to make a decision before the end of the year. It could order a revenue adjustment different from the company's proposal.

The $13.5 million reduction is the result of the CPUC's ''price cap'' formula, which is based on the annual change in Gross National Product Price Index (GNP-PI). That index showed a 4.3 percent increase in prices. From that, a CPUC-established 4.5 percent productivity factor is subtracted. The result (a .2 percent decrease) equates to a $13.5 million annual rate reduction.

The reductions, if approved, would appear on customer bills as an increase in the credit that they have been receiving for the past three years.

Pacific Bell is a subsidiary of Pacific Telesis Group, a worldwide diversified telecommunications corporation based in San Francisco.

LITTLETON, MA (OCT. 2) BUSINESS WIRE - Alliant Computer Systems Corp. (NASDAQ/ALNT) Tuesday announced that MARC Analysis Research Corp., Palo Alto, Calif., has ported its MARC finite element analysis (FEA) software to run on Alliant's RISC-based FX/2800 family of parallel supercomputers.

MARC is the first major FEA package available for the FX/2800 platform, and will be fully compliant with the PAX (Parallel Architecture eXtended) software standard developed jointly by Alliant and Intel Corp. PAX allows software

vendors to write one version of their application to run on any PAX-compliant Intel i860-based system.

MARC is a general purpose FEA package for linear and nonlinear static and dynamic analyses of 2-D and 3-D structures. It includes a parallel solver, optimized for the Alliant FX/Series architecture, that significantly accelerates problem solving by executing portions of the application on multiple processors simultaneously.

MARC's particular strength is in the structural and thermal analysis of nonlinear components and systems. Some of the application areas include jet engine design, automobile component design and electronic packaging evaluation. For example, MARC is used to analyze computer disk drive components. The MARC software is on the leading edge of manufacturing process simulation such as forging, rolling and casting because of its special contact analysis capability.

MARC will be available on the FX/2800 in November 1990. Pricing starts at $40,000 for a MARC license on an FX/2808.

Alliant Computer Systems Corp. manufactures standards-based parallel supercomputers with visualization tools that enable scientists and engineers to quickly interpret and solve complex problems.

#90275b0655 10/02/1990 ~Business Wire

VALENCIA, CA (OCT. 2) BUSINESS WIRE - HR Textron Inc. Tuesday announced that the Naval Air Development Center (NADC) in Warminster, Penn., has awarded the company a research and development contract in excess of $2 million for fluidic actuators and associated equipment.

The contract termed ''Advanced Survivable Flight Control Components, '' calls for HR to study, design and test a laboratory hydrofluidic control system that will enable flight control systems to continue functioning in instances for disruption of electronic flight control or loss of electrical power.

This is accomplished by utilizing hydraulic fluid as a computing medium, so that should loss of electrical control occur, the flight control system

automatically reverts to the fluidic system and allows the aircraft either to continue its mission or return to base safely.

HR will modify two fly-by-wire F/A-18 actuators to incorporate a fluidic-control command channel, and furnish several fluidic sensors, including an angular rate sensor. The prototype actuators and sensors will be assembled and tested in HR's development laboratory at their Valencia headquarters. The rate sensor for the system is a component purchased from Fluid Servo Specialties in Rockford, Ill.

The expected development program duration is 24 months.

In discussing the contract award, Tony E. Singer, business management director for advanced technology said: ''HR Textron has made major research and development advances in fluidic applications. This contract allows us to put these new concepts into primary flight control practice.''

HR will be supported by McDonnell Douglas Aircraft Co. (McAIR) in St. Louis, Mo., which will provide aircraft control and performance requirements for the program.

HR Textron designs and produces control actuation systems, servovalves, electronic products, automatic test equipment and other aerospace components for numerous helicopter, fixed-wing aircraft and missile and space vehicle applications.

HR Textron is a subsidiary of Textron Inc., a multi-industry company with operations focused in three business sectors -- aerospace technology, commercial products and financial services. With headquarters in Providence, R.I., Textron's 1989 revenues were over $7.4 billion.

IRVINE, CA (OCT. 2) BUSINESS WIRE - ReadiCare Inc. (NASDAQ:REDI) Tuesday reported record results of operations for the second quarter and six months ended Aug. 31, 1990.

Net income and earnings per share for the second quarter ended Aug. 31, 1990, increased by 32 percent and 22 percent, respectively, to $880,000, or 11 cents per share, vs. net income of $666,000, or 9 cents per share, reported for the second quarter of the previous year.

Systemwide patient revenues as well as management-fee revenues also reached new highs in the second quarter, both posting 22 percent increases over such

revenues for the comparable period of the previous year.

For the six-month period ended Aug. 31, 1990, the company earned $1,551,000, a 52 percent increase over net income of $1,018,000 reported for the comparable period of the previous year. Earnings per share increased by 46 percent to 19 cents per share vs. 13 cents per share reported for the six-month period ended Aug. 31, 1989.

ReadiCare operates 47 workers'-compensation outpatient medical and rehabilitation centers located throughout California, Washington and Nevada and provides a wide range of on-site workers'-compensation medical-management services to business and industry.

#90275b0663 10/02/1990 ~Business Wire

LOS ANGELES (OCT. 2) BUSINESS WIRE - Century MediCorp (NASDAQ:CEMC) Tuesday announced audited results for the year ended June 30, 1990.

For the year ended June 30, 1990 sales increased 36% to $59,610,411 from $43,760,567 in the year ended June 30, 1989. Net income for the year was $1,745,013 or $.38 per share including a net operating loss carry-forward of $569,340 or $.12 per share.

In the prior year, net income was $606,542 or $.15 per share including a net

operating loss carry-forward of $206,224 or $.05 per share. The substantial increase in earnings is due to increased enrollment and higher premiums at AmeriMed and the inclusion of Loma Linda Health Plan and VIP Health Plan which were acquired in November 1989 and April 1990, respectively.

Commenting on the results, Jacob Y. Terner, M.D., Chief Executive Officer said ''With a strong management team in place, and the successful integration of our acquisitions, we have continued to increase revenues and enhance our profitability. During the prior year, we completed a divestiture program that has removed us from our original business, the management of medical clinics, enabling the Company to focus on penetrating the regional HMO industry.

''Looking ahead,'' Dr. Terner added, ''we anticipate that revenues for Fiscal 1991 will reach approximately $100 million. Our enrollment, which has grown from 27,000 when we entered the HMO field in April 1988 to approximately 83,000 today, should continue to increase as we further expand our geographic coverage and intensify our marketing efforts to small businesses.''

Century MediCorp operates as a health maintenance organization through its wholly-owned subsidiaries, AmeriMed, based in Pasadena, VIP Health Plan in Oxnard and Loma Linda Health Plan in San Bernardino, all California-licensed HMOs. The HMOs provide comprehensive health care services to their approximately 83,000 Southern Californian members as an alternative to traditional indemnity medical insurance coverage. Century MediCorp also operates East Los Angeles Doctors Hospital, a 128-bed acute and subacute care hospital facility.

WHITE PLAINS, NY (OCT. 2) BUSINESS WIRE - IBM Tuesday announced a price reduction on one version of its Personal System/2(a) Model 80. The price reduction affects the PS/2(a) Model 80-121, which has been reduced 7 percent.

In addition, IBM has withdrawn four models of the PS/2 -- the PS/2 Model 30-001 and -021 and Model 80-111 and -311. The withdrawals are effective December 27, 1990.

The new price and configuration are listed below. Dealer prices may vary.

IBM PERSONAL SYSTEM/2	FORMER PRICE	NEW PRICE	STANDARD CONFIGURATION
Model 80-121	$7,495	$6,945	20 MHz 80386; 2 MB RAM; 1.44 MB diskette drive; 120 MB fixed disk.

(a) Trademarks: Personal System/2 and PS/2 are trademarks of International Business Machines Corporation.

MOUNTAIN VIEW, CA (OCT. 2) BUSINESS WIRE - The Xerox DocuTech Production Publisher, announced Tuesday by Xerox Corp., will support a PostScript Level 2 interpreter from Adobe Systems.

The PostScript Level 2 interpreter, to be offered as an option, integrates into the systems software of the Xerox DocuTech Media Server and the Xerox DocuTech Network Server. Level 2 is Adobe's major revision and extension of the PostScript page description language standard.

The DocuTech Publishing Series is among the first products to utilize Level 2 and is the first implementation capable of document production publishing at speeds up to 135 pages per minute with 600 dot-per-inch resolution.

''As one of the first products to result from the Adobe/Xerox partnership, this product signifies the arrival of both companies in providing solutions for high-end, high-volume in-house publishing,'' said Dr. Charles Geschke, Adobe's president and chief operating officer. ''This product also leverages the expertise and reputations of Adobe and Xerox in electronic printing and publishing.''

Bill Lowe, executive vice president of development and manufacturing for Xerox said: ''Our strategy with the DocuTech Publishing Series is to embrace industry standards and form alliances with industry leaders.

''With this strategy, we hope to capture the energy of the desktop computer explosion and become the premier supplier of printers, smart copiers, and multifunctional publishing systems.''

Adobe is the developer of PostScript, an industry-standard page description language for electronic printing and publishing. Adobe offers the PostScript interpreter on a licensing rights basis to major original equipment manufacturers. Xerox acquired licensing rights to the PostScript interpreter

through an agreement with Adobe that was announced in June.

The Xerox DocuTech Publishing Series is an evolutionary family of products that will integrate corporate and commercial publishing environments from the point of creation through production publishing. The Xerox DocuTech Production Publisher, the first product in the new series, is a multifunctional document publishing device that provides high-speed, high-resolution production publishing.

Xerox and Adobe said they plan to continue to collaborate on publishing solutions as the DocuTech Publishing Series evolves.

ONTARIO, CA (OCT. 2) BUSINESS WIRE - John Cavallucci, president of CVB Financial Corp. announced Tuesday that CVB will begin a program of repurchasing its own shares of common stock in one or more open-market or private purchases.

The board of directors of CVB feels that at times its stock is undervalued and represents a good purchase on the part of CVB that will significantly enhance the shareholders' investment in CVB.

The officers of CVB have been authorized to repurchase, from time to time, shares of common stock for up to an aggregate purchase of $3 million. The common stock's current price is $9.375.

At Sept. 30, 1990, CVB had consolidated assets of $509.9 million, consolidated net loans of $358.1 million and consolidated deposits of $457.1 million. As of Sept. 30, 1990, there were 5,957,640 shares of common stock issued and outstanding.

BEDMINSTER, NJ (OCT. 2) BUSINESS WIRE - Officials of NUI Corp. (NYSE:NUI) Tuesday announced the planned dates of the NUI and Pennsylvania Enterprises Inc. (NASDAQ:PENT) shareholder meetings to consider the proposed merger

between NUI and PEI.

The NUI and PEI meetings will be held on Oct. 30 and 31 respectively, while United Water Resources (NYSE:UWR) announced that a UWR shareholder meeting date to consider the sale by PEI of its water operations to UWR is likely to be in November or as soon as practical and will be announced at a later date as soon as it receives clearance of its proxy materials by the Securities and Exchange Commission.

The timing of the proposed merger and sale of PEI and its subsidiary, Pennsylvania Gas & Water Co. (PG&W), has required an amendment of some provisions of the definitive agreements. The amendments were signed by all parties late yesterday afternoon.

The amendments give the parties until Dec. 15 to satisfy certain conditions. A closing would have to be held by Jan. 16, 1991. NUI officials said that while progress has been slower than they anticipated when the agreements were signed five months ago, a closing could take place before year end.

The Merger Agreement between NUI and PEI provides for stockholders of PEI to receive from NUI $52.05 for each share of PEI common stock. Forty percent of the aggregate purchase price will be payable in cash and the remaining 60 percent in shares of NUI common stock, valued at the average price over 20 trading days prior to the merger.

In no event will PEI stockholders receive more than 3.0 shares or fewer than 2.6 shares for each full share of PEI common stock exchanged for NUI common stock. Immediately following the merger of PEI into NUI, PG&W will be merged into NUI.

The Asset Purchase Agreement signed on April 23 provides for United Water's acquisition of the water operations and related assets of PEI for approximately $220 million, subject to adjustment for several factors, including among others, the level of expenditures associated with the construction program currently under way by PEI.

The consummation of the transactions is conditioned upon receipt of regulatory approvals, stockholder approvals and certain other conditions.

NUI Corp., headquartered in Bedminster, is an exempt public utility holding company engaged in the distribution of natural gas to approximately 300,000 customers in New Jersey and Florida.

EAST HARTFORD, CT (OCT. 1) BUSINESS WIRE - TRC Cos. Inc. (AMEX:TRR), announced that its wholly owned subsidiary, TRC Environmental Consultants Inc. (TRC-ECI) has signed a contract with the U.S. Environmental Protection Agency (EPA) estimated at $9,750,000.

The 5-year program for technical assistance on development and service of a unified air emission database for EPA's Office of Air Quality Planning and Standards, includes an initial year estimated at $1.7 million with $8.0 million in options over the 4 subsequent years.

With this contract award, TRC-ECI emerges as the government's chief expert on organizing and managing air emission data. The date which broadly comes from industrial sites, state and local air pollution agencies and virtually all sectors of the federal government is extensively used in government air programs nationally.

The increasing importance of the database in light of the proposed new Clean Air's emphasis on emission inventory, together with TRC's knowledge and proven strength with air permitting and air toxics assessment strategically positions TRC-ECI as a leading environmental firm in the industrial and government marketplaces.

TRC Cos. and its engineering and instrument subsidiaries service clients from offices in 14 states.

NEW HARTFORD, NY (OCT. 2) BUSINESS WIRE - PAR Technology Corp. (NYSE:PTC) PAR Microsystems Corp., a subsidiary of PAR Technology Corp., introduced Tuesday in Atlanta, three industrial application software products for IBM's data collection systems and family of 7527 data collection terminals.

PAR is demonstrating these new products, and the IBM systems' they support, at the SCAN-TECH 90 Conference and Exhibition, Oct. 2 - 4, at the Georgia World Congress Center in Atlanta.

PAR's three new products, CIMscribe, CIMbridge, and CIMprint, are the first vendor-supplied application software packages to fully support IBM's new 7527 multi-line and graphics intelligent terminals. These products execute in IBM PS/2 or Industrial Computer OS/2 environments.

CIMscribe integrates user-application tools with such factory-floor functions as data collection transaction processing, time and attendance, labor reporting, job and material tracking, label printing, and data importing/exporting. CIMscribe functions as a distributed node in a host-based computer integrated manufacturing system or as a standalone data collection system.

CIMbridge enables IBM's many 8100/364X customers to cost effectively migrate their application programs to IBM's strategic Computer Integrated Manufacturing (CIM) and Systems Application Architecture (SAA) platforms. These customers can enhance performance, upgrade at convenient intervals, and preserve their investment in 8100/DPPX applications software and plant wiring.

CIMprint processes input from CIMbridge, CIMscribe, or user-written applications to produce user-defined images for printing tags, labels, travelers, and other documents. Its printed output can include any combination of text, bar codes, magnetic encoding, and optical character reader (OCR) fonts.

These products result from the close relationship of PAR and IBM as Business Partners. PAR develops and manufactures Data Collection Systems that IBM exclusively markets to its industrial-sector customers. In addition, PAR performs, for the industrial marketplace, Systems Integration work-customizing, installing, and supporting Data Collection Systems for IBM CIM customers.

This Business Partnership typifies PAR's corporate history of long-term relationships with major corporations or agencies and attests to IBM's confidence in PAR's technology skills and product quality.

PAR also supplies transaction-processing information systems to food-service and convenience-store markets and provides computer-based system design, development, evaluation, and integration services to the Federal Government.

#90275b0681 10/02/1990 ~Business Wire

BATESVILLE, IN (OCT. 2) BUSINESS WIRE - Tuesday, Hillenbrand Industries Inc. (NYSE:HB) announced unaudited results for the third quarter ended Sept. 1.

Hillenbrand Industries Inc.
Summary of Consolidated Revenues and Income
(In Thousands Except Per Share Data)

	Three Months Ended		Nine Months Ended	
	09/01/90	09/02/89	09/01/90	09/02/89

Net revenues:				
Industrial	$250,015	$232,146	$792,379	$718,367
Insurance	9,471	5,396	24,929	13,760
Total net revenues . .	259,486	237,542	817,308	732,127
Inc. before inc. taxes .	26,735	26,378	93,932	88,012
Income taxes	10,721	10,877	37,667	36,294
Net income	16,014	15,501	56,265	51,718
Earnings/common share .	.43	.42	1.52	1.39

W August Hillenbrand, president and chief executive officer, stated that during the third quarter, total revenues of $259.5 million were 9.2 percent higher than the third quarter of 1989. Industrial segment revenues rose 7.7 percent to $250.0 million, while the Insurance segment increased 75.5 percent to $9.5 million for the comparable period. Net income of $16.0 million was 3.3 percent higher, and earnings per share of 43 cents compared to 42 cents in last year's third quarter. All 1989 figures have been restated for the new insurance accounting standard adopted this year.

Both Health Care companies reported higher revenues in the third quarter. SSI's growth and operating results were affected by a seasonal drop in rental beds in-use.

Revenues in the Durables segment, comprised of American Tourister and Medeco, were flat due to a generally weak economy. Operating profits were also affected by higher manufacturing and fixed costs.

The increase in revenues and improvement in operating margin at the Batesville Casket Co. were due to a combination of selling price and volume increases.

The Forethought insurance group's performance continues to meet management's expectations. New product and service enhancements have been well-received, which should strengthen Forethought's growing leadership position.

CINCINNATI (OCT. 2) BUSINESS WIRE - Cincinnati Bell Inc. (NYSE:CSN) announced Tuesday it has completed the acquisition of Unitel Communications Inc., an Ohio based long distance service reseller.

The Public Utilities Commission of Ohio has approved the transaction.

The purchase price was not disclosed.

Unitel will be merged into the Cincinnati Bell Long Distance division of LDN

Communications, the resale subsidiary of Cincinnati Bell Inc. Based in Columbus, Ohio, Unitel provides service to the Cleveland, Columbus, Dayton and Akron areas. The relationship gives LDN an entry into the northern half of Ohio. LDN currently operates in Michigan, Indiana, Kentucky and Ohio.

Cincinnati Bell Inc. supplies telecommunications, information management and telemarketing services.

Services include information systems development, data processing and systems consulting, discount long distance telecommunications, marketing research, electronic database services, telecommunications equipment supply and repair, and inbound and outbound telemarketing.

#90275b0689 10/02/1990 ~Business Wire

CHICAGO (OCT. 2) BUSINESS WIRE - Southern Pacific Lines announced Tuesday that it has obtained the necessary authorization from the Interstate Commerce Commission to extend its service from Kansas City to Chicago, a step which permits SP Lines to offer direct service between Chicago and the West Coast.

Southern Pacific Lines will be operating over trackage rights obtained from the Burlington Northern railroad between Kansas City and Chicago. SP will operate its own trains with its own crews.

Limited operations over the trackage rights began on Friday, Sept. 28, and SP said operations will be increased over the next several weeks as crews are qualified and tariffs for the new route take effect.

SP Lines, the last of the major western railroads without direct access to the transportation hub of Chicago, reached the city on lines from the Gulf Coast and Southwest last November, after SP Lines' parent, Rio Grande Industries, purchased a 282-mile St. Louis-Chicago line from the Chicago, Missouri & Western railroad.

SP Lines is the system of rail carriers owned by RGI and includes Southern Pacific Transportation Co., Denver and Rio Grande Western, St. Louis Southwestern, and SPCSL Corp.

Obtaining trackage rights on the 466-mile Burlington Northern route across Missouri and Illinois now also gives the SP system a fast, competitive route from California points via Kansas City to Chicago, Mohan said.

The operating unit for SP Lines on the new route is SPCSL Corp. As the owner of the St. Louis-Chicago line across Illinois, SPCSL already has operating rights in the Chicago area which will be necessary to support SP Lines' new Kansas City-Chicago service. SP Lines is engaged in a $36 million improvement project on the St. Louis route, to speed up both Amtrak and freight service.

Trackage agreements also have been obtained from the Norfolk Southern rail system, which operates about 24 miles of the route in Missouri through joint or paired track agreements with BN, SP said.

SP's Mohan said extension of SP Lines' service into Chicago was supported before the ICC by almost 1,000 shippers and many state and local government agencies.

#90275b0696 10/02/1990 ~Business Wire

ZAANDAM, The Netherlands (OCT. 2) BUSINESS WIRE - An extraordinary General Meeting of Shareholders of Koninklijke Ahold nv, on October 30, 1990, has the following items on its agenda: Cancellation of Preferred Stock

One proposal is the cancellation of all Koninklijke Ahold preferred stock outstanding. The Board of the ''Stichting Ahold Continu teit'' (Ahold Continuity Foundation), holder of all preferred stock outstanding, has given its approval. Last year preferred stock was issued as a safeguard against a possible unfriendly takeover. The Corporate Executive Board of Koninklijke Ahold and the Board of the ''Stichting'' consider this threat to be over, so that the preferred stock can now be cancelled. Stock-split

At the same meeting it will be proposed to split each Ahold Dfl 5.00 par value common share into two Dfl 2.50 par value shares. The stock-split is proposed in connection with the intended US listing of Ahold on NASDAQ, the National Association of Security Dealers Automated Quotation System. The stock-split is meant to encourage trading in Ahold stock. Through the split Koninklijke Ahold expects to bring the market price of its shares more in line with those of comparable companies listed in the United States.

Based in The Netherlands, Koninklijke Ahold is one of Europe's largest food retailers and one of the top 10 supermarket operators in the USA. Ahold's shares trade on the Amsterdam Stock Exchange and may be accessed on the Reuters Equities 2000 service under the symbol AHLN.AS and on Quotron under the symbol AHOLN.EU. They also trade in ADR form in the US (symbol 3KAHLY on the electronic OTC Bulletin Board).

STATEN ISLAND, NY (OCT. 2) BUSINESS WIRE - Atlantic Express Inc. (NASDAQ:ATEX) announced Tuesday expected financial results for the year ended June 30.

The company also annouced it has experienced a delay in finalizing its financial statements for the 1990 year end as a result of a change in its independent accountants to Laventhol & Horwarth. The company presently expects completed financial statements to be available in approximately two weeks.

Revenues for the year ended June 30 are projected to increase to approximately $87.8 million as compared to the $70.5 million for the prior year. Net income for the 1990 year end is expected to decrease to approximately $500,000 as compared to $1.8 million for the 1989 year end.

Atlantic Express Inc. is one of the largest school bus contract carriers in New York City with a fleet of 1,400 buses currently transporting approximately 65,000 school children daily. The company also provides charter, tour and commuter bus transportation services. Atlantic Express Inc. operates an entertainment division presently consisting of the Showplace Bowling Center and a joint venture interest in a ten-plex theatre complex in Staten Island, as well as an upscale restaurant in Piscataway, N.J.

The Showplace Center encompasses a 64 lane bowling facility with computerized state-of-art equipment, an upscale restaurant, two cocktail lounges and additional retail space.

NEW YORK (OCT. 2) BUSINESS WIRE - Duratek Corp. (NASDAQ/NMS:DRTK), a subsidiary of National Patent Development Corp. (AMEX/PSE:NPD), entered into a distribution agreement with Westinghouse Electric Corp. in August.

Under this agreement, Westinghouse Electric Corp. will become the sole distributor of Durasils for use in commercial nuclear power plants outside the U.S. and Canada with the exception of France, Yugoslavia, Taiwan, Japan and Korea.

Durasils are ion-specific, ion exchange media, proprietary to Duratek, that have highly selective exchange capabilities. Unlike organic media, which use

most of their exchange sites removing materials that can safely be returned to the environment, Durasils use most of their exchange sites to remove radioactive elements such as cobalt, cesium, and iodine from wastewater. This results in a greater volume of water being cleaned with less media than is possible with organic media.

Since their commercialization in 1984, Durasils have been used to remove radioactive elements from wastewater at U.S. commercial nuclear plants and DOE nuclear facilities. The distribution agreement between Westinghouse Electric Corp. and Duratek is expected to facilitate the expansion of Durasils into the European nuclear marketplace.

#90275b0703 10/02/1990 ~Business Wire

WILLOW GROVE, PA (OCT. 2) BUSINESS WIRE - Applied Intelligent Systems Inc. and Kulicke and Soffa Industries Inc. Tuesday announced an agreement in which K&S will purchase substantial numbers of machine vision computers and software from AISI to be integrated with K&S' semiconductor production equipment.

The agreement could be worth millions of dollars over the next three years.

''This new agreement represents a partnership between two companies with the world's most advanced technology in their respective areas,'' said Jim Anderson, president and CEO of AISI.

According to the agreement, AISI will sell its AIS-3000 family of vision computers and vision software to K&S for integration into K&S' semiconductor production equipment. The AISI vision systems are based on parallel processing hardware and neural network software.

The vision computer will perform such tasks as precisely locating integrated circuit die, locating the leads that are to be bonded to the die and other, as yet unspecified, tasks. The AISI systems will replace K&S' own vision system on selected models of K&S' products.

AISI's neural network approach, which employs hundreds of thousands of individual software processing units, rather than the central CPU used in conventional computing, has been in use in many manufacturing industries for the past three years. The K&S/AISI agreement, however, represents the most extensive use of this technology to date.

K&S is one of the largest and most experienced users of machine vision in the world. Their present machine vision computer has been in constant use since

K&S designed and built it 10 years ago. More than 7,500 machine vision computers have been shipped by K&S as components of the company's products.

Kulicke and Soffa is a leading global supplier of assembly equipment and systems for the semiconductor industry. K&S serves both the IC and hybrid markets with sales and service facilities worldwide. In addition to wire bonding systems, the company's product line includes wafer preparation, wafer dicing and die bonding systems. Traded on the Over-the-Counter National Market (NASDAQ: KLIC), the company's headquarters are in Willow Grove, Pa.

Applied Intelligent Systems Inc., manufactures a complete family of machine vision computers and software. These computers and software are used by many OEM's, corporate automation groups and research institutions to develop advanced manufacturing processes that require machine vision for improved quality and reliability.

NEW YORK (OCT. 2) BUSINESS WIRE - Shorewood Packaging Corp. (NASDAQ:SHOR) Tuesday announced the acquisition of certain of the operating assets of Toronto Carton Ltd. for a cash consideration of approximately $2.5 million.

Toronto Carton Ltd., whose annual volume is approximately $10 million, is a manufacturer of folding cartons in Toronto, Canada servicing both the Canadian and United States markets in the general consumer packaging area.

As part of this acquisition, the litigation between Shorewood and Toronto Carton Ltd. has been discontinued by the parties.

''We are extremely pleased that we have completed this acquisition,'' stated Paul B. Shore, chairman of the board, president and chief executive officer. ''This acquisition will enable Shorewood to further expand its operations in the general consumer packaging area in both the U.S. and Canadian markets.''

Shorewood Packaging Corp. and its subsidiaries print and manufacture high quality paperboard packaging for such industries as music, home video, food, tobacco, film, cosmetics and toiletries. The company's executive offices are in New York City, with manufacturing and sales operations in New York, Georgia Alabama, Virginia, Illinois, California, Canada and England.

#90275b0710 10/02/1990 ~Business Wire

SEATTLE (OCT. 2) BUSINESS WIRE - SkyPix Corp. announced Tuesday that it will lease satellite capacity from Hughes Communications Inc., under a long-term agreement between the two companies.

SkyPix is the 80-channel direct-to-home satellite service that is expected to revolutionize home entertainment by offering more choice than cable TV and more convenience than video stores.

The system will become operational in early 1991 and will eventually expand to utilize its full 250-channel capacity.

The agreement - one of the largest satellite agreements ever - provides SkyPix with 10 transponders on SBS 6, an all-Ku-band satellite, and includes an arrangement for SkyPix to migrate its service in early 1993 from SBS 6 to Galaxy IV, Hughes Communications' planned next-generation hybrid C- and Ku-band satellite. SkyPix will lease 12 Ku-band transponders on Galaxy IV.

SkyPix is designed to provide consumers with a whole new way to watch TV, while offering viewers the world's first in-home video store. SKyPix viewers will be able to choose from 40 to 50 major Hollywood films at any time in a virtual on-demand programming schedule. In addition to movies, SkyPix will offer an exciting selection of news, sports, major live events, music, original children's programming and a package of superstations from around the nation.

The heart of the SkyPix system is a small, lightweight 22-inch to 36-inch antenna (size dependent on geographic location) and sleek remote-control receiver that will be sold through consumer electronics specialty chains and satellite retailers at a suggested retail price of $699. As for programming, Hollywood's major studios and independents have already agreed to supply product to SkyPix.

The breadth of programming to be offered by SkyPix is made possible by a dramatic breakthrough in digital video compression technology developed over the past four years. This exclusive SkyPix technology can ''squeeze'' up to 20 channels into the bandwidth of a single satellite transponder.

Another key technology in the SkyPix system is the use of medium-power Ku-band satellites. Transmissions from Ku-band satellites -- which are much stronger than those of C-band satellites - can be received by small dishes, making SkyPix practical for a wide range of homeowners.

#90275b0711 10/02/1990 ~Business Wire

SAN DIEGO (OCT. 2) BUSINESS WIRE - Audre Recognition Systems Inc. (NASDAQ:ADREF) has set up its Document Conversion System at the U.S. Army's Logistic Support Test Bed Facility at Fort Monmouth, N.J.

''AUDRE's equipment is being evaluated by the Army as it relates to the technology required for defense contractors to meet the Computer-aided Acquisition and Logistics Support (CALS) standards established by the Department of Defense,'' stated Thomas F. Casey, AUDRE's chairman and chief executive officer.

The conflict in Iraq has caused the U.S. Military to rapidly deploy weapon systems and troops on a massive scale. Included with this deployment are the Defense Department's newest weapons, including the F-117 Stealth Fighter and the M-1 Tank. The Military's Logistics Command faces the challenge of procurement, deployment, maintenance and resupply of these items.

In order to more efficiently meet future challenges of this nature, the Department of Defense is currently investigating some of the most advanced computer technologies in the world, with the intent to select the premier method for converting technical information such as maps or maintenance manuals into digital data which can be rapidly accessed and used in support of activities such as Desert Shield.

Once transformed into computer data through the AUDRE System, critical information could be transmitted directly to battlefields or be used to assist in the procurement and management of sophisticated weapon systems.

Repair manuals, containing the most recent updates or parts information, could conceivably be printed on-site to maintain systems rapidly deployed and which incorporate the newest equipment modifications.

AUDRE, a seven year old concern, is a leader in the field of automated conversion. The company designs, develops and markets a line of proprietary artificial intelligence-based software systems to convert paper or microfilm drawings, blueprints, technical documents and maps into computer-intelligent formats.

AUDRE's products are used primarily within the multi-billion design/engineering, mapping and technical publications industries. Some of its customers include McDonnell Douglas, Niagara Mohawk Power Co., TRW, Chevron, Pacific Bell, United Air Lines and The California Department of Transportation.

#90275b0712 10/02/1990 ~Business Wire

CAMBRIDGE, MASS. (OCT. 2) BUSINESS WIRE - Intermetrics Inc. (NASDAQ:IMET) Tuesday reported revenues of $13,825,000 for the second quarter of fiscal year 1991 which ended Aug. 31, 1990, compared to $11,648,000 for the second quarter of fiscal 1990.

Net income for the quarter was $515,000, or 14 cents per share, compared to $562,000, or 16 cents per share, a year ago.

For the first six months of fiscal 1991, revenues were $26,096,000 compared to $23,252,000 for the same period last year. Net income was $1,011,000, or 28 cents per share, compared to $1,157,000, or 32 cents per share, a year ago.

In making the announcement Joseph A. Saponaro, president and chief executive officer, noted that ''The higher revenues resulted primarily from the increased backlog recorded during the latter half of the prior year and beginning of the new year. The company's growing activity as a prime contractor, billing customers for its services and those of its subcontractors has contributed to the increase in revenues.

Contract awards recorded during the second quarter retained the company's backlog at approximately $50 million. The total potential value associated with this backlog grew approximately 6 percent to $161 million during the second quarter.

Earnings were comparatively lower due primarily to the competitive nature of the U.S. Government defense-related market. Intermetrics believes that its sound balance sheet and steady backlog represents an advantage in an environment characterized by rising competition and growing economic

uncertainties.''

Headquartered in Cambridge, Intermetrics is a leading software company providing professional engineering and software services, standard software products and integrated systems to commercial and U.S. Government customers. The company specializes in embedded computer-based information systems.

KINGSTON, NY (OCT. 2) BUSINESS WIRE - National Micronetics Inc. (NASDAQ: NMIC) announced final financial results for its fourth fiscal quarter ended June 30, 1990.

For the fourth quarter, National Micronetics reported sales of $10,782,000 resulting in a net loss of $1,309,000 compared to a year earlier sales of $10,022,000 and a net loss of $435,000.

Final results for the year ended June 30, 1990 included sales of $42,126,000 with a net loss of $5,121,000 compared to sales of $41,932,000 and a net profit of $944,000 for the prior year.

The auditors, KPMG Peat Marwick, noted that the financial statements had been prepared by assuming that National Micronetics Inc. will continue as a going concern; however, the auditors disclaimed expressing an opinion on the financial statements for the fiscal year ended June 30, 1990 by reason of uncertainties as to the company's ability to obtain the financial resources necessary in order to convert its MIG (Metal-In-Gap) technology into volume production.

Robert C. Ristagno, president of National Micronetics, noted that, as previously announced, the company is currently engaged in negotiations with an offshore company looking for an equity investment by that offshore company in NMI with a series of collateralized bridge loans to precede that investment.

If the negotiations are successful, the company anticipates it will be able to achieve satisfactory production of its new products.

National Micronetics Inc. is an independent magnetic recording head manufacturer for the disk drive industry.

MILPITAS, CA (OCT. 2) BUSINESS WIRE - Octel Communications Corp. (NASDAQ:OCTL) and Hewlett-Packard Co. (NYSE:HWP) Tuesday announced the signing of a two-year $4 million contract under which Hewlett-Packard will purchase Octel voice processing systems and applications software packages for expansion of its international voice mail network.

Hewlett-Packard is currently among Octel's largest customers, with more than 45,000 HP employees in the United States and Europe using Octel voice processing systems.

''Octel systems have proven themselves to be an important element of our communications strategy within Hewlett-Packard,'' said Lloyd Taylor, director of corporate information systems at HP.

''The systems we have purchased from Octel over the last five years have improved our employee productivity and have paid for themselves through significant cost savings. We are expanding the Octel network to provide for increased use of this valuable technology.''

Octel Communications Corp. designs, manufactures and markets a full line of high-performance voice processing systems. Octel's Aspen product line is sold in the United States, Canada and overseas to small business and large multisite corporations.

The Sierra multiple-application voice processing platform is a very large

capacity system designed to meet the special needs of telephone companies and other voice information service providers. Octel was founded in 1982 and has headquarters in Milpitas.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 92,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

COLUMBUS, OH (OCT. 2) BUSINESS WIRE - The board of directors of Drug Emporium Inc., (NASDAQ:DEMP) Monday declared a cash dividend of six cents per share payable Jan. 2, 1991, to the holders of record on Dec. 3, 1990.

This dividend represents a 20-percent increase over the dividend paid in January 1990. Drug Emporium currently has about 12.9 million shares outstanding.

Other actions taken by the board included the election of Robert H. Morosky, 49, as a director. Philip I. Wilber, chairman of the board, said: ''We are delighted to have someone with bob morosky's vast retailing experience available. We expanded the board to 12 members to accommodate him. His advice and counsel will be invaluable to the board in guiding Drug emporium in a rapidly changing industry.''

Morosky is currently chairman of Safelite Glass Corp., a privately owned manufacturer and distributor of auto glass with five plants, 45 warehouses and 600 company-owned stores. He is also a director of Lear Siegler Inc., a private manufacturing conglomerate, and Moen Inc., a privately owned plumbing-fixture manufacturer. His business activities include his own investment firm and he is a limited partner in Forstmann Little & Co., an investment company.

Having spent most of his business career in key retailing positions, Morosky served as president of Allied/Federated Department Stores and for 15 years was with the Limited Inc., as vice chairman. Earlier, he was a certified public accountant and retailing consultant with Arthur Andersen & Co.

#90275b0746 10/02/1990 ~Business Wire

NEW ORLEANS (OCT. 2) BUSINESS WIRE - Freeport-McMoRan Inc. (NYSE:FTX) announced today that it had executed an agreement in principle with plaintiffs to settle the lawsuits which have been filed challenging FTX's previously announced merger agreement with Freeport-McMoRan Oil & Gas Co. (NYSE:FMP), which had been entered into prior to the early-August Iraqi invasion of Kuwait.

Pursuant to the proposed settlement, which is subject to court approval, FTX has agreed to increase the consideration to be paid in the merger (in the form of FTX Common Stock) for each publicly-held share of FMP Common Stock to $11.00 per FMP share from $10.50 per FMP share.

The fraction of a share of FTX Common Stock to be received for each FMP share upon completion of the merger will be determined by valuing FMP at $11.00 per share and valuing FTX at an average of the composite tape closing prices for 10 trading days prior to formal FMP shareholder approval.

As previously agreed, for purposes of calculating this fractional FTX share, the FTX stock price will be no lower than $31.875 per share and no higher that $38.875 per share. Under the formula, the fraction of an FTX share to be received for each FMP share will be between .345 and .283 FTX share per FMP share.

The agreement also provides that FTX's obligation to consummate the merger is subject to court approval of the settlement and the absence of any material objection being filed to the settlement.

FTX and plaintiffs have agreed to use their best efforts to obtain court approval of the settlement by Nov. 13, 1990, so that the merger can be consummated in time for FMP stockholders to receive the scheduled FTX December dividends aggregating 62.5 cents per share of FTX common stock.

If the conditions to consummation of the merger are not satisfied by Nov. 15, 1990, the agreement provides that FTX will have no obligation to pay these dividends to FMP stockholders or otherwise compensate them therefor. FTX anticipates amending its merger agreement with FMP shortly to reflect the terms of the proposed settlement.

FTX is a leader in the exploration, mining, development, production, processing, and marketing of natural resources. The company's assets include

sulphur, phosphate rock, phosphate fertilizer products, oil and natural gas, copper, gold and other natural resources.

EATONTOWN, NJ (OCT. 2) BUSINESS WIRE - Roberts Pharmaceutical Corp. (NASDAQ:RPCX) and its U.K. based subsidiary, Monmouth Pharmaceuticals Ltd. of Guildford, England, jointly announced Tuesday that an agreement has been reached with Prographarm Laboratories of Paris, whereby Monmouth has acquired the product rights for two cardiovascular products in the U.K. and one of these in the Republic of Ireland.

The products are a recently approved anti-arrhythmic and a beta-blocker currently awaiting formal approval. One product is available in immediate and sustained release forms, the other in sustained release, and both will be marketed and sold under Monmouth's own distinctive trademarks. It is expected that both products will be launched during the next business quarter.

Under the terms of the agreement, Prographarm Laboratories will provide Monmouth's entire requirements of the products in finished form.

Monmouth is currently marketing kidney stone and gall stone therapy products in the U.K., ROWACHOL and ROWATINEX; the cardiovascular MIDON, in the Republic of Ireland, and the broad based Sinclair product line in Ireland.

Roberts Pharmaceutical Corp. is in the business of acquiring, developing and marketing pharmaceuticals for use in the treatment of cancer, respiratory disease, pain management, endocrine/metabolic disorders, cardiovascular disease, urinary disorders and iron overload conditions in the United States and abroad.

BILLERICA, MA (OCT. 2) BUSINESS WIRE - Bull HN Information Systems Inc. Tuesday announced it has completed the acquisition of Honeywell Federal Systems Inc. from Honeywell Inc.

The companies have received all necessary U.S. government approvals and have announced a final purchase price of $93 million.

Bull's new wholly owned subsidiary has changed its corporate name to HFS Inc. but will continue to be called HFSI. HFSI will continue its mission of providing systems integration, computer products and technical services to the U.S. government, prime contractors and NATO. The unit, which employes approximately 1,600 people, will contine to operate from its current McLean, Va., headquarters. HFSI's 1989 sales were $274 million.

Due to Bull's foreign ownership, HFSI will be operated under a proxy arrangement. The three independent proxyholders, retired U.S. Air Force Gen. Monroe W. Hatch Jr, retired U.S. Army Gen. John A. Wickham Jr. and Earl C. Williams, chief executive officer of BDM International Inc., will represent Bull's interests and serve as members of the HFSI board of directors

Several successful government contractors are owned by foreign interests and operate under proxy agreements. Reviewed and approved by the Department of Defense, the proxyholders represent the business interests of the shareholder (in this case Bull) and provide guidance to the operation's management. At the same time, they ensure that classified information that is part of the normal course of business is protected.

Bull HN Information Systems Inc. provide proprietary and open information systems, software and services to customers in 28 countries. With over 17,000 employees, including 8,100 employees based in the United States, the company had revenues of $2.1 billion in 1989.

#90275b0761 10/02/1990 ~Business Wire

WHITE PLAINS, N.Y. (OCT. 2) BUSINESS WIRE - IBM Tuesday announced a series of new products enhancing its Advanced Function Printer family, including the IBM 3900, the highest-speed printer IBM has ever announced.

With today's additions, the IBM Advanced Function Printer family provides large-system customers a full range of printer options from high-speed cutsheet and continuous-forms printers to desktop models. Advanced Function Printing software announced today enables customers to centrally manage all printing in their enterprise, and to integrate printing tasks with other system-based business solutions for increased productivity.

''This is the most comprehensive printer announcement IBM has ever made,'' said William O. Grabe, IBM vice president and general manager, marketing, IBM U.S. Marketing and Services.

''Never before has IBM provided customers such a broad selection of features for both cutsheet and continuous-forms printers with this range of speeds.''

The new advanced function printers, along with currently supported page printers, can be attached (via 3270 controllers and adapters) to both System/370 (a) and the recently announced System/390 (a) processors.

New Printers and Printer Features

New products announced today include:

IBM 3900 Advanced Function printer - a non-impact, continuous-forms printer that provides customers all-points addressable printing at speeds up to 229 impressions per minute (ipm) and up to 5.6 million standard 8 1/2-inch forms per month.

IBM 3828 Advanced Function MICR printer - a channel- attached, cutsheet duplex printer that does Magnetic Ink Character Recognition (MICR) printing at speeds up to 92 ipm and up to 2 million impressions per month using a 480-picture element (PEL) printhead.

IBM 3835 MICR Post-Processing Interface - an attachment to the 3835 control unit. This interface directs appropriate MICR print fields to the Troy TMP 3835 MICR printer for cost-effective MICR solutions on applications that require continuous-forms output. This solution is provided to customers in cooperation with Troy, a division of Pierce Companies, Inc.

IBM Advanced Function Image and Graphics Feature for the IBM 3825 and 3835 Page Printers - a feature that enables these general-purpose printers to process compressed image and vector graphics. This feature also provides customers increased performance for existing text and raster image applications.

IBM LaserPrinter 4028 Model NS1 - an advanced function general-purpose letter-quality printer that attaches to the 3270 family of controllers and adapters. It prints text, images, graphics, barcodes and optical character recognition at up to 10 ipm and 20 thousand impressions per month with 300 PEL addressability. It is the newest member of the IBM LaserPrinter family and provides the same features as the LaserPrinters designed for the IBM PS/2 and AS/400.

AFP support for the IBM 4028 Model NS1 enables customers to convert applications written for 240 PEL fonts and images to 300 PEL font and images

used by the 4028. SAA Image Architecture enables the 4028 printer to perform resolution correction for these images.

New Advanced Function Printing Software Features

New functions for IBM Advanced Function Printing include a new version of Print Services Facility (PSF) for Multiple Virtual Systems (MVS), Virtual Machine (VM) and Virtual Storage Extended (VSE) operating systems that includes support for the new printers announced today.

PSF is the product that accepts application program data and prints it (optionally merged with image, graphics, or overlays) on IBM printers that span a wide range of speeds from 3 to 229 impressions per minute. Differences between printer characteristics and carrier protocols, such as channels and telecommunications lines, are handled automatically by PSF. PSF also provides customers system management functions such as automatic resource management, message routing and comprehensive print job accounting.

Enhancements for PSF Version 2 include:

A new package providing support for all AFP printers which gives customers a simpler way of installing PSF and managing their application growth.

A new pricing structure, including a low entry price, that more closely aligns the price of print driver software with the value received by the customer.

Support for IBM 4224 and 4234 printers in PSF/MVS Version 2. Support for IBM 3812 and 3816 printers and Systems Application Manager (SAA) Remote PrintManager in PSF/VSE Version 2.

PSF/VSE Version 2 also gives customers improved job management functions and a sample utility for transferring print resources from an MVS or VM system to VSE.

New functional capabilities that simplify the development of print applications and the management and operation of PSF software and AFP printers.

Additional New Software

New IBM AFP Core Interchange fonts available with Version 2 of PSF are part of the implementation IBM announced on March 5, 1990 of the Adobe Systems Inc. font technology. These fonts will give customers consistent printing across AFP platforms and printing of OS/2 Presentation Manager-based applications on host-attached printers. Availability of display and printer fonts with the same typeface and size enables Presentation Manager applications to give users WYSIWYG (what-you-see-is-what-you-get) capability on printers.

Document Composition Facility (DCF) Version 1 Release 4 enhances customer

inhouse publishing and text processing solutions through many new functions such as shading, color separation and support for the IBM LaserPrinter 4028. These enhancements meet a number of customer needs and requirements of SHARE and GUIDE user groups.

Pricing and Availability

The IBM 3900 Advanced Function Printer is planned for limited availability in the second quarter of 1991 and general availability in the third quarter of 1991 for a list price of $289,500.

The IBM 3828 Advanced Function MICR Printer availability is planned for November 1990 for a list price of $260,000.

The IBM Advanced Function Image and Graphics feature availability is planned for October 19, 1990 for the IBM 3825 page printer and in the first quarter of 1991 for the IBM 3835. List price for the feature is $12,750 for either printer.

The IBM LaserPrinter 4028 Model NS1 availability is planned for October 12, 1990 for a list price of $6495.

IBM PSF/VSE Version 2 availability is planned for November 16, 1990. IBM PSF/MVS Version 2 and PSF/VM Version 2 availability are planned for March 29, 1991. List prices range from $250 to $2200 per month.

Marketing and Channels

The IBM 3835 MICR Post-Processing Interface is available only on a request-for-pricing-quotation basis. The Troy TMP 3835 MICR Printer is available through IBM's Cooperative Hardware Marketing Program.

All other products are marketed in the United States by IBM's U.S. Marketing & Services organization. The IBM LaserPrinter 4028 Model NS1 is also marketed by IBM Authorized Industry Remarketers. -0-

NEW YORK (OCT. 2) BUSINESS WIRE - Hellmuth, Obata & Kassabaum (HOK), the country's second largest architectural firm Tuesday announced it has acquired

the New York offices of PHH Environments, formerly Neville Lewis Associates.

In addition, members of the PHH Los Angeles office have joined HOK's L.A. office.

This acquisition means that HOK's New York office is now one of the largest interior design firms in the city and significantly broadens the already wide range of architectural and strategic planning services currently offered by HOK to its worldwide client base.

The acquisition of PHH Environments was negotiated by its parent company PHH Corp., a firm with 1989 revenues of nearly $2 billion, and HOK's New York office. Established in 1973, HOK's New York office will grow to 170 professionals with the addition of the New York based interior design staff of PHH Environments.

Revenues for HOK's New York office are anticipated to rise from $13 million to $18 million in 1990 as a result of this transaction.

HOK provides architectural, landscape and interios design services to a wide range of clients including AT&T, Mobil, Campbell Soup Co., J.P. Morgan & Co., NYNEX, Rockefeller Center and Columbia University.

Jerry Davis, managing principal, HOK NY said, ''This merger is part of our long range strategic plans to position HOK for the future and attain new levels of growth while maintaining our highest values of design quality, client service and personal dedication. PHH environments shares those values and our two firms will work well together because of this shared vision of the future.''

Hugh Williamson, senior principal, HOK NY, said, ''This merger is the ideal marriage for us and our clients. Successful work in today's real estate market demands a broad range of services in strategic planning, architecture and interior design which can only be provided by a firm such as ours that has overall expertise in all areas.''

PHH Environments, New York was established in 1976 by Neville Lewis, and quickly merged as one of the nation's premier interior design and space planning firms. Since its inception, the New York office has installed more than 15 million square feet of office space, ranging from major headquarters to small renovation.

Among their clients are Citibank, Merrill Lynch, Dean Witter Reynolds and IBM. Neville Lewis, who founded Neville Lewis Associates, and will also join HOK said, ''Increased productivity and quality products and services are the hallmarks of today's successful businesses. The combined talents and track records of HOK and PHH Environments are a winning combination that will serve the diverse needs of our growing list of clients.''

Juliette Lam, managing principal of PHH Environments New York will join HOK as senior principal and head of the interiors group.

Lam said, ''The newly expanded HOK interiors group represents the best and the brightest in the interior design world. HOK's New York design staff was poised for growth and with the acquisition of PHH Environments/Neville Lewis moves it to the top of the field.

Elizabeth Minor, an HOK/New York Interiors Group principal who will assist in the expanded group's management, concurs, ''A strong collaboration of complementary teams is underway.''

HOK employs 1000 professionals worldwide and has offices in New York, St. Louis, Dallas, Kansas City, Los Angeles, San Francisco, Tampa, Washington D.C. Hong Kong and London.

MARLBORO, MA (OCT. 2) BUSINESS WIRE - Stratus Computer Inc., a leading vendor of fault-tolerant computers for critical online applications, Tuesday announced that it has signed a value-added reseller (VAR) agreement with Epic Data Inc., of Richmond, British Columbia, a world leader in high-performance factory data collection systems.

The VAR pact opens a new distribution channel for Stratus in the manufacturing plant management systems market. Stratus sells its systems for critical online business applications in manufacturing and other industries, such as banking, brokerage, and retail. The Epic agreement comes on the heels of an OEM/reseller agreement between Stratus and Tokyo-based NEC Corp. Under that agreement, which was announced last week, NEC will resell Stratus systems into the telecommunications industry.

Stratus systems will be the first fault-tolerant computers to support Epic Data's software, providing an efficient solution for ensuring reliable, around-the-clock data collection. As well, Stratus systems will be the only fault-tolerant computers Epic Data resells.

Under the terms of the agreement, Epic Data will resell Stratus' full range of XA2000 Continuous Processing Systems running Epic Data's System Controller Software (SCS).

Founded in 1975, Epic Data manufactures, integrates, and supports data collection systems consisting of terminals, controllers, software, and accessories. Epic Data is headquartered in Richmond, British Columbia, Canada and has 13 offices in the United States, two in Canada, and one in England, as well as representatives in Asia and Australia. Epic Data is publicly traded on the Toronto and Vancouver Stock Exchanges (EKD).

Stratus Computer Inc., is a leading supplier of fault-tolerant systems for critical online computing applications, such as online transaction processing and online data communications and telecommunications applications. The company offers the broadest range of fault-tolerant systems and maintains the highest standard for computer reliability. One of the fastest-growing companies in the industry, Stratus reported revenues of $341.3 million for fiscal year 1989, up 29 percent from $265.3 million in 1988.

The company, whose headquarters are in Marlboro, Mass., has 11 international subsidiaries. Stratus Computer Inc. common stock is traded via the New York Stock Exchange and the Boston Stock Exchange under the trading symbol SRA.

RICHMOND, Va. (OCT. 2) BUSINESS WIRE - Robert H. Hilb, president of Hilb, Rogal & Hamilton Co. (NASDAQ: HRHC) announced an agreement in principle to merge has been reached with Dixon Sheehan Titus Inc. of Savannah, Ga., and

Hilb, Rogal and Hamilton Co.'s Savannah insurance agency.

Terms were not disclosed.

The merger will be completed after filing of a supplement to Hilb, Rogal and Hamilton Co.'s Form S-4 Registration Statement as shares of the common stock of Hilb, Rogal and Hamilton Co. will be issued in this transaction.

Hilb stated, ''The merger of this office will represent another orderly step in the expansion of our company and will strengthen our presence in Savannah.''

According to Thomas J. Sheehan Sr., who will become an executive vice president of Hilb's Savannah agency, ''This move will add additional insurance markets, expertise and stability to our firm, and assures that our tradition of service to the Savannah community will continue even stronger.''

Hilb, Rogal and Hamilton Co. provides insurance agency services to a wide variety of clients through its network of wholly owned subsidiaries which operate 39 insurance agencies in 15 states and the District of Columbia. The company is traded on the NASDAQ National Market System, symbol, HRHC.

#90275b0797 10/02/1990 ~Business Wire

KNOXVILLE, TN (OCT. 2) BUSINESS WIRE - Clayton Homes Inc. (NYSE:CMH) Tuesday announced that it will act as servicer for approximately $100 million of installment sales contracts owned by a newly created REMIC Trust.

The trust issued appproximately $70 million of 9.40 percent senior certificates which have been rated AAA by both Standard & Poors and Moody's. The senior certificates are guaranteed as to principal and interest by a financial guarantee policy issued by Financial Security Assurance Inc.

In addition to its servicing responsibilities, Clayton has purchased the junior certificates representing the residual interest in the REMIC by establishing a $12.5 million reserve fund for the senior certificates and by agreeing to pay the premium on the FSA policy.

The REMIC was formed by NCNB National Bank of North Carolina and Sovran Bank/Central South which owned the installment sales contracts and deposited them in the REMIC. NCNB Capital Markets Inc. has completed the private placement of the senior certificates.

Clayton's finance subsidiary, Vanderbilt Mortgage and Finance Inc., will be responsible for servicing the $100 million of contracts owned by the REMIC.

This brings the total portfolio serviced by Vanderbilt to over $500 million.

Jim Clayton, chairman of the board and chief executive officer of Clayton Homes Inc., said: ''We believe our servicing and ownership of the residual interest in the REMIC will produce value to our shareholders over the next seven to 10 years. In our fiscal year ending June 30, 1991, earnings will increase by 10 cents to 15 cents per share.

''Our ability to realize the $29.7 million residual interest in the contracts will depend on our ability to service this pool of contracts. Most of the contracts are located in Texas and were originated by savings institutions which were placed into receivership by the FSLIC. We are confident that the expertise developed by our finance subsidiary will enable us to ultimately realize a large part of the residual interest.''

GUERNSEY, CHANNEL ISLANDS (OCT. 1) BUSINESS WIRE - Insituform Group Limited (''IGL'') 1/8NASDAQ National Market: IGLSF (shares) and IGLWF (warrants)3/8 Tuesday announced that on Friday, September 28, 1990, the United States Securities and Exchange Commission declared effective an amendment to its registration statement covering the ordinary shares to be issued on exercise of Insituform Group Limited's publicly traded warrants (NASDAQ SYMBOL:IGLWF).

As such, the right of warrantholders to exercise their warrants into ordinary shares has been restored.

The present exercise price of the warrants is $3.14, which is the same price prior to the suspension of their exercisability. This exercise price will remain effective through November 28, 1990 or a total of 60 days, unless extended. The exercise price will then increase by $.38 to $3.52 and unless extended, the warrants will remain exercisable at that price for a further ten months before expiring on September 28, 1991.

There are a total of 703,852 Insituform Group Limited publicly traded warrants presently outstanding.

Insituform Group Limited, through its wholly-owned subsidiaries, owns the world-wide rights to a system of pipeline and conduit rehabilitation known as the Insituform Process. With more than 18,000 successfully completed contracts in over 40 countries, Insituform retains market lead, having renovated in excess of 4,000 km of pipeline to date.

By eliminating the need for disruptive excavation, the Insituform Process

provides a cost-effective solution to the problem of deteriorating pipe systems. A flexible non-woven fiber tube (Insitutube), impregnated with a liquid resin, is inverted by water pressure through the damaged pipe and is forced firmly against the inside of the pipe.

The resin is then cured, either by hot water or high frequency light, creating a durable new structural pipe within the old.

CALGARY, ALBERTA (OCT. 2) BUSINESS WIRE - ORS Corp. (NASDAQ:ORSC) Tuesday announced the finalization of a contract with Petroleo Brasileiro S.A. - Petrobras, the Brazilian Government-owned oil company.

The contract will be administered by ORS Corp.'s joint venture partner Azevedo & Travassos S.A. (AT) and calls for the electromagnetic stimulation of four wells to be drilled by Petrobras in the Rio Panon field in northeast Brazil in the early spring of 1991.

ORS also announced the completion of the installation of its EM Process on two wells for Amoco Canada. The installations were made by EOR International Inc. the majority-owned marketing and operating affiliate of ORS. All operations are running smoothly and production figures will be reported when authorized by Amoco.

Other projects reported by ORS include three wells with Texaco scheduled for early October spud dates and one well with Mobil Oil Canada scheduled for electrical stimulation in late October. Both the Mobil and Texaco projects are in heavy oil fields in Canada.

ORS also announced the completion and equipping of a well in Wyoming for Marathon Oil Co. Stimulation of the Marathon well is also scheduled for late October.

ORS Corp.'s operating affiliate EOR International Inc. markets services and systems for electromagnetic stimulation of oil and gas wells from its head office in Calgary, Alberta.

SAN JOSE, CA (OCT. 2) BUSINESS WIRE - New publishing software announced by Xerox Corp. (NYSE:XRX) enables project teams to easily collaborate on the creation of production-quality documents across computer networks.

The announcement was made Tuesday at the Seybold Computer Publishing Exposition being held here this week.

Called Xerox DocuBuild, the new software application provides features that enable workgroups to collectively manage and contribute to the publishing process. It is particularly useful for the creation of medium and large multi-author documents such as product manuals, technical proposals, scientific reports and regulatory filings.

DocuBuild's industry firsts include patent-protected, high-speed pagination technology and the only compound document ''What-You-See-Is-What-You-Get'' (WYSIWYG) support of the Standard Generalized Markup Language (SGML), which is the International Standards Organizations/Open Systems Interconnect (ISO/OSI) standard for formatting documents.

SGML is a core requirement for compliance with the Department of Defense's (DoD) Computer-Aided Acquisition and Logistics Support (CALS) Initiative, and is a Federal Information Processing Standard requirement for all new document systems purchases by U.S. government agencies.

In addition, DocuBuild supports numerous text, graphics and data formats, enabling organizations to fully integrate and use their existing software and hardware investments.

DocuBuild operates within the Xerox GlobalView networked desktop environment, noted for its icon-based, mouse-driven graphical user interface (GUI). It runs on personal computers equipped with Xerox GlobalView-for-the-PC, a co-processor board and software that turn personal computers (PCs) into multitasking, networked workstations. It also runs on Xerox 6085 workstations. A text editing version, called PC DocuBuild, is also available for standard PCs.

The introduction of DocuBuild is part of Xerox Corp.'s strategy to provide a broad spectrum of products and services to help organizations create, use and manage documents.

DocuBuild will begin shipping in the United States in the second quarter of 1991. Pricing starts at $2,500 per workstation and $495 per PC.

BEDMINSTER, NJ (OCT. 2) BUSINESS WIRE - NUI Corp. (NYSE:NUI) stated Tuesday that 25 employees of the New Jersey Division have elected to participate in a

special early retirement program, announced on July 2, 1990, under which they will begin retirement beginning Jan. 1, 1991.

NUI estimates that the present value of the future payroll costs for the participating employees is $2.7 million. The estimated costs to NUI to accrue the additional pension benefits provided under the program is approximately $1.1 million, before tax. These benefits have been recorded in full as of Sept. 30 and NUI will expense the related cost over three years commencing Jan. 1, 1991 in accordance with the expected rate-making treatment.

John Kean Jr., vice president, said, ''This program will help the company to reduce operating expenses and improve efficiencies while providing an attractive retirement opportunity for the participating employees.''

Under the program, employees who are part of the NUI pension plan and who were born prior to Jan. 1, 1932, were offered the opportunity to elect early retirement with special incentives during a specific election period which commenced July 1 and ended Oct. 1. The employees who have elected early retirement under the plan will receive certain special incentives including three years additional credited service.

Headquartered in Bedminster, NUI is engaged in the distribution of natural gas to approximately 300,000 customers in New Jersey and Florida.

#90275b0822 10/02/1990 ~Business Wire

LAS VEGAS (OCT. 2) BUSINESS WIRE - On Nov. 15, Southwest Airlines, America's eighth largest independent airline, will add new service from Las Vegas to Reno and to Ontario.

Southwest will offer six daily nonstop roundtrip flights to Reno and five daily nonstop roundtrip flights to Ontario on the newest pure jet fleet in the industry. Regular unrestricted coach fares will be $59 to Reno and to Ontario.

''These will be our highest fares and yet they are less than half the amount of other airlines,'' said John Denison, executive vice president of Southwest. Unrestricted coach fares on other airlines are $135 from Las Vegas to Reno and $130 to Ontario.

Southwest will also offer lower advance purchase ''Fun Fares'' on a restricted basis starting as low as $39 for a 21-day advance purchase fare to Reno and

just $29 to Ontario.

Not only is Southwest slashing fares by as much as 50 percent with the new service to Reno and Ontario, its ''$20 Take Along Fare'' which is already available on other Southwest flights leaving Las Vegas, will apply to flights to Reno and Ontario, also.

For just $20 one way, a regular fare Customer can ''take along'' a companion to any Southwest Airlines destination--no matter how far away--when both tickets are purchased with the American Express Card. Some restrictions apply, and the offer is good for travel through Dec. 19.

''Our streamlined operating procedures and dedicated employees allow Southwest Airlines to enjoy the lowest operating cost of any major airline in the country. We simply pass those cost savings on to our customers,'' Denison noted.

Southwest Airlines has become known as the ''price policeman,'' leading the airline industry in low fares while maintaining its service level at the top of nation's air carriers. Among its cost-saving measures are a quicker ticketing process, boarding passes on a first-come, first-served basis and no meal service.

Employees have also become known for wearing ''Fun'' uniforms and bringing humor to the flight experience--an extension of CEO Herb Kelleher's philosophy that work should be fun.

Flights to Reno will begin at 7:00 a.m. with the last return flight leaving Reno at 8:10 p.m. Flights to Ontario will begin at 7:00 a.m. with the last return flight leaving Ontario at 7:50 p.m. Weekend flights are also available.

In addition to the new Reno and Ontario service, Southwest will also be adding one new roundtrip flight daily between Las Vegas and San Diego, which brings to seven the number of roundtrips between those two cities. The carrier will also be adding a roundtrip flight between Las Vegas and Burbank, bringing to seven the number of roundtrips offered each day.

''Southwest is the only airline to be rated the monthly best in all three categories of service levels--on-time performance, customer complaints and baggage service, and we've won the coveted 'Triple Crown' four times,'' Denison concluded.

Southwest Airlines' advertising campaign for the new service uses the themeline ''Happy Days Are Here Again.'' Don Valentine, vice president sales and marketing for the airline, noted that ''this advertising delivers the message that low fares and lots of flights are back.''

He continues, ''We have a good solid schedule to offer our customers, but the

big kicker is that Southwest fares to Reno and Ontario are 50 percent off the current market prices. And these will be our regular fares, not some special introductory promotio.''

Southwest began serving Las Vegas on Jan. 31, 1982, offering 32 nonstop departures weekly. Since entering the Las Vegas market more than eight years ago, Southwest has carried almost 6.5 million Customers to and from Las Vegas.

With the new service, Southwest Airlines will serve a total of 33 airports in 31 cities and 14 states from California to Alabama and from the Canadian border to the Mexican border.

For reservations or information in Las Vegas, the phone number is 702/382-1221.

TINTON FALLS, NJ (OCT. 2) BUSINESS WIRE - October 2, 1990--Concurrent Computer Corporation today announced that it has not made the September 1990 principal and interest payments due on its senior bank debt.

Concurrent indicated it is having on-going discussions with the bank group regarding the interim period until repayment terms can be established, based on the company's expected new business plan.

Commenting on today's announcement, Denis R. Brown, Concurrent's new president and CEO said, ''The bank group, as well as our bondholders, recognizes the need to modify the company's capital structure to allow the company the flexibility to grow in the computer industry. The company is preparing a business plan that will clearly address current financial issues, market and technology development, and organizational changes required to better address the business on a long-term basis. We expect to complete that plan during this quarter. In the meantime, the company is preserving needed liquidity to continue to meet obligations to customers, suppliers and employees.'''

Concurrent Computer Corporation is the leading supplier of high performance, real-time computer systems worldwide. The company's products, marketed through its Commercial Markets, Simulation/Training and Real-Time Technical Systems Groups, provide real-time solutions to the financial, communications, public sector, technical, aerospace and simulation markets. Its common stock (CCUR) is traded on the NASDAQ National Market System.

#90275b0837 10/02/1990 ~Business Wire

NEW YORK (OCT. 2) BUSINESS WIRE - American International Group Inc. (NYSE: AIG) announced Tuesday that two of its member companies, AIU Insurance Co. and American Home Assurance Co. have been granted licenses from the Japanese Ministry of Finance to sell directors and officers insurance in Japan.

This insurance coverage will be available to Japanese companies immediately.

Directors and officers insurance, of which AIG is the leading underwriter in the United States, protects directors and officers of a company against legal actions taken against them by shareholders, creditors, employees or others as a result of negligent acts or omissions or misleading statements. AIG companies have been providing directors and officers coverage in the United States for 25 years.

Commenting on the new Japanese license, Jeffrey W. Greenberg, executive vice president of American Home Assurance Co., said, ''This coverage provides the global protection so necessary today for Japanese corporations expanding in the world marketplace. Now that D&O insurance has been licensed in Japan, all Japanese companies, regardless of size or the scope of their operations, will be able to protect the personal assets of their directors and officers from the enormous cost of defending lawsuits and of paying settlements or judgments brought against them in their official capacities in any jurisdiction.''

Greenberg continued, ''Although Japan is not known as a litigious society, the expanding international presence of Japanese companies exposes their directors and officers to the same risks faced by officials of U.S. headquartered and other multi-national companies.

Greenberg is also president of National Union Fire Insurance Co. of Pittsburgh Pa., the AIG company underwriting this coverage in the United States and many foreign countries.

AIG is the leading international insurance organization and the largest underwriter of commercial and industrial insurance in the United States. Its member companies write property, casualty, marine, life and financial services insurance in more than 130 countries and jurisdictions, and are also engaged in a range of other financial services. AIG's common stock is listed on the New York Stock Exchange, as well as the stock exchanges in Paris, London and Tokyo.

OAK BROOK, IL (OCT. 2) BUSINESS WIRE - McDonald's Corporation listed its common stock on the stock exchanges in Zurich, Geneva, and Basel, Switzerland today. The closing price was 36 Swiss Francs (approximately US$28).

McDonald's stock is also traded on the New York, Midwest and Pacific Stock Exchanges in the U.S., and those in Toronto, Canada; Paris, France; Frankfurt and Munich, Germany; and Tokyo, Japan.

Chairman and Chief Executive Officer Michael R. Quinlan said, ''The McDonald's System has many dimensions that make us a worldwide business leader with nearly 3,000 restaurants in 51 countries outside of the U.S. We are a marketing company which owns one of the ten most powerful brands in the world. We are a real estate company which owns 60 percent of our restaurant sites providing us a competitive edge and an ability to control occupancy costs. McDonald's is a franchising system; about 75 percent of our restaurant businesses are locally owned and operated by independent entrepreneurs. Most importantly, we are an operations company whose focus is providing customers with the highest levels of Quality, Service, Cleanliness and Value everyday, in every McDonald's around the world.''

Jack M. Greenberg, Senior Executive Vice President and Chief Financial Officer of McDonald's Corporation, commented, ''This is an important step in our strategy to broaden McDonald's shareholder base. Now that McDonald's is traded on 11 exchanges around the world, customers can think of us not only as their favorite and most convenient restaurant, but also as a more accessible investment opportunity. McDonald's stock has yielded a 21 percent total compound annual return to shareholders over the past ten years. This compares favorably with the 16 percent return of the Dow Jones Industrial Average, and the 15 percent return of the Standard & Poor's 500 for this same period.''

According to a survey conducted by the National Association of Investors Corporation, in 1990 McDonald's stock ranked as the most popular and widely held stock among investment clubs.

McDonald's is the world's leading foodservice organization, with more than 11,300 restaurants in 52 countries, including 16 in Switzerland. McDonald's is one of the 30 companies which comprise the Dow Jones Industrial Average.

WHITE PLAINS, NY (OCT. 2) BUSINESS WIRE - NYNEX Corporation announced Tuesday that its New England Telephone and New York Telephone subsidiaries have merged NYNEX Materiel Enterprises Company (MECO) and NYNEX Service Company (NSC) to form a new unit, Telesector Resources Group, Inc., which will provide centralized planning, marketing, purchasing and other services to NYNEX's two telephone companies.

NYNEX transferred ownership of MECO to New England Telephone and New York Telephone in March. NYNEX Service Company has been owned by the two telephone companies since 1985.

''NYNEX is creating a strong and clearly defined Telecommunications Sector, giving our telephone companies control over the key resources necessary to operate efficiently and effectively,'' said NYNEX Chairman and CEO William C. Ferguson.

''We are painting bright lines around our regulated businesses,'' Ferguson added. ''As we move forward, there should be no confusion on the part of NYNEX and its employees, nor on the part of the public and our regulators, that we will maintain clear distinctions between the two sectors of our corporation, and clearly defined rules governing interaction between them.''

WAYNE, PA (OCT. 2) BUSINESS WIRE - Soft-Switch Inc., Tuesday announced that Stephen M. Layne, founder and former co-chairman of the X.400 API Association, has been named to the position of Vice President of Business Development.

Formerly with US Sprint, Layne will be coordinating the formation of worldwide strategic business relationships for Soft-Switch.

According to Layne, ''Electronic mail has moved beyond a basic office automation technology which allowed for improved person-to-person communications. It is now the enabling technology for application-to-application communication between dissimilar computer systems. Soft-Switch, as the recognized leader in standards-based enterprise mail networking, is delivering these solutions today through a growing family of products and services.''

In addition to establishing the X.400 API, Layne has participated actively in the creation and wide acceptance of global electronic mail standards.

Soft-Switch Inc. provides standards-based connectivity, electronic mail network management and mail-enabled applications that add value to customers' expanding electronic mail networks.

A privately held corporation, it is the acknowledged leader in supplying high-performance, open-architecture enterprise mail networks to large corporations. The company also licenses its technology to major office systems vendors and public electronic mail system vendors.

In addition to its Wayne, headquarters, Soft Switch has regional headquartes in Chicago, Los Angeles and Washington. The company also markets its products internationally through distributors from its European headquarters in

Amsterdam.

NEW YORK (OCT. 2) BUSINESS WIRE - John Hoyt Stookey, Chairman, Quantum Chemical Corporation, Tuesday announced the election of Dennis J. Spina to the position of President, Suburban Propane/Petrolane and Vice President, Quantum Chemical Corporation effective September 1, 1990.

Spina, formerly Vice President - Eastern Region and a corporate officer of Federal Express Corporation, has had significant responsibility over the company's expansion during the 1980s.

He joined the company in 1973 as a courier, advancing to Station Manager in various locations before being named Managing Director of the New York/ New Jersey Metro District in 1978. In 1980, he was promoted to Vice President of the Eastern Region, which today has over 12,000 employees.

He played a major role in the integration of the Flying Tigers acquisition into Federal Express.

The recipient of a B. A. degree from Temple University, Spina has completed the Financial Management Program at Harvard University. Spina and his family are residents of Califon, New Jersey.

Mark J. Anton will continue in a consulting capacity as Vice Chairman of Suburban Propane.

CHARLOTTE, N.C.(OCT. 2) BUSINESS WIRE - Southeastern Savings Bank announced that its agreement to be acquired by Southern Financial Holdings Inc. of Atlanta has been terminated by mutual agreement.

Also terminated was a complementary Agreement For Services between parties. Southern Financial's Investment Banker has advised that the current state of

the capital markets would make it impossible for Southern Financial to procure the required financing at this time.

Frank R. Thies Jr., president of Southeastern and chairman of its executive committee said, ''Southeastern will immediately resume its searches for a chief operating officer and a chief financial officer, searches which were placed in abeyance when the Agreement For Services with Southern Financial was executed earlier this year.''

Thies continued, ''Southern Financial will doubtless continue its efforts to secure capital, albeit in the absence of any formal agreements between the parties.''

Southeastern Savings Bank Inc. is a stockholder-owned, federally insured financial institution with 23 branches in 21 North Carolina communities.

WAYNE, PA (OCT. 2) BUSINESS WIRE - Soft-Switch Inc., Tuesday announced the availability of a new release of its X.400 Gateway Model-10 and Model-20 to include support for intra-enterprise communication via Ethernet.

Soft-Switch X.400 Gateways can now communicate with other X.400 systems over IEEE 802.3 Ethernet for internal connections. This option is in addition to existing support over X.25 for external connections.

''Now that Soft-Switch's X.400 Gateway supports communications over Ethernet, we can begin working towards intra-enterprise communication via X.400 and taking advantage of our existing Ethernet infrastructure,'' said Steve Mahaney vice president and manager of Global Electronic Messaging Services for Chase Manhattan Bank. ''Further, having the new ability to connect multiple X.400 systems via Ethernet to a single Soft-Switch X.400 Gateway allows us to provide secure and cost-effective communications to multiple public mail carriers over a single X.25 line,'' continued Mahaney.

Soft-Switch's support for X.400 over Ethernet in addition to the recently announced Open Addressing Service enhances customers' capabilities to communicate efficiently using open protocols. ''The initial thrust of the X.400 standard was toward inter-enterprise and long-haul communications, and the sales to date of our X.400 Gateway have reflected that emphasis,'' said Dave Foster, vice president of marketing for Soft-Switch. ''We are now seeing increased interest in X.400 for intra-enterprise use and for use in LAN environments. The enhancements to our X.400 Gateway will position us solidly in these areas.''

Intra-enterprise communication via X.400 will be released initially for connections to DEC's X.400 gateway - MR/X. Additionally, the existing Soft-Switch Directory Synchronization product is being enhanced to use X.400 as the e-mail transport for synchronization between DEC's Distributed Directory Service (DDS) and the Soft-Switch Central Names Directory. ''Increasingly, effective e-mail solutions will need to address administrative issues such as directory synchronization, in addition to basic connectivity,'' commented Foster. In the future other vendors' X.400-compliant systems will be certified to interoperate with Soft-Switch X.400 Gateways over Ethernet.

NORWOOD, MA (OCT. 2) BUSINESS WIRE - Phoenix Technologies and Traveling Software announced Tuesday that they have signed an exclusive joint development and licensing agreement for Battery Watch, Traveling Software's battery monitoring and maintenance software for PC laptops.

Phoenix currently makes its BIOS (Basic Input/Output system) available to PC manfacturers, so the additional integration of Battery Watch will be a natural

addition to its current package offered to its OEM client base. Phoenix will offer Battery Watch to PC manufacturers as either a stand-alone product or as a component in a bundled package of systems software, utilities, and services for laptop design and development. Traveling Software will also have the option of incorporating any Phoenix Battery Watch enhancements into its retail Battery Watch product.

The BIOS, a necessary component in every computer, makes it possible for software applications to communicate with hardware. Because BIOS is customized to a particular computer model, Phoenix must have a complete understanding of each computer's hardware configuration. This is similar to the process by which Battery Watch is customized to work with individual laptop computer models.

As portable, battery-powered PCs proliferate, manufacturers are embracing power management software as a new key feature for end users. Battery Watch is a valuable systems software utility for battery operated laptops/notebooks/handhelds that monitors and maintains system power usage. It not only monitors power levels, in hours and minutes, and warns users when power is running low, but it can also deep discharge nickel cadium (NiCad) batteries and allow them to renew their charge to nearly full working capacity.

Phoenix Technologies Ltd. designs, develops and markets systems software products for personal computers, laser printers and workstations. Its products allow OEMs to offer their customers computers and printers that are compatible with industry standards. More than 300 of the major personal computer and peripherals manufacturers rely on Phoenix for its system-level software and hardware compatiblity expertise.

Traveling Software, founded in 1982, designs and develops practical connectivity products that link information, computers and computing environments, including laptops, PCs and compatibles, and Apple Macintoshes. Its product line includes LapLink, LapLink Mac, DeskLink, and Battery Watch. The company's hand-held division also produces link products for handheld organizers such as the Casio B.O.S.S. and the Sharp Wizard as well as the new generation of coatpocket PCs. The company is privately held.

NEW YORK (OCT. 2) BUSINESS WIRE - KB Communications Inc. announced Tuesday that based on a preliminary study of the books and records of KB, the local accounting firm recently retained by KB advised that the number of shares of issued and outstanding common stock of KB may have been understated in KB's financial statements since 1988.

The accounting firm recommended that a review of the previously issued financial statements of KB in 1988 and 1989 be undertaken. In response, KB has engaged its accountants to conduct such a review and KB management states that they will take all steps necessary to insure that KB's financial statements are accurate and are restated to the extent required.

WASHINGTON (OCT. 2) COMTEX - The 8-K report filed at the SEC shows on Sept. 12, 1990, Kar Ventures Inc. acquired all of the issued and outstanding stock of Clarion House Inc.

In exchange, Kar Ventures issued 8,996,000 shares of its common stock to the shareholders of Clarion.

Such shares represent approximately 80 percent of the outstanding shares of Kar Ventures.

Pursuant to the agreement, Wallis W. Wood was elected president of Kar Ventures and Ruth C. Wood was named vice president and secretary/treasurer.

Clarion House is engaged as a development stage company in the publishing business.

Kar Ventures intends to continue the business of Clarion House.

The executive office of Kar Ventures is located at Suite 100, 1350 Center Drive, Dunwoody, Georgia 30338.

Its telephone number is (404) 668-0432.

#90275c0037 10/02/1990 ~Comtex

WASHINGTON (OCT. 2) COMTEX - The 8-K report filed at the SEC shows on Sept. 25, 1990, The Furia Organization Inc. appointed Benard J. Fried as its principal independent accountant, replacing the firm of Grant Thornton.

In connection with the audits of the two most recent fiscal years and the subsequent interim period, there were no disagreements with the former accountant on any matter of accounting principles or practices, financial statement disclosures, or auditing scope or procedure.

Grant Thornton's reports on the financial statements for the past two years expressed substantial doubt about Furia's ability to continue as a going concern, due to its net capital deficiency for the fiscal years ended June 30, 1989 and 1988, and also certain recurring losses for the fiscal year ended Dec. 31, 1988.

Furia's executive office is located at 170 Broadway, New York, NY 10038 and its telephone number is (212) 267-5800.

-30- 1085

#90275c0038 10/02/1990 ~Comtex

WASHINGTON (OCT. 2) COMTEX - The 8-K report filed at the SEC shows on Sept. 14, 1990, Mutual Venture Corp. issued 3 million shares of its common stock to two shareholders of Sportswear Corp. in an exchange transaction in which Sportswear became a wholly-owned subsidiary of Mutual Venture.

The two shareholders of Sportswear, Daniel Nasshorn and Irving Schneider, received 2.7 million and 300,000 shares, respectively, of Mutual Venture's common stock in exchange for their shares of Sportswear.

In addition to the above, in a related transaction, Daniel Nasshorn, Irving Schneider and certain other persons purchased an aggregate of 3.25 million shares of Mutual Venture's common stock from Martin Rifkin for a total of $4,000 paid in cash.

After giving full effect to the above transactions, there are 7.55 million shares of Mutual Venture common stock outstanding with Martin Rifkin owning of record 750,000 shares or 9.9 percent.

Following the above transactions, all three directors of Mutual Venture

resigned and two new directors were elected.

Mutual Venture's new board of directors consists of Daniel Nasshorn and Irving Schneider.

Daniel Nasshorn is also president and chairman of the board of Mutual Venture and Irving Schneider is secretary and treasurer.

The executive office of Mutual Venture is located at 523 Commack Road, Deer Park, NY 11729 and its telephone number is (516) 254-6666.

-30- 1587

#90275c0039 10/02/1990 ~Comtex

WASHINGTON (OCT. 2) COMTEX - The 8-K report filed at the SEC shows on Sept. 13, 1990, Chronar Corp.(TICKER: CRNR) concluded a transaction for the transfer of its technology rights for its second generation photovoltaic thin film process and panel production line to Energetics Jungere Corp.

Energetics is a subsidiary of the Sheet Metal Workers' National Pension Fund.

In exchange for the rights, Chronar received $4 million and a 5 percent equity interest in Energetics.

-30- 636

#90275c0040 10/02/1990 ~Comtex

WASHINGTON (OCT. 2) COMTEX - The 8-K report filed at the SEC shows on Sept. 24, 1990, Two Pesos Inc.(TICKER: TWP) appointed Coopers & Lybrand as its independent accountants, replacing Ernst & Young.

In connection with the audits of the two most recent fiscal years and the subsequent interim period, there were no disagreements with the former accountant on any matter of accounting principles or practices, financial statement disclosures, or auditing scope or procedure.

The former accountant's report on the financial statements for the past two years contained no adverse opinion or disclaimer of opinion and was not qualified or modified as to uncertainty, audit scope or accounting principles.

-30- 874

#90275c0041 10/02/1990 ~Comtex

WASHINGTON (OCT. 2) COMTEX - The 8-K report filed at the SEC shows on June 29, 1990, Pierce International Inc.(TICKER: PRCI) appointed the accounting firm of Doran W. Peck, CPA as its independent accountants, replacing Hein & Associates.

Hein & Associates' reports on the financial statements of Pierce for the years

ended June 30, 1989 and 1988 contained no adverse opinion or disclaimer of opinion or qualification.

Their report, however, indicated the company's ability to continue in existence was dependent upon their obtaining additional equity capital and/or long-term debt and ultimately attaining and maintaining profitable operations.

The executive offfice of Pierce is located at 9250 East Costilla Ave., Suite 650, Englewood, Colorado 80112 and its telephone number is (303) 792-0719.

WASHINGTON (OCT. 2) - President George Bush welcomed the commander of the Soviet armed forces to the White House Tuesday, and praised bilateral military contacts that have increased with the warming of superpower ties.

General Mikhail Moiseyev Monday visited the Defense Department, where he was received with military honors at the start of a one-week U.S. visit.

"I strongly support these military-to-military contacts," Mr. Bush told his Soviet guest. "President (Mikhail) Gorbachev has been very generous in that respect and we want to show you that you're very welcome here in the United States."

Gen. Moiseyev, who was accompanied by the chairman of the U.S. Joint Chiefs of Staff, General Colin Powell, passed on the Soviet leader's best wishes to Mr. Bush.

"We cherish what is uniting our two nations today and we fully understand the contribution you both made to the improvement of our ties," Gen. Moiseyev said.

During his stay the general is to visit U.S. Army, Air Force, Navy and Marine Corps units in several states.

Before traveling here, Gen. Moiseyev said he hoped his visit would lead to military cooperation projects between the United States and the Soviet Union.

U.S. Defense Secretary Dick Cheney is scheduled to visit the Soviet Union this month.

LUSAKA (OCT. 2) - Zambian President Kenneth Kaunda announced Tuesday that a bill to amend Zambia's constitution to allow opposition parties will be put to parliament early in November.

But he rejected calls by the Movement for Multi-party Democracy (MMD) for an interim government to supervise multi-party elections due next year.

President Kaunda told the British Broadcasting Corporation (BBC) in an interview that he planned to ask parliament to repeal Article-4 of the constitution which makes his United National Independence Party (UNIP) the only legal political party.

''Parliament meets early next month. It fits in very well if we give notice -- this week or early next week -- it will be in time for parliament to repeal that article'', he said.

Mr. Kaunda said the MMD, which has said it intends to form an opposition party will ''have to be patient'' until the constitution is changed.

He said it was ''absolute rubbish'' that UNIP could not supervise free and fair elections. ''There is no question of UNIP surrendering its authority,'' he said when asked about an interim government.

''UNIP is fully in control...I will not succumb to such political idiocy,'' he added.

UNIP would win the election since the opposition was a ''political non-entity'', he said. If violence followed he would put the question of returning to a one-party state back to the people.

#90275d0230 10/02/1990 ~French/German News Agency
MOSCOW (OCT 2) - The parliament of the Russian Federation, the largest Soviet republic, on Tuesday postponed issuing an appeal to citizens to help the government implement radical economic reforms, notably by agreeing not to go on strike.

The parliament had voted to go ahead with the move in principle in the morning and a final text of the appeal was expected before the end of the day.

But the commission working on the final text then proposed delaying the appeal until next Tuesday, when Russian Federation Prime Minister Ivan Sialyev is due to make a major speech on the economic situation.

The final text of the appeal could be altered in light of the speech, deputies said, and the parliament therefore delayed a decision until then.

The text adopted in principle Tuesday morning urged Russian Federation residents to help the government implement its crash programme to move from a planned to a market economy in 500 days.

It called for "500 days of hard work, 500 days of strict adherence to contracts, 500 days without strikes, 500 days of social agreement."

The Russian Federation parliament had already decided Monday to postpone implementation of the reforms, due to begin that day, for a month to November 1 in the face of the Soviet parliament's failure to reach agreement on a nationwide economic reform package.

The Soviet parliament has been presented with a radical plan supported by President Mikhail Gorbachev and a far more moderate package from the government of Nikolai Ryzhkov.

The government has threatened to resign if forced to implement a package it does not support, and a further attempt at a compromise package is due to be presented later this month.

#90275d0360 10/02/1990 ~French/German News Agency
ANKARA (OCT 2) - Japanese Prime Minister Toshiki Kaifu will hold talks with Turkish leaders on the Gulf crisis when he visits Turkey Thursday as part of the first Middle East tour by a Japanese premier in 12 years.

Turkey is the third country on Mr. Kaifu's itinerary after Egypt and Jordan. He will go on from here Friday to Saudi Arabia and Oman.

The tour, initially scheduled for August 16, was delayed after Iraq invaded Kuwait on August 2.

Japanese diplomatic sources here said Mr. Kaifu, who is to meet with President Turgut Ozal and Prime Minister Yildirim Akbulut, hopes for an "exchange of views" on how the two countries can cooperate in "finding a solution" to the "unstable situation" in the region.

Japan, which established diplomatic ties 100 years ago with what was then Turkey of the Ottoman Empire, also wants to "open a new page in bilateral relations" already flourishing on the economic level.

Mr. Kaifu is expected to reaffirm Tokyo's readiness to help Turkey and Jordan, which share a border with Iraq and occupied Kuwait, as well as Egypt.

Tokyo says the two billion dollars' aid it proposes giving the three states amounts to one-fifth of estimated Japanese losses caused by the embargo of Iraq.

Out of that sum, 600 million dollars is expected to be divided among the three countries in the form of an open credit at one per cent over 30 years, with a 10-year grace period, according to figures provided by the Japanese Embassy here.

The remaining 1.4 billion dollars would be in the form of investments to be studied with governments of the three states.

Japan is to spend another two billion dollars supporting multinational forces deployed in the Gulf and has earmarked 22 million dollars to assist refugees through the United Nations and International Migration Organization, plus 98 million dollars for Jordan in material aid.

Mr. Kaifu will be accompanied by a large economic delegation. The Japanese businesmen will hold parallel talks with Turkish counterparts who hope to use Japan as a future bridge for developing trade with Southeast Asia, should Turkey be refused membership in the European Economic Community (EEC) in 1993.

#90275d0410 10/02/1990 ~French/German News Agency

ERFURT, East Germany (OCT 2) - West German Economy Minister Helmut Haussmann, whose portfolio will cover all Germany from Wednesday, said Tuesday he would sack the communist-installed bosses of East German state-owned industries.

"Pressure is mounting from employees" to get rid of the bosses installed by the former communist government, and they would be asked to go "in the coming weeks", Mr. Haussmann told journalists in Erfurt.

The minister also confirmed that the East German state holding Treuhandanstalt which covered the estimated 8,000 East German enterprises would be regionalised to adapt it to the future make-up of what is now East Germany.

The territory of East Germany will become five new federal German states following local elections on October 14.

MANILA (OCT. 3) - The overall year-on-year Philippine inflation rate held at a steady 11 percent in September despite a sharp increase in Manila, the National Statistics Office said here Wednesday.

The Manila inflation rate rose to 16.7 percent last month from 15.4 percent in the previous month, but the national inflation rate actually dipped to 11.0 percent from 11.1 percent in August, spokesmen said.

They described the Manila rate, the highest since August 1989, as anticipatory in nature with businessmen raising prices even before the government hiked domestic fuel prices by 29 percent last month.

#90275d0490 10/02/1990 ~French/German News Agency

PRETORIA (OCT 2) - South Africa's discriminatory land laws keeping 87 percent of the country in the hands of whites will be repealed during next year's parliamentary session, President Frederik De Klerk said here Tuesday.

Adressing a press conference at the end of a meeting with leaders of South Africa's six tribal homelands, Mr. De Klerk said that "land ownership will be available to all South Africans irrespective of race or colour."

But he reassured white South Africans that he had no intention "of taking any land away from anybody" who legally owned it.

A joint statement after the meeting recommended "transitional arrangements" allowing individual blacks to buy what has been tribal or communal land.

The statement also recommended removing racial bars to state funds for buying land, but Mr. De Klerk told journalists no more money could be made available in the current financial year.

The land laws, passed in 1913 and 1936, are considered one of the pillars of the apartheid system.

Mr. De Klerk has already announced that the Group Areas Act (GAA), dividing

residential areas along racial lines, would be repealed during the next parliamentary session, which starts in February.

The only remaining apartheid law will then be the Population Registration Act, which classifies people at birth according to their race and is considered the real cornerstone of apartheid.

#90275d0500 10/02/1990 ~French/German News Agency

NEW YORK (OCT 2) - Syrian Foreign Minister Faruk al-Sharaa said Tuesday the Iraqi invasion of Kuwait had caused ''grave damage'' to the Iraqi people and harmed the Arab nation as a whole as well as the Palestinian cause.

Speaking before the United Nations General Assembly, al-Sharaa said hiding behind slogans about Islam, Pan-Arabism and the distribution of oil wealth would not deceive the people of Iraq or reduce their sufferings.

''Arabs and Moslems know quite well that in the name of Pan-Arabism, Islamic Iran was attacked and under the slogan of Islam and Jihad, the Arab Kuwait was occupied,'' al-Sharaa said.

Although Iraq is one of the rich oil states, ''the entire Arab wealth will not be sufficient to pay the cost of its irresponsible policies'', the Syrian official said.

Turning to the question of Lebanon, al-Sharaa said that ''Syria is committed to support the Lebanese legitimate authority and to help it implement the necessary measures to extend the authority of the Lebanese state all over the Lebanese land''.

Al-Sharaa called for the implementation of Security Council resolution 425 of 1978 which demands the ''unconditional Israeli withdrawal from the Lebanese land,'' al-Sharaa said.

#90275d0870 10/02/1990 ~French/German News Agency

ABIDJAN (OCT 2) - Ivory Coast President Felix Houphouet-Boigny's proposal to create a new post of prime minister if he wins presidential elections here, has been welcomed by the main opposition parties.

At the same time the opposition is betraying unease at having some ground cut from under its electoral platform against 33 years of virtual one-man rule by the 85-year-old president, observers said.

The president, who legalised opposition parties in April after leading a one-party state since independence in 1960, made the proposal at the opening

Monday at Yamoussoukro of a week-long congress of his ruling Ivory Coast Democratic Party (PDCI).

He also proposed that control of the PDCI be decentralised and made more democratic with an elected secretary general.

Secretary general of the opposition Social Democratic Union (USD) Bernard Zadi Zaourou told Agence France-Presse that the president's proposals were in line with opposition demands.

But he added significantly, "We acknowledge the political experience of the head of state. We have never underestimated his cleverness."

A major plank of the opposition campaign against the president has been strong criticism of his position as leader of both party and state.

Mr. Zaourou stressed that the president, who also proposed Monday that the head of state would remain "above all parties" continued to back a presidential regime, while the USD wants a parliamentary system.

#90275d0950 10/02/1990 ~French/German News Agency
NICOSIA (OCT 2) - Energy prospects in the Middle East are at the mercy of events and speculators but need not panic, experts said here Tuesday.

"This time, the increase in price is due to speculation," said Marcello Colitti, energy adviser to the Italian oil conglomorate ENI at the start of a three-day conference entitled "Middle East Strategy to the Year 2003."

He was contrasting the current Gulf tension sparked by Iraq's August 2 invasion of Kuwait with previous energy crises -- notably after the 1973 Arab-Israeli war, the Iranian revolution of 1979 and the slump hitting oil markets in 1985.

"If we go to war, it will last more than five days and will be far more destructive," he said of the multinational troop buildup in the region to protect Saudi Arabia and other Gulf states from an Iraqi attack.

But he dismissed reports that oil prices could reach 100 dollars per barrel. While not discounting further rises, particularly if war broke out, he insisted that high figures were put out by speculators "to scare people."

Former Saudi Arabian Oil Minister Ahmad Zaki Yamani said last week that oil prices would exceed 100 dollars per barrel if Saudi oil fields came under attack.

"I disagree with Mr. Yamani's assessment," said a Japanese oil executive who

declined to be identified. "I think it will go up by 10 dollars, and certainly not more than 20 from the current price."

Oil futures in New York fell Tuesday with West Texas Intermediate crude off 1.29 dollars to 35.80 dollars.

The drop reflected a market reaction to U.S. President George Bush's speech Monday at the United Nations General Assembly, in which he blasted the Iraqi invasion but seemed to be calling for a diplomatic solution to the crisis.

-30- 1964

#90275d1160 10/02/1990 ~French/German News Agency

PARIS (OCT 2) - French President Francois Mitterrand on Tuesday reshuffled his government, notably moving Agriculture Minister Henri Nallet to the justice ministry, and replacing European Affairs Minister Edith Cresson, a presidential spokesman announced.

Mr. Nallet was replaced by Louis Mermaz, 59, a long-time Mitterrand associate who currently heads the Socialist group of parliamentary deputies.

Observers noted that as Mr. Nallet was moved to another ministry, his transfer could not be interpreted as a sanction for failing to end violent protests by French farmers over falling meat prices.

The transfer looked more like a bid to defuse the farmers' anger.

Presidential spokesman Jean-Louis Bianco said Mr. Nallet would replace Justice Minister Pierre Arpaillange, 66, who like the agriculture minister had served for the last two years in the Socialist government of Prime Minister Michel Rocard.

Mr. Arpaillange's departure from the government had been expected.

Mrs. Cresson, a former agriculture and foreign trade minister, is replaced by Elizabeth Guigou, 44, an adviser to Mr. Mitterrand.

#90275d1180 10/02/1990 ~French/German News Agency

NEW YORK (OCT 2) - The European Economic Community (EEC) announced Tuesday its members would provide 1.5 billion European Currency Units (ECU) (two billion dollars) in aid to Egypt, Jordan and Turkey to help them cover economic losses linked to the Gulf crisis.

The foreign ministers of the 12 EEC member countries met briefly Monday night to discuss the matter while they were in New York to attend a meeting of the Conference on Security and Cooperation in Europe. The decision was announced

in a communique released Tuesday.

The two billion dollar figure represents 1.5 billion dollars that individual members have said they would contribute to the so-called front-line states and another 500 million dollars they would contribute as a group.

Egypt, Jordan and Turkey have sustained serious economic hardships as a result of the United Nations-mandated embargo against Iraq and Iraqi-held Kuwait.

Turkey lost revenue when it shutdown an Iraqi oil pipeline through its territory, Jordan has been burdened by tens of thousands of refugees and Egypt has incurred the costs of keeping troops in Saudi Arabia to deter further Iraqi aggression.

The EEC was also looking into the possibility of joining the assistance efforts of other nations, in particular Arab countries, that have been affected by Gulf crisis, diplomats said.

But there were differences last week between the EEC and the six-member Gulf Cooperation Council over aid to Jordan, European diplomatic sources said. Some GCC members, like Saudi Arabia, had opposed aiding Jordan because of what they viewed as its pro-Iraq stance in the Gulf crisis, the sources said.

BELGRADE (OCT 2) - Yugoslavia's state presidium on Tuesday annulled last week's decision by the parliament of the Slovenian Republic to take over responsibility for its own territorial defense force.

The presidium, comprising representatives from Yugoslavia's six republics and two autonomous provinces, is the country's highest political authority. The reason for its controversial decision was Slovenia's ''destruction of the unity of Yugoslavian armed forces''.

''The Presidium will not tolerate a direct threat to the constitution and integrity of Yugoslavia,'' it said.

The Slovenian representative voted against the measure. The Croatian member was absent. The defence ministry was instructed to implement the presidium's decision. It was not clear whether force would be used. The Slovenian territorials are a form of militia.

Slovenia has long sought full sovereignty. Several months ago, it revised its constitution, which now clashes with federal law. Both Slovenia and Croatia want to turn Yugoslav into a confederation of sovereign states.

TOKYO (OCT 2) - The chairman of the Federation of Bankers' Association here Tuesday called on the central Bank of Japan to be careful in taking measures to prop up falling stock prices.

Taizo Hashida, who is also Fuji Bank president, told reporters that the central bank may not have to change immediately its basic monetary policy as regards its tight credit stance.

He said that recent declines in stocks have had a strong adverse impact on Japanese banks, undermining their efforts to meet the international reserve recommendations set by the Bank of International Settlements (BIS).

The financial environment was tough, he said, and banks here can only cope with BIS requirements of eight percent of assets by either further curbing their own capital or curbing the growth in monetary assets.

Share prices on the Tokyo market had lost more than 48 percent of their value since the beginning of the year until Monday, while interest rates had also climbed steadily.

The Nikkei Average plunged to a 43-month low Monday, prompting the finance ministry to announce that it would ease rules on stock margin and index-future and option trading as a means to prevent stock prices from falling further.

The Nikkei soared 13.2 percent, or 2,676.55 yen, for the largest single day rise in history Tuesday.

OTTAWA (OCT 2) - Canada will host a meeting of foreign ministers from the six-member Association of Southeast Asian Nations beginning Thursday in a bid to boost Canada's ties with the fast-growing region, it was announced Tuesday.

The four-day meeting will be held in Calgary and Jasper, in the western province of Alberta. It will be attended by the foreign ministers of Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand and be hosted by Joe Clark, Canada's secretary of state for external affairs.

Foreign ministry officials here described the meetings as a unique initiative destined to build Canada's relations with ASEAN countries.

Bilateral trade between Canada and ASEAN countries has doubled since 1986 to reach nearly three billion dollars this year.

In addition to exploring ways of increasing cooperation between Canada and

ASEAN, the participants are expected to address global issues such as the crisis in the Gulf, East-West relations and refugee problems, officials said.

There will be a number of workshops and conferences held simultaneously in Calgary to encourage closer business and academic contacts between Canada and ASEAN.

NEW YORK (OCT 2) - Italian Foreign Minister Gianni de Michelis said here Tuesday that the European Economic Community (EEC) was in full agreement with remarks on the Gulf crisis made by U.S. President George Bush at the United Nations Monday.

Speaking in his capacity as current chairman of the EEC council of ministers, he added that he did not see the remarks as marking a softening of the U.S. stance on the Iraqi takeover of Kuwait.

Mr. de Michelis is attending a ministerial meeting here of the Conference on Security and Cooperation in Europe, a forum grouping 33 European nations plus the United States and Canada.

In his speech to the U.N. General Assembly, Mr. Bush said an unconditional Iraqi troop withdrawal from Kuwait, might create "opportunities for Iraq and Kuwait to settle their differences permanently, for the states of the Gulf themselves to build new arrangements for stability and for all states and peoples of the region to settle the conflict that divides Arabs from Israel."

"I don't consider the position of President Bush yesterday more flexible. It has been the position of the United States and the (other) Western states from the beginning of the crisis," Mr. de Michelis told a press conference.

"We cannot accept (Iraqi President) Saddam Hussein's attempt to link" the current Gulf crisis and other Middle East problems such as the Palestinian issue and Lebanon.

"We have always stated the fact that there are (other) problems in the region " the Italian minister said. He also said Italy "will participate in any decision taken by the United Nations" regarding the Gulf crisis. He was responding to a question as to whether his country would be prepared to join a military operation against Iraq ordered by the U.N.

He added that the EEC was prepared to study the needs of East European countries being adversely affected by the imposition of U.N. economic sanctions against Iraq.

The EEC has pledged financial aid to Jordan, Egypt and Turkey, the three

countries hit hardest by the fallout of the sanctions,

"We are ready to do something also for other countries within an international framework," the Italian minister said, citing Morocco, Lebanon, Djibouti, Pakistan, Bangladesh and India.

The EEC announced Tuesday, on the sidelines of the CSCE ministerial session, that he would earmark nearly two billion dollars in aid to Egypt, Jordan and Turkey.

WASHINGTON (OCT 2) - U.S. warships diverted a West German-flagged container ship heading to the Gulf of Aqaba Saturday but allowed it to set sail again Tuesday after it docked in Port Suez, the Defense Department said.

Pentagon spokesman Pete Williams said the Red Sea Ensign, apparently headed for the Jordanian port of Aqaba, was diverted after a U.S. boarding team found that the ship's cargo did not match its manifest.

The vessel docked in Egypt's Port Suez, apparently to straighten out its documentation, and was boarded again Tuesday by a U.S. Navy team that allowed it to continue toward the Gulf of Aqaba.

Saturday's incident took place in the northern Red Sea, just below the Gulf of Aqaba, Mr. Williams said.

He said the ship was carrying food -- mainly apples and rice.

Mr. Williams told reporters about 1,630 naval interceptions had been performed by the international task force enforcing the U.N. economic embargo against Iraq.

He said 158 ships had been boarded, 130 of them by U.S. forces, and that seven vessels had been diverted in the international campaign aimed at forcing Iraq to withdraw its troops from Kuwait.

#90275d1800 10/02/1990 ~French/German News Agency

WASHINGTON (OCT 2) - The United States announced Wednesday that Chile will be brought back into the Overseas Private Investment Corporation to bolster investments that had stagnated in Chile under the past military regime.

President George Bush announced Chile's inclusion into the corporation during a meeting with Chilean President Patricio Aylwin at the White House.

Mr. Bush confirmed Tuesday that he would visit Santiago on December 6 as part of his swing through South America that will also take him to Brazil, Argentina, Uruguay and Venezuela.

The two countries signed Monday another agreement creating the Bilateral Council that is aimed at spurring investments in Chile and setting up a free-trade zone there.

The Overseas Private Investment Corporation will help stimulate investment in the South American country by guaranteeing loans and credits.

Under those terms, Chile in the short term could attract 100 million dollars in investments to promote production and export of agricultural products, Chilean sources said.

Renewed interest in investments in Chile comes after after Mr. Aylwin won a landslide victory last year in the country's first democratic elections since General August Pinochet seized power in a 1973 military coup.

BERLIN (OCT 2) - Seven people were arrested and a policeman was slightly injured Tuesday, Berlin police said, as tens of thousands of Berliners gathered to mark German unification.

The policeman received a minor knife wound in the arm as he was checking the identity of a demonstrator protesting unification, police said.

Seven people were arrested in the city centre carrying starting pistols and firework rockets, they said.

A spokesman said that small groups of anarchists, as well as a number of right-wing extremists, had been spotted ahead of the midnight ceremonies of unification.

Thousands of police were deployed in Berlin to prevent clashes between the two groups. Neo-nazi groups have flourished in East Germany's economic crisis.

Earlier Tuesday, police arrested and later released several protestors who climbed on Berlin's Victory Column, near the Brandenburg Gate, to protest unification as a takeover by West Germany.

AMMAN (OCT 2) - Jordan lifted Tuesday a ban imposed a day earlier on Saudi-bound trucks crossing its territory, a senior Jordanian official said.

Director general of the customs department Mehdi Farhan told the official PETRA news agency the decision followed several diplomatic contacts and a telephone conversation between Prime Minister Moudar Badran and Syrian counterpart Mahmoud al-Zohbi.

Authoritative sources said the ban was in retaliation for harrassment of Jordanian truckers at the Saudi border.

The decision affected all heavy-duty trucks transporting goods for Saudi Arabia and the Gulf states from Turkey by way of Syria. Jordan is on the route for the transport of goods from Europe to Saudi Arabia.

Saudi Arabia decided September 19 to halt oil deliveries to Jordan and later expelled the Jordanian military attache and asked for a reduction of the Jordanian embassy staff in Riyadh.

Jordan responded by recalling its ambassador.

Amman has been subjected to punitive measures by Riyadh for its support of Baghdad in the wake of Iraq's August 2 invasion of Kuwait.

On Sunday, authorities turned back at the border with Saudi Arabia 25 Jordanian refrigerated trucks carrying mostly vegetables to the Gulf.

A truckers' association said only 10 per cent of the 1,000-vehicle national fleet which served Saudi Arabia and the other Gulf states have been allowed to cross the border since the start of the Gulf crisis.

#90275d7260 10/02/1990 ~French/German News Agency

SEOUL (OCT. 2) - South Korea plans to offer Moscow a 2.5-billion-dollar credit line while encouraging its industry to undertake developments and other investments in the Soviet Union now that the two countries have established formal ties, press reports quoting officials said here Tuesday.

Soviet Foreign Minister Eduard Shevardnadze and his South Korean counterpart Choi Ho-Joong signed a joint communique at the United Nations headquarters in New York announcing the establishment of diplomatic relations on ambassadorial level from September 30.

The reports said that the 2.5-billion-dollar credit to be offered for the next five years will allow Moscow to import South Korean products on a deferred payment basis, and to allow South Korean firms to set up factories for such consumer goods as soap and footwear in the Soviet Union.

Bilateral trade volume increased from 290 million dollars in 1988 to 600

million dollars in 1989, and the figure is expected to top one billion dollars this year and rapidly expand to 10 billion dollars within four to five years, officials were quoted as saying.

South Korea mainly exported fibre products, machinery, electronic goods, footwear and ships, and imported from the Soviet Union coal, iron, agricultural and fishery products and cotton.

#90275d7390 10/02/1990 ~French/German News Agency
TOKYO (OCT. 2) - Japan will tighten quarantine checks on imported foods in order to keep out products tainted by farm chemicals, a health and welfare ministry official said Tuesday.

Under the decision, the ministry will double the number of food inspectors from 99 to 200 in the next three years, and expand random sampling on meat, seafood and other imported food.

The ministry will set up food inspection centers at quarantine stations in Japan's two major ports of Yokohama and Kobe for tighter checks on imported foods for residual agricultural chemicals and antibacterial substances.

Japanese consumer groups have been demanding stricter checks on imported foods as various farm chemicals were found in imported farm products, including "2,4-D," a defoliant that was used during the Vietnam war.

In September, the 13.5-million member Japan Consumers' Cooperative stopped importing lemons from the United States after discovering anti-mould agricultural chemicals.

#90275d7540 10/02/1990 ~French/German News Agency
MEXICO CITY (OCT. 2) - More Japanese investors might install assembly plants in Mexico for export to the United States if Mexico and the United States reach a free trade agreement, the president of the Export Import Bank of Japan said here.

"The new Japanese commercial strategy is to export from producing plants in third countries, so a free trade agreement would be an encouragement for establishing more of those plants in Mexico," Mitsuhide Yamaguchi, the bank's president said Monday.

Foreign owned assembly plants here take advantage of Mexico's low labor costs to assemble and re-export goods to the United States without having to pay Mexican taxes.

The governments of Mexico and the United States opened negotiations for a free trade agreement August 8 in Washington.

Mr. Yamaguchi Monday began a three-day visit to Mexico that is to include a meeting with Mexican President Carlos Salinas de Gortari, Finance Minister Pedro Aspe and other Mexican officials.

#90275d7570 10/02/1990 ~French/German News Agency

WASHINGTON (OCT. 2) - Government bank regulators have announced a new policy extending deposit insurance to 300 billion dollars kept in overseas branches of U.S. banks, the Washington Post reported Tuesday.

The Federal Deposit Insurance Corp. (FDIC), in a letter written last week by Paul Fritts, director of supervision, stated explicitly what previously had been an informal policy of insuring offshore deposits, the Post said.

The new coverage is not authorized by law and banks do not pay for the insurance.

The action has already split the banking industry and sparked criticism from Congress, the paper said.

The FDIC said the strategy was necessary to protect the competitive position of the nation's big banks, which have huge operations in world financial centers like London and Tokyo, the paper said.

According to the FDIC, the nine largest U.S. banks have 51 percent of their deposits in offshore branches, the Post said.

Most other nations' governments have promised to stand behind banks and protect depositors when banks fail, according to the report.

Mr. Fritts detailed the FDIC position in explaining why the agency had bailed out depositors who had 37 million dollars in accounts in a Nassau branch of National Bank of Washington (NBW) which was taken over recently by Riggs National Bank.

Congress already has hatched two competing plans to change the way overseas accounts are handled, the Post said.

One solution, favored by the American Bankers Association, forbids the FDIC from protecting offshore depositors.

The Independent Bankers Association of America backs an alternative plan that would require banks to pay for deposit insurance on their overseas deposits.

#90275d7600 10/02/1990 ~French/German News Agency
Berlin (OCT. 2) - The three Western Allied commanders of West Berlin signed document here Tuesday formally notifying West Berlin Mayor Walter Momper that their duties have been fulfilled -effectively relinquishing 45 years of military control.

Generals Raymond Haddock of the United States, Robert Corbett of Britain and Francois Cann of France signed the document in a final meeting of Allied military command at their headquarters in the Kaiserswerther Strasse in the Dahlem section of West Berlin.

The move was mandated by last months Two-plus-Four agreement in Moscow which granted sovereignty to unified Germany as of October 3. In keeping with that timetable, the Allied commanders notified Momper their duties would end at midnight Tuesday.

In their written notification, the generals said the 45-year presence of Allied forces in West Berlin had served as a constant reminder of the Western Allies' commitment to preserving liberty, democraty and the right of self-determination at any price.

General Corbett, recalling that the Allied command commenced on July 11, 1945, said he was pleased to be able to report that the relaxation in East-West tensions had brought the long command to a successful conclusion.

The Allied command structure was outlined in the London agreement of September 12, 1944, which spelled out the occupation and administration of the German capital. The Soviets walked out of the command setup shortly before the Berlin blockade on August 13, 1948. Under revised terms of command dating from May 5, 1955, the Western Allies restricted their duties to supervision of security and air traffic, handing over the day-to-day operation of West Berlin to city officials.

#90275d7660 10/02/1990 ~French/German News Agency
BAGHDAD (OCT. 2) - Tens of thousands of Iraqi schoolchildren staged a demonstration outside the U.S. Embassy here Tuesday to denounce U.S. intervention in the Gulf and the trade embargo on Baghdad, correspondents said.

The children, returning to classes Tuesday, shouted slogans against U.S. President George Bush during the three-hour gathering. "We love Saddam," they cried, referring to President Saddam Hussein, and, "Yes to Peace, No to War."

Education Minister Abdel Qader Ezzedin has said almost five million pupils were to attend school in this academic year, or around 27 percent of the

country's population.

The United States has sent some 143,000 ground troops to Saudi Arabia and dramatically bolstered its naval presence in the Gulf area following the Iraqi invasion of Kuwait August 2.

In addition, Washington has spearheaded a campaign at the United Nations to isolate Iraq through a series of tough Security Council sanctions.

#90275d7800 10/02/1990 ~French/German News Agency

LAGOS (OCT. 2) - Burkinabe President Blaise Compaore has admitted that the rebel leader of the National Patriotic Front of Liberia (NPFL), Charles Taylor once lived in Ouagadougou, President Ibrahim Babangida disclosed in an interview.

He gave no further details.

In an interview with West Africa magazine published this week, President Babangida said that his government had tried to appeal to "those we think may have influence on either Taylor or two countries we think are providing support for him that negotiations are much better than war".

During a visit to Nigeria last month, the U.S. Assistant Secretary of State for African Affairs, Herman Cohen, had talks with the government on the issue. A similar appeal, he said, was also made to the French authorities to use their influence on the Burkinabe leader.

Following Gambian President Dawda Jawara's recent visit to Burkina Faso, President Compaore gave "absolute assurance" that he would prevail on Mr. Taylor to accept negotiations, the Nigerian leader told the weekly magazine.

The presence in Monrovia of the West African peace-making force ECOMOG, made up of troops from Nigeria, Ghana, Sierra Leone, Gambia and Guinea, has, to "a certain extent", ensured the safety of lives, property and institutions, he also said.

NEW DELHI (OCT. 2) - Indian police opened fire on students protesting a government job quota scheme in the Indian capital Tuesday, leaving a number of people dead or injured, police and witnesses said.

The firing occurred when a crowd of students who had attended a rally of some 200,000 people to protest the government scheme converged on a small contingent of police at India Gate and pelted them with stones and rocks, the

witnesses said.

-30- 626
#90275d7820 10/02/1990 ~French/German News Agency
JOHANNESBURG (OCT. 2) - Zulu leader Mangosuthu Buthelezi has turned down an invitation to attend an African National Congress (ANC) conference on communal violence, the South African liberation movement said Tuesday.

The meeting between the ANC and leaders of six of the country's 10 tribal homelands - the four nominally independent homelands were specifically excluded - was to have taken place Friday, October 5.

The invitation was extended to Buthelezi in response to fighting between supporters of his Inkatha Freedom Party (IFP) and ANC followers which claimed up to 800 lives in August and September this year in townships around Johannesburg.

Buthelezi originally acknowledged the invitation but expressed concern that he had been invited in his capacity as Chief Minister of the KwaZulu homeland, and not as president of Inkatha.

The meeting would have brought him face-to-face with ANC deputy President Nelson Mandela.

Buthelezi has often criticised the de facto ANC leader for refusing to meet him to discuss a power struggle between the two organisations in the eastern Natal province in which 4,000 people have been killed in four years.

An Inkatha spokesman said Buthelezi was in Geneva, Switzerland, to attend the World Economic Forum conference on southern Africa and was therefore unavailable for comment.

He was expected back in South Africa next week.

-30- 1585
#90275d7870 10/02/1990 ~French/German News Agency
Manama (OCT. 2) - Jordan's ban on trucks crossing its territory into Saudi Arabia and other Gulf states has resulted in dramatic food price hikes in some Gulf countries, according to reports Tuesday.

Prices for vegetables and fruit soared in the United Arab Emirates, and skyrocketed by up to 500 percent in Dubai, said reports in regional newspapers.

Prices remained stable in Bahrain and were not expected to rise appreciably over the short run due to adequate supplies, according to a government spokesman in Manama.

Jordan slapped the truck blockade on through-traffic Monday in retaliation against Saudi Arabia's earlier decision to ban Jordanian trucks from carrying goods across the kingdom to Gulf states.

The decision by Saudi Arabia to ban Jordanian land exports to the Gulf was the latest in Saudi measures that have soured relations between the two countries since the August 2 Iraqi invasion of Kuwait.

Riyadh punished Jordan for failing to support its policies and for its opposition to the deployment of foreign forces in the Gulf by expelling Jordanian diplomats last week and cutting off of Saudi oil supplies to Jordan which amounted to half the country's oil needs.

#90275d7880 10/02/1990 ~French/German News Agency

DURBAN, SOUTH AFRICA (OCT. 2) - A man was killed when a bomb delivered in a computer case exploded Tuesday at the offices of South African anti-apartheid campaigner Tam Alexander here, police said.

The bomb exploded when Nic Cruise, an associate of Mr. Alexander, opened the case soon after it had been delivered in mid-morning. Mr. Cruise was killed instantly.

It is believed the bomb was aimed by rightwingers at Mr. Alexander, who is a member of the black nationalist African National Congress (ANC).

Mr. Alexander has played a leading role in trying to persuade whites not to serve in what the ANC describes as the "racist" South African army. His offices are situated in the residential suburb of Berea.

#90275d7990 10/02/1990 ~French/German News Agency

BONN (OCT. 2) - West German industrial production fell slightly, by 0.5 percent, from July to August, but for those two months combined, German output was 5.3 percent higher than the July-August 1989 period, Bonn reported Tuesday.

The Economics Ministry said that August performance was mixed. While construction in the month fell 7.5 percent compared to July, mining increased by 4.5 percent and food and luxury items output, spurred by demand from East Germany, was up 5.5 percent.

In comparing July-August 1990 to the same two months a year earlier, the ministry said manufacturing was six percent higher.

Food and luxury items production was 17 percent higher in July-August over

levels a year earlier. Investment goods (plus 6.1 percent) and consumer goods (plus 6.5 percent) were also robust.

Construction in July-August was 2.3 percent higher than in the same two months of 1989, the ministry said.

But two other sectors comprising the overall industrial output picture showed only moderate growth and decline, the ministry pointed out. The electricity and gas industry showed only 0.3 percent growth in July-August compared to a year earlier, while mining output declined by 2.3 percent.

In a separate report, the German Construction Industry Association said Tuesday that new housing orders in July were 22.4 percent higher than in July 1989, but that public-sector building contracts had fallen by 3.4 percent.

#90275d8010 10/02/1990 ~French/German News Agency

MARCH AIR FORCE BASE, CALIFORNIA (OCT. 2) - Retired U.S. Air Force General Curtis LeMay, who issued the order to drop atomic bombs on Japan at the end of World War II, has died. He was 83.

Gen. LeMay died Monday of a heart attack at the 22nd Strategic Hospital at March Air Force Base, east of Los Angeles, a hospital spokesman said.

The former four-star general said in 1985 that the atomic bombs dropped on Hiroshima and Nagasaki had not been necessary to force Japan's surrender.

"We felt that our incendiary bombings had been so successful that Japan would collapse before we invaded," he said.

The United States could have defeated Japan in "a few more days" if it had continued firebombing Japanese cities, he said, but then-president Harry Truman "told me to do it (drop the atomic bombs)."

During World War II in Europe, Gen. LeMay was instrumental in pressing the daylight bombing offensive against the Nazis.

His wartime strategies earned him recognition as the father of strategic bombing.

After the war, he was given command of the U.S. Air Force in Europe. He directed the airlift that kept West Berlin supplied after the Soviet Union cut off ground access to the city's western sector in 1948.

From 1948 to 1957 he was commanding general of the Strategic Air Command, and is widely credited with having transformed the largely demobilized air arm into a global strike force that could deliver nuclear weapons anywhere, at any

time.

He was promoted to full general while at the Strategic Air Command. After leaving that post, he became vice chief of the Air Force. Then-president John Kennedy named him chief of staff.

After he retired in 1965, Gen. LeMay grew angry and frustrated at Robert McNamara, the defense secretary under Mr. Kennedy and Lyndon Johnson.

He particularly disagreed with Mr. McNamara's restraints on U.S. air power during the Vietnam war.

Referring to North Vietnam, Gen. LeMay was quoted as saying, "They have got to draw in their horns and stop their aggression, or we are going to bomb them back into the Stone Age."

He later denied the statements, but said he saw nothing wrong with using nuclear weapons to shorten any war.

He ran for vice president in 1968 as George Wallace's running mate.

#90275d8070 10/02/1990 ~French/German News Agency

TOULOUSE (OCT. 2) - Airbus Industries, the West European airplane consortium, plans double its production from current levels by 1995, when output will reach 21 planes per month, the company said Tuesday.

Airbus Industries said here that monthly production by 1995 would be comprised of four A300A310 planes, seven A330A340 planes and ten A320A321 aircraft.

The company said the partner firms from France, Britain, West Germany and Spain had made the investment commitments to achieve the higher production volume in order to meet increasing demand.

Airbus Industries said that the production decline of early 1990 caused by

strikes could be evened out during the course of 1991. It expects to deliver its 1000th Airbus plane in 1992 and its 1,500th plane in 1995.

#90275d8080 10/02/1990 ~French/German News Agency

KUALA LUMPUR (OCT. 2) - Malaysian Prime Minister Mahathir Mohamad told ethnic-Chinese family-owned businesses Tuesday that they risked folding unless they were willing to expand and diversify by tapping the capital markets.

"There are many companies which are doing well enough to qualify for listing but are not keen because the owners of many of these family-owned businesses are afraid to lose control," Dr. Mahathir told a business convention.

He said that the Kuala Lumpur Stock Exhange's (KLSE) second board, launched two years ago to enable small companies with strong potential to tap the capital markets, listed only 10 companies.

The KLSE second board is open to companies with a paid-up capital of between five million and 20 million dollars (1.85 to 7.4 million U.S.) and a track record of at least two years with reasonable profit.

"If companies and enterprises are to survive their founders, they must be turned into public limited companies and have professional management," Dr. Mahathir said.

"Chinese family companies which prospered during the lifetime of their founders have all disappeared. The same will happen to the present family companies unless they convert to public limited companies," he said.

KLSE executive chairman Nik Mohamed Din Yusoff said that the lack of interest in the second board was not because of any stringent listing requirements.

"There is no feedback to say that they are not listing because of the requirements. It's just that there is no interest," he said.

Mr. Din said that small family-owned businesses did not want to diversify and did not want to be the target of any takeover.

"I've said that if you don't want to be the subject of a takeover, you don't have to float all your shares. You just have to float 30 or 40 per cent. In the event of a takeover bid, if you don't sell there can be no takeover," he said.

Mr. Din said that the KLSE was prepared to review listing requirements for the second board if they were thought too stringent.

He said that the KLSE, which currently lists 269 counters on its first and second boards, hoped to raise the number of companies listed to 300.

#90275d8140 10/02/1990 ~French/German News Agency

TOKYO (OCT. 2) - Japanese economists may fret over the long-term effects of the stock market's volatility, but the most serious problem of the day is the continuing labor shortage.

As Japan enters its 47th consecutive month of economic growth, the most recent government unemployment figures showed only 2.1 percent of the active population out of work, by far the lowest level of any industrialised country.

According to the Japanese Labor Ministry, 145 jobs were on offer for every 100 people seeking work in August. By the end of August a total of 64.17 million Japanese had jobs, 840,000 more than the year before.

In the construction business there are six vacancies for every candidate, according to the foreign securities firm W.I. Carr Ltd.

The personnel glut has caused tension in the labor market and fed inflation by pushing wages up -- by five percent in August compared with a year earlier.

Industries have responded to the labor shortage by investing heavily in rationalisation and automation.

Some companies have had to cut working hours and turn down orders.

The most serious shortage is among skilled workers, with shortfalls averaging 15 percent and up to 40 percent among metalworkers, according to a recent study by Mitsubishi Bank.

Automobile, electronics and household appliances firms have been forced to take on under-qualified personnel, the study said.

The economy's vitality will only exacerbate the labor situation over the next few years, especially in light of Japan's rapidly ageing population, analysts say.

Some research institutes predict that the economy could be lacking about two million personnel in two years.

A recent trade ministry survey found that about seven out of 10 firms expect the labor shortage to persist and attribute the problem to the structure of the Japanese economy.

Monetary authorities, starting with the Bank of Japan, are well aware of the problem's inflationary consequences.

Some economists say pending reforms in agriculture and distribution, two sectors that have enough hands and are not subject to market laws, might be a major source of manpower in the future.

Meanwhile, the government is gradually relaxing immigration laws as a means of building the work force.

The government also has encouraged the recent growth in part-time jobs and employment of women and the elderly.

The number of working women in August was up two per cent on last August, compared with 0.8 percent for men.

HARARE (OCT. 2) - Three rhino poachers were killed Monday in a shoot-out with police in Zimbabwe's main game reserve, according to police quoted here Tuesday by the semi-official Herald newspaper.

They said the poachers had been armed with an AK-47 rifle, three axes and two rhino horns when they were intercepted by a police anti-poaching unit in Hwange National Park in north-western Zimbabwe.

The park is one of the last major strongholds of the world's surviving population of some 6,000 black rhinos.

The report said police sustained no casualties, and were on the trail of more members of the gang who escaped.

Around 100 rhino poachers have been killed since 1985 when Zimbabwe launched a major campaign to protect the endangered beasts. Most of the poachers are believed to cross the Zambezi river from neighbouring Zambia.

Rhino horn commands high prices in the Far East where it is prized as a medicine and aphrodisiac and in Yemen where it is used for ceremonial dagger handles.

Dhaka (OCT. 2) - At least 25 people were injured Tuesday as police used force to break up a demonstration by fundamentalist Moslems in support of Iraqi President Saddam Hussein, eyewitnesses said.

About 500 members of the Islamic Mujahid Party marched along the streets of central Dhaka calling for a holy war against the United States.

Police intervened as the marchers, chanting ''Allah o akbar'' (Allah is great) and ''long live Saddam Hussein'', threatened to cross a road block on way to Dhaka's diplomatic district.

Eyewitnesses said police wielding batons dispersed the demonstrators carrying portraits of the Iraqi leader.

Rome (OCT. 2) - Gulf crisis talks between foreign ministers of the European Community and the Arab League have been postponed ''for several weeks'', a spokesman for the Italian E.C. presidency announced Tuesday.

The meeting originally was set to take place after the regular E.C. foreign minister talks in Venice Saturday and Sunday.

Preparations for the meeting were said to have been complicated by tensions within the Arab camp. Arab foreign ministers are to meet Wednesday in New York on the periphery of the U.N. General Assembly session to discuss the Gulf issue.

Leipzig (OCT. 2) - Arguing against a mood of despair for East Germany's economy, a top West German Bundesbank official said here Tuesday that East German industry had good prospects ahead and was starting to adapt better to the market system.

Bundesbank director Johann Wilhelm Gaddum told journalists that surveys taken of East German firms showed 60 percent of them reporting satisfactory order book volumes.

He said that East German firms were apparently adapting better to market economy conditions, especially with regard to prices and product quality.

Gaddum conceded that the current phase of adaptation was a painful one for East German firms. He said the problems were mainly rooted in the artificial pricing framework of the former socialist system and in East German industry's having been shielded from the world market.

But it was a positive sign that there was a high number of applications in East Germany to establish new firms. This signalled a restructuring going on in the trades and in services, Gaddum said.

The Bundesbank director's remarks, a day before the unification of East and West Germany, comes at a time of widely diverging economic developments in the

two Germanys, economic analysts say. While West German industrial performance remains robust, East German output has fallen and unemployment has risen.

TOKYO (OCT. 2) - Japan Airlines (JAL) is planning to introduce international telephone services on some of its trans-Pacific flights starting in March, JAL officials said Tuesday.

A one-minute call to Japan would cost about 1,000 yen (7.3 dollars).

JAL, the Japanese Ministry of Post and Telecommunications and Japan's international telecommunication giant KDD are in the final phase of a feasibility study on the project, the officials said.

ROME (OCT. 2) - Italian consumer prices rose 0.6 per cent in September over the August level, giving year on year inflation of 6.3 per cent, the same as in August, the national statistics institute said Tuesday.

Oil product prices accounted for 0.2 per cent of the month on month rise,

the institute said, and saw related items rise sharply with electricity and heating fuel up 1.6 per cent and transport up 0.7 per cent.

#90275d8640 10/02/1990 ~French/German News Agency

LONDON (OCT. 2) - Britain's exchange reserves fell 344 million dollars in September to 39.06 billion dollars, the first fall since April, according to seasonally-adjusted figures released Tuesday by the Bank of England.

The drop was worse than market forecasts of a fall in the reserves -- gold, currency and special drawing rights -- of between 80 million and 200 million dollars.

The fall was largely due to Bank of England intervention to support the pound at the end of the month when it fell sharply.

Major monthly fluctuations in the exchange reserves are generally seen by economists as giving an indication of the extent of Bank of England intervention on the exchange market during the month.

The reserves had risen by 366 million dollars in August.

#90275d8670 10/02/1990 ~French/German News Agency
KAKATA, Liberia (OCT. 2) - Traditional small trade is slowly resuming in Liberia, but few people can afford the prices which have been driven up as much as 10-fold during the West African country's nine-month civil war.

Market women have begun to spread out their wares along the streets of Kakata, a crossroads 55 kilometers (35 miles) north of Monrovia, where thousands of refugees have passed through in recent weeks in search of family.

Residents here are thought to be virtually the only people in Liberia to have electricity, recently restored after a four-month outage.

But prices for many basic commodities have quadrupled since Easter, corresponding to the black market rate for the Liberian dollar.

One U.S. dollar is now exchanged for 10 Liberian dollars. In April, police were arresting Lebanese traders exchanging at a ratio of only 2.5 to one. Officially, the Liberian dollar is on a parity with the U.S. dollar.

The rebellion, launched last December by Charles Taylor's National Patriotic Front of Liberia (NPFL), has driven the price of a 50-kilogram (110-pound) bag of wheat to 400 Liberian dollars, up from 38 Liberian dollars six months ago.

Prices for locally produced items have quadrupled. A bar of soap costs one dollar, while a stack of firewood in this heavily forested country now costs 10 dollars. A 10-kilogram (22-pound) sack of charcoal sells for six dollars.

COLOMBO (OCT. 2) - Rival groups of the Liberation Tigers of Tamil Eelam (LTTE) in the north east of the country are being provided with weapons by the Sri Lankan government for "self-defence", the leader of Tamil group said on Tuesday.

Douglas devanandan, leader of the Eelam People's Democratic Party (EPDP), a splinter group of a former Tamil militant group, said that almost all rival Tamil groups of the LTTE were using weapons issued by the state to face any threat from the LTTE, the main Tamil rebel faction in the country.

He said its cadres that were operating in the Sri Lankan army occupied Kayts island in northern Sri Lanka and the weapons issued for "self defence" might be used for the "destruction of the LTTE, which is fighting for an independent homeland in the north east of the country for the minority Tamils.

The People's Liberation Organistion of Tamil Eelam (Plote), another rival

group, has also admitted that it was moving about in the northern Vavuniya districts with weapons issued by the government.

Civilians arriving in Colombo form the war-torn north east said most of the rival Tamil groups were assisting the army in their operations against the powerful LTTE.

The Tamil rebels are holding on to over 90 percent of the land in the north, while government troops have been confined to three main military camps there. In the east, security forces have taken control of most areas except for a few rebel pockets.

CHEMNITZ, EAST GERMANY (OCT. 2) - The city of Chemnitz, in southern East Germany, has scrubbed Adolf Hitler's name from its roll of citizens of honour, the city's press service said Tuesday.

The city hall said the measure was retroactive, with effect from Hitler's death in 1945.

The Gauleiter, or Nazi governor, of the state of Saxony, Martin Mutschmann, was also taken off the roll.

Chemnitz was renamed Karl-Marx-Stadt under the German Democratic Republic, which disappears under unification.

Local officials voted to give the city back its former name after the ouster of East Germany's hardline government on October 18 last year.

Brussels (OCT. 2) - European Community foreign ministers have approved special aid worth 2 billion dollars for Egypt, Jordan and Turkey as countries especially affected by the Gulf crisis, the E.C. Commission said here Tuesday.

The Commission said that the foreign ministers approved the funds, which will be distributed to the three countries by the end of 1991, at a meeting in New York.

The E.C. is to provide one-third of the money, with the individual Community countries coming up with the remaining two-thirds.

At the same time, the ministers agreed in principle to extend aid to other countries negatively affected by the Gulf crisis and the blockade against Iraq.

The Commission said that in reviewing which countries may qualify for such help, two main factors would be considered - oil prices, and to which degree a country's foreign trade situation is affected by the economic embargo against Iraq.

The E.C. aid for Egypt, Turkey and Jordan is to be provided within the framework of some 9 billion dollars' worth of help which wealthy industrial nations as well as such Gulf oil producers as Saudi Arabia, Qatar and United Arab Emirates are to provide.

The aid breakdown would amount to 4 billion dollars for Turkey by the end of 1991, 3 billion for Egypt, and 2 billion dollars for Jordan, the Commission said.

Hamburg (OCT. 2) - Germany's now-united Christian Democratic Union (Cdu) adopted a party platform for all-German elections on December 2 at the close of its congress here Tuesday.

Cdu general-Secretary Volker Ruehe said the elections would be ''even more significant'' than the first free ballot in the Federal Republic in 1949.

Chancellor Helmut Kohl, who on Monday became the first chairman of an all-German Cdu, urged his party to ''apply all its strength'' in integrating the Germanys and winning the elections. East and West Germany officially unite on Wednesday.

The party platform calls for the establishment of an ecological and social market economy in all of Germany. The Cdu has dubbed itself the ''party of unity''.

Former East German Prime Minister Lothar de Maiziere, who has repeatedly pressed the party to be more open to social issues, is Kohl's sole deputy.

KIGALI (OCT. 2) - The authorities in Rwanda announced a curfew Tuesday throughout the Central African country following fighting between Rwandan army troops and a commando that they said came from Uganda earlier in the day.

The Ministry of National Defence said in a communique broadcast on Radio Rwanda that the country had been attacked in the northeast region of Mutara "by elements from Uganda".

It said the curfew would last from 8 p.m. (1800 GMT) to 5 a.m. (0300 GMT), and called on all Rwandans to watch out for and report anyone "infiltrating" among them.

In Nairobi, an informed source said rebel forces were rapidly approaching the Rwandan capital. He said the attackers included Rwandans serving in the Ugandan military.

Earlier, sources here said commandos had launched a dawn attack on several villages in Kagitumba valley. The army counter-attacked quickly but fighting continued for much of the day, the sources said.

Since May, about 2,000 Rwandans have crossed into southern Uganda because of land and food shortages in Rwanda, informed sources said in Kampala last month.

According to official figures, 84,000 Rwandans have fled to Uganda since 1959.

The source in Nairobi said several attacks have been launched on Rwanda by anti-government forces crossing from Uganda, Zaire, Burundi and Tanzania.

New Delhi, Oct 2 dpa - The worst rioting in weeks erupted Tuesday in New

Delhi on the 121st anniversary of the birth of Mahatma Gandhi.

More than 200,000 people joined in a demonstration to protest against the government's job plan for lower castes.

Groups of demonstrators wielding axes, iron bars, clubs and chains clashed with police.

Authorities ordered para-military units into the city, the Indian news agency Uni reported.

The anniversary, which is a national holiday, started with rioters burning cars, smashing windows of government buildings, and looting shops.

Police used teargas and water cannons to disperse demonstrators and strengthened guards outside government buildings and the homes of politicians.

At least 70 persons have died in protests since the government announced its job plan on August 7th. The Indian supreme court Monday ordered a halt to the plan, which has aroused violent opposition from upper castes.

The court ordered the government not to press ahead with the plan until the government had completed lists of the castes it intended to benefit. The judges also said they hoped that the halt would help to cool tempers.

Mahatma Gandhi, Indian nationalist leader, was born in 1869. He was assassinated in 1948 by a Hindu fanatic incensed by Gandhi's advocacy of friendship between Hindus and Moslems. dpa pt 021425 okt 90

#90275d9370 10/02/1990 ~French/German News Agency
PRETORIA (OCT. 2) - South Africa managed to roll over or refinance about one billion rand (390 million dollars) of foreign debt in the second quarter of this year, according to figures in the Reserve Bank's latest quarterly review.

They show that total capital outflow during the second quarter was 2.19 billion rand (854 million dollars) as against about three billion rand (1.17 billion dollars) of foreign debt that fell due.

The outflow comprises not only foreign debt payments but also other capital outflow.

Reserve Bank economists said Tuesday they were unable to give an exact breakdown of outflow, but added it was clear that a large amount of maturing debt must have been rolled over, though some new sources of foreign capital may have been tapped.

Since 1985, South Africa has been slowly working its way out of a debt crisis sparked when foreign banks refused to roll over debt repayments and cut their credit lines to Pretoria.

The portion of overall foreign debt caught in the standstill net has dropped from more than 57 percent at the time of the moratorium in 1985 to just over 35 percent at the end of 1989.

Overall, Pretoria's foreign debt declined from 22.6 billion dollars in 1987 to 20.6 billion dollars at the end of last year.

Economists said last year that 1990 would be the worst year for foreign debt repayments, with 1.9 billion dollars falling due, the bulk of it in the second quarter.

But total capital outflow in the three months was less than the 2.9 billion rand (1.1 billion dollars) outflow in the third quarter of 1988, the heaviest repayments since the moratorium.

After weathering the foreign debt storm the balance of payments remained healthy in the next two months, with the review noting that the Reserve Bank's net foreign reserves soared by 1.2 billion rands (468 million dollars) in July and August this year.

Net reserves do not include foreign bridging finance and are a purer reflection of the balance of payments performance than the monthly figures released by the Bank.

The inflow allowed the Bank to repay more than one billion rand (390 million dollars) of foreign bridging finace taken in the second quarter to tide South Africa over the heavy foreign debt repayments.

Economists said Tuesday that the fact that South Africa had sailed so easily through its foreign debt crisis was proof that the country was on its way back to international financial respectability.

Recent reforms by President Frederik de Klerk and his highly-successful trip to the United States ought to ease the position even further and Pretoria should have no difficulty in meeting 1991's scheduled repayments of one billion dollars, they said.

#90275d9450 10/02/1990 ~French/German News Agency

JOHANNESBURG (OCT. 2) - A massive 1.4-million man-days were lost through industrial action in South Africa in the third quarter of this year, figures released Tuesday by industrial relations firm FSA-Contact show.

The number of man-days lost was well above the total of 1.2-million lost in the first half of the year. In the first quarter, 699,000 man days were lost.

The increase was attributed by the company to deadlock in this year's round of wage negotiations in various sectors.

The manufacturing, public and chemical sectors accounted for 18 percent, 16 percent and 14 percent respectively of all strikes.

#90275d9540 10/02/1990 ~French/German News Agency

ZAANDAM, Netherlands (OCT. 2) - The Netherlands' largest supermarket chain, Ahold, said Tuesday it planned to cancel all outstanding preferred stock, introduced last year to fend off a hostile takeover bid from Asko Kaufhaus of West Germany.

"As the threat has disappeared, the preferred stock can be cancelled," the group said in a statement.

The Fondation Ahold Continuite, which held all the preferred stock, had given its agreement to the move and it would be put to a special shareholders' meeting October 30.

Ahold, one of the top ten supermarket chains in the United States with the Bi-Lo, Giant Food Stores and First National Supermarkets names, said it also planned to propose to shareholders cutting the nominal value of its ordinary shares from five guilder to 2.5 guilder (2.7 to 1.35 dollars).

This was in view of plans to list Ahold on the U.S. National Association of Securities Dealers Automated Quotation System (NASDAQ), bringing the nominal value of Ahold stock into line with that of comparable U.S. companies and thus encouraging trading in the shares.

Ahold's fight to fend off the Kaufhaus bid began last year when Asko Kaufhaus quietly acquired 15 per cent of the Dutch firm at a time when it was holding discussions with the group - as were Casino of France and Argyll of Britain - on possible collaboration.

When Ahold discovered this, it broke off talks with Asko Kaufhaus and introduced the preferred stock to fend off any takeover attempt. It later signed a cooperation agreement with Casino and Argyll in September last year.

Asko finally threw in the towel in July after several abortive attempts to pursue the matter through the courts, and sold its 15 per cent stake in Ahold to a bank consortium headed by Amro of the Netherlands and Deutsche Bank of West Germany.

Ahold made a net profit of 71.4 million dollars in the first half of this year up 41.3 percent over the same period last year.

Almost half its 10 billion dollars in sales last year came in the United States, and group president Pierre Everaert has said it wants to expand further in the North American market.

#90275d9570 10/02/1990 ~French/German News Agency

RIYADH (OCT. 2) - British Secretary of State for Energy John Wakeham held talks here Tuesday with Saudi Arabian Oil Minister Hisham Nazer on ways to expand bilateral cooperation in the light of the Gulf crisis, informed sources said.

The two ministers discussed Saudi efforts to make up for some four million barrels of oil a day (bd) produced by Kuwait and Iraq before the United Nations imposed an embargo on Baghdad for its August 2 invasion of Kuwait, they said.

Mr. Wakeham told reporters that Britain insisted on an Iraqi withdrawal from Kuwait and the return of the Kuwaiti government under Sheikh Jaber al-Ahmad al-Sabah.

The two men also reviewed means of stabilizing oil prices.

On Monday, Mr. Nazer said Saudi Arabia had raised oil production by more than two million bd since the invasion and would increase it even further "in the near furture".

The extra production is aimed at trying to moderate prices and make up for the lost Iraqi and Kuwaiti output.

Mr. Wakeham, who arrived here Sunday from the United Arab Emirates, also met

earlier with the Saudi ministers of industry and finance for discussions on bilateral cooperation.

#90275d9610 10/02/1990 ~French/German News Agency

BANGKOK (OCT. 2) - Thailand is considering opening direct negotiations with the United States in a bid to end a dispute between the two countries over Bangkok's ban on foreign cigarette imports, the Thai foreign ministry said Tuesday.

Thailand is considering negotiations in the wake of a ruling by the General Agreement on Tariffs and Trade (GATT) against Thailand on the issue, ministry spokesman Saktiepya Kraireuk said.

It was the first official confirmation of the GATT ruling, which Thai and U.S. Embassy officials had said was to remain confidential until a council meeting of GATT set for November 7.

(Informed GATT sources said in Geneva Tuesday that a GATT disputes panel had ruled that the Thai restrictions violated GATT agreements.

(As a result, Bangkok should renounce its tobacco monopoly and allow U.S. cigarettes into the country, it said, but did not accept U.S. complaints that tariffs and taxes on cigarettes violated GATT rules).

The move has prompted speculation of U.S. trade sanctions against Thailand.

According to a U.S. diplomat here, GATT is empowered to approve retaliatory measures against a country found guilty of unfair trade practices, while Washington could also impose sanctions under Section 301 of the Omnibus Trade Bill passed by the U.S. Congress in 1988.

In an interview broadcast over state-run Radio Thailand, Thai Foreign Minister Subin Pinkayan, who is currently in the United States, expressed hope that trade disputes with the United States, including those on cigarette imports, textiles, countervailing duties and agricultural subsidies, could be resolved.

#90275d9710 10/02/1990 ~French/German News Agency

BUDAPEST (OCT. 2) - Retail prices in Hungary rose an average 27.1 percent in the first eight months of the year against the same period in 1989, figures released Tuesday by the central statistical office showed.

Food prices rose almost 35.4 percent, coffee, tea and tobacco rose 26.3 percent and clothing rose 22 percent, the figures showed.

Prices rose fastest in August hitting an average 31.6 percent compared to August 1989. The average for the first seven months of the year was 26.3 percent.

Meat, milk, flour, pasta and citrus fruit rose more than 40 percent in August. The price of bread, sugar, chicken, butter, oil, chocolate and fruit rose between 30 to 40 percent in the same month.

#90275d9750 10/02/1990 ~French/German News Agency

LUANDA (OCT. 2) - Angola's current ambitious monetary reform, which has seen the kwanza replaced by a new kwanza worth only half as much, aims at restoring economic health and encouraging privatisation, analysts say here.

But the reform, announced last month, has so far led to some confusion, as people flocked to banks to fulfil a requirement to hand over all their old kwanza for new ones - only to find that they were only allowed to keep five per cent of their cash.

The remaining 95 percent is being placed in special savings accounts to be made available by the government at a future date which has not yet been announced.

The new kwanza is valued at 60 to the dollar, against 30 old kwanza to the dollar, according to a report by the Angolan news agency ANGOP monitored in Lisbon on Monday, but many people here fear that further stringent devaluation is to follow.

The official exchange rate has always been far removed from the rate on the flourishing black market in this Marxist-governed country, where barter and other arrangements have flourished.

But the government has been seeking to reduce the amount of cash in circulation as the value of the currency has fallen, leaving people forced to go shopping with huge wads of notes.

The currency reform has sparked confusion, with most shops on Monday refusing to sell anything on the grounds that they did not know how much to charge under the new system.

Cans of beer, however, generally seen as a litmus test of the pricing system as a whole, were changing hands at 20 new kwanza against 4,000 old kwanzas.

YUGOSLAVIA REGISTERS 7.1 PERCENT INFLATION RISE IN SEPTEMBER

BELGRADE (OCT. 2) - Retail prices in Yugoslavia rose 7.1 percent in September, Vice Prime Minister Zivko Pregl said Tuesday.

The cost of living had risen 7.6 percent, due largely to the rise in the price of agricultural products and services Mr. Pregl told the national press agency Tanjug.

Mr. Pregl said his government planned to cut inflation by importing 600 million dollars worth of meat, flour, rice and sugar and by easing controls on imports.

The government said it would try to keep inflation in the next three months to 1.5 percent a month on condition that consumption was curbed and salary increases kept to a minimum.

Huancayo, Peru (OCT. 2) EFE - Suspected Maoist rebels murdered four leading members of civilian militias after dragging them from their homes in the central Peruvian city of Huancayo, police said Monday.

Police found the bodies of the four, aged from 20 to 25, early in the day on a street in the Pilcomayo district.

They bore wounds caused by guns, knives and explosives, police said.

The civilian militias have been organized in Peru to help security forces fight leftist rebel violence, mainly by the Maoist Shining Path guerrilla group, which police blamed for the killings.

At least 21,000 people have died in political violence in Peru since Shining Path took up arms in 1980.-EFE

Paris (OCT. 2) EFE - The majority of French people are opposed to a war with Iraq, although most of them support their government's decision to send troops to the Gulf to stave off further Iraqi aggression, according to a poll published Tuesday.

The survey, published by the daily Le Monde, showed that 83 percent of those interviewed were against a military showdown with Baghdad and favored a negotiated solution to the crisis.

But 90 percent said they saw the French government's decision to send troops to join the multinational force in the Gulf as a bid to ensure international laws were respected.

Sixty-one per cent of those surveyed said France should participate in an attack on Iraq if its Western allies decided to launch an offensive.

Thirty-nine percent said they backed a bombardment of Iraqi military installations in Baghdad even if Western hostages were being held in the city, while 49 percent said they opposed the idea.

Le Monde's survey was carried September 25 and 26 and questioned 1,006 people over the age of 18.

France was one of the first countries to send troops to join U.S. forces deployed in the Gulf following Iraq's August 2 invasion of Kuwait and has backed United Nations resolutions against Baghdad.

#90275e0019 10/02/1990 ~Latin America New Agency

Johannesburg (OCT. 2) EFE - Zulu Chief Mangosuthu Buthelezi has turned down an invitation from Nelson Mandela to attend a meeting of +homeland+ leaders to discuss ways of ending South Africa's black township warfare, the African National Congress (ANC) said Tuesday.

Buthelezi's Inkatha movement, based in the Zulu tribe, is locked in a bitter struggle with Mandela's ANC, a majority of whose members belong to the Xhosa tribe.

The ANC said Buthelezi gave no reason for his refusal to attend the October 5 meeting at Mandela's residence in the Soweto township.

Observers said Buthelezi may have spurned the invitation because Mandela invited him as chief of one of the ten black "homelands", rather than as Inkatha chief.

Buthelezi is chief minister of the KwaZulu homeland, one of the nominally

autonomous or independent rural areas set aside by the South African government as part of its segregation policy.

The government has been urging the two black rival leaders to meet in the hopes of helping to end the violence in the townships which has killed 800 people since August.

In a related development, Pretoria was still considering an ANC request for a third summit to discuss the factional township fighting.

The ANC had proposed that the talks be held before Saturday when Mandela, the ANC deputy president, departs on a tour of India, Australia and the Soviet Union.

But a government spokesman said that such a high-level meeting would not be opportune as joint government-ANC working groups have not made enough progress in preparatory work.

Previously Mandela has refused to meet Buthelezi, accusing him of promoting the violence so that he would have to be included in any negotiations on the elimination of South Africa's racist apartheid system.

Buthelezi is a conservative who has been accused by his rivals of collaborating with white leaders for years.

ATHENS (OCT 2) EFE - A former Greek Socialist deputy prime minister was jailed Tuesday after being charged with having accepted a bribe of more than a million dollars in exchange for drawing up a financial law to benefit the owner of a bank.

Agamemnon Koutsogiorgas, who served under ex- premier Andreas Papandreou, will be held in jail until the trial begins of what has been described as one of Greece's biggest-ever financial scandals.

Koutsogiorgas allegedly received a dlrs 1.2 million bribe in return for drawing up a law which prevented the (central) Bank of Greece gaining access to the financial affairs of the Bank of Crete -- owned by magnate George Koskotas.

The alleged bribe was deposited in a bank account in Switzerland.

Koskotas is in jail in the United States charged with tax evasion. The Greek government has asked for his extradition on the grounds that he was responsible for having embezzled more than dlrs 200 million of Bank of Crete funds.

The former deputy prime minister, who was considered Papandreou's right-hand man during the prime minister's 1981-89 administration, said Tuesday that the accusations against him were +an act of vengeance+ by political opponents.

Koutsogiorgas' wife Aliki is also to appear before a judge Tuesday. The alleged bribe was deposited in an account to which she also had access.

The Greek Parliament lifted the former deputy prime minister's immunity status last September.

It has also removed that of Papandreou and five former Socialist ministers so they could also be tried in the financial scandal.

Papandreou, 72, was admitted to hospital Monday suffering from a lung infection.

HAMBURG (OCT. 2) EFE - On the eve of German unification, West Germany's ruling Christian Democrats fused with their East German counterparts and by a near-unanimous vote nominated West German Chancellor Helmut Kohl as their candidate for December's all-German elections.

Before wrapping up the two-day party congress, 98.5 per cent of the delegates present -- a quarter of whom were from East Germany -- endorsed Kohl as their choice to carry on as leader of the united Germany that officially comes into existence on Wednesday.

Kohl was hailed by his supporters as the architect of German unification, although his many detractors maintain he did little more than exploit the collapse of the Communist regime in East Germany and the subsequent economic breakdown.

In his acceptance speech, Kohl said, "We are the principal political force in the country and we shall continue to be so in the times ahead. Thus we have the principal responsibility for Germany's future."

Speaking to the delegates Monday, Kohl said the main tasks ahead for a united Germany would be the economic reconstruction of the former East German states, progress towards European unity, and the eventual creation of the United States of Europe.

Germany must take its place in the emerging international order and fully assume the responsibilities deriving from its importance in the new scheme of things, said Kohl, who is widely tipped as the favorite in the December 2 elections.

East German Prime Minister Lothar de Maiziere was elected vice president of Kohl's Christian Democratic Union and is expected to be offered a top government post if Kohl wins in December.

NEW YORK (OCT. 2) EFE - Soviet President Mikhail Gorbachev is to make his first visit to Spain within the next two months, +barring any last minute hitch+, Spanish Foreign Minister Francisco Fernandez Ordonez said Tuesday.

Fernandez Ordonez and his Soviet counterpart, Eduard Shevardnadze, met in New York where they were attending the United Nations General Assembly and a meeting of the 35-nation Conference on Security and Cooperation in Europe (CSCE)

The Spanish foreign minister said both sides were still studying specific dates for the trip but that Gorbachev wanted to go to Spain before the CSCE Paris summit scheduled for November 19-21.

He said Gorbachev and Spanish Prime Minister Felipe Gonzalez would sign some 30 accords, including one guaranteeing Spanish investments in the Soviet Union.

MANAGUA (OCT. 3) EFE - Sandinista leader Carlos Nunez, a former urban guerrilla who presided over the Nicaraguan National Assembly for 10 years, died from a heart attack Tuesday, the Radio Sandino station announced.

Nunez, 39, was the youngest of the nine-person Directorate that led the country from the 1979 Sandinista revolution that overthrew dictator Anastasio Somoza until last February's surprise electoral defeat by President Violeta Chamorro's UNO coalition.

The young Sandinista commander played an important part in the defeat of the Somoza regime, having led the so-called Internal Front which was responsible for waging the leftist insurgency in Nicaraguan cities during the late 1970s.

Nunez died in a hospital in the Cuban capital, Havana, where he was taken Sunday after falling gravely ill from a disease he had been suffering from for more than a year.

A Marxist-Leninist, Nunez married the daughter of ex-Central Bank president Joaquin Cuadro Chamorro although they were recently divorced. Nunez remarried last February.

#90275e0072 10/02/1990 ~Latin America New Agency
Boston (OCT. 3) EFE - A Colombian judge has requested asylum in the United States after receiving death threats from alleged drug traffickers in her country, U.S. immigration officials said.

Judge Clara Parra Bravo, 41, fled Colombia in April with her two teenage children after an anonymous caller +invited+ her to attend her own funeral on May 5, the officials said.

During her interview Tuesday with immigration authorities, she told officials that the northern town of Guamal, where she was a municipal judge, was dogged by violence from drug traffickers and leftist rebels.

She added that 200 judges have been murdered in Colombia since 1981, mostly by gunmen at the pay of the infamous Medellin Drug Cartel, which has attempted to ensure its impunity in the country through the intimidation and bribery of judicial and government officials.

The immigration officers said Parra's asylum request would be examined by the State Department.-EFE

LUSAKA (OCT. 2) XINHUA - WHILE FEES HAVE ONLY BEEN LEVIED ON NON-ESSENTIAL MEDICAL SERVICES IN THE PAST, THE ZAMBIAN GOVERNMENT HAS ANNOUNCED FEES FOR MEDICAL SERVICES PROVIDED IN ALL HEALTH CENTRES AND HOSPITALS IN ZAMBIA.

ACCORDING TO THE LATEST ISSUE OF THE GOVERNMENT GAZETTE THAT PEOPLE WILL HAVE TO PAY AN ADMISSION FEE OF 20 KWACHA (0.5 U.S. DOLLAR) IN GENERAL HOSPITALS AND THEREAFTER PAY A DAILY FEE OF 50 KWACHA (1.2 DOLLARS) FOR THE FIRST SEVEN DAYS.

THIS WILL BE REDUCED BY HALF FOR THE NEXT SEVEN DAYS AND THEREAFTER NO FEE WILL BE CHARGED.

IN DISTRICT HOSPITALS, THEY WILL PAY 50 KWACHA REGISTRATION FEE IF THEY HAVE NOT BEEN REFERRED AND 10 KWACHA WHEN THEY HAVE.

OTHER FEES TO BE CHARGED ARE 50 KWACHA FOR CONSULTATION AND FIVE KWACHA FOR A

PRESCRIPTION IN A CENTRAL HOSPITAL WHILE IN A GENERAL HOSPITAL, THE PRESCRIPTION FEE WILL ALSO BE FIVE KWACHA BUT THERE WILL BE NO CHARGE FOR CONSULTATION.

IN DISTRICT HOSPITALS, THE REGISTRATION FEE FOR REFERRED PATIENTS WILL BE FIVE KWACHA AND 30 KWACHA FOR NON-REFERRED PATIENTS WHILE CONSULTATION AND TREATMENT FEES WILL NOT BE PAID FOR.

HOWEVER, MATERNITY CASES, CHILD CARE AND MENTAL PATIENTS WILL BE EXEMPTED FROM PAYING THE FEES.

THE MOVE ALLOWING MEDICAL INSTITUTIONS TO CHARGE FOR THE SERVICES THEY PROVIDE IS AIMED AT ENABLING THEM TO GENERATE INCOMES TO SUPPLEMENT GOVERNMENT GRANTS AND EVENTUALLY ENSURE SELF-SUSTAINABILITY.

#90275h0202 10/02/1990 ~Chinese News Agency

BEIJING (OCT. 2) XINHUA - CHINA WILL GIVE TOP PRIORITY IN THE 1990S TO BUILDING A COMPREHENSIVE NETWORK OF ROADS WHICH WILL SPAN THE MAINLAND, TODAY'S "CHINA DAILY" REPORTED.

ACCORDING TO THE PLANS OF THE MINISTRY OF COMMUNICATIONS, ABOUT 90,000 KM OF HIGHWAYS WILL BE BUILT DURING THE EIGHTH FIVE-YEAR PLAN PERIOD (1991-95), INCREASING THE COUNTRY'S TOTAL TO 1.11 MILLION KM. AT THE SAME TIME, THE COUNTRY'S ONE MILLION KM OF EXISTING HIGHWAYS, MOST OF WHICH NEEDS REPAIRING, IS ALSO TO BE UPGRADED.

THE FIRST PHASE OF THE HIGHWAY PROJECT INVOLVES THE CREATION OF 12 TRUNK HIGHWAYS TOTALLING 25,000 KM, ACCORDING TO COMMUNICATIONS VICE MINISTER WANG ZHANYI.

THE HIGHWAY PROJECT MAY TAKE 10 YEARS TO COMPLETE. AFTER COMPLETION, THE MAJOR HIGHWAYS INCLUDED IN THE PROJECT WILL FORM A NETWORK WHICH CONNECTS ALL PROVINCIAL CAPITALS, INDUSTRIAL CENTRES, TRANSPORTATION HUBS AND PORTS.

THESE HIGHWAYS ARE ALSO EXPECTED TO TAKE THE LION'S SHARE OF THE VOLUME OF TRANSPORT SO THAT THE HEAVY BURDEN CARRIED BY RAILWAYS CAN BE LESSENED.

THIS YEAR, SOME 12,500 KM OF ROADS, INCLUDING THREE EXPRESSWAYS, WILL BE COMPLETED, INCREASING THE TOTAL TO 1.03 MILLION KM, SAID WANG WHO IS IN CHARGE OF HIGHWAYS AT THE MINISTRY.

IN CONJUNCTION WITH THE HIGHWAY PROJECTS, THERE WILL ALSO BE NEW ROADS BUILT IN REMOTE AND UNDERDEVELOPED REGIONS TO HELP SPEED ECONOMIC DEVELOPMENT IN THESE AREAS.

#90275h0204 10/02/1990 ~Chinese News Agency
HONG KONG (OCT. 2) XINHUA - THE VALUE OF HONG KONG'S TOTAL RETAIL SALES IN JULY THIS YEAR ROSE BY 16 PERCENT TO 9,819 MILLION H.K. DOLLARS (1,258 MILLION U.S. DOLLARS) OVER A YEAR AGO.

MEANWHILE, ITS RETAIL SALES IN VOLUME GREW BY NINE PERCENT, ACCORDING TO THE PROVISIONAL GOVERNMENT STATISTICS RELEASED HERE TODAY.

THE MARKED INCREASES WERE PARTLY DUE TO A PICK-UP IN LOCAL PEOPLE'S CONSUMER SPENDING AND ALSO TO A LOW BASE OF COMPARISON IN JULY LAST YEAR.

COMPARING WITH JULY LAST YEAR, RETAIL SALES OF CONSUMER DURABLES ROSE BY 31 PERCENT IN VALUE AND 23 PERCENT IN VOLUME, AND THAT OF MOTOR VEHICLES AND PARTS WENT UP BY 39 PERCENT IN VALUE AND 28 PERCENT IN VOLUME.

RETAIL SALES OF FOODSTUFFS, ALCOHOLIC DRINKS, TOBACCO, FUELS, CLOTHING, FOOTWEAR AND ALLIED PRODUCTS ALSO INCREASED.

IN THE FIRST SEVEN MONTHS OF THIS YEAR, HONG KONG'S TOTAL RETAIL SALES INCREASED BY SIX PERCENT IN VALUE, BUT REMAINED ALMOST UNCHANGED IN VOLUME COMPARED WITH THE SAME PERIOD OF LAST YEAR.

-30- 1156
#90275h0229 10/02/1990 ~Chinese News Agency
ISTANBUL (OCT. 2) XINHUA - TURKEY, HARD-HIT BY SOARING OIL PRICES BECAUSE OF THE GULF CRISIS, HAS RAISED THE PRICES BY ANOTHER 15 PERCENT, THE FOURTH RISE SINCE AUGUST 7, LOCAL NEWSPAPERS REPORTED TODAY.

THE STATE-OWNED TURKISH OIL REFINERIES CORPORATION (TUPRUS) DECIDED TO RAISE AS OF MONDAY THE PRICE OF SUPER GRADE PETROL BY 15.5 PERCENT TO 2,648 TURKISH LIRA PER LITRE (ABOUT 0.97 U.S. DOLLAR) FROM 2,295 LIRA (ABOUT 0.84) AND THAT OF DIESEL FUEL BY 14.9 PERCENT TO 1,903 LIRA PER LITRE (ABOUT 0.70 DOLLAR) FROM 1,656 LIRA (ABOUT 0.61 DOLLAR).

WITH THD LATEST INCREASE, PETROL PRICES IN TURKEY HAVE SHOT UP BY ABOUT 70 PERCENT SINCE IRAQ'S AUGUST 2 INVASION OF KUWAIT, SERIOUSLY HAMPERING THE COUNTRY'S EFFORTS TO CURB INFLATION, WHICH IS OFFICIALLY PROJECTED AT 54.5 PERCENT BY THE END OF THE YEAR.

OFFICIALS ESTIMATE THIS TARGET WILL BE EXCEEDED BY 5-8 PERCENTAGE POINTS.

BEFORE THE GULF CRISIS, THE PRICE OF SUPER GRADE PETROL WAS 1,391 LIRA (ABOUT 0.51 DOLLAR) PER LITRE AND THAT OF DIESEL FUEL 1,191 LIRA (ABOUT 0.44 DOLLAR).

TURKEY, WHICH IMPORTS 90 PERCENT OF ITS OIL NEEDS, HAS BECOME PRONE TO FLUCTUATIONS ON THE SPOT MARKET AFTER SHUTTING DOWN A VITAL IRAQI OIL PIPELINE

ACROSS THE COUNTRY TO THE MEDITERRANEAN, FROM WHICH IT GOT 60 PERCENT OF ITS OIL IMPORTS IN 1989.

"THE ABNORMAL RISE IN INTERNATIONAL OIL PRICES, WHICH HAVE HIT 40 U.S. DOLLARS A BARREL, HAS NECESSITATED THE READJUSTMENT OF OUR PETROL PRICES," MEHMET SAVRAN, GENERAL MANAGER OF TUPRUS TOLD REPORTERS.

"IF THE WORLD OIL PRICES FALL, THEY WILL BE REFLECTED IN THE DOMESTIC MARKET," HE ADDED.

THE RISE IN THE WORLD OIL PRICES IS OFFICIALLY ESTIMATED TO PUT AN EXTRA 2 BILLION U.S. DOLLARS NEXT YEAR ON TURKEY'S OIL IMPORT BILL WHICH STOOD AT 2.46 BILLION DOLLARS IN 1989.

#90275h0234 10/02/1990 ~Chinese News Agency

LAGOS (OCT. 2) XINHUA - NIGERIAN GOVERNMENT YESTERDAY LAUNCHED A 25-VOLUME REVISED EDITION OF THE LAWS OF THE FEDERATION.

THE LAUNCHING OF THE REVISED LAWS COINCIDED WITH THE 30TH ANNIVERSARY OF INDEPENDENCE OF THE COUNTRY.

AT A LAUNCHING CEREMONY HERE YESTERDAY, PRESIDENT IBRAHIM BABANGIDA SAID THE LAWS WERE REVISED TO BRING THE NATION'S LEGAL SYSTEM CLOSER TO ALL NIGERIANS.

HE SAID THAT LAWS MUST BE INDIGENOUS AND REFLECT THE CHANGES IN THE COUNTRY, ADDING THAT THE REVISION EXERCISE MUST BE VIEWED AS "AN APPLICATION OF SELF-RELIANCE TO OUR LEGAL SYSTEM".

THE REVISED LAWS WHICH WILL BE VALID FOR 32 YEARS, ARE SEEN HERE AS A DEPARTURE FROM THE LAST VESTIGE OF COLONIALISM LEFT OVER BY BRITISH RULE BEFORE 1960 WHEN NIGERIA WON INDEPENDENCE.

NIGERIA FIRST REVISED ITS LAWS IN 1958.

TOKYO (OCT. 2) KYODO - ENVIRONMENTALIST GROUPS MEETING IN WASHINGTON IN LATE SEPTEMBER URGED THE WORLD BANK TO HALT LOANS TO A CONTROVERSIAL DAM PROJECT IN INDIA, JAPANESE ENVIRONMENTALISTS SAID TUESDAY.

THE CONFERENCE, WHICH COINCIDED WITH THE ANNUAL MEETINGS OF THE BANK AND THE INTERNATIONAL MONETARY FUND, WAS ATTENDED BY 170 ENVIRONMENTAL GROUPS, INCLUDING THE FRIENDS OF EARTH JAPAN, THEY SAID.

ENVIRONMENTALISTS CLAIM THE PROJECT, BEING BUILT ACROSS THE NARMADA RIVER IN GUJARAT STATE IN WESTERN INDIA, WILL DISPLACE 100,000 PEOPLE AND DESTROY THE CULTURE OF TRIBAL PEOPLE.

THE WORLD BANK APPROVED A 450 MILLION DOLLAR LOAN FOR THE PROJECT IN 1985.

YUKIO TANAKA, SECRETARY GENERAL OF THE FRIENDS OF EARTH JAPAN, AND KAZUO SUMI, A PROFESSOR AT YOKOHAMA CITY UNIVERSITY, CALLED ON BANK OFFICIALS AND URGED THEM TO STOP FINANCING THE PROJECT BUT THE OFFICIALS REFUSED THE REQUEST, THEY SAID.

THE ENVIRONMENTAL GROUPS CALLED ON THE WORLD BANK TO STOP DESTRUCTION OF TROPICAL RAIN FORESTS AND FORCED RELOCATION RESULTING FROM THIRD WORLD DEVELOPMENT PROJECTS INVOLVING THE BANK, THEY SAID.

#90275m0001 10/02/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT 2) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

On news of government actions to aid stocks, the Nikkei skyrockets a record 2677 points, a gain of 13%. ... The FTSE is also higher, up 31 points in midday London trading. ... Bond prices head higher with the long yield down to 8.82%. ... Crude oil continues to decline with Brent North Sea off $1.75 to $35.30. ... The COMMERCE DEPARTMENT says construction spending was flat from July to August. ... The NATIONAL ASSOCIATION OF PURCHASING MANAGEMENT says its business index fell to 44.4% in September, the lowest since a 42.8% level in December 1982. in September was up 58% from September a year ago. ... The GANNET FOUNDATION says it has rejected a $540 million offer by GANNETT CO. to buy back the foundation's 10% stake in the company at current market share prices.

WHAT'S AHEAD:

The COMMERCE DEPARTMENT is scheduled to release new home sales for August at 10 a.m. EDT. Economists are expecting a decline of 1.1% from July. ... XEROX CORP. plans to unveil today a combination copier, fax, image scanner and document printer that it calls its most important development in 31 years. ... AMERICA WEST AIRLINES says it plans to buy or lease up to 118 Airbus A320 jets.

FROM THE BULLS:

JACK CANTWELL, manager of block trading for DEAN WITTER REYNOLDS, says the market got a boost yesterday from strategist ELAINE GARZARELLI of SHEARSON LEHMAN BROTHERS, who told clients that stock prices have bottomed and could rally "10 to 12 percent from now on." Ms Garzarelli says, "The market anticipates. Historically, over the last 50 years, the stock market will begin to rally two quarters before the economy bottoms out. We're only two quarters away from the bottom of the economy." ("USA Today" and NYT, 10/2)

"I think the market's bought itself some time on the upside," says JON GROVEMAN of LADENBURG THALMANN. "The bulls are finally taking the ball and

running with it." ("The Washington Post", 10/2)

FROM THE BEARS:

"This is simply a bounce in a bear market," says THOM R. BROWN, managing director at RUTHERFORD BROWN & CATHERWOOD. "I don't really think we hit bottom last week." Mr. Brown believes that the market is more likely to drop an additional 10% to 12%. He says he expects the market to begin showing signs of weakness again tomorrow. (WSJ, 10/2)

MARSHAL ACUFF of SMITH BARNEY called Monday's trading "a pleasant respite from the problems we've had in recent weeks." He says this recovery will continue, but adds, "I still look at this as a rally in a bear market." He says third quarter earnings and a weak economy will eventually pull stocks down. (FNN "Marketwrap", 10/1)

"It looks like a rally in a bear market," says PETER DaPUZZO, co-head of world-wide equities for SHEARSON LEHMAN BROTHERS. He suggests that the rally can be sustained for only a few weeks before fizzling under the weight of longer-term pessimism about stocks and the economy. (WSJ, 10/2)

STOCK MARKET:

"The prospects of a weak economy and a Fed easing has really given investors some encouragement," says JAMES FRALICK of MORGAN STANLEY. (FNN "Marketwrap", 10/1)

ALAN BOND of WR LAZARD & CO. does not think the budget agreement will have much lasting impact on the stock market. "What we would prefer to see is better fundamentals and better earnings support to provide impetus for the market to move higher." (CNBC "Market Wrap-Up", 10/1)

"The market's been tremendously oversold and there's been so much bearish sentiment, we were ready for a rally," says ROBERT FREEDMAN, chief portfolio manager for JOHN HANCOCK's mutual funds. "But whether it's a rally in a bear market or is ready to move up, is too early to tell." (NYT, 10/2)

If the market rally dies today, TRUDE LATTIMER of JESUP JOSEPTHAL & CO. says that "at the very least we should expect a test below the 2400 level. If indeed some further encouraging news comes out, and we can carry the rally further, then we have to make different projections. If we get up above 2600 a test may come above 2500. It's too soon to know. This rally is only a day-and-a-half old." (CNBC "Market Wrap-Up", 10/2)

ARNOLD KAUFMAN, editor of S&P's "Outlook" newsletter, says dividend decreases and omissions are at their highest levels since 1982. Meantime, dividend increases are down 22.3% and are growing at the slowest rate in twenty years. The dividend drought results from companies' "concern about a recession,

shrinking profits and high debt service," says Kaufman. (WSJ, 10/2)

"It's a two-tiered market," says RICHARD BERNSTEIN, manager of quantitative analysis at MERRILL LYNCH. "Companies in trouble are being forced to cut their dividends. On the other hand, companies that perceive themselves strong are buying back their stock." (WSJ, 10/2)

STOCK TIPS:

"Wall Street is having a sale," says STEPHEN LEEB of "Personal Finance" who believes the economy is stronger than most people think. While the Gulf crisis has dramatically increased short term risk, Leeb says, "[The] flip side of every crisis is an historic buying opportunity." Rated a best buy: TIME-WARNER -- "A winner for any climate." (CNBC "World Business", 10/2)

"The New York Times" reports that UAL CORPORATION has been thriving amid the buyout turmoil over UNITED AIRLINES. "The outlook for United is very promising," says JOHN EICHNER, a New York based airline industry consultant. "It must be one helluva property if it is doing this well in spite of all of its problems." Some do have reservations. "I am not sure it would be fair to call United the stellar performer in the business," says THOMAS LONGMAN, an airline analyst for BEAR, STEARNS & COMPANY. "They just happen to have a nice chunk of their business -- roughly 30 percent -- in the Pacific." (NYT, 10/02)

Recently STANDARD & POOR'S assembled a list of "crunch-proof" companies that are generating "robust" cash and have low debt loads. ARNOLD KAUFMAN, editor of S&P's "Outlook" newsletter, says that his favorites on the list include ABBOTT LABORATORIES, FLIGHT SAFETY INTERNATIONAL, HILLENBRAND INDUSTRIES, MERCK, NOVELL, STRIDE RITE, UST, WARNER-LAMBERT and WOOLWORTH. (WSJ, 10/2)

NATIONAL SERVICE INDUSTRIES is "a stock picker's dream ... solid growth, strong balance sheet," say the editors at "Street Smart Investing." The company should do well regardless of economic conditions. But they say ANHEUSER BUSCH faces impending challenges: "Investors should contemplate the sale of the stock." (CNBC "World Business" 10/2)

GOLDEN NUGGET is betting on boxing as the heavyweight championship comes to the Mirage, its splashy and expensive Las Vegas hotel and casino, on October 25. Analysts are split on the outlook for the company. Worried about the company's heavy debt and the effects of an economic downturn on its operating results, MARK MANSON of DONALDSON, LUFKIN & JENRETTE considers the stock "unattractive." JAMES MURREN, an analyst with C.J. LAWRENCE, has a "hold" on the company fearing an impending recession. MICHAEL MUELLER, with MONTGOMERY SECURITIES, recommends the stock anticipating that Golden Nugget will earn $3 a share this year. PAINEWEBBER's LEE ISGUR has the strongest recommendation for the stock. He says, "It's the only game of its kind in town and nothing else like it is under construction. I have no doubt they can sustain their success. Anyone with doubts should fly out and take a look. No one who's been

there has doubts anymore." (NYT, 10/2)

"We would only be interested in companies that have relatively low debt loads because we would expect them to increase the dividend," says DAVID RAJALA, director of equity management at ONE FEDERAL ASSET MANAGEMENT CORP. One of Mr. Rajala's favorite low-debt companies is ARCHER-DANIELS-MIDLAND. (WSJ, 10/2)

-30- 8219

#90275m0002 10/02/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT 2) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"We're relieved that a [federal budget] package was finally put together that avoided the train wreck of sequestration and will lead to an opportunity for the Fed to lower interest rates and keep economic growth going," says JERRY JASINOWSKI of the NATIONAL ASSOCIATION OF MANUFACTURERS. (FNN "Marketwrap", 10/1)

"With [FEDERAL RESERVE BOARD CHAIRMAN ALAN] GREENSPAN worrying about inflation that's what really heightens the risk ... that the economy is not just flat, but is drifting downward and will begin to accelerate," says DAVID BLITZER, chief economist for STANDARD & POOR'S. "At this point, the Fed seems very stubborn: They're fighting inflation." (FNN "Marketwrap", 10/1)

The proposed budget agreement is probably two-thirds real and one- third smoke and mirrors, says DAVID BOSTIAN, managing director at JESUP JOSEPHTHAL. Most important will be the Fed's reaction to the five year, long term plan to cut $500 billion out of the deficit. Pointing to recent rallies in the bond market Bostian says, "If long term interest rates come down, that in itself will help. The Fed ... wants to follow interest rates down rather than lead." With continuing Fed concern about the dollar and inflation, Bostian sees an easing of only eighths and quarters in funds rate. "But there could be a discount rate cut later this year." (CNBC "World Business", 10/2)

"Trading volume [in the bond market] was light partly because people can't decide if this is just a temporary drop in oil prices or the beginning of a more pronounced slide," says LAWRENCE LEUZZI, a managing director at S.G. WARBURG & CO. Investors, he says, remain leery of bonds because of the "erratic" attitude of Iraqi President SADDAM HUSSEIN. "He's conciliatory one day, then sabre-rattling the next, which in turn sends ripples through the oil and credit markets." (WSJ, 10/2)

"I don't think the bond market gives [the budget agreement] much credence,"

says WAYNE WONG, manager of fixed-income investments at MARINVEST INC. "I don't think there's a lot of positive things you can say." (WSJ, 10/2)

THE ECONOMY:

"I think the economy is essentially flat," says DAVID BLITZER, chief economist for STANDARD & POOR'S. But he does not think that we have entered a recession. "We're going no place in a hurry," says Blitzer. He forecasts only a fifty-fifty chance of a widespread decline that he would define as a recession. (FNN "Marketwrap", 10/1)

"There's a pervasive gloom over the whole economy," says ROBERT EGGERT, editor of "Blue Chip Economic Indicators." ("USA Today", 10/2)

The NATIONAL ASSOCIATION OF PURCHASING MANAGEMENT index of economic activity which fell to 44.4% "is certainly consistent with the idea that we are in a recession," says NEAL SOSS, chief economist with the FIRST BOSTON CORPORATION. "The fact that business does not have a sense of confidence in the economy is reflected in order declining. And there is the inflationary backdrop of the oil shock that has clearly affected the economy." (NYT, 10/2)

Construction spending stalled in August and remains at a low level. "There's a lot more weakness to come," says DARRYL DELANO, an economist with CAHNERS ECONOMICS in Newton Mass. "Confidence is the major problem we have across the board right now. Confidence is certainly at the lowest point we've seen in a long time." (NYT, 10/2)

"If you get the price [of oil] up as a result of war fears, it doesn't take much towards the possibility of a different sort of outcome to cause a selloff " says STEPHEN SMITH of BEAR STEARNS. But Smith points out that even a peaceful resolution may not lead to oil prices falling to their pre-crisis levels. "Whether SADDAM HUSSEIN pulls out or whether he is forced out, I think there's a good chance that the Kuwaiti oil capacity may well be impacted." (FNN "Marketwrap", 10/1)

IN WASHINGTON:

"I've had to compromise," says PRESIDENT BUSH in a news conference on the budget accord. "The Democrats have had to compromise. And I hope that other voices who are troubled by one aspect or another of this [budget agreement] would also compromise. Every once in a while you come to a time when you have to do that to get something done." (NYT, 10/2)

"The budget package is not all that good," says SUNG WON SOHN, chief economist for the NORWEST CORPORATION of Minneapolis. "I'm somewhat disappointed. The general consensus in the financial markets is that this is not enough." (NYT, 10/2)

ROBERT DiCLEMENTE of SALOMON BROTHERS says the budget agreement "has some teeth in it, but some of them are false." DREW LEWIS, chairman of the BUSINESS ROUNDTABLE, says the agreement has plenty of specific provisions to criticize, but that "there's enough serious deficit reduction in the package for all of us -- business included -- to support it." ("The Washington Post", 10/2)

"If I had to give three words to describe [the budget accord], it would be 'ha ha, ha,'" says MARSHA ZERCOE, vice president and fixed- income portfolio manager at PROVIDENT CAPITAL MANAGEMENT, INC. She described the economic assumptions underlying the plan as "a bit of a joke." (WSJ, 10/2)

"Put me in the show-me category" about the budget accord, says STEPHEN MORRELL chief economist at SOUTHEAST BANK in Miami. "It's a menagerie of tax increases and heroic assumption about [lower] interest rates and higher economic growth." ("USA Today", 10/2)

The SUPREME COURT has declined to review a FEDERAL RESERVE order that allows bank holding companies to sell insurance in states that allow such sales. The action denied an appeal from independent insurance agents. ("USA Today", 10/2)

ORANGE, CA (OCT. 2) PR NEWSWIRE - Shelly Associates Inc. and VTN Corporation jointly announced that their Philippine Joint Venture Company, Precious Metals Mining and Development Corporation, has purchased an option to acquire the mining claims, known as the Golden River Claims, adjacent to its claims, ACJ-1 & ACJ-2, in the Paracle Gold District of the Philippines. These new claims are believed to increase the ore reserves of the company to over 10,000,000 Troy ounces of gold (at $400 per Troy ounce that is over $4,000,000,000 of aggregate ore reserve value). In May of 1990 Precious Metals; reopened the underground tunnels of ACJ-1 and ACJ-2 to rehabilitate what was the largest pre-World War II gold mine in Asia. From Precious's original claim area the underground geological work to date has proven out over 350,000 ounces of gold reserves and highly probable reserves of an additional 1,250,000 ounces, with additional possible reserves of over 1,500,000 ounces. With this major claim addition the management of the Philippine Joint Venture believes that from the geological indications shown, the vein extensions should increase their total ore reserves by over 700 percent.

Initial estimates of cost to produce an ounce of gold from this mine are $190 per ounce. This is due to two factors: 1) the low cost of labor in the Philippines ($6 per day for a qualified miner), and 2) the high content of gold in the ore body, approximately 11 grams of gold per ton of ore, which is 20 times richer than the average U.S. gold mine.

Shelly Associates Inc. has a 16 percent interest in the Philippine gold

venture and VTN Corporation has a 10 percent interest. Shelly Associates interest in the project is held through a California corporation, "Gold Properties Restoration Co. Inc."

Gold Properties Restoration Co. Inc. has received a Letter of intent from the Burbank Investment Securities firm of Toluca Pacific Securities to underwrite 1,000,000 shares of Gold Properties Restoration Co. Inc. at $5.00 per share. The new share offering is scheduled for later this year or early 1991 and the capital raised will be used to develop the Philippine gold mining project.

PROVIDENCE, RI (OCT. 2) PR NEWSWIRE - NESTOR, INC (NASDAQ: NEST) today announced operating results for the fiscal year ended June 30, 1990.

Dr. David Fox, president and chief executive officer of NESTOR, in commenting on the results, stated "We are disappointed with the operating results of the company in fiscal 1990. Several important contracts and licenses, which had been projected to generate revenue in the second half did not take affect until after year-end. For example, the DARPA neural chip development contract announced in the third quarter of fiscal 1990, began very slowly with total billings of less than $90,000 between January and June. Anticipated billings during FY91 on this contract alone are expected to exceed $500,000. Two months after the close of the fiscal year, the company's cash position was helped by an investment in NESTOR by SLIGOS,SA, a financial services firm headquartered in France. As a result, our balance sheet is stronger than it has been, and we now believe our anticipated revenue stream, combined with our present liquid assets, will meet our requirements through the end of the current fiscal year, and beyond.

"Total expenses for the year were about $95,000 greater than last year. This 2.8 percent increase in annual expenses should not be viewed as a trend. On the contrary, expenses in the final quarter were $331,000--or 30 percent --less than the prior quarter. This improvement was achieved through the cost-cutting measures adopted by the company at the end of the third quarter."

All NESTOR products are based on adaptive information- processing systems that "learn" from experience. The company's products are taught to recognize complex configurations of data, and to interpret input patterns.

LONDON (OCT. 2) PR NEWSWIRE - London International Group plc (NASDAQ: LONDY) today announced that its common shares, in the form of sponsored American Depositary Receipts, will begin trading on the NASDAQ National Market System today. London International is a leading manufacturer and marketer of high quality health and personal products, latex gloves and photoprocessing services.

Alan Woltz, chairman and chief executive officer, commented, "We are pleased to further increase our presence in the U.S. market with a full listing. We already have a number of shareholders in the U.S. and believe that listing on NASDAQ will build on our international shareholder base."

London International reported last June that for the fiscal year ended March 31, 1990, pre-tax profits increased 20.5 percent to $60.2 million on sales of $579.6 million -- an increase of 14.1 percent. The company has 131 million shares outstanding and a share to ADR ratio of 5:1. There is no intention to offer new shares in conjunction with the listing at this time.

London International is a world leader in its businesses of health and personal products and photoprocessing services. It is the global leader in branded condoms, and holds leading worldwide market share in health and beauty aids and latex gloves for household, industrial, surgical and dental use. In the United States, London International's brands include Ramses, Sheik and Fourex condoms, the Biogel brand of surgical and dental gloves, and the Cook Bates line of personal care implements. It is also the largest independent photoprocessor in Europe.

HARRINGTON PARK, NJ (OCT. 2) PR NEWSWIRE - Officials of United Water

Resources (NYSE: UWR) said yesterday that the timing of the proposed merger and sale of Pennsylvania Enterprises, Inc. (NASDAQ: PENT) and its subsidiary, Pennsylvania Gas & Water Company (PG&W), has required an extension of the deadline for consummating the transaction. The transaction includes the merger of PEI and PG&W into NUI Corporation (NYSE: NUI) and UWR's purchase of the water operations and related assets of PEI and PG&W.

UWR officials said that while the transaction is moving forward, the progress has been slower than they anticipated when the acquisition agreements were signed on April 23.

Accordingly, the agreements, as amended, call for the transaction to be consummated on or prior to Dec. 15, 1990; provided that such termination date will be extended up to 32 days if on or prior to Dec. 15, 1990 (i) certain approvals of the Pennsylvania Public Utility Commission (PUC) are obtained and (ii) all other conditions to the parties' obligations have been satisfied or waived. The transaction must be consummated no later than Jan. 16, 1991, however. The agreements had called for the transaction to close by Oct. 1, 1990, and provided for an extension up to December 1 if all required approvals except those of the PUC were achieved by October 1.

The companies delayed meetings, originally scheduled for late September, at which their shareholders were to vote on the transaction. A new meeting date for UWR is likely to be in November, or as soon as practicable, and will be announced at a later date. NUI and PEI have announced new shareholder meeting dates. The Asset Purchase Agreement signed on April 23 provides for United Water's acquisition of the water operations and related assets of PEI and PG&W for approximately $220 million, subject to adjustment for several factors including among others, the level of expenditures associated with the construction program currently under way by PEI. United Water anticipates that it will require about $248.5 million to finance the acquisition. The consummation of the transactions is conditioned upon receipt of regulatory approvals, stockholder approvals and certain other conditions.

United Water is a holding company whose principal subsidiaries, Hackensack and Spring Valley water companies, provide water service to about a million residents of northern New Jersey and southern New York.

United Water has about 16 million shares of common stock outstanding.

PURCHASE, NY (OCT. 2) PR NEWSWIRE - PepsiCo, Inc. (NYSE: PEP), today announced that through its Mexican snack food subsidiary, Sabritas S.A. de

C.V., it has acquired over 70 percent of the stock of Empresas Gamesa for approximately $300 million. Empresas Gamesa is a holding company which owns 68 percent of Mexico's largest cookie manufacturer, Grupo Gamesa ("Gamesa"). Through a tender offer, the majority of these shares have been purchased as of today. The remaining shares are held publicly.

"We were attracted to this opportunity for making a significant investment -- our second largest international food acquisition -- by Mexico's considerable economic progress and its government's commitment to free market policies," said Wayne Calloway, chairman and chief executive officer of PepsiCo, which has operations in 160 countries around the world. "This acquisition solidifies PepsiCo's position as one of the most important food companies in Mexico."

Gamesa has been a leading manufacturer of cookies in Mexico for over 30 years and currently holds more than a 50 percent share of the Mexican cookie market. Cookies represent about 75 percent of Gamesa's sales with the balance coming from other food operations.

Sabritas, Mexico's leading snack chip manufacturer, has been operating successfully in Mexico for more than 20 years. About 75 percent of its sales prior to this acquisition were derived from snack chips. The remaining sales are from sweet snacks under the Sonrics brand name.

Sabritas is a unit of PepsiCo Foods International (PFI), the international snack food business of PepsiCo, Inc. PFI is the leading international snack food company in the world, with worldwide retail sales of $3 billion and an estimated 25 percent share of the international snack food market.

PepsiCo, Inc., has long had a major presence in the Mexican market and employs more than 14,000 people in Mexico. Pepsi-Cola soft drinks have been manufactured and sold there for more than 50 years and PepsiCo's Pizza Hut and Kentucky Fried Chicken businesses have been in Mexico for more than 20 years.

J.P. Morgan & Co. acted as PepsiCo's financial advisor and InverMexico executed the open market purchase through a tender offer on the Mexican Stock Exchange.

ATLANTA (OCT. 2) PR NEWSWIRE - The Coca-Cola Company (NYSE: KO) announced today that it plans to report third quarter earnings on Oct. 17. Roberto C. Goizueta, chairman of the Board and chief executive officer, said, "The Company's third quarter results will be excellent, reflecting continued strong growth momentum in worldwide soft drink volume and earnings."

The Company also said that in the third quarter it recorded a pre-tax profit of approximately $52 million on its investment in BCI Holdings, Inc., resulting from BCI's sale of the Beatrice Company.

The Company also recorded certain non-cash charges of approximately $49 million related to its U.S. soft drink business. These charges primarily reflect accelerated amortization of certain software costs due to management plans to upgrade and standardize information systems, as well as adjustments to the carrying value of certain fountain equipment.

#90275p0357 10/02/1990 ~PR Newswire

PERTH, Western Australia (OCT. 2) PR NEWSWIRE - Bond Brewing Holdings Limited ("BBH") today announced that it has accepted for purchase and payment pursuant to the tender offer by BBH's wholly owned subsidiary, Dimola Pty. Ltd. ("Dimola"), all 12-5/8 percent extendable subordinated debentures of BBH (representing approximately 88 percent in principal amount outstanding of debentures) validly tendered prior to 10:00 p.m., New York City time, on Oct. 1, 1990 (the old expiration date) and not withdrawn.

BBH stated that Dimola had extended the offer until 12:00 midnight, New York City time, on Tuesday, Oct. 16, 1990 (the new expiration date), and increased to 100 percent the principal amount outstanding of debentures it is offering to purchase. Dimola also announced that it has accepted for purchase and payment all debentures otherwise validly tendered prior to the old expiration date and not withdrawn, but which were not accompanied by a properly executed agreement and release (representing approximately 10 percent in principal amount outstanding of debentures), subject to the condition subsequent that a properly executed agreement and release be delivered to the depositary. Debentures tendered after the old expiration date may be withdrawn prior to 12:00 midnight, New York City time, on Tuesday, Oct. 9, 1990.

Debentures validly tendered between the old expiration date and the new expiration date and not withdrawn will be purchased as received from time to time after the opening of business, New York City time, on Wednesday, Oct. 10, 1990.

BBH also announced that all conditions to the tender offer have been either satisfied or waived. However, it remains a requirement to effecting a valid tender that debentureholders execute and deliver to the depositary an originally executed agreement and release. Tendering debentureholders who require assistance as to this requirement or proper tender procedures in general are advised to contact Hill and Knowlton, the information agent, or Bankers Trust Company, the depositary.

Pursuant to the tender offer, tendering debentureholders whose debentures are purchased pursuant to the tender offer will receive a purchase price amount equal to US$700 less accrued interest for the six-month periods ended Nov. 30, 1989, and May 31, 1990 (including interest to the special payment date on such overdue installments of interest). Accordingly, tendering holders whose debentures are purchased pursuant to the tender offer will receive US$564.41 per US$1,000 principal amount in payment for their debentures. In addition, all debentureholders of record as of the old expiration date (whether or not they have tendered debentures) will receive US$135.59 per US$1,000 principal amount in payment of the interest installments described above.

COSTA MESA, CA (OCT. 2) PR NEWSWIRE - Parker Automotive Corp. (NASDAQ: PKRA) announced today that it has received an order for more than $8,500,000 U.S. of its CarbonClean products for delivery to the Union of Soviet Socialist Republics.

Poly-Ker Co. of Budapest, Hungary will distribute a portion of that equipment in the Republic of Georgia and in cooperation with the Consul Co., a state-owned enterprise. Poly-Ker will distribute elsewhere in the U.S.S.R. through other state-owned enterprises.

The order calls for the goods to be shipped by Jan. 1, 1991 and for Parker Automotive to receive payment in U.S. dollars via wire transfer or irrevocable letter of credit. Subject to receipt of financial documentation, the company considers the order to be firm.

Concurrently, Parker Automotive Corp. (PAC) received a letter of intent executed by Jozsef Leeb, managing director of Poly-Ker, to distribute approximately $35,000,000 U.S. in CarbonClean products throughout the U.S.S.R. over the next year.

The letter of intent calls for a formal distribution agreement to be finalized before Nov. 10, 1990, and Leeb will be visiting PAC's Costa Mesa headquarters in mid-October to conclude negotiations.

PAC was awarded the order at a government-attended symposium in Kiev, Ukraine S.S.R. on Sept. 28, 1990, where Tim Taylor, senior product engineer represented the company.

"Environmental issues are paramount in the U.S.S.R. and Eastern Europe today," said Michael E. Parker, chief executive officer of Parker Automotive Corp. "We have been told by representatives of various Soviet governmental agencies that over $21 billion U.S. have been committed to environmental issues between now and December 1990. Evidently, the Soviet people are serious about trying to clean up the air they breathe -- which in now the dirtiest in the world," continued Parker.

CarbonClean is a patented system that cleans fuel system contaminants from internal combustion engines. Currently distributed in more than 60 nations, the CarbonClean product family has been tested and approved by numerous independent agencies worldwide. In each case, CarbonClean proved to reduce exhaust emissions by up to 90 percent, and to restore fuel economy and engine performance -- in some cases -- to manufacturer's specifications.

In addition to its corporate headquarters office in Costa Mesa, Calif., PAC has manufacturing facilities in Fountain Valley, Calif., and maintains sales offices worldwide.

TORRANCE, CA (OCT. 2) PR NEWSWIRE - International Technology Corp. (NYSE: ITX) (IT) announced today that it has completed the acquisition of MetaTRACE Inc.'s (MetaTRACE), analytical laboratory located in St. Louis. In accordance with the terms of the previously announced definitive agreement, IT acquired certain assets of MetaTRACE, a wholly owned subsidiary of TRC Companies Inc., for $4,500,000 in cash.

MetaTRACE's laboratory, employing approximately 60 people, contains a complete range of analytical testing equipment to perform testing of hazardous and mixed waste substances.

"The acquisition of MetaTRACE strengthens the geographical coverage of IT's laboratory network and provides additional mixed waste capacity to capture a significant share of the projected high growth mixed waste analytical market,"

said Murray H. Hutchison, chairman and chief executive officer.

International Technology Corp., based in Torrance, is a leading environmental management company providing services to government and industry. The company's common stock is traded on the New York Stock Exchange under the symbol ITX.

MINNEAPOLIS (OCT. 2) PR NEWSWIRE - Humana Inc. (NYSE: HUM) expects to report earnings per share of approximately $3.00 for the year ended August 31, David A. Jones, chairman and chief executive officer, told investment analysts at a meeting here today. Announcement of complete results for fiscal 1990 is scheduled for next week.

Humana had net income of $255,987,000 or $2.56 per share a year ago. The 17 percent earnings increase was achieved from operations of the integrated hospital and health plan company, Mr. Jones said. Income resulting from a favorable settlement in a federal tax case was used primarily to establish reserves for possible losses arising from the deteriorating financial condition of an unrelated professional liability insurance carrier, to fund charitable contributions, and for an early extinguishment of debt.

"This will be the 21st time in 23 years as a public company that Humana has achieved an increase in earnings per share despite economic recessions, changes in strategy, and the ever-present uncertainty of the level of government funding," Mr. Jones said.

Revenues for the year increased 19% to approximately $4.8 billion from $4.1 billion a year earlier.

Humana, based in Louisville, Ky., owns and operates 84 hospitals and has approximately 1.2 million members in health benefit plans for employee groups and Medicare beneficiaries.

#90275p0371 10/02/1990 ~PR Newswire

RARITAN, NJ (OCT. 2) PR NEWSWIRE - A long-term, co-marketing and development agreement has just been reached between Johnson & Johnson subsidiary Ortho Pharmaceutical Corp., the leading U.S. pharmaceutical firm in women's reproductive health, and Akzo Health Care Division's subsidiary Organon, a marketing leader in oral contraceptives in Europe and other important markets, it was announced today by Ortho.

The agreement gives Ortho rights to co-market, in the United States and Canada contraceptives and hormone replacement therapy (HRT) products containing Organon's desogestrel, a new synthetic version of the female hormone, progesterone. Hormone replacement therapies are indicated for the prevention and treatment of menopausal symptoms and osteoporosis.

In Europe and a number of the other important markets, Organon has market leadership with its desogestrel-based oral contraceptive and is successfully launching other versions of it. In the United States, Organon Inc. based in West Orange, N.J., expects to apply for FDA approval for the first desogestrel-based oral contraceptive around the end of this year.

Organon Inc. will receive exclusive rights to a new, uniquely formulated oral contraceptive developed and registered in the United States by Ortho. With the introduction of this product later this year, Organon will initiate the first phase of its plan to enter the women's healthcare market in the United States. This is intended to lead up to the launch, after FDA approval, of the first desogestrel-based oral contraceptive.

Outside the United States and Canada, Organon will license desogestrel technology data to Ortho, allowing Cilag, another Johnson & Johnson pharmaceutical subsidiary, to independently develop and market certain desogestrel-based products.

For selected countries in Europe and Latin America, Organon will receive co-marketing rights from Johnson & Johnson affiliate Janssen Pharmaceutica, to both an anti-depressant and a neuroleptic drug.

Also included in the overall agreement is the exchange of rights to certain diagnostic technology between the parties' diagnostic divisions.

Ortho Pharmaceutical Corporation, a wholly-owned subsidiary of Johnson & Johnson (NYSE: JNJ), is based in Raritan. Ortho is the leader in developing and marketing women's healthcare products for 50 years. With 83,000 employees, Johnson & Johnson is the world's largest and most comprehensive manufacturer of health care products serving the consumer, pharmaceutical and professional markets. In the year 1989, sales were $9.78 billion.

Organon is part of the Health Care Division of Akzo N.V., a diversified chemical company based in Arnhem, the Netherlands. Akzo's 1989 sales exceeded $9.0 billion. In the United States and Canada, it employs more than 10,500 people. Its ADRs (American Depository Receipts) are traded on NASDAQ.

DALLAS (OCT. 2) PR NEWSWIRE - Harken Energy Corporation (NYSE: HEC) ("Harken") of Dallas and Frontier Holdings Inc. ("Frontier") today announced that their respective boards of directors have approved a letter of intent for Harken's wholly owned subsidiary, E-Z Serve Holding Company, Inc. ("E-Z"), to acquire Frontier's wholly owned subsidiary, Frontier Oil Corporation ("FOC") of Denver. FOC and Harken Marketing Company ("HMC"), E-Z's wholly owned refined products marketing subsidiary, would be operated under E-Z, which will be renamed Frontier Refining and Marketing Company ("FRMC").

This transaction would result in Harken owning a majority of the FRMC common stock, with the Frontier stockholders receiving a combination of FRMC common stock and FRMC preferred stock. Harken and Frontier hope to finalize their due diligence and complete definitive documents to close this transaction within the next 60 days, subject to appropriate regulatory and other approvals.

FOC is engaged principally in the business of crude oil refining and wholesale marketing of refined petroleum products. It owns and operates a crude oil refinery (the "refinery") located in Cheyenne, Wyo. with a rated capacity of 38,000 barrels per calendar day ("BPD"). HMC retails and wholesales gasoline and other refined products primarily through approximately 800 outlets in predominantly rural locations in Sunbelt states.

The Refinery is competitively advantaged because it is capable of utilizing up to 80 percent of its capacity to refine heavier, less costly sour crude oil into lighter, more valuable petroleum products such as gasoline and diesel fuel.

FOC also owns a 25,000 BPD undivided interest in an 87-mile crude oil pipeline

running from Guernsey Station, Wyo. (the major Rocky Mountain pipeline terminal point) to Cheyenne, near the Refinery.

Harken Energy Corporation (NYSE: HEC) manages and develops energy assets. HEC retails, wholesales and distributes gasoline through its subsidiary, Harken Marketing Company. Through its subsidiary, Tejas Power Corporation, HEC constructs, owns and operates natural gas gathering, storage and transmission facilities in Texas and Louisiana and markets third party gas to a variety of end-users. HEC explores for, develops and produces oil and gas reserves domestically through its subsidiary Harken Exploration Company and internationally through its subsidiary Harken Bahrain Oil Company. HEC provides contract drilling and workover/well services through its subsidiary, Harken Resource Management Corporation.

JACKSONVILLE, FL (OCT. 2) PR NEWSWIRE - The Unit Companies has announced it has acquired the Lentz Warehousing & Distribution Co., a provider of warehousing and logistics services headquartered in Winston-Salem, N.C., for an undisclosed amount. Lentz is the largest such operation in the Winston-Salem and Greensboro area with 18 facilities comprised of approximately 2.5 million square feet.

"The economic and political climate in North Carolina and its growing manufacturing base are extremely favorable for maintaining and expanding Lentz's existing customer base," said Warren P. Powers, chairman, chief executive officer of The Unit Companies.

"A comparatively high proportion of Lentz's business is based on long term contracts of a year or more, which support our strategic objectives. It also brings Unit into an exciting new market and exposure to additional customer groups," Powers commented. "In addition to normal logistics services such as warehousing and transportation, Lentz provides a wide variety of value adding services such as inspection, weighing, sorting, pricing, packaging, labeling and coding," he added.

The Unit Companies, a subsidiary of GATX Corp. (NYSE: GMT) Chicago, is the nation's largest provider of contract and public warehousing services. Based in Jacksonville, Fla., Unit offers its customers a full range of warehousing, distribution and related services including storage, transportation, handling, packaging inventory control, just-in-time delivery and data systems support. GATX Corp. is a $3-billion asset-based services company which provides financial, maintenance and management services related to rail, aircraft, bulk liquid storage terminals, warehousing and shipping. GATX Corp. (GMT) is

listed on the New York, London and other stock exchanges.

PINE BROOK, N.J. (OCT. 2) PR NEWSWIRE - Cistron Biotechnology, Inc. today announced record sales for the fiscal year ended June 30, 1990.

Sales for the year were $1.1 million, an increase of 17 percent over 1989's figure of $945,631. Net income for the year was $188,434 versus $301,391 in 1989. Substantially all of the 1989 income was the result of a one-time licensing fee of $300,000.

The gross margin on sales for the year rose to 64 percent from 60 percent and operating expenses were reduced by 11 percent from 1989.

Fourth quarter sales were $276,227 compared with $249,981 last year. Net income was $30,173 for the quarter versus $30,211 the prior year, marking the sixth consecutive quarter in which the biotechnology company has been profitable.

Cistron emerged from Chapter 11 bankruptcy in May of this year. Most creditors received a 100 percent cash payment and the remaining claims were paid through granting of stock options, issuance of 1,075,000 shares of common stock and secured notes payable over the next two years.

Cistron's primary product area is immune system regulators, known as

lymphokines. The company manufactures and sells lymphokine assay kits to pharmaceutical companies and academic institutions in the United States, Europe and the Far East for cancer, arthritis and other autoimmune disease research.

Cistron is developing additional lymphokine products which the company expects to introduce during fiscal 1991.

WHITE PLAINS, NY (OCT. 2) PR NEWSWIRE - IBM (NYSE: IBM) today announced DisplayWrite(A) 5 Composer, a new page layout program designed to complement DISPLAYWRITE 5, the company's full-function word processor for the Disk Operating System (DOS) environment.

With DisplayWrite 5 Composer, personal computer users can create sophisticated documents that incorporate text, fonts and graphics. The program also includes 50 pre-defined stylesheets for creating newsletters, reports and proposals.

"As a standard in large corporations, DisplayWrite has always delivered the right tools for advanced text handling," said Tom Fornoff, manager of editor

marketing for IBM Desktop Software. "Now users can enhance those documents with graphs, charts and images using DisplayWrite 5 Composer."

Previously available only in the Operating System/2(A) (OS/2)(A) environment, DisplayWrite 5 Composer requires an IBM Personal Computer or Personal System/2(A) (PS/2)(A) with at least an 80286 microprocessor and 528 Kb of available memory.

The DisplayWrite family of word processing products for the personal computer also includes DisplayWrite 5 for DOS, DisplayWrite 5/2 for OS/2 and DisplayWrite 5/2 Composer for OS/2.

DisplayWrite 5 Composer will be available within a week, and will ship with DisplayWrite 5 included for a suggested price of $595. Licensed users of DisplayWrite 5 can add DisplayWrite Composer for a suggested price of $125. Upgrades for licensed users of DisplayWrite 3, 4, and 4 version 2 are priced at $200.

For more information on DisplayWrite, users can call 800-IBM-7699.

(A) -- DisplayWrite, Operating System/2, OS/2, Personal System/2 and PS/2 are trademarks of the International Business Machines Corp.

GREENVILLE, SC (OCT. 2) PR NEWSWIRE - Carolina First Corporation (NASDAQ: CAFC) and American Federal Bank (NASDAQ: AMFB) announced Tuesday they have reached an agreement in principle under which Carolina First will purchase the two offices of American Federal in the City of Anderson.

"Carolina First is excited to be entering a market that has demonstrated the dynamics of Anderson," said Mack Whittle, President and Chief Executive Officer of Carolina First. "We are especially pleased because Anderson is the birthplace of our Chairman Emeritus Thomas C. 'Nap' Vandiver. Nap began his banking career in Anderson over fifty years ago in his uncle's bank and is excited about our entry into this upstate market. This acquisition also gives us the opportunity to enter the Anderson market with a well-established base of customers and an experienced staff. As the result of this transaction Carolina First will gain access to a new market, increase its deposits, and open up an excellent loan market, all with minimal impact on profitability and capital."

The sale price was not disclosed. The sale has been approved by both Boards of Directors and is subject to regulatory approval. The offices are scheduled to change hands in the spring of 1991. The two branches are the

North Main Street office, which was opened in 1982, and the Shockley Ferry Road office, opened in 1983.

After completion of this acquisition Carolina First Bank will have over $250 million in assets with four offices in Greenville, two in Anderson and one in Georgetown County at Litchfield Beach. In addition, Carolina First Corporation operates a federally-chartered savings and loan, First Federal of Georgetown, with $120 million in assets with two branches in the city of Georgetown, one in Andrews and one in Pawley's Island.

Roy Abercrombie, President and Chief Executive Officer of American Federal, said his institution remains committed to a major presence in northeastern Anderson County, with branch offices in Williamston, Piedmont and Powdersville. He said those three branches are more closely tied to the bank's primary market area of Greenville, Spartanburg, and Pickens MSA.

Carolina First Corporation is a $360 million asset financial company consisting of Carolina First Bank, a state-chartered bank headquartered in Greenville and of First Federal Savings and Loan of Georgetown, a federally-chartered savings and loan. Both are full-service, community-oriented financial institutions offering a broad range of commercial and consumer banking services. The company operates, through its subsidiaries, four offices in Greenville County and five in Georgetown County. The company was organized in 1986 following an October initial public offering of stock. Through this offering, $15 million in capital was raised, earning Carolina First the distinction of being the largest bank holding company created in South Carolina. It's stock is traded on the over-the-counter market under the NASDAQ symbol CAFC. Market markers of Carolina First Corporation include J.C. Bradford, Interstate/Johnson Lane Securities and Robinson Humphrey Company, Inc. It is widely traded stock with over 2 million shares and over 2,500 outstanding shareholders.

WOODBURY, NY (OCT. 2) PR NEWSWIRE - Comverse Technology, Inc. (NASDAQ: CMVT) announced the signing of an exclusive distribution agreement with COMPTA Equipamentos E Servicos De Informatica, S.A. COMPTA will market Comverse's TRILOGUE voice and facsimile message management systems in Portugal.

Brian Wiltshire, president of Comverse International, stated that, "This signing represents the eighth significant international distribution agreement consummated by Comverse as part of its major international penetration. COMPTA now joins GPT (U.K.), Ascom (Switzerland), GPT (Australia), Oki (Japan) Voice Data Systems (the Netherlands), Nokia (Finland) and TriGem (Korea) as OEMs of Comverse's TRILOGUE." Kobi Alexander, president and chairman of the

board of Comverse, added, "We are particularly pleased with this agreement, since Portugal is one of the fastest growing economies in Europe and is planning major improvements in its telecommunications in general and in value added services and equipment, such as TRILOGUE, in particular. COMPTA is a major distributor of telecommunications and computer equipment and also distributes, amongst others, for CODEX, Motorola, Northern Telecom and Sony."

Vitor Assuncao, chairman and CEO of COMPTA, stated that, "COMPTA is very well positioned in the CPE market as a leading PBX sales organization and has strong existing business relationships with Portugal's three PTTs (telephone companies). We, therefore, believe that TRILOGUE will represent a very significant part of our future revenues and profits."

Comverse, located in Woodbury, N.Y., develops, manufactures and markets high performance computer systems for commercial and defense communications applications, including multi-media message management systems under the name of TRILOGUE.

#90275p0389 10/02/1990 ~PR Newswire

NEW YORK (OCT. 2) PR NEWSWIRE - James P. Lennane announced today that the Delaware Chancery Court has set Oct. 9, 1990 as the hearing date for his suit to enjoin the consummation of the sale of approximately 42 percent of ASK Computer Systems' (NASDAQ: ASKI) common stock to the Hewlett-Packard Company (NYSE: HWP) (H-P) and Electronic Data Systems Corporation (EDS) unless the proposed transaction is first approved by a vote of ASK shareholders.

Ask has represented that it currently does not intend to close the sale of stock to EDS and H-P prior to Oct. 12, 1990. The hearing is scheduled to begin at 10:00 a.m. on Oct. 9 before Chancellor William T. Allen.

Lennane, the owner of 1,282,100 Ask shares or about 9.7 percent of the outstanding common stock, filed the lawsuit last Wednesday, September 26.

Lennane's suit charges that the board's failure to obtain shareholder approval constitutes a breach of its fiduciary duty to Ask shareholders. Additionally, the suit contends that the proposed $60 million stock sale will violate National Association of Securities Dealers (NASD) by-laws and the company's listing agreement with NASD unless the transaction is first approved by a vote of Ask shareholders. These violations could result in a de-listing of Ask shares from the NASD National Market System (NMS).

Lennane's suit also claims that Ask management has undertaken a number of increasingly drastic entrenchment actions, which include adoption in August

this year of a Poison Pill and the proposed sale of stock to EDS and H-P. The suit specifically states that Ask's agreement with EDS and H-P further entrenches management by requiring EDS and H-P to vote in favor of Ask's board nominees and by requiring Ask to give EDS and H-P, at their option, one Ask board seat each.

Ask management has said that it intends to use the proceeds from the stock sale to finance, in part, Ask's proposed acquisition of Ingres Corporation (NASDAQ: RELY) at a total cost of $135 million, pursuant to its currently outstanding tender offer which is now scheduled to expire at midnight, New York time, on Oct. 12, 1990.

Lennane also announced that the Chancery Court granted his motion for expedited discovery and that pre-trial discovery has commenced.

MT. HOLLY, N.J. (OCT. 2) PR NEWSWIRE - Franklin Electronic Publishers Inc. (NASDAQ-NMS: FPUB) announced today that Bruce S. Mendel has been named national sales manager-Software Division.

In his new post, Mendel will manage the sales activity for the Franklin software product line, which includes the popular LANGUAGE MASTER dictionary, as well as forthcoming products.

Franklin's LANGUAGE MASTER provides complete dictionary definitions for 80,000 words from Merriam-Webster and returns 1.4 million responses to 40,000 thesaurus entries. These responses include synonyms, antonyms, contrasted words, compared words, and related words. All synonyms are grouped together according to meanings and are returned in the same inflected form as they are entered. The LANGUAGE MASTER is available for DOS, Macintosh, and Windows and is compatible with Microsoft Windows 3.0 -- the operating environment of the 90s.

"Bruce is a high energy individual who will bring to Franklin a wealth of knowledge and experience in the area of software marketing. Under his leadership, we anticipate great expansion in the distribution of Franklin software," said Morton E. David, Franklin's chairman and chief executive officer. "The division's long term growth will be based on technology developed by Proximity Technology Inc., a Franklin subsidiary."

Previously Mendel served as regional sales manager of ABCO Distributors, and before that, as sales manager of Park Avenue Computer.

Franklin Electronic Publishers Inc., is the creator and leader of the electronic reference product category. With more than 3 million volumes sold throughout the world, Franklin publishes a library of 20 of the world's most authoritative, accurate and scholarly reference products including the popular Spelling Ace(R) spelling corrector, Wordmaster(R) electronic thesaurus, Language Master(TM) electronic dictionary, Spanish Master/ Maestro Ingles(TM) bilingual dictionary and electronic Holy Bible. Franklin's publication list is being broadened to include hand-held electronic versions of The Concise Columbia Encyclopedia and Bartlett's Familiar Quotations.

Franklin, founded in 1981, is a public company headquartered in Mt. Holly, whose common stock is traded in the NASDAQ National Market System under the symbol "FPUB."

HICKSVILLE, NY (OCT. 2) PR NEWSWIRE - Michael H. Epstein, an investment banker with Allen & Co. Incorporated, has been appointed to the board of directors of Metro Tel Corp. (NASDAQ: MTRO).

The announcement was made by Venerando J. Indelicato, president and chief executive officer of the firm, which manufactures telephone system test equipment and peripheral telephone equipment. At the same time, Indelicato announced that the company had signed a two-year agreement with Allen & Co. Incorporated whereby the latter, a long-established major investment banking

and underwriting firm, will serve as Metro Tel's financial advisor.

Epstein, with Allen & Co. for the past five years, had earlier been a managing director with Salomon Brothers. He was with that firm for 24 years, serving as a partner in charge of a trading department. Epstein currently serves on the boards of directors of Milfeld Trading Co. and Mini-Computer Systems, Inc. in addition to board memberships with several private firms and organizations.

In making the dual announcement, Indelicato stated: "We are pleased to have established this new working relationship with Allen & Co., both in that Mr. Epstein has joined our board and that the firm will be actively working as our financial advisor. Both their backgrounds in business and finance will be of immense help in moving our company toward maximizing its growth potential."

LAKE BUENA VISTA, FL (OCT. 2) PR NEWSWIRE - Walt Disney World Co. has become the first company in the nation to assume total sponsorship of a school's dropout-prevention program, according to Orlando/Orange County Compact Executive Director James Blount.

Walt Disney Attractions President Dick Nunis today announced that the company will underwrite the entire cost of the Orlando/Orange County Compact dropout-prevention program for Dr. Phillips High School.

As a compact partner, Walt Disney World will supply 110 salaried employees to serve as volunteer mentors at Dr. Phillips, holding weekly one-on-one sessions to provide academic assistance, guidance and encouragement to students identified as at risk of dropping out.

In addition to sponsoring the mentors, Disney will pay the costs of providing a salaried, on-site Compact coordinator, career activities for the students, leadership training, mentor-training seminars, travel-related expenses, lecture series and supplies, which include a mobile classroom.

Florida Education Commissioner Betty Castor said Disney's contribution of both mentors and money will help to shift the business community's role into high gear in efforts to reverse Florida's dropout rate.

"The commitment of both the company and the employees who volunteer their time reflects a real concern for the future of our children and, indeed, of our state," said Castor. "We hope other companies will follow Disney's example."

Nunis said the company's decision to join Compact was based, in part, on the

program's approach -- involving business, education, government and the community to solve a problem which affects the state's future and touches many lives.

"We are very excited about the impact Compact can have on Florida's dropout rate and the individual lives of young people," Nunis said. "I can think of no better group of volunteers than enthusiastic Walt Disney World cast members to help students who might be considered potential drop outs discover thier real potential for success."

In addition to Compact, Disney is helping area students make the grade through the Challenge Center, a dropout-prevention-and-retrieval program operated by Disney and the Orange County School Board through Disney University. Challenge students receive employment (20 hours per week) and full benefits while completing their high school education at a special half-day school on Disney property.

MAYWOOD, NJ (OCT. 2) PR NEWSWIRE - AutoInfo, Inc. (NASDAQ: AUTO) announced today it has completed the acquisition of the operating assets and customer bases of ADDS/Locate, Inc. and Recyclers Computer Network, Inc. (RYCON), both privately held computer companies serving the auto dismantling industry. As a result of the transactions, AutoInfo becomes the largest supplier of computer systems to automotive dismantlers in the western United States.

ADDS, located in Los Angeles, and RYCON, located in Phoenix, provide inventory computer systems for about 80 auto salvage dealers throughout California, Arizona, Oregon, Washington and Nevada. AutoInfo, through its Checkmate(TM) and Orion Network divisions, is the nation's largest provider of computerized services to auto salvage dealers.

"These two transactions are important strategic moves which complement our earlier acquisitions of StarNet and Parts Locator, Inc." said Martin A. Rubin, president of AutoInfo. "Today over 400 auto salvage dealers in California utilize AutoInfo services. This compares quite favorable with under 100 dismantlers as of March, 1990."

AutoInfo provides communications and computer services to over 2,000 auto parts salvage dealers in 49 states and eight Canadian provinces. The company operates one of the largest satellite networks in North America and provides database services to major automobile insurance companies.

WARREN, NJ (OCT. 2) PR NEWSWIRE - Celgene Corporation (NASDAQ: CELG) has signed an agreement to work with General Electric Co. (NYSE: GE) on its program to degrade polychlorinated biphenyls (PCSs) in the Hudson River.

The purpose of the R&D contract with GE's Corporate Research and Development Center is to accelerate and optimize the effectiveness of bacteria in breaking down PCBs. The research results will be used by GE in a Hudson River demonstration project set for 1991.

"We know that natural bacteria in the sediments in the floor of the Hudson River are 'feeding' on PCBs," said GE's manager of corporate environmental science and technology, Stephen B. Hamilton, "and that we can accelerate the rate at which it happens." The research will focus on anaerobic bacteria -- those that need no oxygen to survive -- found on the river floor.

"One of Celgene's principal capabilities is the development of systems for the biological degradation of hazardous chemical wastes, particularly chlorinated compounds," said John L. Ufheil, president and chief executive officer of Celgene. "GE will utilize this capability to define optimal conditions in preparation for its 1991 test. We are proud to be a part of this important project."

Celgene (NASDAQ: CELG), based in Warren, N.J., is a chemical biotechnology company engaged in the development of fine and specialty chemicals and proprietary biotreatment systems to degrade hazardous wastes.

THOROFARE, N.J. (OCT. 2) PR NEWSWIRE - Retailers, facing a downturn in consumer spending, are looking for viable strategies to increase the profitability of their operations.

Checkpoint Systems Inc. (NASDAQ: CHEK), the leading provider of Electronic Article Merchandising(SM) (EAM) systems, said it sees EAM systems as a key element in an overall strategy to increase retailer profitability.

To better understand retailers' strategic needs, Checkpoint is developing a proprietary database which will be used to manage information about the nation's retailers. The database which is called MAPS, stands for Market Analysis Profile System. According to Gerald W. Klein, president and chief

operating officer of Checkpoint, MAPS represents the company's continuing commitment to assist retailers and manufacturers in their efforts to increase sales with effective implementation of open merchandising strategies.

"With this database, we want to develop an in-depth picture of retailers and manufacturers. Armed with this knowledge, we will be positioned to help them improve their ability to merchandise products more openly without sacrificing any of the open merchandising benefits to shrinkage losses," Klein said. "Our Impulse(TM) program, a plan to add EAM targets to products at the point of manufacture or packaging, is an integral part of this overall strategy to help retailers increase profitability."

Using MAPS, Checkpoint will maintain ongoing communication with its expanding base of retailer and manufacturer contacts. The new database will contain such information as the location of individual retail accounts, the stores open merchandise practices, the loss prevention strategy used by a store, and the type of equipment used in price marking, scanning and printing. Additional information will include a priority list of product categories and items for which EAM is a necessity; comments from store managers regarding the integration of EAM with product warehousing, distribution, stocking and merchandising operations.

Checkpoint Systems Inc. is the leading developer and manufacturer of advanced microprocessor radio frequency-based security systems. Using detectable, paper-thin disposable circuits that can be de-activated remotely, Checkpoint Electronic Signature(R) systems identify items or people in retail, institutional, industrial and commercial applications. Checkpoint Systems Inc. is a publicly held company and is traded Over- the-Counter.

NEW YORK (OCT. 2) PR NEWSWIRE - Noise Cancellation Technologies, Inc. (NCT) (NASDAQ: NCTI) today announced a joint development contract with a major worldwide air compressor manufacturer.

The agreement provides NCT with substantial funding to apply active noise and vibration control technology to silence air compressor products.

"The potential revenue to our company provided by the integration of our technology into products sold into the $4 billion air compressor market is enormous," said John J. McCloy, chairman of NCT. "More importantly, we are pleased to have the help and support of a market leader to ensure our success in the market."

NCT's core technology is a process-control microcomputer which cancels

repetitive low-frequency noise and vibration. The system analyzes the structure of unwanted noise or vibration, predicts the waveform, and then generates "anti-noise" -- a waveform exactly 180 degree out of phase with the source. Based on the scientific principle of destructive interference, the original noise or vibration and the anti-noise cancel each other out when they meet.

Noise Cancellation Technologies, Inc. is a world leader in active noise and vibration abatement. A publicly traded company, NCT trades its common stock in the NASDAQ market under the symbol NCTI. The company owns worldwide patents for the process and application of active noise and vibration cancellation to a variety of industries. NCT is headquartered in New York City with domestic research and development facilities in Linthicum, Md. and an overseas facility in Cambridge, U.K.

BOULDER, CO (OCT. 2) PR NEWSWIRE - NBI Inc. (NYSE: NBI) today announced the signing of one of Italy's leading software republishers, MicroBusiness Italiana, to republish and distribute Legacy, NBI's recently introduced advanced word processing, page layout and graphics package for Windows 3.0.

MicroBusiness Italiana, the republishing company of Editrice Italiana Software (EIS), will republish and distribute Italian and English versions of the Legacy software.

In making the announcement, Stephen G. Jerritts, NBI president and chief executive officer, stated, "This partnership with MicroBusiness Italiana expands our international distribution and supports our objective of distributing Legacy throughout Western Europe.

Based in Milan, Italy, MicroBusiness Italiana is a subsidiary of Editrice Italiana Software. EIS is the master distributor and republisher for Fox Software Inc., Gupta Technologies Inc. and Symantec Corp.; as well as the leading Italian distributor for Ashton-Tate Corp. and Lotus Development Corp.

Legacy is a comprehensive word processing, page layout and graphics package. Compared with other Windows word processing packages, the depth of page layout and typographical controls and robust architecture in Legacy enable easier, faster creation of high-impact documents containing text, graphics and data.

In the United States, Legacy is available through authorized resellers at a suggested retail price of $495. It requires Microsoft Windows 3.0 and MS-DOS 3.2 or higher; an IBM AT or compatible (80282 or 80386 CPU) or IBM PS/2; 640K of RAM (1-2 MB recommended); EGA, VGA or other Windows-compatible display; and a Windows-compatible mouse. For more information, users can call 1-800-NBI-1111.

Based in Boulder, Colo., NBI Inc. designs and markets advanced word processing software packages. A leader in the word processing industry for more than a decade, NBI also provides customer service and support to a wide base of system users in domestic and international locations.

CONTACT: Carole Kimminau of NBI, 303-938-1042, or Lori Cross of White & Cromer, 714-752-2216, for NBI.

BOYNTON BEACH, FL (OCT. 2) PR NEWSWIRE - Dextran Products Ltd., a subsidiary of Polydex Pharmaceuticals Limited, (Polydex) (NASDAQ: POLXF), announced today a memorandum of understanding entered into with Global Telecommunications, Inc. of Bridgewater, N.J. and its partner BEV (Asia) Ltd. of Hong Kong (henceforth "Partner") under which Dextran agrees to the transfer of its iron dextran technology to a joint venture to be formed by the Partner in China for the manufacture and marketing of iron dextran products. Dextran Products is located in Scarborough, Ontario.

The Partner and the Shanghai Veterinary Pharmaceutical Company (SVPC) intend to form a joint venture (JV) to manufacture 5 percent, 10 percent, and 20 percent iron dextran in China. The JV will be responsible for product marketing in China and the Pacific Rim countries of the products from the JV in Shanghai. Dextran will have a certain percent of the equity of the new joint venture, the exact amount to be determined during the final negotiations of the new venture. For its contribution in technology and know-how in iron dextran production, Dextran will be entitled to a royalty payment, technology transfer fee and commission on sales which are subject to negotiation between the JV and Dextran.

The JV formation has recently been initiated by the Partner. Thomas C. Usher, chairman of Polydex and Dextran, stated it is anticipated that signing of the preliminary technology transfer agreements with the JV will take place sometime in November in Shanghai. Dextran further intends to enter into a formal agreement with the JV when the JV is established by the Partner and SVPC. In commenting on the favorable impact that this agreement will have on Polydex, Usher stated that the potential market for iron dextran in China exceeds the combined market of the rest of the world.

The shares of Polydex are traded in the over-the-counter market and are also listed on the Boston Stock Exchange (PXL).

CROWLEY, TX (OCT. 2) PR NEWSWIRE - Aztec Manufacturing Co. (NASDAQ: AZTC) announced today the acquisition of substantially all of the assets of The Calvert Company, Inc. Terms of the agreement were not disclosed. Calvert, based in a suburb of Jackson, Miss., manufactures and sells bus ducts, which convey electrical current and are marketed primarily to the power generation industry and secondarily to industries which use large amounts of power such as the transit, pulp and paper, steel, refinery and glass industries. Calvert had revenues of approximately $7 million for the first 10 months of its current fiscal year.

Aztec currently operates five galvanizing facilities, two facilities equipped for the end finishing of oil field tubing and drill pipe, a job shop precision machine operation and a manufacturer and assembler of industrial lighting products.

FORT LAUDERDALE, FL (OCT. 2) PR NEWSWIRE - CarePlus, Inc. (NASDAQ: CPLS) today announced that it has renegotiated its credit facilities to increase available capital at more favorable borrowing rates. The company's revolving credit facility has increased to $10 million, and the interest rate has decreased to prime from 1/4 percent over prime. As of today, the company has no outstanding borrowings on its revolving line.

A separate $5 million financing package for acquisitions and capital expenditures is also available at 1/4 percent over prime. The co-lenders on both credit facilities are Southeast Bank, N.A. and the Daiwa Bank, Limited.

"These expanded credit facilities give CarePlus the flexibility to meet its current operational needs and future expansion and acquisition plans," remarked Bob L. Wood, chairman and CEO of CarePlus.

CarePlus is a national provider of high-tech infusion therapy, treating patients requiring chemotherapy, nutritional feeding through either a vein or a tube, intravenous (I.V.) antibiotic therapy, pain treatment, fluid administration, and other home infusion therapies.

CarePlus, Inc. common stock is traded on the National Market System under the symbol: CPLS.

MINNEAPOLIS/ST. PAUL (OCT. 2) PR NEWSWIRE - Angeion Corporation (NASDAQ: ANGN) has announced the appointment of William H. Ham as president and chief operating officer. Ham will be responsible for the day-to-day operations of Angeion, reporting to chairman and chief executive officer Wendell L. King.

Ham, who will assume his responsibilities Oct. 8, has nearly 20 years of experience in the medical products industry, particularly in operations and product development.

In announcing the appointment, King said: "I've known Bill for nearly 20 years

since our days at Medtronic, and I have the highest regard for his abilities. Angeion has grown so quickly that we need to have a separate person in charge of the day-to-day operations. Bill's arrival will allow me to focus more on the longer range, big-picture aspects of developing the company."

"I'm delighted to join Angeion at this exciting time," said Ham. "I look forward to working closely with Wendell and senior management to move Angeion further toward its goal of becoming a world-class manufacturer of cardiovascular products."

Ham comes to Angeion from Johnson & Johnson Professional Diagnostics, where he served from 1988 to the present, most recently as vice president and acting general manager.

He spent 14 years at Medtronic, Inc. from 1972-86, where he progressed through a series of increasingly responsible engineering management positions, culminating with director of research and development.

Ham earned a bachelor of science degree, with high distinction, in electrical engineering from the University of Minnesota in 1976. He received an associate of applied science and electronics technology degree from Iowa State University in 1968.

Minneapolis-based Angeion Corporation is a manufacturer of cardiovascular products. Under its subsidiary AngeLase, it is currently engaged in the research and development of a catheter which would provide a nonsurgical cure for arrhythmia. Angeion's current core business target is the angioplasty accessory market.

Angeion is traded on NASDAQ under the symbol ANGN and on the Boston Stock Exchange under the symbol ANI.

NEW YORK (OCT. 2) PR NEWSWIRE - Gralla Publications' Contract Design and Facilities Design & Management will become partners in a new media network, announced Mark Gross, publishing vice president of Gralla's Real Estate, Design & Technology Group. "The purpose of this network partnership is to increase our market share and visibility by delivering the entire commercial interior design market through one comprehensive package," says Gross. "Both publications will be under one sales force, which will enhance our delivery of this market."

The network will be directed by Carrie Enfield, current publisher of

Facilities Design & Management. Enfield will provide leadership for both Contract Design and Facilities Design & Management in their new positions as network partners.

Most of the benefits of the commercial design network will be immediately evident: total market coverage of architects, designers, dealers, facilities managers and corporate executives; increases in advertising cost efficiency; expanded merchandising opportunities; consistent and complimentary editorial; and one sales force representing both publications.

"We are building a fresh new identity within the industry," Gross notes. "We are confident of the expanded niche we serve and the opportunity it presents to our readers and advertisers."

BOULDER, CO (OCT. 2) PR NEWSWIRE - NBI Inc. (NYSE: NBI) today announced the signing of Ingram Micro D to distribute NBI's recently introduced advanced word processing, page layout and graphics package, Legacy. Under terms of the agreement, Ingram Micro D will begin distributing the Windows 3.0 software program to resellers immediately in the U.S. and Canada.

In making the announcement, James Pachak, NBI vice president of sales, stated, "The addition of such a widespread distributor as Ingram Micro D reinforces Legacy's penetration into the reseller channel and greatly enhances our ability to deliver Legacy to the Microsoft Windows end-user community."

"We're extremely pleased to have NBI's Legacy software as part of our Windows product line," said Bruce Fredrickson, Ingram Micro D vice president of marketing. "The NBI/Microsoft tie-in is a further step in satisfying our resellers needs not only for Microsoft Windows but also for sophisticated applications, such as Legacy, which fulfill and extend the promise of Windows."

Legacy is a comprehensive word processing, page layout and graphics package. Compared with other advanced word processing packages, the depth of page layout and typographical controls and robust architecture in Legacy enable easier, faster creation of high-impact documents containing text, graphics and data.

Legacy is available through authorized resellers at a suggested retail price of $495. It requires Microsoft Windows 3.0 and MS-DOS 3.2 or higher; and IBM AT or compatible (80286 or 80386 CPU) or IBM PS/2; 640K of RAM (1-2 MB recommended); EGA, VGA or other Windows-compatible display; and a Windows-compatible mouse. For more information, users can call 800-NBI-1111.

Ingram Micro D Inc. is one of the world's largest distributors of microcomputer products, marketing and distributing more than 7,000 products from over 500 of the world's top hardware manufacturers and software developers. It serves as a wholesale distributor to over 40,000 reseller customers in the U.S., Canada and Europe. The company is headquartered in Santa Ana, Calif. and achieved sales in excess of $1 billion in 1989.

Based in Boulder, NBI designs and markets advanced word processing software

packages. A leader in the word processing industry for more than a decade, NBI also provides customer service and support to a wide base of system users in domestic and international locations.

Microsoft is a registered trademark and Windows is a trademark of Microsoft Corp.

Legacy is a trademark of NBI Inc.

WEST CHESTER, PA (OCT. 2) PR NEWSWIRE - Roy F. Weston Inc. (NASDAQ: WSTNA) (WESTON) today announced that the Jacobs-WESTON team has been selected to provide architecture and engineering services for the groundwater remediation phase of the U.S. Department of Energy's (DOE) $100 million Uranium Mill Tailings Remedial Action (UMTRA) project.

WESTON is a primary teaming partner with Jacobs Engineering in this $100 million contract, which is valued at approximately $30 to $40 million to WESTON over five years.

This contract, which was competed, will be a follow-on to the current Jacobs-WESTON contract which has been providing technical assistance to the UMTRA project since 1982. The cost-plus-fixed fee contract is to be negotiated in 1990, with the award expected about the end of February 1991. The contract will cover a basic two-year period with three one-year options.

The UMTRA project is a cooperative effort by DOE and the affected states and Indian tribes to perform remedial actions at 24 uranium mill tailing sites and associated vicinity properties where radioactive tailings have been used in building foundations and other properties.

"We believe this is a definite reaffirmation of our qualifications to support the U.S. Department of Energy's environmental restoration program. With this contract we look forward to administering new technologies in groundwater restoration of heavy metals and radionuclides," said David Lechel, vice president, Southwest Operations.

WESTON is a recognized leader in the environmental engineering, design and consulting industry. As a full-service environmental and health and safety firm, WESTON provides nationwide analytical laboratory services, consulting and engineering, remediation, facility construction and operations, technical information management and major program management services.

WESTON is headquartered in West Chester, and operates a network of four analytical laboratories and 44 offices, including Los Angeles, Houston, Chicago, Atlanta, Boston, New York and Washington, D.C.

HOUSTON (OCT. 2) PR NEWSWIRE - NaTec Resources, Inc. (NASDAQ: NATC) announced that it has received a letter from Advance Ross Corporation (NASDAQ: AROS) rejecting a revised merger proposal which it made to Advance Ross on Sept. 25. Under terms of the rejected proposal, NaTec would have issued a sufficient number of common shares (based upon the closing price of NaTec common stock on the day its initial proposal was made to Advance Ross) to give Advance Ross shareholders a value of $14.00 per share.

The proposed exchange would have represented an approximately 44 percent premium over the closing price of Advance Ross common stock on the same day. NaTec also offered to construct a floating exchange rate to assure Advance Ross shareholders a premium at various prices of NaTec shares. In addition, NaTec expressed in its letter a willingness to increase its offer if additional sources of value were discovered during due diligence.

Advance Ross, in its letter, stated that it has concluded that there is no basis for a transaction involving NaTec stock which is in the best interest of Advance Ross shareholders. In view of this, NaTec has decided not to take any further action at this time.

Soc Christopher, chairman of NaTec, said "We are disappointed at the response of Advance Ross. We felt it was a fair and generous offer and consistent with the previously announced objectives of Advance Ross and their financial advisors."

NaTec is committed to the control of pollutants commonly associated with acid rain. The company provides consulting engineering, injection system installation, operations and maintenance services, and processed sorbent supply. Primary markets are utility and industrial power including pulp and paper and refining.

SANDUSKY, OHIO (OCT. 2) PR NEWSWIRE - Cedar Fair, L.P. (NYSE: FUN) today announced combined attendance at its two amusement/theme parks for the just-ended 1990 operating season.

Richard L. Kinzel, president and chief executive officer of Cedar Fair Management Company, the managing general partner of Cedar Fair, L.P., reported that combined 1990 attendance at Cedar Point and Valleyfair parks was the second highest in the partnership's history and totaled 4,130,000, 4 percent below the record 4,310,000 achieved in the previous year. Cedar Point in Sandusky, Ohio and Valleyfair, near Minneapolis/St. Paul, concluded their 130-day and 120-day operating seasons Sept. 30. The partnership does not disclose specific attendance figures for either park.

"We are very satisfied with the attendance results achieved in the current year in light of the unusually poor weather this past summer, particularly on weekends, and especially following a year in which very popular new roller coasters were introduced at both parks," Kinzel said. The partnership announced last month that it expected record results in 1990 and had increased its annualized cash distribution rate by 16 percent to $1.45 per limited partner unit.

Kinzel also reported that capital expenditures at Valleyfair for the 1991 operating season have now been finalized and will total $2.5 million, including a 36-hole Adventure Golf attraction and a 1,500-foot Grand Prix-style go-kart track. Both of these will be extra-charge amusements located adjacent to the Minnesota park. Cedar Fair previously announced plans for $9 million in capital expenditures for the 1991 operating season at Cedar Point, including a $7.5 million world-record wooden roller coaster. Named Mean Streak, the new coaster will be 160 feet tall and travel at speeds over 65 mph, giving Cedar Point the highest and fastest roller coasters in the world in both steel and traditional wooden structures.

LONDON (OCT. 2) PR NEWSWIRE - Reuters Holdings PLC (NASDAQ: RTRSY) has signed a new marketing agreement with Effix Systemes of Paris for the worldwide distribution of Effix's application software for the trading room.

The new agreement gives Reuters exclusive rights to market a suite to Effix products including intelligent workstations as part of Reuters Triarch 2000, already established as one of the world's leading digital trading room systems with over 115 sites installed. It supersedes a previous agreement, signed in 1989, for non-exclusive distribution of a more limited set of products.

This Effix workstation provides advanced facilities for the trader in today's volatile and unpredictable markets. Besides displaying information in an unlimited variety of formats, the software allows the user to plot graphs, run real-time updating spreadsheets, manage news alerts and create personalized

montage displays. A key feature is the Data Dictionary, which allows the trader to define a library of commonly used prices which can then be sourced by any application program.

The suite of software products run under Unix, a multi-tasking operating system standard supported by the majority of computer hardware suppliers. This gives the benefit of portability to the Effix applications and allows Triarch 2000 clients to choose their system hardware from a range of vendors according to their needs.

Triarch 2000 uses a local area network to distribute and manage data from market information vendors and clients' own computer systems. A standard facility know as the Source/Sink Library allows clients and third parties to develop their own application programs for further processing and analysis of trading opportunities.

Effix Systemes is a French software house which specializes in the development of front office trading applications. Since its formation in 1987, Effix has installed a number of dealing room systems in Paris and elsewhere in Europe.

Reuters Holdings PLC supplies the global business community and news media with a wide range of facilities including real-time financial data and transaction services, access to numeric and textual historical databases, news and news pictures. Reuters has a controlling interest in Visnews, the international television news agency, and Reuter Group companies design and install trading room systems. Reuters obtains information from around 160 exchanges and over-the-counter markets and from a network of 1,310 journalists photographers and cameramen. Reuters distributes information through approximately 200,000 video terminals and teleprinters. This includes information directly transmitted to clients' computers.

MINNEAPOLIS/ST. PAUL (OCT. 2) PR NEWSWIRE - Mesaba Aviation, Inc., which operates as Northwest Airlink, said today that it plans to increase service at its Detroit hub this fall.

Effective Nov. 15, Mesaba will add one round-trip flight from Detroit Metropolitan Airport to four airports; Kalazamoo, Mich.; Lansing, Mich.; Cincinnati, Ohio; and Columbus, Ohio. All of the new service will complement existing service currently provided between those market by Northwest Airlines Mesaba's major airline marketing partner. Mesaba already provides service to Kalazamoo, Cincinnati and Columbus from Detroit.

To accommodate its expansion, Mesaba will be leasing an additional 44 passenger Fokker F27, increasing the size of the carrier's fleet to 31 aircraft. On Nov. 15, the airline will be serving 38 cities in 10 states.

Mesaba operates as Northwest Airlink under a marketing agreement with Northwest Airlines. The two carriers provide connecting fares, schedules and marketing programs at Minneapolis/St. Paul, Detroit and Milwaukee airports.

#90275p0475 10/02/1990 ~PR Newswire

EAST CHICAGO, IN (OCT. 2) PR NEWSWIRE - Inland Steel Co. said today that a fire caused by an overflow of liquid steel at the No. 1 Slab Caster at its No. 4 Basic Oxygen Furnace Shop (BOF) will disrupt steelmaking operations at that facility over the next several weeks.

The fire occurred about 2 a.m. on Sunday, Sept. 30, when a small amount of liquid steel overflowed the caster mold, burned through high pressure hydraulic lines, and damaged electrical control equipment.

Two employees were treated for smoke inhalation; one of them also had minor burns.

The extent of the damages is not yet known, but most of the cost is expected to be covered by insurance.

Inland said it believes it will be able to return the Slab Caster to 60 to 70

percent capacity within one to two weeks, and that full service can be restored within six weeks.

The company noted that the No. 4 BOF Shop produces almost half of the steel output at its Indiana Harbor Works steel plant in East Chicago, Ind. Full utilization of its other steelmaking facilities there and the availability of inventories should enable it to meet customer requirements with minimum disruptions.

Inland Steel Co. is a subsidiary of Chicago-based Inland Steel Industries, Inc. (NYSE: IAD).

#90275p0479 10/02/1990 ~PR Newswire

CHICAGO (OCT. 2) PR NEWSWIRE - Continental Bank Corp. (NYSE: CBK) said today it expects to report net income in the range of $35-40 million for the quarter ended Sept. 30.

Third-quarter revenues increased over the second quarter, and operating expenses were reduced by Continental's recent product realignment. This action, announced June 26, adjusted the composition and capacity of the corporation's product mix in response to customers' changing demands.

Continental's key credit indicators are not expected to change substantially in the third quarter. Total non-performing assets are expected to decline from the $748 million reported at the end of the second quarter to about $720 million on Sept. 30. Within the third- quarter total, non-performing loans to less-developed countries (LDCs) should remain at or near their $218 million level at the end of the second quarter; non-performing loans for highly leveraged transactions (HLTs) should increase modestly from the $251 million reported on June 30; and non-performing real estate assets are expected to decline from $115 million on June 30 to approximately $60 million at the end of the third quarter, principally because other real estate owned was reduced from $75 million to less than $5 million during the period.

Also during the third quarter, Continental continued its several- year-old program to reduce the size of its balance sheet and improve liquidity. Quarter-end total assets are estimated to be $27-28 billion on Sept. 30, compared with $29.5 billion on June 30.

"The more intense the competition in the financial services industry, the more we believe in our business-banking focus," said Continental Chairman Thomas C. Theobald. "My personal belief in the strategy prompted me to buy 50,000 shares of our common stock in July."

Continental Bank Corp. is a market-driven bank holding company devoted to serving corporations, institutional investors and individuals with complex financial requirements. Through its subsidiaries, the corporation arranges financing, makes markets, manages financial risk and processes cash and securities on behalf of its customers in key capital markets worldwide.

PHILADELPHIA (OCT. 2) PR NEWSWIRE - The board of directors of Prime Bancorp Inc. (NASDAQ-NMS: PSAB), the holding company of Prime Savings Bank, fsb, has declared a dividend of 14 cents for each share of common stock payable Nov. 1, 1990, to shareholders of record on Oct. 3.

In light of the problems confronting many banks and with some of the major money centers cutting dividends and even eliminating the dividends completely, Prime has continued to increase its dividends since its inception. In August, the company concluded its stock repurchase program by re-acquiring 69,145 shares, which has increased the book value per share in excess of the $27.73 reported at June 30, 1990.

Prime Bancorp Inc.'s common stock is listed on the NASDAQ National Market System under the symbol "PSAB." Its price at the close of business on Oct. 1, 1990, was $11.25.

Prime Bancorp Inc. is headquartered in Philadelphia. Prime Savings Bank, fsb, is a federally chartered savings bank, which is insured by the Savings Association Insurance Fund (SAIF), which is administered by the Federal Deposit Insurance Corp. (FDIC). HOUSTON (OCT. 2) PR NEWSWIRE - British Airways (NYSE: BAB) plans to double its Houston staff by 1992, it was announced here today by Sir Colin Marshall, the airline's deputy chairman and chief executive.

During a visit to the city - where British Airways maintains its major reservations facility servicing the western United States - Marshall noted that staffing levels could go from a current 175 to 300 by 1992.

"We are delighted with the progress we have made since our arrival in the Houston marketplace more than two-and-a-half years ago," he noted.

"Starting from square one - being the world's largest international airline but at the time unknown to Houston - the gateway gradually became a significant contributor to our North American profit," added Marshall.

In 1987 British Airways acquired British Caledonian Airways, which had previously served Houston, and made its first appearance on the route on April 1, 1988.

Today the airline, which is more than 30 percent owned by American shareholders and flies from 19 U.S. gateway cities, generates $250,000 a day in revenue from Texas.

British Airways also has more non-stop departures and capacity from Texas to London and beyond than any other carrier.

In August, the airline achieved a load factor of 82 percent from Houston against a worldwide average of 80 percent.

ROCKVILLE, Md. (OCT. 2) PR NEWSWIRE - CRI Insured Mortgage Association, Inc. (CRIIMI MAE) (NYSE: CMM), a real estate investment trust specializing in insured, multifamily mortgage investments, and a subsidiary have commenced an exchange offer to acquire control of four insured mortgage investment partnerships (AIM funds) sponsored by bankrupt Integrated Resources, Inc.

The exchange offer, scheduled to continue through Tuesday, Dec. 18, 1990, unless extended, was detailed in a registration statement (including a prospectus/offer to purchase) which the U.S. Securities and Exchange Commission (SEC) declared effective on Friday, Sept. 28, 1990.

CRIIMI MAE Chairman William B. Dockser, in a letter being sent with the prospectus/offer to purchase to the 64,000 investors in the four AIM funds, says that the exchange offer provides AIM investors with the opportunity to choose new management for the AIM funds and the opportunity to choose one of two alternative investment vehicles.

Under the exchange offer, CRIIMI MAE and its newly formed subsidiary company -- AIM Liquidating REIT, Inc. (the liquidating company) -- offer investors the right to exchange interests in each of the four AIM funds for a deferred cash payment, plus shares in either CRIIMI MAE or the liquidating company. Ten

percent of the exchange value per unit will be paid in the form of the deferred cash payment and 90 percent will be paid in shares.

Investors holding a majority of interests of each AIM fund must tender their units for that fund to participate in the exchange offer. Approval of a majority of the outstanding shares of CRIIMI MAE is also required for the consummation of the offer.

Soon after the offer's consummation, CRIIMI MAE and the liquidating company intend to remove the Integrated-affiliated general partners and to acquire each of the participating funds.

The four Integrated-sponsored AIM funds, which in the aggregate held insured mortgage investments of more than $500 million at June 30, 1990, are American Insured Mortgage Investors (AIM 84), Integrated Resources American Insured Mortgage Investors - Series 85, A California Limited Partnership (AIM 85), American Insured Mortgage Investors L.P. - Series 86 (AIM 86) and American Insured Mortgage Investors L.P. - Series 88 (AIM 88).

ATLANTA (OCT. 2) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) today announced plans to begin service between Los Angeles and Hong Kong on May 7, 1991.

The airline, which was designated by the U.S. government to operate over this route, said it expects to receive all requested approval from Hong Kong authorities soon.

Delta Chairman, President and Chief Executive Officer Ronald W. Allen said: "Hong Kong represents an important expansion of Delta's Pacific route system, and we welcome this opportunity to bring our service to one of the world's most dynamic cultural and business centers." Delta already flies to Tokyo, Seoul, Taipei and Bangkok from its Portland, Ore., gateway.

Delta plans to inaugurate its service on May 7, 1991, using the 213-passenger Lockheed 1011 international-range aircraft. This new Hong Kong service represents another major step in Delta's strategy to develop Los Angeles as its second gateway to the Pacific Basin. Delta expressed optimism that the final Department of Transportation decision in the U.S.-Japan Gateways Case will affirm the administrative law judge's recommended award of Los Angeles-Tokyo authority and Portland, Ore., to Nagoya authority to Delta.

Initially, there will be three roundtrip Los Angeles-Hong Kong flights a week with a stop in Anchorage. In late 1991, Delta will begin daily nonstop

flights featuring the new 264-passenger international-range McDonnell Douglas MD-11 aircraft. The new MD-11 will fly the 7,247-mile trip from Hong Kong to Los Angeles in approximately 12 hours and 15 minutes.

MIAMI (OCT. 2) PR NEWSWIRE - Enviropact, Inc. (AMEX: ENV), today announced its opening of an additional Texas office in San Antonio. This location marks the second facility that Enviropact has opened in Texas within a year. The San Antonio office has been established to enhance Enviropact's responsiveness in the San Antonio and Austin area. This location will further allow the Corpus Christi staff to dedicate their efforts toward the environmental requirements in the Gulf region of the state.

In opening the San Antonio location, division manager Randy Reddick expects to increase market penetration and obtain high profitability through the facility's ability to provide environmental assessments and other consulting services.

In commenting on the announcement, Edward King, president of Enviropact, stated "the institution of the San Antonio office exemplifies the priority Enviropact places on most effectively meeting the regulated community's environmental service needs."

Enviropact, Inc., an environmental services organization, provides businesses with comprehensive services relating to their compliance with present and future environmental regulations. Services offered include: environmental audits, underground storage tank management, soil and groundwater restoration, laboratory analysis, asbestos management services, air quality services, and hazardous waste management. In Florida, the company presently has offices in Miami, West Palm Beach, Orlando, Jacksonville and Tampa Bay. The company also has an office in Yonkers, N.Y.; Greenville, S.C. and Corpus Christi, Texas.

ROCKLEIGH, NJ (OCT. 2) PR NEWSWIRE - Delivering the maximum value for the dollar was Volvo's objective when they priced their 1991 product line. In spite of increase in content and declining dollar, Volvo's pricing has increased only 2.7 percent on a sales weighted average over the previous year. This means the average manufacturer's suggested retail price is still under $25,000.

On an individual model basis, the price changes ranged from -3.0 percent to +9.0 percent. The least expensive car in the Volvo line will be the 240 sedan with 5-speed manual transmission carrying a manufacturer's suggested retail price of $19,300.00. At the top of the Volvo model range is the limited production Bertone Coupe, of which fewer than 400 will be produced for 1991. It is priced at $41,945.00.

The new 940 line of sedans and wagons will replace last year's 760 series. Elegantly styled and fully equipped there are six individual members of the 940 range priced from $27,885.00 to $33,630.00.

All 1991 Volvos come equipped with a driver's side air bag, power assisted rack & pinion steering, 4-wheel power disc brakes, air conditioning, and a custom audio system. For 1991, the Volvo New Car Limited Warranty offers a full 3 year/50,000 miles of coverage. In addition, all Volvos will be protected by three years of On Call(TM), Volvo's trend setting 24-hour road side assistance program.

VENLO, THE NETHERLANDS (OCT. 2) PR NEWSWIRE - Oce-van der Grinten NV (NASDAQ: OCENY) announced here today that executive board member J.V.H. (Harry) Pennings would become chairman of the executive board with effect Dec. 1, 1990 thus becoming the company's new chief executive officer as of that date with the departure of Henk Bodt who is taking up an appointment as member of the group management committee of the Philips Group (NV Philips Gloeilampenfabrieken).

Oce, an international manufacturer of design engineering and office systems copying systems, has its home base in Venlo, The Netherlands and North American headquarters in Chicago.

Pennings, 56, has been with Oce for 21 years. His current areas of responsibility as a long time member of Oce's executive board include commercial strategy and the group's operations in North America.

Oce is the parent company of an international group of companies renowned worldwide for advanced products and systems for the presentation of information on paper comprising: multi-volume copiers and copying supplies for standard and network office applications; copying and plotter systems for design engineering offices; printing and publishing systems; graphic film and photosensitive materials.

Oce's products and systems are largely developed, produced and marketed within

the group, which employs 11,000 people in 90 countries, and in some 20 of which it has its own operating companies.

#90275p0501 10/02/1990 ~PR Newswire

ROCHESTER, NY (OCT. 2) PR NEWSWIRE - RCI Long Distance has announced a new, easy to understand long distance service for businesses.

Called Simplicity, the new service offers a greatly simplified rate structure -- one rate for calls made to designated areas in the Northeastern United States and another for calls made to everywhere else in the country.

(Traditionally, a long distance call is rated by its point of termination: whether it's within or outside the caller's state, and according to which of seven "mileage bands" -- concentric circles indicating distance from the caller -- it falls into. This "banding" system makes it difficult for customers to anticipate the cost of a given call. Simplicity effectively eliminates state distinctions and mileage bands, making it easy for a customer to anticipate exactly how much a call will cost.)

In addition, Simplicity eliminates the traditional "evening" rating period (7 p.m. - 11 p.m.), so cheapest rates go into effect at 5 p.m. Callers are billed for every six seconds, not every minute, of use. There are no minimums or account fees, and higher-volume users can receive discounts of up to 15 percent of their total bill.

As a special introductory promotion, RCI is offering new customers a credit of up to $100, applicable to the customer's third RCI bill.

"Consumers are frustrated by being subjected to industry jargon, like 'mileage bands' and 'intrastate' versus 'interstate' rates," said Ronald L. Bittner, RCI chief executive officer. "Our customers are more concerned with measuring their savings than their mileage. RCI is taking the lead in de-mystifying long distance."

LAS VEGAS, NV (OCT. 2) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) and Penske Corporation said today that Mobil will become an associate sponsor for Penske's championship auto racing team and the primary lubricants supplier for the thousands of trucks and cars in Penske's varied transportation services company.

The announcement was made here to more than 4,000 service station dealers and others attending Mobil's annual Dealer Convention. Roger Penske, president of the Penske Corporation, was here to participate in the introduction of the new relationship of the two companies.

The Penske Racing Team, which designs and builds its own cars and has won a record seven Indianapolis 500 races, eight national championships and 62 Indy Car events overall, will use Mobil synthetic technology for all lubrication, including Mobil 1 in the cars' Chevrolet Indy V8 engines.

"Auto racing's grueling and increasingly popular competition helps showcase the special capabilities of Mobil 1 synthetic engine oil and other lubricants resulting from leadership in synthetic technology," said Mobil marketing Vice President Robert J. (Bob) McCool. "We are particularly pleased to be teaming

with the dynamic and forward-looking Penske organization in an arrangement anticipating mutual business benefits extending beyond a top-flight racing effort."

Penske said, "We have been impressed with the quality and performance of Mobil lubricants through Mobil's supply relationship with Penske Truck Leasing. We plan to broaden this relationship through Detroit Diesel Corp. and our Retail Automotive Group, as well as our racing team."

The two executives indicated that, among other things, collaborative research and development efforts teaming Mobil and Penske technology could lead toward future-generation lubricants for the engines of tomorrow.

Mobil 1 synthetic automotive engine oil is a major product of pioneering Mobil synthetic technology that's been chosen for lubrication in spacecraft, many military and commercial jetplanes, nuclear submarines, and other demanding applications, as well as by an increasing number of motorists wanting better protection for their cars.

WHITE PLAINS, NY (OCT. 2) PR NEWSWIRE - IBM (NYSE: IBM) today announced a series of new products enhancing its Advanced Function Printer (AFP) family, including the IBM 3900, the highest-speed printer IBM has ever announced. With today's additions, the IBM Advanced Function Printer family provides large-system customers a full range of printer options from high-speed cutsheet and continuous-forms printers to desktop models.

Advanced Function Printing software announced today enables customers to centrally manage all printing in their enterprise, and to integrate printing tasks with other system-based business solutions for increased productivity.

The new advanced function printers, along with currently supported page printers, can be attached (via 3270 controllers and adapters) to both System/370(A) and the recently announced System/390(A) processors.

New Printers and Printer Features New products announced today include: -- IBM 3900 Advanced Function printer -- a non-impact, continuous-forms printer that provides customers all-points addressable printing at speeds up to 229 impressions per minute (ipm) and up to 5.6 million standard 8-1/2-inch forms per month. -- IBM 3828 Advanced Function MICR printer -- a channel-attached, cutsheet duplex printer that does Magnetic Ink Character Recognition (MICR) printing at speeds up to 92 ipm and up to 2 million impressions per month using a 480-picture element (PEL) printhead. -- IBM 3835 MICR Post-Processing Interface -- an attachment to the 3835 control unit. This interface directs

appropriate MICR print fields to the Troy TMP 3835 MICR printer for cost-effective MICR solutions on applications that require continuous-forms output. This solution is provided to customers in cooperation with Troy, a division of Pierce Companies, Inc. -- IBM Advanced Function Image and Graphics Feature for the IBM 3825 and 3835 Page Printers -- a feature that enables these general-purpose printers to process compressed image and vector graphics. This feature also provides customers increased performance for existing text and raster image applications. -- IBM LaserPrinter 4028 Model NS1 -- an advanced function general-purpose letter-quality printer that attaches to the 3270 family of controllers and adapters. It prints text, images, graphics, barcodes and optical character recognition at up to 10 ipm and 20 thousand impressions per month with 300 PEL addressability. It is the newest member of the IBM LaserPrinter family and provides the same features as the LaserPrinters designed for the IBM PS/2 and AS/400. -- AFP support for the IBM 4028 Model NS1 enables customers to convert applications written for 240 PEL fonts and images to 300 PEL font and images used by the 4028. SAA Image Architecture enables the 4028 printer to perform resolution correction for these images.

ASHLAND, KY (OCT. 2) PR NEWSWIRE - Ashland Oil Inc. (NYSE: ASH) today announced it will continue its commitment of supporting quality education through a new advertising campaign that stresses the importance of business-education partnerships in Minnesota.

According to Dan Lacy, Ashland Oil vice president of corporate communications, Ashland Oil will promote the Minnesota Academic Excellence Foundation (MAEF) in its campaign's print advertising as the resource for companies to contact for assistance in establishing business-education alliances.

Lacy said companies interested in forming partnerships should contact the MAEF which has agreed to serve as a resource and clearinghouse for partnerships. MAEF is a non-profit public-private education partnership based in St. Paul that was formed in 1983 to promote and recognize academic excellence in Minnesota's elementary and secondary schools.

With a campaign theme of "Better education is the bottom line," Lacy said that the 1990-91 program is the eighth consecutive year the company has focused its corporate regional advertising campaign on quality education. It is the third year the program will be run in Minnesota.

Ashland Oil's campaign, includes radio, print and television advertisements, which have just begun airing. The three television commercials used in the campaign were filmed earlier this year in Minneapolis and St. Paul and feature

talent from the area. James Productions Inc. of Minneapolis and director Denny Carlson produced the commercials.

The campaign will include a number of other education programs sponsored by the corporation. Ashland Oil again will award $25,000 in Teacher Achievement Awards to 10 Minnesota teachers for their teaching excellence. The company also intends to expand its "Recipes for Self-Esteem" program distributed statewide last year. "Recipes" is a teaching aid designed to build elementary students' self-esteem in Minnesota.

Ashland Oil Inc. is a diversified energy company, whose operations in Minnesota include 185 SuperAmerica retail outlets and its regional headquarters in Bloomington; 38 Valvoline Rapid Oil Change locations; a variety of retail locations carrying Valvoline products; an Ashland Chemical Inc. distribution facility in Shakopee and a plastics distribution plant in Burnsville; and an Ashland Petroleum Co. refinery at St. Paul Park.

Ashland Oil provides jobs to 3,043 Minnesota families and has investments of $242 million in fixed assets, land and inventory in the state.

WASHINGTON (OCT. 2) PR NEWSWIRE - The Federal National Mortgage Association (Fannie Mae) (NYSE: FNM) issued the following debenture pricing:

Date of Offering: Oct. 3, 1990

Price:	Par
Issue Date:	Oct. 10, 1990
Term:	10 years
Callable on or after:	10/10/93
Initial Redemption Price:	104.575 pct.
Interest Rate:	9.15 pct. Amount (millions): $700
Maturity Date:	10/10/00 Date of First Interest Payment
(then semi-annually):	4/10/91

The debentures of Oct. 10, 2000, are redeemable on or after Oct. 10, 1993, in whole or in part at the option of the corporation at any time (and from time to time). The redemption price payable on or after Oct. 10, 1993, initially will be a percentage of the principal amount redeemed equal to 100 percent plus one-half the coupon rate on the debentures, plus accrued interest on the amount redeemed. The redemption price will decrease on each succeeding interest payment date, as will be set forth in the Supplement to the Guide to Debt Securities information statement dated Aug. 8, 1990, relating to this offering. The amount payable at maturity will be equal to 100 percent of the then outstanding principal balance, plus accrued interest.

The net proceeds of this offering will be used to redeem in part the $750,000,000 of Series SM-1990-I, 10.15 percent debentures due Oct. 10, 1990.

Debentures will be issued in book-entry form only. The minimum purchase is $10,000 and multiples of $5,000 thereafter. The offering is being made through Fannie Mae's Senior Vice President - Finance and Treasurer Gary L. Perlin, and Vice President and Assistant Treasurer Linda K. Knight, 3900 Wisconsin Avenue, N.W., Washington, D.C. 20016, assisted by a nationwide selling group of recognized securities dealers.

The issues that are offered on Oct. 3, 1990, will be free to trade at 8:20 a.m. EDT.

CONTACT: Bonnie O'Dell of Fannie Mae, 202-752-6527.

#90275p0536 10/02/1990 ~PR Newswire

FAIRFIELD, CT (OCT. 2) PR NEWSWIRE - Barry Blau & Partners, Inc. (NASDAQ: BLAU) today reported results for its fiscal year ended June 30, 1990, along with restated results for its 1988 and 1989 fiscal years. Pursuant to its previously announced agreement with the Securities and Exchange Commission, the company is including restated financial statements for the fiscal years ended June 30, 1988, and June 30, 1989, in its annual report on Form 10-K for the year ended June 30, 1990. Barry Blau, chairman, explained that this restatement, while affecting results in certain prior years, has had no material adverse effect on shareholders' equity as of June 30, 1990.

For the year ended June 30, 1990, the company reported a net loss of $271,256, or 14 cents per share. For fiscal 1989, as restated, the company's net income was $833,708, or 43 cents per share. The company's restated fiscal 1988 net income was $727,092, or 38 cents per share.

For the year ended June 30, 1990, the company showed growth in both revenues and gross agency income, with revenues increasing 10 percent to $56,079,550 from $50,849,338 a year earlier and gross agency income rising 12 percent to $12,381,780 from $11,050,897 in fiscal 1989. However, selling, general and administrative expenses also increased during fiscal 1990, rising 31 percent to $12,494,148 from $9,569,793 in fiscal 1989. Most of this increase represented the company's substantial investment in personnel and facilities to service the existing clients as well as clients acquired during the 1989 and 1990 fiscal years.

Since the beginning of the fourth quarter of fiscal 1990, the company has reduced personnel by approximately 15 percent in its efforts to curb overhead expenses.

Pursuant to previously announced authorization from the board of directors, the company has repurchased approximately 138,000 of its shares since July 1, 1990. The company continues to have discussions exploring opportunities to improve company prospects and maximize shareholder values.

Barry Blau & Partners, Inc. is the nation's largest independent direct response advertising agency. Headquartered in Fairfield, the company has full-service offices in New York, Chicago and Baltimore.

BARRY BLAU & PARTNERS, INC.

HOUSTON, (OCT. 2) PR NEWSWIRE - Powell Industries Inc. (NASDAQ: POWL) today announced that it has appointed Edwin G. Becnel as president of The MICON Co. (formerly Powell-Process Systems Inc.) effective immediately. Becnel's career spans more than 30 years with Westinghouse Electric Corp. and included service as general manager of Westinghouse's Measurement & Control Division. With the acquisition of the Westinghouse T&D businesses by Area Brown Boveri, Becnel was appointed vice president and general manager of the electric metering business area of ABB with responsibility for electric meters and related products on a worldwide basis.

"We are extremely fortunate to be able to attract someone with the abilities and stature of Ed Becnel to lead The MICON Company's turn-around," stated Thomas W. Powell, chairman and CEO of Powell Industries Inc. "Ed's business experience and talents as an industry strategist will be very important to the future success of this operation," he added.

Earlier this year, Powell-Process Systems Inc. began doing business as The MICON Co. to more closely assiciate the company with the trade name under which its products are sold.

Powell Industries Inc. designs, manufactures and packages electrical generation, control and distribution equipment.

#90275p0549 10/02/1990 ~PR Newswire

CARTHAGE, Mo. (OCT. 2) PR NEWSWIRE - Leggett & Platt Inc. (NYSE: LEG) announced today that fully diluted earnings per share for this year's third quarter are expected to be about 15 percent lower than the 67 cents per share the company earned in the third quarter of 1989. Results of operations for the September quarter should be available for release on Oct. 25, 1990. For the first half of this year, fully diluted earnings were $1.40 per share, up from $1.33 for the first half of 1989.

Several factors have contributed to the recent weakness in earnings. First, overall demand and sales have softened. This primarily reflects lower levels of consumer confidence and, hence, reduced spending on durable goods, particularly since the Persian Gulf crisis erupted in early August. This has resulted in more intense competition in the home furnishings industry and diversified markets Leggett serves. Several operations have been hit exceptionally hard by reduced demand. These include the company's urethane foam business in the economically depressed Northeast and other diversified operations producing products for the marine, transportation, and utility

industries. Reflecting these conditions, management is now anticipating that Leggett's total sales for the third quarter, excluding acquisitions, will be down modestly from the like quarter a year earlier.

Second, costs for some raw materials and certain operating expenses have increased. Some of these inflationary cost pressures have been caused by the recent sharp increases in oil prices. Given weaker market conditions, management has delayed implementing some price increases needed to recover all of the increased costs. Management is continuing to monitor these conditions very closely to determine the best future course of action. Third, the profitability of Leggett's aluminum smelting and refining operation was impacted by a strike which resulted in reduced production during the third quarter. Finally, some recently acquired operations, which were previously reported to be somewhat dilutive for several quarters, are depressing earnings due to unrecovered increases in interest expense.

Management now believes that it could be well into 1991 before any significant improvement in economic conditions starts to develop. If recent trends remain relatively unchanged throughout the balance of this year, fully diluted earnings for all of 1990 should approximate $2.50 per share.

Headquartered in Carthage, Leggett & Platt is a Fortune 500 company that specializes in manufacturing and marketing a broad line of components used by companies making furniture and bedding for homes, offices, and institutions. Other home furnishings products include a select line of finished furniture and carpet cushioning materials. A variety of diversified products are also produced and sold in several different markets unrelated to the home furnishings industry. Leggett & Platt's common stock is listed on the New York and Pacific Stock Exchanges.

NEW YORK (OCT. 2) PR NEWSWIRE - Reporting record results for the 15th consecutive year, New Plan Realty Trust (NYSE: NPR), leading equity REIT, said net income for the fiscal year ended July 31, 1990 jumped 29 percent over the prior year on a 24 percent rise in revenues.

Net income rose to a record $35,046,653, equal to $1.01 per share, from $27,110,623, or $.95 per share, the previous year. Income before gain from the sale of property and sale of securities amounted to $31,784,578 in fiscal 1990, up 27 percent from $24,957,948 the prior year.

Revenues totaled $54,123,451 vs. $43,540,987 for the fiscal year ended July 31 1989.

Commenting on the results, chairman and chief executive William Newman said, "The year was a good one for New Plan, which achieved record growth in virtually every category."

Looking ahead, he said, "We expect continuing progress in the new fiscal year, reflecting our strong cash position during today's increasingly severe credit crunch."

He pointed out that the trust has approximately $140 million in cash and marketable securities to implement its program of property acquisitions in 1991.

New Plan Realty Trust, the largest publicly owned equity real estate investment trust (REIT) in terms of market capitalization, owns 60 shopping centers in 14 states east of the Mississippi, apartment complexes and other real estate.

HOUSTON (OCT. 2) PR NEWSWIRE - Kirby Corp. (AMEX: KEX), announced today that its board of directors had authorized Kirby to purchase up to one million additional shares of its own common stock as a supplemental authority to the existing two million share authorization. This interim authorization will enable Kirby to continue its repurchase program until the regular quarterly board meeting on Oct. 16 when the matter of stock repurchase will receive further review and deliberation. Through Oct. 1, 1990, Kirby has repurchased 1,858,401 shares under the existing authorization.

Purchases will be made on the American Stock Exchange and in privately negotiated transactions. Purchases will be subject to price, trading volume, and other market considerations. Shares repurchased may be used for reissuance on the exercise of stock options, on the conversion of outstanding debentures, or in future acquisitions for stock.

Kirby is engaged in marine transportation, diesel repair, and property and casualty insurance.

IRVINE, CA (OCT. 2) PR NEWSWIRE - Toshiba America Information Systems today announced a significant advance in the price/performance of flat-panel color displays. The technology is incorporated in the Toshiba T5200C, the first affordably priced portable computer with a full-performance color VGA display, and brings Toshiba's comprehensive family of portable desktop computers to full strength.

The T5200C display, which will also be available as an upgrade to existing Toshiba T5200 portable computers, is a passive liquid-crystal display (LCD) utilizing an innovative mating of super-twist LCD technology with a pigment-dispersed microcolor filter. The result is a display with nearly twice the contrast and brightness of previous passive color displays at a fraction of the price premium of active matrix displays.

Bill Johnson, vice president and general manager of Toshiba America's Computer Systems Division, said, "Color is the last barrier between portables and satisfying the needs of 90 percent of computer users. Bringing this kind of performance to market at reasonable cost is a result of our singular focus on portable computing."

The new display offers full VGA compatibility, 640 x 480 pixel resolution, and 16 vivid colors. Coupled with the system's powerful 20 MHz, 80386 microprocessor, the display enables the Toshiba T5200C to take full advantage of the power of Windows 3.0 and other graphically oriented productivity tools. The new system, priced at $9,499, includes a 200 MB Winchester drive, Toshiba's largest, featuring an average seek time of 16 msec. The drive is also available in the new T5200/200, identical to the T5200C except for its monochrome gas plasma VGA display and its suggested retail price of $8,499.

Toshiba America Information Systems is a wholly owned subsidiary of Toshiba America Inc. Five divisions within TAIS market a wide range of office automation products within the United States. The Toshiba Computer Systems Division markets and supports high-quality Toshiba portable personal computers and peripherals for the U.S. marketplace.

LAS VEGAS (OCT. 2) PR NEWSWIRE - Nevada Power Company's (NYSE: NVP) bond rating was lowered yesterday by Standard & Poor's from A- to BBB+. S&P attributed the drop to the company's rapidly rising construction budget and the need for internal cash flows to help meet those construction needs.

According to Nevada Power vice president and chief financial officer Richard Hyte, the lower rating was not unexpected. "We're fully aware that to meet the demands of our rapidly growing service territory, our internal cash flow will be strained."

Hyte said the company remains confident about the future. "Our goal is to steer the company through this period of high growth and to position ourselves in such a way that our ratings will return to previous levels."

RYE BROOK, N.Y. (OCT. 2) PR NEWSWIRE - The MCI Card is available to U.S. citizens located overseas, including military personnel, MCI Communications Corporation (NASDAQ: MCIC) announced today.

The card may be used in the United States to place telephone calls domestically and internationally from the United States and from almost 30 MCI CALL USA countries back to the United States. The new card does not require a U.S. phone number for billing purposes.

Now, for the first time, U.S. military personnel and civilians living abroad can subscribe to the MCI Card and take advantage of MCI's lower prices and high quality, with English speaking operator assistance. To request the MCI Card, overseas U.S. citizens must supply their VISA or MasterCard account numbers to which the calls will be billed. The total charges will appear on the credit card monthly statement and a detailed monthly billing report will be supplied direct from MCI.

MCI is offering $15 of free calling for overseas billing customers who sign up before the end of the year. MCI is also offering promotional pricing from Japan and from Italy with special MCI CALL USA rates of $.79/minute. For example, during this promotional period MCI CALL USA will save a customer 42 percent from Japan and 28 percent from Italy vs. AT&T USA Direct.

"We are proud to be able to offer our worldwide customers this added convenience," said Seth Blumenfeld, president of MCI International, MCI's international subsidiary. "The ability to use the MCI Card will allow our military personnel overseas, overseas executives of U.S. companies, embassy staffs, and all U.S. citizens the cost savings and quality of MCI when calling back to the U.S. from a growing number of MCI CALL USA countries."

Applications for the MCI Card with overseas billing are available through

selected overseas U.S. government and military facilities as well as through international newspaper advertisements and through any of MCI's 50 overseas offices. In the United States, the application for the overseas MCI Card may be requested by dialing (toll-free) 800-955-0925.

MCI CALL USA began in October 1988. The service provides the ability to place calls back to the United States from almost 30 countries by dialing freephone (toll-free) numbers. The advantages to the U.S. citizen traveling or living overseas are English-speaking operators who place the calls back to the United States, no need to carry a variety of coins from different countries, easy use of unfamiliar phone systems, elimination of surprising surcharges, and convenient detailed monthly statements.

MCI provides a wide range of international telecommunications services including voice services such as MCI International 800 Service and direct distance dialing from the United States to more than 170 countries and places. MCI also provides private line and private line switching services, electronic mail, telex and cablegram services. MCI International has subsidiaries and representative offices in 50 countries to aid in the provision of international services.

MIAMI, (OCT. 2) PR NEWSWIRE - Carnival Cruise Lines, Inc. (AMEX: CCL) reported record revenues and net income for the three-month and nine-month periods ended Aug. 31, 1990.

Net income for the third quarter was $107.2 million ($0.80 EPS), on revenues of $482.9 million, compared to net income of $84.4 million ($0.63 EPS) on revenues of $405.2 million for the same quarter in 1989. For the nine months

ended Aug. 31, 1990, Carnival reported net income of $187.0 million ($1.39 EPS), on revenues of $1.095 billion, compared to net income of $172.3 million ($1.28 EPS), on revenues of $921.6 million, for the same period in 1989.

Revenues increased for both the latest three months and nine months by 19 percent compared to the same periods in 1989. Net income for the third quarter and nine months of 1990 increased by 27 percent and 9 percent, respectively, over the comparable periods in 1989.

The increases were primarily attributed to new capacity provided by Carnival's Fantasy, which entered service in March 1990, as well as to the addition of 490 berths to Holland America's Westerdam which re-entered service in March 1990, following a six-month drydocking for lengthening.

For the three months ended Aug. 31, 1990, the company carried 295,898 passengers, to achieve an average occupancy level on its ships of 113.1 percent. This represents a 32 percent increase over the 223,953 passenger boardings recorded during the third quarter of 1989 when occupancy was at 112.2 percent. Combined with results for the first half of 1990, the company achieved a fleetwide occupancy level of 108.3 percent, carrying 718,372 passengers, up 18.5 percent from the 606,189 passengers carried during the same period last year when occupancy was 108.6 percent. The increase in passengers was also attributed to the additional capacity provided by the Fantasy and the Westerdam.

Carnival President and CEO Micky Arison said the company was very pleased with the earnings for the third quarter. "Besides achieving record revenues and net income, we were able to absorb a substantial amount of new tonnage and improved our occupancy levels at the same time," he said. Arison pointed to Carnival's Holland America subsidiary as a major factor contributing to the company's record earnings. "We are particularly delighted with the performance of Holland America. The line had a record Alaska season and, even with the additional capacity of the Westerdam, they were able to post an increase in occupancy." Carnival acquired Holland America in January 1989.

Kirk Lanterman, president and CEO of Holland America Line-Westours, said that division reached a milestone by carrying more than 100,000 cruise/tour passengers during its Alaska season. "Overall for our Alaska and Canadian Rockies products we recorded an eight percent increase in passengers over 1989. Interior Alaska cruise/tours were up about 20 percent, and this had a strong positive impact on our Gray Line of Alaska and Westmark hotel chain subsidiaries," he said.

Although there is some fear of an economic slowdown having a negative impact on the travel business, Arison said that he was very bullish about the company's performance in the fourth quarter. "Despite a weakening economy, increasing oil and fuel prices, and the high level of discounting in the industry, we believe the cruise segment of our business will perform very

well. Based on advance booking patterns, we expect to have a strong fall, and I suspect the cruise industry as a whole may well achieve record growth in 1990," he said.

However, Arison said the company's resort and casino in Nassau did not perform up to expectations. Arison cited a softening of the economy in the Northeast which he said "resulted in generally lower tourism to the Bahamas and we felt that at the Crystal Palace."

Carnival is the world's largest cruise line based on the number of passengers carried. Together with its subsidiaries Holland America Line and Windstar Cruises, Carnival currently operates 15 ships in Alaska, the Caribbean, the South Pacific and the Mediterranean. The company also operates Carnival's Crystal Palace Resort & Casino, a 1,550-room hotel and casino complex in Nassau, Bahamas. Carnival has a 2,600-passenger vessel, the Ecstasy, under contruction, scheduled to begin service June 2, 1991. Negotiations are underway for construction of another 2,600-passenger vessel for the Carnival fleet. Carnival has also contracted for construction of three more ships for Holland America Line. The first of these, named Statendam, is scheduled for delivery in late 1992, with the second and third vessels delivered in 1993 and 1994.

A regular quarterly dividend of 12 cents per share has been declared for the fiscal quarter ending Nov. 30, 1990. The dividend will be payable on Dec. 14 1990, to stockholders of record on Nov. 30, 1990.

DALLAS (OCT. 2) PR NEWSWIRE - Herbert D. Kelleher, chairman of the board, president, and chief executive officer of Southwest Airlines, America's 8th largest independent airline, today announced the inauguration of Boeing 737 jet service from Reno to Las Vegas and Oakland, Calif., beginning Nov. 15.

Southwest will offer six daily nonstop roundtrip flights to both cities on the newest pure jet fleet in the industry. Regular unrestricted coach fares will be $49 to Oakland and $59 to Las Vegas.

Not only is Southwest slashing fares by as much as 70 percent in the Reno market, it is also offering a "$20 Take Along Fare," which is good for travel through Dec. 19, 1990. For just $20 one way, a regular fare customer can "take along" a companion to any Southwest Airlines destination, no matter how far away -- when both tickets are purchased with an American Express Card. Some restrictions apply.

Southwest Airlines has become known as the "price policeman," leading the airline industry in low fares while maintaining its service level at the top of the nation's air carriers. Among its cost-saving measures are a quicker ticketing process, boarding passes on a first-come, first-served basis and no meal service. Employees have also become known for wearing "Fun" uniforms and bringing humor to the flight experience -- an extension of Kelleher's philosophy that work should be fun.

Flights to Las Vegas will begin at 7:15 a.m. with the last return flight leaving Las Vegas at 6 p.m. Flights to Oakland will begin at 8:25 a.m. with the last return flight leaving Oakland at 8:35 p.m. Weekend flights are also available.

Southwest will also be offering one stop service to Albuquerque, Burbank, El Paso, Ontario, Phoenix, San Antonio, and San Diego at tremendous savings, Kelleher noted.

Southwest Airlines will begin its advertising campaign for the new Reno service with the themeline "Happy Days are Here Again." Don Valentine, vice president-sales and marketing for Southwest, noted that "this advertising delivers the message that low fares and lots of flights are back." He continues, "We have a good solid schedule to offer our customers, but the big kicker is that Southwest fares are 50 to 70 percent off the current market prices. And these will be our regular fares, not some special introductory promotion."

CONTACT: Melanie Jones of Southwest Airlines, 214-904-4413.

MELBOURNE, FL (OCT. 2) PR NEWSWIRE - DBA Systems, Inc. (NASDAQ: DBAS) announced today that revenues for the three-month period ending June 30, 1990 were $8,625,000, down $4,093,000 from the $12,718,000 recorded in the comparable three-month period in the prior fiscal year.

Approximately $3,650,000 or 90 percent of the revenue shortfall was attributable to the company's Military Products Division which is in the process of being divested.

A pretax loss of $730,000 was recorded during the current period as compared to a pretax loss of $2,872,000 in the same period in the prior fiscal year. Included in the current quarter, pretax loss was approximately $200,000 in legal fees and settlement costs associated with various actions against the company. During the period, lawsuits were settled with E.I. du Pont de Nemours & Co., John S. Scott and MTL Systems.

Also included in the pretax loss was approximately $190,000 in costs to settle

an employment contract with the company's former chairman and approximately $350,000 in additional costs associated with the divestiture of machinery and equipment at the Military Products Division.

DBA's backlog of uncompleted work on its existing contracts as of June 30, 1990 was approximately $29,000,000, an increase of 7.4 percent when compared to the approximately $27,000,000 reported a year earlier.

The company is currently negotiating a new credit facility with its bank. As a result of a recent bankrupcty filed by the bank's holding company, Washington Bancorporation, and the insolvency of Washington Bancorporation's principal banking subsidiary, The National Bank of Washington, the discussions regarding the new credit facility includes the Federal Deposit Insurance Corporation (FDIC). A preliminary agreement has been reached between DBA, its bank and the FDIC. DBA expects to be in a position to complete its annual report on Form 10-K filed with the Securities and Exchange Commission and release audited financial statements for the 1990 fiscal year within two weeks.

#90275p0636 10/02/1990 ~PR Newswire

SAN FRANCISCO (OCT. 2) PR NEWSWIRE - Pan Pacific Petroleum Inc., today announced that its wholly owned Indonesian oil subsidiary, Enim Oil Co. Ltd.,

has obtained a loan facility of up to U.S. $5 million to help finance the development of its Harimau oil field in South Sumatra, Indonesia.

The loan, obtained from Premier Energy Equipment and Services Ltd. of Hong Kong, is repayable no later than Aug. 15, 1991, and bears interest at the rate of 1.75 percent above the Singapore Interbank Offer Rate (SIBOR), which was 8.25 percent at the time of the signing.

"This loan, at very favorable interest rates, will help bridge the company's funding at our Harimau oil and gas field on the 280,000 acre Lematang Block until commencement of production," said Lawrence Barker, Jr., president and chief executive of Pan Pacific. "Since drilling began early in 1990 in the Harimau field, the total tested oil rate has reached 9,491 barrels per day, sufficient for commercial production."

Barker said the company is prepared to proceed with the pipeline connections for both oil and gas as soon as the development plan is approved by Pertamina, the state enterprise of the Republic of Indonesia. Pan Pacific holds a 50 percent interest in the Lematang Block with Pertamina through its Enim Oil Co. subsidiary. Production is expected to begin before the end of 1990.

Pan Pacific has guaranteed repayment of the loan. As part of its guarantee Pan Pacific agreed that in the case of default Premier may elect to convert all or a portion of its loan into common shares of Pan Pacific at the rate of one share for every Cdn. $8.25 of liability. The exercise of this conversion privilege is subject to approval by the Toronto Stock Exchange.

Pan Pacific common stock is traded on the Toronto stock exchange under the symbol PPP.

NEW YORK (OCT. 2) PR NEWSWIRE - In response to the many heartfelt requests from members of the armed forces serving in Saudi Arabia, Philip Morris U.S.A. has shipped free of charge 2 million cigarettes to Operation Desert Shield.

The 10,000 cartons of Marlboro cigarettes -- Philip Morris' premium cigarette brand -- arrived in Saudi Arabia on Sept. 26 and were delivered to the members of the Army, Air Force and Marines who have the least access to the basic comforts of everyday life. The shipment was transported to the Middle East by the 82nd Airborne from Pope Air Force Base in Fayetteville, N.C.

"Over the past several weeks, we have received numerous letters asking for cigarettes from troops serving in Operation Desert Shield," said Larry Glennie director of military specialty sales, Philip Morris U.S.A. "Philip Morris

has a long history of supporting our nation's military and we hope that our donation will help make life a little easier for the men and women on the front line."

According to Glennie, the letters from the soldiers were both touching and funny. One member of the 82nd Airborne wrote: "We are not greedy people, just paratroopers unable to get hold of great cigarettes. So any cigarettes you could send us would make our stay here much more pleasurable."

Another soldier said: "We came over here with hardly any notice (a few hours!) and most of us are out of tobacco and tired. ... Even if you cannot send us our Marlboros, we would love to hear from you."

One letter even included credit card numbers with an offer to buy cigarettes for the writer, a corporal in the Marine Corps and his entire infantry mortar section. The corporal said that he and his men were in quite a predicament due to the fact that they had to borrow cigarettes from machine gunners "who usually smoke third-rate cigarettes."

"We at Philip Morris hope that our shipment of Marlboro cigarettes will help ease the predicament of this Marine corporal and all our troops in Saudi Arabia," said Glennie. The Marlboro cigarettes were manufactured in the Philip Morris plant in Richmond, Va.

HARRISBURG, PA (OCT. 2) PR NEWSWIRE - Dr. Robert E. Young, chairman of The Harrisburg Authority, and Harrisburg Mayor Stephen R. Reed today unveiled the most extensive improvement program in 50 years for the Harrisburg Water System.

The Harrisburg system serves 22,400 customers, including all of the city, Penbrook Borough, and a portion of Susquehanna Township. The authority owns the physical plant, property and real estate of the water system following the city's March 1, 1990, sale of the system to allow the authority to issue bonds and undertake improvements.

About 100 civic and business leaders joined the two officials at the site near the Harrisburg State Hospital where the authority plans to build the new water treatment and filtration plant, the largest single project of the program.

Young and the mayor capped their presentations about the water system improvements by unveiling the graphics and slogan -- "Water that Works" -- that will identify authority water projects around the city. All told, the "Water that Works" improvements will take three years to complete, according to Young.

"By improving our facilities," Reed and Young said, "we will assure our customers a safe and reliable supply of drinking water far into the future. These improvements will also allow for the expanded capacity to accommodate future business, industrial and residential customers."

The principal elements of the multimillion-dollar "Water that Works" plan are:

-- A 20-million gallons-per-day treatment and filtration plant, including a testing laboratory.
-- A water intake and pumping station on the Susquehanna River to serve as a backup water supply to the DeHart Dam, today's sole source of water.
-- Reservoir gatehouse improvements. -- Additional transmission mains.
-- Distributions system modifications, replacements and improvements, including expansion of some water lines to allow higher volume flows.

PHOENIX, AZ (OCT. 2) PR NEWSWIRE - Del Webb Corp. (NYSE: WBB) has completed the sale of its High Sierra hotel/casino in Lake Tahoe, Nev., to real estate developer and hotel operator William J. Yung.

Webb entered into an agreement to sell the High Sierra on Nov. 6, 1989, for a total purchase price of $19 million. The land which the hotel/casino occupies was leased to Webb. Yung also acquired that lease.

At close of escrow Sept. 30, Webb received $2.6 million which represents Yung's purchase of the casino's gaming equipment. Webb has managed the casino since November while Yung sought licensing approval from Nevada regulatory authorities. That approval was received Sept. 27.

In 1988, the company announced plans to sell its gaming properties which also included The Mint in Las Vegas, Nev., and the Nevada Club in Laughlin, Nev. Those sales were completed in 1988. In June of 1989, Webb ended its involvement with the Claridge hotel/casino in Atlantic City, N.J.

Chairman and Chief Executive Officer Philip J. Dion said the company is now focused on the development of its active adult communities.

"We serve a niche market that is growing in sheer numbers and in personal wealth. They are pursuing healthy lifestyles and we are well positioned to satisfy that interest better than any other company," Dion said.

"We are a company with outstanding potential. We pioneered and perfected the development of active adult communities and we intend to capitalize on our 30 years of experience in this industry," he said.

Dion also said that Webb continues to out-perform the housing industry in general. "Despite the weakness of the Arizona market, we are doing well and are positioned to take advantage of the opportunities this creates for us."

Webb is pursuing a strategic plan that will diversify the company geographically. Its current Sun Cities are located in Phoenix and Tucson, Ariz. and Las Vegas. In California, the company has filed plans for a community near Palm Springs, and has property optioned near Sacramento.

Phoenix-based Del Webb Corp. is the nation's leading developer of active adult communities.

LOS ANGELES (OCT. 2) PR NEWSWIRE - International Movie Group Inc. (NASDAQ: IMGRF; Toronto: IMV) today announced record revenues and earnings for the twelve months ended June 30, 1990. This marks the fourth consecutive year of record earnings in the company's four year history.

Revenues for the year ended June 30, 1990 increased 51 percent to $17,520,000 from $11,601,000 the previous year. Net income increased 30 percent to $1,867,000, or $0.26 per share ($0.21 fully diluted); from $1,433,234, or $0.21 per share ($0.17 fully diluted), the previous year. (All figures in US dollars)

Revenues from the three months ended June 30, 1990, were $7,387,000 and net income was $982,000, or $0.13 per share ($0.10 fully diluted).

Commenting on the results, Peter E. Strauss, chairman and chief executive officer of International Movie Group, Inc. said, ''We are very pleased with the solid growth the company has maintained. Among the eight films released this year were ''Cadence'' with Charlie and Martin Sheen and three films of a six film joint venture with Chrysalide Films and French powerhouse Canal Plus. We hope to continue this pattern of growth in the coming year, and are optimistic about five pictures currently in various stages of production. These include ''Chaindance'' starring Michael Ironside and Rae Dawn Chong, ''By The Sword'' starring Eric Roberts and F. Murray Abraham, and the three remaining Chrysalide-Canal Plus pictures.''

International Movie Group Inc., through its wholly owned subsidiary, The Movie Group, Inc., distributes independently produced English language films to over 50 countries outside of North America.

SOMERVILLE, MA (OCT. 2) PR NEWSWIRE - Century Bancorp, Inc. (NASDAQ: CNBKA) today announced that it has added an additional $1 million to its Loan Loss Reserve, bringing its total reserve to $6.4 million a the end of the third quarter ending on Sept. 30, 1990.

Century Bank determined this addition to the reserve appropriate in view of the continued downturn in the local economy. Although Century did not have major charge-off's during the quarter, it continued to see economic deterioration with attendant increases in non-performing loans. Management expects that after the addition to the loan loss reserve, Century will not post a loss for the quarter.

But because management expects the downturn in the economy to be long-lived, it will recommend a possible reduction in dividends to help preserve its strong capital base. This measure will be presented to the board of directors on Oct. 10, 1990.

Century Bancorp, Inc., with 14 offices in eastern Massachusetts has three subsidiaries: Century Bank and Trust Company, headquartered in Somerville, Century North Shore Bank and Trust Company, headquartered in Lynn and Century Bank/Suffolk, headquartered in Chelsea.

#90275p0662 10/02/1990 ~PR Newswire

SAN MATEO, CA (OCT. 2) PR NEWSWIRE - Interactive entertainment software supplier Electronic Arts (NASDAQ: ERTS) today announced that, in the week ending Sept. 23, the company shipped over $1 million worth of game cartridges for the 16-bit Sega(R) Genesis(R) console.

"Demand for Genesis software is still building," said Bing Gordon, EA's

vice-president of marketing, "and initial orders for Zany Golf(TM) were our highest yet on Sega." First shipped in September, Zany Golf is EA's third Sega title, joining Populous(TM) and Budokan: The Martial Spirit(TM). EA has shipped more than 150,000 units of the three games combined since entering the Sega Genesis market in the last week of June.

Gordon attributes EA's success with Sega to the characteristics of Genesis owners. "According to our research," he explained, "the median Genesis player is 19 years old, vs. early to mid-teens for Nintendo(R), and 27 for the traditional PC gamer. They're pretty sophisticated, and over half also own a PC. Perhaps that's why they recognize the value of spending $50 on a 16-bit Genesis cartridge."

EA's research also revealed differences in taste and buying influences among the three groups. Compared to Nintendo users, the typical Genesis player is much more interested in simulation, role-playing and strategy games, and much less interested in "action". Like PC gamers, Genesis owners are more likely to buy based on brand loyalty, packaging and in-store displays, while Nintendo users tend to be swayed more by advertising and product reviews. For example, more than half of EA's Genesis customers cited Electronic Arts' reputation as an important factor in their purchase decision.

Electronic Arts mission is to be a leader in providing entertainment software to the mass market.

Nintendo(R) is a registered trademark of Nintendo of America Inc. Sega(R) and Sega Genesis(R) are registered trademarks of Sega Enterprises Ltd.

ALBANY, GA (OCT. 2) PR NEWSWIRE - As previously announced, the heirs of the Estate of James H. Gray Sr., had agreed with Mr. James H. Gray Jr. for the Executor of the Estate to sell the shares of common stock of the Gray Communications Systems, Inc. (the "Company") owned by the Estate to James H. Gray, Jr. for $162.50 either through a direct sale or pursuant to a merger. In connection with that agreement, which had an expiration date of Oct. 1, 1990, Mr. Gray made a merger proposal to the company for $162.50 per share.

This merger proposal was conditioned upon the approval of the proposal by a special committee appointed by the Board of Directors to consider the fairness of the proposal. Bear Stearns & Co. Inc., was engaged by the committee to act as its financial advisor.

The Special Committee has informed the company it is unable to conclude that

Mr. Gray's offer of $162.50 per share is fair, from a financial point of view, to the Company's public shareholders.

The Special Committee advised the Directors that, when the Special Committee was unable to conclude that the offer of $162.50 was fair to the shareholders, discussions ensued between the Special Committee and Mr. James Gray's advisors concerning whether the Committee could recommend an offer at $172.50 per share. The Committee advised Mr. Gray's advisors that a market check or other conditions would be necessary and those discussions were continuing when Mr. Gray notified the Company by letter dated Sept. 26, 1990 that the offer was withdrawn.

PITTSBURGH (OCT. 2) PR NEWSWIRE - Mellon Bank Corp. (NYSE: MEL) through its credit card operation at Mellon Bank (DE), Wilmington, Del., has purchased approximately $110 million in credit card receivables from Ameritrust Company N.A., Cleveland, it was announced today.

The sale is expected to result in a one-time pre-tax gain of $14.6 million to Ameritrust.

Included in the receivables are $73 million in American Automobile Association (AAA) Club accounts in West Virginia, Kentucky, North Carolina and South Carolina. The transaction closed last week.

Ameritrust will continue to service the AAA accounts until they are converted to the Mellon computer system by the third quarter of 1991. At conversion, Mellon will bring the accounts under its credit card operation in Delaware.

"This purchase emphasizes the corporation's commitment to retail banking activities and reflects our strategic plan to grow the credit card business," said Kerry Ryan, senior vice president and head of Mellon Bank's Credit Card Group. "The AAA portfolio will enable us to enter a new affinity card market that should provide us with excellent growth opportunities. We are excited about working with such an outstanding organization."

Ameritrust Corp. (NASDAQ-NMS: AMTR) is an $11.1 billion regional bank holding company headquartered in Cleveland, with more than 200 offices located in Ohio, Indiana and Michigan. Ameritrust manages one of the nation's largest trust departments, in addition to providing a full range of retail and commercial banking services.

Mellon Bank Corp. is a regional leader in issuing MasterCard and Visa bank cards and has a selected national presence in affinity cards. From its Delaware processing center, Mellon Bank issues affinity cards for several organizations including the World Wildlife Fund, the University of Pittsburgh and the U.S. Olympics.

With assets of $31.7 billion at June 30, 1990, Mellon Bank Corp. is one of the nation's largest bank holding companies. Through its subsidiaries, it provides wholesale, middle market and retail banking, as well as numerous service products including trust and investment, cash management and financial data processing.

ATLANTA (OCT. 2) PR NEWSWIRE - T2 Medical Inc. (NASDAQ-NMS: TSQM) today announced that Anthony C. Smith would become a member of the company's board of directors effective Oct. 1.

Smith established Anthony Smith Advisors Inc., on Jan. 1, 1988, and has actively consulted T2 Medical on numerous financial matters since the company's initial public offering in May 1988. Smith's firm is registered with the Securities and Exchange Commission as a Registered Investment Advisor.

From 1984 through 1987, Smith was the director of the Financial Advisory Service for Kidder, Peabody & Co. for the Southeastern Region. From 1975 through 1984, Smith was an attorney in the law firm of Carter, Ansley, Smith & McLendon, where his practice involved the areas of estate and financial planning, pension planning, insurance law, and tax planning.

Smith holds a B.B.A. (Finance) degree and a J.D. (Law) degree from the University of Georgia and a Masters of Taxation degree from Georgia State University.

In commenting upon the addition to the board of directors, Thomas E. Haire, chairman and chief executive officer of the company, stated: "We are extremely pleased that the company is able to obtain the services of Mr. Smith. Having been an active consultant to the company since May 1988, Tony is thoroughly familiar with the company's business and brings a complete understanding of the financial industry and the challenges and opportunities which it represents for the company. He has excellent business and financial skills and his financial service experience will assist the company immensely in its continued growth."

T2 Medical is a leading provider of home infusion therapy in the United States. Infusion therapy is the administration to a patient of nutrients, antibiotics and other drugs and fluids, either intravenously or through a feeding tube.

CONTACT: Thomas E. Haire, chairman, or Dale R. Benzine, 404-442-2160, both of T2 Medical.

DETROIT (OCT. 2) PR NEWSWIRE - Electric utility professionals will learn more about the needs of their industrial and commercial customers when Detroit Edison serves as host for the Great Lakes Power Association's fall conference

Oct. 24-26.

John E. Lobbia, chairman and chief executive officer of Detroit Edison (NYSE: DTE), and Gary S. Dewey, president of the Great Lakes Power Association, will address the conference at the Omni International Hotel in downtown Detroit.

Additionally, experts from the electric utility and other manufacturing industries will discuss advances in electric forging, infrared drying, power quality, glass processing and ion nitriding, as well as trends in marketing and sales. The conference also will feature an update on the environmental impact of chloro-flourocarbons, chemicals used primarily for refrigeration.

A $70 registration fee is due Oct. 24, but reservations are requested by Oct. 12. For further information, call Detroit Edison's Peter Snyder at 313-237-8922.

The 60-year-old Great Lakes Power Association is composed of 18 electric utilities from Michigan, Ohio, Indiana, Illinois, Minnesota and Wisconsin. The association promotes use of energy-efficient state-of- the-art electric technology to improve commercial and industrial operations.

CONTACT: Vanessa Waters, 313-237-7255, or Martin L. Bufalini, 313-237-8808, both of Detroit Edison.

CAMBRIDGE, MA (OCT. 2) PR NEWSWIRE - Index Technology Corporation (NASDAQ: INDX), a leading developer and marketer of computer-aided software engineering (CASE) products, today announced that although it anticipates a revenue increase for the quarter ended Sept. 30, 1990 of approximately 15 percent over the same period last year, the company anticipates a loss of approximately $500,000, or 10 cents per share, for the quarter.

Richard A. Carpenter, chairman and chief executive officer of Index Technology attributed the loss to the cost of investment in the next generation of its product line and lower than expected revenue.

"Index Technology is in the midst of a series of significant product roll-outs that demonstrate our long-term market strategy as well as our confidence in the CASE marketplace and our commitment to the market's long-term needs," said Carpenter. "Two of those products were announced during this past quarter and they have received a favorable response."

In July, Index Technology announced 4Front, a product developed under a strategic alliance with the professional services firm of Deloitte & Touche. In September, the company introduced Excelerator for Design Recovery, the first product to bring CASE analysis and design capabilities to the critical problem of maintaining, enhancing and documenting existing information systems. The company plans two more significant product introductions in the near future.

"While we regret this loss for the quarter, we at Index Technology are confident in our long-term corporate strategy and in the soundness of our product line," Carpenter said.

Index Technology's Excelerator Series are the world's most widely used systems analysis and design CASE products, with an installed base of more than 24,000 copies. The company, founded in 1983, markets its products from its Cambridge Mass., headquarters, field sales and support offices throughout the U.S. and Canada, subsidiaries in the U.K., France, Germany, Sweden, Denmark and Australia, and through third-party distributors, providing coverage in approximately 40 countries worldwide.

#90275p0697 10/02/1990 ~PR Newswire

NEWPORT NEWS, VA (OCT. 2) PR NEWSWIRE - The Flight International Group, Inc. (NASDAQ/NMS: FLTI) announced today that the Comptroller General of the United States has recommended that the U.S. Navy terminate a $250 million contract with Sabreliner Corporation and award the contract to Flight International.

The recommendation, which involves the five-year Under-graduate Naval Flight Officer (UNFO) Training Program, follows a protest lodged by Flight International in March 1990 when the contract was first awarded to Sabreliner Corporation.

The protest was lodged by Flight International when the company learned that its bid had been rejected. The Comptroller General found in favor of Flight International: "We therefore find that Sabreliner's evaluation under the technical factor lacked a reasonable basis and, as a result of the failure to properly take into account Sabreliner's weakness in this regard, that Flight International's superiority under the technical factor was understated. Again Sabreliner's perceived advantage with respect to price--the other most important evaluation factor--was in error. Since the management factor was significantly less important than technical and cost, we find no basis in the evaluation record for concluding that any weakness of Flight International's management proposal effect Flight International's superiority under the significantly more important technical factor. Thus, absent consideration of financial capability, award to any offeror other than Flight International would be an abuse of discretion."

Following a thorough review by the Comptroller General, Flight International's protest was sustained: "By letter of today to the Secretary of the Navy, we are recommending that the agency determine the (financial) responsibility of Flight International, and, if the firm is found non-responsible, refer the matter to the SBA (Small Business Administration). If the SBA issues a COC (Certificate of Competency) to Flight International, the contract awarded to Sabreliner should be terminated for the convenience of the government and award should be made to Flight International...We find that Flight International is entitled to be reimbursed its protest costs."

The Flight International Group, Inc. is a leader in aviation services with interests in government and military contracts as well as commercial flight operations.

RESTON, VA (OCT. 2) PR NEWSWIRE - DynCorp (NASDAQ: DYNPP), formerly Dynalectron Corporation, has been awarded two government contracts, collectively valued at over $5 million. Both contracts represent new customers for the Reston-headquartered professional and technical services firm.

Under the terms of the first contract, with the Department of Justice, DynCorp

will supervise the installation of intrusion detection systems in the residences of United States Marshals Service employees nationwide. DynCorp will perform site surveys, inspect system installations and provide user training. The two-year contract begins Oct. 1, 1990.

Under a second contract with the Food and Drug Administration, DynCorp will operate and maintain the Center for Food Safety and Applied Nutrition's facility and equipment in Laurel, Md. This research facility is dedicated to the exploration of health and safety issues in the nation's food supply, including nutrition, toxicology, food additives and microbiology. The three-year contract commences on Jan. 1, 1991.

The awards reflect the company's strategy of decreasing its dependence on the Department of Defense. According to DynCorp President and Chief Executive Officer Dan R. Bannister: "Although they are not large in terms of revenue dollars, these awards are strategically significant. They broaden our current customer base within the U.S. government and create opportunities for us to further build our reputation for customer satisfaction in non-defense related capacities."

DynCorp is an employee-owned professional and technical services firm providing a wide range of services to government and commercial clients worldwide.

#90275p0711 10/02/1990 ~PR Newswire

LOS ANGELES (OCT. 2) PR NEWSWIRE - Spelling Entertainment Inc. (AMEX: SP), a leading entertainment production and distribution company, today reported net income for fiscal 1990 of $6,510,000 on a 10 percent increase in revenues for the year ended July 31, 1990.

For fiscal 1990 revenues were $158,025,000, up from $143,856,000 for the previous year. Operating income totaled $21,736,000, up from $20,849,000 a year ago. Net income attributable to common shares was $5,010,000, or $.15 per share, compared to $11,88,000, or $.48 per share, for fiscal 1989.

Revenues for the fourth quarter decreased to $38,837,000 from $43,883,000 for the final 1989 fiscal quarter. Net income attributable to common shares was $722,000, or $.02 per share, a decrease from $3,086,000, or $.09 per share, recorded for the comparable year-earlier period.

Spelling Entertainment includes the results of Worldvision Enterprises, Inc. and Laurel Entertainment, Inc. since their acquisition on March 1, 1989.

Expenses for the 1990 fiscal year include a full twelve months of the amortization of acquisition costs not allocated to specific assets, compared to only five months in the prior fiscal year, as well as the cost of financing the cash portion of the acquisitions, and preferred stock dividends. In addition, the fourth quarter of fiscal 1990 reflects the write off of costs associated with the exploration of the potential sale of the company, the plans for which were terminated during the fourth quarter.

Net income for the fourth quarter of fiscal 1989 included $6,000,000 received from American Broadcasting Company in satisfaction of series commitments not fulfilled, an amount substantially offset by the writedown of production and development costs incurred on pilots and series not ordered by the television networks for the current production season.

According to Aaron Spelling, chairman and chief executive officer, "the past several months have been exciting ones for the company. The success of 'Twin Peaks' in the Spring has prompted the ABC Network to renew the program for this Fall season. A new half hour series entitled 'American Chronicles,' produced by David Lynch and Mark Frost, was ordered by the Fox Broadcasting

Company for the airing of at least 13 episodes this Fall. Our Worldvision subsidiary has acquired the worldwide distribution rights for both of these properties.

"A new one hour dramatic series entitled 'Beverly Hills, 90210,' produced by Torand Productions, a wholly owned subsidiary of Spelling Entertainment Inc., is scheduled for airing in the Fall by the Fox Broadcasting Company. Our Laurel Entertainment subsidiary produced 'Tales From The Dark Side: The Movie ' which was among the top ten grossing movies for four consecutive weeks and has commenced production on an additional 24 episodes of its current series, 'Monsters.' Additionally, Aaron Spelling Productions is working on a number of films for television that are expected to be aired this season," he continued.

"The company will also produce a new theatrical motion picture for Paramount entitled 'Soapdish.' Shooting starts on Oct. 22 for release sometime next year," Spelling stated.

Spelling Entertainment Inc. is primarily engaged in the development, production and distribution of television series, television series pilots, movies for television, and television mini-series. The company also produces feature films financed and distributed primarily by major studios and licenses music and merchandising rights associated with its television properties.

CONTACT: John T. Brady, senior vice president of Spelling Entertainment, 213-965-5822, or Jim Goldman, 212-661-8030, or Donna Limper, 312-266-7800, both of The Financial Relations Board, for Spelling

SUNRISE, Fla. (OCT. 2) PR NEWSWIRE - Jan Bell Marketing, Inc. (AMEX: JBM) announced today that W. Gregory Robertson has been elected to fill a vacancy on its board of directors.

Robertson, president of TM Capital Corp., a New York-based investment banking firm, has been an advisor to Jan Bell for several years. He formerly was executive vice president and director of investment banking at Thomson McKinnon Securities Inc., which had been one of Jan Bell's early investment bankers. Robertson began his career and spent 15 years at Goldman Sachs & Co. one of Jan Bell's investment bankers today.

"Greg has been a valued advisor over the years and now, with him serving directly on our board, we can take maximum advantage of his experience in counseling a wide range of companies to help even more in objectively guiding Jan Bell's corporate development and operating growth in the 1990s," said Lee A. Mills, vice chairman of Jan Bell.

Jan Bell is a leading provider of fine jewelry and popular watches to the value-conscious consumer through power-format marketing programs in conjunction with distribution channels that emphasize quality, credibility and consistent value.

DALLAS (OCT. 2) PR NEWSWIRE - Jess Hay, chairman and chief executive officer of the Lomas Financial Group (NYSE: LFC), announced today that Gene H. Bishop has been elected vice chairman of the board and chief financial officer of Lomas Financial Corp. and president and chief operating officer of its mortgage banking division, Lomas Mortgage USA.

Bishop has been a member of Lomas Financial Corp.'s board of directors since 1969. He will remain on its board. As president of Lomas Mortgage USA, Bishop succeeds Paul M. Low, who is retiring after a tenure of 32 years with the company.

Commenting on Low's retirement, Hay noted that, "Paul Low has been a creative force in the development of Lomas Mortgage USA throughout his tenure. He has served us well, and will be missed."

Bishop, who recently retired as chairman and chief executive officer of MCorp, was president of Lomas Financial Corp. from 1969 to 1975. He left Lomas in 1975 to become chief executive officer of Mercantile National Bank of Dallas and Mercantile National Corp., the predecessor company to MCorp. He retired from MCorp in July 1990.

"Gene Bishop's management skills, knowledge of the mortgage industry and expertise in the disciplines necessary to achieve the aggressive goals set forth in our five year business plan will prove of great value to our company in the months and years ahead," Hay said. "He adds an important dimension to our management team. We are very pleased to have him back."

Bishop said that he sees tremendous opportunity for growth in Lomas' mortgage businesses.

"We see a substantial amount of mortgage servicing business coming available over the next several years," Bishop said. "Lomas Mortgage USA and Lomas Information Systems are outstanding organizations with staffs of extremely talented people. As one of the industry's lowest cost producers, with the finest, most sophisticated computer system available, Lomas is in an extremely strong position to take advantage of opportunities for growth."

Hay said that he began talking with Bishop about coming back to Lomas in a senior management position upon learning of Bishop's decision to retire from MCorp.

In addition to Lomas Financial Corp., Bishop currently serves on the boards of Lomas & Nettleton Mortgage Investors, MCorp, Republic Financial Services Inc., Southwest Airlines Co., Southwestern Public Service Co. and VISystems, Inc.

#90275p0729 10/02/1990 ~PR Newswire

PITTSBURGH (OCT. 2) PR NEWSWIRE - Equimark Corp. (NYSE: EQK) today announced that it expects to report a net loss for the third quarter of 1990 projected in the range of $12.0 million to $14.5 million, equal to a net loss per common share of between $1.08 and $1.29.

Including this third quarter projected loss, Equimark's results of operations for the nine months ended Sept. 30, 1990, would aggregate a projected net loss of between $43.0 million, or $3.80 per share, and $45.5 million, or $4.01 per

share. Equimark reported a corporate net loss of $15,525,000, or $1.38 per share, in the second quarter of this year. For comparison, Equimark reported consolidated net income of $6,047,000, or $0.48 per share, in the third quarter of 1989 and $15,750,000, or $1.31 per share, for the nine months ended Sept. 30, 1989.

It is presently anticipated that the third quarter financial results will be released in mid-October, 1990.

As of June 29, 1990, the federal and state bank regulatory agencies began their regularly scheduled examinations of the Equibank and Liberty Savings Bank subsidiaries of Equimark. At this time the on-site portions of these examinations are nearing completion.

The continuing deterioration of various economic conditions in Equimark's market area has led to a further bolstering of Equimark's reserve for possible loan losses. It is projected that Equimark's reserve will be increased to approximately 2.30 percent of loans outstanding at Sept. 30, 1990, up from 2.18 percent of loans at June 30, 1990. The increase in the reserve principally relates to the corporation's Liberty Bank subsidiary in Philadelphia.

Equimark's nonearning assets at Sept. 30, 1990, are projected to increase by approximately 7 percent to 10 percent over the June 30, 1990, level of $65,608,000. A significant percentage of the increase relates to the Liberty Bank commercial real estate portfolio. The coverage of the nonearning asset totals by the reserve for possible loan losses is projected to remain approximately the same as June 30, 1990, at 82 percent.

While the 1990 third quarter provision for possible loan losses remains high, corporate results are projected to include a reduction in the provision of approximately 40 percent from the second quarter of 1990. Net loan chargeoffs in the third quarter of 1990 are projected to be approximately one-half the amount of the prior quarter. A significant portion of the expected reduction in quarterly net loan losses relates to the nonrecurrence of losses from retained delinquent balances associated with the April 1990 credit card portfolio sale. In addition, lower net chargeoffs from Equimark's other consumer portfolios are anticipated. Projected net loan chargeoffs in the commercial, commercial mortgage and construction portfolios in the 1990 third quarter are anticipated to be between 40 percent and 50 percent lower than in the second quarter of 1990 and less than one-half the comparable net chargeoffs in the first quarter of 1990.

As a result of the full quarter effect of the April 30, 1990, sale of $349.1 million of credit card loans, Equimark's net interest income in the 1990 third quarter is projected to decline by approximately 5 percent from the second quarter of this year. The credit card sale accounted for a net gain of $14.3 million in the 1990 second quarter. In addition, a lower level of consulting

and other service fees, principally related to services performed by EquiManagement, will be realized in the third quarter.

The corporation also anticipates a reduction in operating expenses by approximately 20 percent from the second to the third quarter of 1990. Professional fees and legal expenses are projected to decline by approximately $6.0 million, or 70 percent, from the second quarter of 1990. Additionally, operating results in the second quarter of 1990 absorbed a one-time loss of $4.1 million on the sale of an under-performing balance sheet hedge.

It is anticipated that total consolidated assets of Equimark at Sept. 30, 1990 will approximate the June 30, 1990, total of $3.5 billion.

At Sept. 30, 1990, Equimark's ratio of primary capital and reserves to assets is projected to approximate 8.0 percent. The primary capital positions of each of its banking subsidiaries are projected to remain above minimum regulatory requirements.

Equimark Corp. is a diversified financial services institution with total assets of approximately $3.5 billion. Equimark's principal subsidiaries are Equibank, The Liberty Financial Group Inc., EquiManagement Inc. and Treasure Valley Bancorp Inc. Equibank, with assets of approximately $2.8 billion, operates 55 offices in southwestern Pennsylvania. Liberty is the parent of Liberty Savings Bank, a Philadelphia-based, FDIC-insured savings bank with 21 offices and assets of approximately $660 million. EquiManagement provides management consulting services, primarily to financial institutions. Treasure Valley Bancorp Inc. is the parent of Treasure Valley Bank, an FDIC-insured bank with assets of approximately $80 million and eight offices in southwestern Idaho.

ATLANTA (OCT. 2) PR NEWSWIRE - CIBA Vision Corp., a subsidiary of CIBA-GEIGY Corp., today announced the formation of CIBA Vision Ophthalmics(TM), a business expansion into the ophthalmic pharmaceutical market.

Internationally, CIBA-GEIGY Limited, Basle, Switzerland, and ZYMA S.A. NYON also announced that ZYMA's board has approved, in principle, the sale of its ophthalmics business to CIBA Vision. Since CIBA-GEIGY Limited is the majority shareholder of ZYMA, the purchase price will be established by an independent financial auditor and will be subject to final approval by ZYMA's board of directors.

Domestically, Jim Callahan, president and chief executive officer of CIBA Vision Corp., has appointed Stephen M. Martin president of the new division.

"Steve's expertise in business development and former pharmaceutical experience make him ideally qualified to guide CIBA Vision into this new stage of development," Callahan said.

In 1980, Martin was CIBA Vision Corp.'s first employee, appointed as vice president of operations from CIBA-GEIGY's Pharmaceutical Division. He most recently served as CIBA Vision Corp. executive vice president of technical affairs and business development in Atlanta and as a member of the CIBA Vision worldwide group management committee headquartered near Zurich, Switzerland. He received his bachelor's degree from Wake Forest University in North Carolina and later studied law at Woodrow Wilson College of Law in Atlanta.

"When we first started CIBA Vision in the United States we were the 27th entry into the contact lens market. Only 10 years later, we are a market leader. Innovative products, forceful marketing, and a customer orientation have allowed us to become a successful and profitable business providing quality soft contact lenses and lens care products," Martin said. "Today, we are ready to do it again. Combining our industry experience, the pharmaceutical expertise of our parent company CIBA-GEIGY and our commitment to make it happen, we will continue the successful growth of CIBA Vision."

Martin appointed Bruce Riddell as the vice president of marketing and sales for CIBA Vision Ophthalmics. Riddell has more than six years of marketing and sales experience in the ophthalmic industry, most recently working with Allergan Inc. Riddell holds a graduate degree in business from Pepperdine University in Malibu and a graduate degree in physiology from California State

University in Long Beach.

"We are excited about expanding the offerings of CIBA Vision," Riddell said. "The diversification strategy into the ophthalmic pharmaceutical market today will give CIBA Vision Ophthalmics the opportunity to offer innovative products which will meet the needs of eye care specialists tomorrow."

CIBA Vision Ophthalmics will be located in the new headquarters of CIBA Vision Corp. at 11460 John's Creek Parkway, Atlanta, Ga., 30136.

CIBA Vision Corp., a subsidiary of CIBA-GEIGY Corp., is a leading manufacturer of soft contact lenses and lens care products. CIBA-GEIGY Corp. is a leading developer and manufacturer of agricultural chemicals, pharmaceuticals, dyes, plastics, vision care products and specialty chemicals in the United States. CIBA-GEIGY Corp. is a wholly owned subsidiary of CIBA-GEIGY Limited of Basle, Switzerland.

The first company who will use UTI's patented automotive technology is Daihatsu Motor Co. Ltd.

American Pacific Co. is a marketing service and project management company. They represent various companies that supply parts and accessories to the automotive, motorcycle and power products industries. American Pacific has done projects for Suzuki, Toyota and Mitsubishi.

UTI has conducted extensive research and development on automotive parts for the past 12 months. Approximately 22 parts were engineered for Daihatsu. Prototype molds were made and the parts were tested. Production molds are near completion and manufacturing will commence within a few months.

The Daihatsu parts will be manufactured in the United States by Star Custom Products Inc. of Anaheim, Calif. Star Custom Products already does urethane automotive parts for the aftermarket. They presently have the necessary equipment in order to go into production. Additional equipment will be purchased from UTI which will speed their production line. "Star Custom Products will then purchase their chemical systems from UTI under a license agreement," says Vincent F. Panaroni, president of UTI Chemical Inc.

SUNRISE, Fla. (OCT. 2) PR NEWSWIRE - Jan Bell Marketing, Inc. (AMEX: JBM) announced the addition of three executives to its corporate management team.

Jay M. McGuire Jay M. McGuire has joined the company in the newly created position of president - retail division, spearheading Jan Bell's expanding involvement in retail sales of fine jewelry. McGuire previously spent his entire 20-year professional career with Kentucky Fired Chicken, a division of Pepsico. Most recently, he served as general manager of KFC - Western Canada, responsible for the market development in that region of over 250 company-owned and franchised Kentucky Fried Chicken stores. McGuire holds a B.A. in finance and served as an intelligence analyst in the U.S. Army.

"Jay's experience should enhance Jan Bell's expanding efforts in the retail sector, including our 'jewelry store-within-a-store' power formats," said Lee A. Mills, vice chairman of Jan Bell.

Merrell M. Tomlin Merrell M. Tomlin has joined Jan Bell in the newly-established position of senior vice president of sales - wholesale division (watches), leading the company's expanding efforts in the marketing of well-known, popular watches.

Tomlin formerly served for five years as National Sales Manger - Timepiece Division of Casio, Inc. His experience also includes both retail and wholesale sales of home-electronic and other consumer products with Capital Marketing Group, Sweetheart Cup Corp. and Helig Meyers Co. Tomlin has a B.S. degree in marketing management.

"Merrell's responsibilities include coordinating sales between Jan Bell and our joint venture with Big Ben Corporation, a leading independent distributor of timepieces, through which we are strategically sourcing the growing sales of watches in our company's fine jewelry programs," said Alan H. Lipton, co-chairman of Jan Bell.

Thomas Pecott Thomas Pecott has joined Jan Bell as director of management information systems, guiding what is considered to be the most sophisticated MIS operation in the U.S. jewelry industry.

Pecott most recently spent eight years as director - information services of Domino's Pizza, Inc., where he established and supervised that company's MIS operation. Earlier, Pecott served for seven years as manager - management consulting group of Arthur Andersen & Company. Pecott is a certified public accountant and holds a B.A. in accounting.

"Tom is managing Jan Bell's advanced, computerized MIS operation, which is expanding and currently integrating our own sophisticated POS (point-of-sale) system, including bar-code identification of our jewelry merchandise, for the most efficient monitoring of sales and inventory by both individual stockkeeping unit and store location," said Rosemary B. Trudeau, vice president - finance of Jan Bell.

Isaac Arguetty, co-chairman, added, "Jay McGuire, Merrill Tomlin and Tom Pecott joining Jan Bell's corporate team represents the selective addition of talented executives in order to properly manage our company's broadening growth in the 1990s."

Jan Bell is a leading provider of fine jewelry and popular watches to the value-conscious consumer through distribution channels that emphasize quality, credibility and consistent value.

ST. LOUIS (OCT. 2) PR NEWSWIRE - The May Department Stores Co. announced today that its Board of Directors has authorized the distribution of .13 shares of common stock of Venture Stores Inc., per share of May common stock to holders of record of May common stock at the close of business on Oct. 15, 1990. May expects to distribute approximately 16 million shares of Venture common stock in the spin-off. The shares of Venture common stock will be distributed on or about Nov. 3, 1990. After the spin-off, May will own no shares of Venture common stock. The spin-off will complete May's previously announced disposition of Venture, May's wholly owned discount retail subsidiary.

In August, May postponed the previously announced initial public offering of approximately 15 percent of the Venture common stock due to current market conditions. May said that in light of market conditions, May determined not to pursue the initial public offering.

The elimination of the initial public offering will result in Venture reducing the dividend paid to May from $305 million to $262.5 million. Venture currently intends to pay quarterly cash dividends at an annual rate of 54 cents per share of common stock and, subject to certain conditions and declaration by the Board of Directors of Venture, intends to pay its first dividend on Dec. 15, 1990, to holders of record at the close of business on Dec. 1, 1990, and quarterly thereafter.

BOSTON (OCT. 2) PR NEWSWIRE - Chancellor Corporation (NASDAQ: CHCR) announced today that, on Sept. 28, 1990, it sold to Lauritzen Corporation for $5.4 million in cash all of the stock of Diversified Financial Services, Inc. (DFS) a newly-formed Chancellor subsidiary that has acquired substantially all of the assets of Chancellor subsidiaries, Chancellor Financialease, Inc. and Valmont Financial Corporation. The completed sale is subject to expiration of the notification period required by the Hart-Scott-Rodino Act, and the final sale price is to be adjusted according to a closing review of the sale of the assets subject to the sale.

DFS's assets consist of stock of Valmont Credit Corp., Valmont Indemnity Company, Valmont Indemnity Company, Ltd., (the "Valmont Companies") and certain assets held by other Chancellor subsidiaries related to the Valmont Companies. The Valmont Companies, based in Omaha, Neb., are engaged in financing irrigation systems, mobile agricultural equipment, microcomputers and other products, and in providing property and casualty insurance for its lessees and customers.

Founded in 1977, Chancellor Corporation has, in recent years, concentrated on the leasing of transportation equipment. It is also involved in the leasing of aircraft, communications, medical, agricultural and other equipment. Chancellor Corporation common stock is listed on the National Association of Securities Dealers (NASDAQ) National Market System.

KENT, Wash. (OCT. 2) PR NEWSWIRE - Mervin Shetler has been named vice president of Operations for the Aerospace & Electronics Division of Boeing Defense & Space Group, replacing Randolph Mitchell Jr., who has retired.

Shetler oversees the division's manufacturing, materiel, quality assurance, quality improvement, facilities and environmental activities. His responsibilities include all developmental and production support of the division's electronics, missiles and space projects and programs. In addition, Shetler oversees manufacturing facilities in Oak Ridge, Tenn., and Corinth, Texas.

Shetler reports to John Sheridan, Defense & Space Group executive vice president for the Aerospace & Electronics Division. About 6,900 of the

division's 26,000 employees report to Shetler.

Shetler earned a bachelor of science degree in electrical engineering in 1959 from the Indiana Institute of Technology in Fort Wayne. Later that year, he joined Boeing as an electronics manufacturing engineer.

A variety of assignments followed on military and space programs. His Boeing career twice took him to positions outside the Seattle area: He worked on the Apollo/Saturn space program in New Orleans and served as Military Systems director of Operations at Boeing Military Airplane Co. in Wichita, Kan. In the latter, he oversaw the manufacturing of avionics systems, aircraft simulators, automated test equipment and aircraft modifications.

In 1987, Shetler became vice president of Operations for Boeing Electronics, where he directed military and commercial electronics product procurement, as well as manufacturing and test functions at facilities in Seattle, Wichita, and Corinth and Irving, Texas.

In May 1989, he was named vice president of Manufacturing. Shetler was awarded in 1978 his Professional Engineering certification in manufacturing engineering/electronics. He was born in North Dakota, grew up in Indiana and served in the U.S. Army from 1953 to 1955.

DETROIT (OCT. 2) PR NEWSWIRE - The following is a General Motors statement in response to the federal budget agreement reached last week:

We support the summit agreement, which should result in real reductions of the budget deficit. We understand Congress will have the opportunity, within the framework of the agreement, to remedy unintended problems, but we believe nothing should be done that would jeopardize passage.

We also note that the single largest revenue raiser in the package is a significant increase in the gasoline tax. Clearly this tax will result in real energy conservation as people cut back on driving and move to more fuel-efficient vehicles. We believe a broader based energy fee or tax would have been more equitable in spreading the burden and cost of conservation.

Unfortunately, a gasoline tax places a disproportionate share on the highway user, especially since a portion of it will be used for deficit reduction instead of funding for highways and bridges. Nonetheless, this gasoline tax increase is the kind of market-based approach to conservation that will be effective, as opposed to the disruptive and inefficient Corporate Average Fuel Economy (CAFE) program.

#90275p0783 10/02/1990 ~PR Newswire

NEW YORK (OCT. 2) PR NEWSWIRE - Allegheny & Western Energy Corporation (NASDAQ: ALGH) announced today that the company's net income for the year ended June 30, 1990 was $2,984,104 or $.37 per share compared to $3,323,825 or $.41 per share for the previous year. Pre-tax income for the year ended June 30, 1990 was $807,000 compared to $4,765,000 for the previous year. The company's net earnings were higher than pre-tax earnings due to a one-time tax benefit and the company's ability to utilize a large portion of its Devonian Shale credits generated from West Virginia production. The lower pre-tax

earnings for the year ended June 30, 1990 are primarily due to lower earnings at the company's utility, start-up costs for company's Texas drilling operations, lower investment income and lower other income. Revenues were higher primarily due to increased gas acquisition costs at Mountaineer. However, as a consequence of warmer weather, gas volumes and profits were lower compared to the same period last year.

On Sept. 13, 1990, the company announced that it had drilled and completed three horizontal wells in the Austin Chalk. One of the horizontal wells, the Lane No. 4 well, tested at a rate of 2,050 barrels of oil per day and 920,000 cubic feet of natural gas per day with a flowing tubing pressure of 535 pounds per square inch through a 33/64th inch choke. The Lane No. 4 well was the longest horizontal well with the highest potential test in LaSalle County, Texas.

The company anticipates stronger earnings for fiscal 1991, in part due to the recent rate case order affecting the utility, higher oil prices and the company's initial development of its acreage in the Austin Chalk with horizontal drilling. The recent rate case order for the company's utility became effective July 13, 1990, and the authorized rate of return on equity contained in this increase would allow Mountaineer under normal operating and weather conditions to earn up to a 12.12 percent net return on the utility's common equity.

ALLEGHENY & WESTERN ENERGY CORPORATION

Year ended June 30;	1990	1989
Revenues	$188,360,509	$174,296,104

SANTA CLARA, Calif. (OCT. 2) PR NEWSWIRE - FMC Corp. (NYSE: FMC) announced that its Ground Systems Division in San Jose, Calif. has been awarded three contracts valued at nearly $88 million.

The largest of the three contracts is a $75 million agreement for 335 M113 Armored Personnel Carriers, including M113A3s and M577 command post vehicles.

The contract includes vehicles destined for the U.S. Army, the National Guard and foreign customers. Production of these vehicles is scheduled to run from April 1991 to March 1992.

Two smaller contracts call for engineering development programs and "kit" production. One contract is for $10.8 million to incorporate more advanced electronic equipment in 62 M577s. The process is expected to take 33 months and the modified vehicles will be re-classified as M1068 vehicles.

Another contract is for $2.1 million to improve the mechanical performance and electrical generator system of one M1015, an intelligence and electronic warfare vehicle. The process is expected to take one year.

FMC Corp., headquartered in Chicago, is one of the world's leading producers of machinery and chemials for industry, government and agriculture. The company operates 89 manufacturing and mine facilities in 24 states and 14 foreign countries. The company divides its businesses into five major segments: Industrial Chemicals, Precious Metals, Defense Systems, Performance Chemicals, and Machinery and Equipment.

PARK RIDGE, ILL. (OCT. 2) PR NEWSWIRE - The Brand Companies, Inc. (NASDAQ: BRAN) announced today that its board of directors has authorized the repurchase by the company of up to 1,000,000 shares of its common stock in the open market or in privately negotiated transactions over the next 24-month period.

After giving effect to the exercise by Chemical Waste Management, Inc. of options to purchase 2,601,272 shares of the company's common stock announced earlier today, the company will have approximately 21,326,000 shares of common stock outstanding.

Eugene L. Barnett, chairman of the board and chief executive officer, stated that ''the decision to authorize repurchases of The Brand Companies, Inc. common stock arises from the company's belief that, at the current market prices, The Brand Companies, Inc. common stock is a sound financial investment for the company.''

Common stock repurchased under the program will be held in the company treasury and will be available for use in connection with business acquisitions by the company, in connection with the company's employee stock option programs or for other general corporate purposes.

#90275p0812 10/02/1990 ~PR Newswire
SAUSALITO, Calif. (OCT. 2) PR NEWSWIRE - Light Source Computer Images, Inc. today unveiled new technologies designed to bridge photography, video and microcomputers, and announced strategic partnerships with Apple Computer Inc. (NASDAQ: AAPL) and NEC's Professional Systems Division.

"Photographs and video can significantly improve business communication, but current technology makes it difficult for non- specialists to utilize these communications tools through microcomputers," said Michael Solomon, co-CEO and president of Light Source. "Over the next 12 months, we will introduce a series of products that will give business people, educators and individuals the ability to incorporate video and photographs into their daily work with the same ease with which they now use text."

"Visual images make the most lasting impressions, but extraordinarily high expectations for photographic quality have been set by publications such as 'Life' and 'National Geographic,'" said Rob Cook Light Source founder, co-CEO and chief technical officer. "Our technology meets these high standards while also being easy for anyone to use."

Initially, Light Source technology and software products will be licensed to and distributed through strategic partners. Apple Computer will incorporate Light Source Technology into future developments. Desktop video software produced in cooperation with NEC's Professional Systems Division will provide Macintosh software for NEC's PC-VCR. Light Source software will allow business and home users to do professional-level video editing for the first time at a price, including a Macintosh and the PC-VCR, in the $5,000 range.

"Our alliance with Light Source represents the first real-world bridge between microcomputers and professional video products," said Jeff Locke, vice president of NEC's Professional Systems Division. "For the first time, people will be able to apply the power and ease-of-use of the Macintosh to video, simplifying video editing, creation of interactive presentations, and video archiving and storage." New Light Source Technology for Video and Still Images Video

Light Source video software will ship this month with the NEC PC-VCR, the first low-cost, frame-accurate SuperVHS VCR with a direct personal computer interface (RS232 port). The PC-VCR can record timecode information onto previously recorded video tapes without erasing them. In this way, existing video can be made computer interactive, catalogued or edited.

"Our video software makes this deck the first computer-compatible VCR, and allows teachers, trainers and anyone making presentations to create interactive video from tapes they already have -- with equipment that is

affordable," said Ty Roberts, a Light Source founder.

The Light Source Multimedia Toolkit will be available from NEC for $149 when the NEC PC-VCR ships this month. The Multimedia Toolkit is a HyperCard stack which enables Macintosh users to control the PC-VCR from a Macintosh computer, and export the PC-VCR functions to HyperCard stacks.

In January 1991, a full-featured Light Source video software package will be offered with the PC-VCR for $295. It will include:

MOSCOW (OCT. 2) TASS - ON MONDAY, THE IZVESTIA NEWSPAPER RAN AN INTERVIEW WITH FORMER SOVIET OIL MINISTER NIKOLAI LEMAEV, WHO RECENTLY RESIGNED FROM HIS POST.

A SERIES OF NEW LAWS DENY THE MINISTER AND MINISTRY WORKERS CONTROL OVER SOME 700 PLANTS AND ASSOCIATIONS IN THE INDUSTRY, LEMAEV COMPLAINED.

MARKET RELATIONS ARE STILL IN THEIR BUDDING STAGE. PRICES ARE SUCH THAT PLANTS OFTEN FIND IT UNPROFITABLE TO PRODUCE PRODUCTS NEEDED BY SOCIETY. MINISTERIAL DIRECTIONS HAVE BEEN REPLACED BY ORDERS FROM LOCAL AUTHORITIES NOT TO TAKE ORDERS FROM THE CENTRE, HE SAID.

SUPPLIERS NOW ENJOY A MONOPOLY, DEMANDING THAT CUSTOMERS PAY IN SCARCE COMMODITIES INSTEAD OF WORTHLESS ROUBLES. THE INDUSTRY IS ALSO UNDER PRESSURE FROM THE GREENS, WHO DEMAND THE CLOSURE OF SOME PLANTS.

"THERE IS PRACTICALLY NO ONE LEFT TO WORK. MANY MINISTRY WORKERS HAVE LEFT FOR COOPERATIVES AND JOINT VENTURES. THOSE REMAINING SEE NO FUTURE PROSPECTS. SOCIETY IS AGAINST THEM. THEY DO NOT FEEL LIKE WORKING. WHAT SHOULD THE MINISTER DO? HOLD ON TO HIS JOB? THIS IS AGAINST MY PRINCIPLES. AND THIS IS WHAT I TOLD NIKOLAI RYZHKOV," LEMAEV SAID.

"RECENTLY THE CABINET DISCUSSED PETROL SHORTAGES IN THE COUNTRY. THERE IS NO FUEL TO COLLECT THE HARVEST. IT IS A PARADOX AS THE WORLD'S BIGGEST OIL EXTRACTOR, WE NOW HAVE TO BUY PETROL ABROAD FOR 400 U.S. DOLLARS PER TONNE. A PROPOSED WAY OUT? -- THE SAME - TO PUMP OUT MORE OIL. TO DRILL MORE WELLS.

"THIS WILL REQUIRE MORE TUBES, PUMPS AND OTHER EQUIPMENT, AND, OF COURSE, MONEY -- AN ADDITIONAL 16 BILLION ROUBLES NEXT YEAR ALONE. THEN MORE MONEY WILL BE NEEDED BECAUSE EXTRACTION COSTS WILL CONTINUE TO RISE.

"THE QUESTION IS WHAT DO WE WANT? TO PUMP MORE OIL OR TO SATISFY DOMESTIC

DEMAND FOR OIL PRODUCTS? THESE ARE TWO DIFFERENT GOALS THE FIGURES ARE SIMPLE: TEN INSTALLATIONS TO PROCESS OIL INTO PETROL COST ONE BILLION TWO HUNDRED THOUSAND ROUBLES.

"THEY COULD PRODUCE 12 MILLION TONNES OF PETROL, MAKING IT UNNECESSARY TO EXTRACT 25 MILLION TONNES OF CRUDE. IS IT NOT CLEAR WHAT DIRECTION WE SHOULD TAKE? BUT, ALAS, WE TEND TO PURSUE INEFFICIENT DEVELOPMENT MODELS.

"WE CONSULTED PLANT DIRECTORS ABOUT WHAT TO DO AND HOW TO KEEP UP THE INDUSTRY GOING. THE COLLEGIUM WILL DISCUSS THE ISSUE TODAY. OUR PROPOSALS ON THE ISSUE WERE SENT TO THE GOVERNMENT IN JULY. WE HAVE YET TO RECEIVE A DEFINITE ANSWER. OUR PROPOSAL BOILS DOWN TO DENATIONALISING ENTERPRISES, TURNING THEM INTO JOINT STOCK COMPANIES IN ORDER TO COMBINE THE INTERESTS OF WORK COLLECTIVES, NATIONAL REPUBLICS, REGIONS AND THE ENTIRE UNION.

"WE PROPOSE SETTING UP, ON A VOLUNTARY BASIS, SEVEN LARGE CORPORATIONS, TO WHOSE LEADERS ENTERPRISES WILL DELEGATE CERTAIN RIGHTS. IN SHORT, WE WOULD TRANSFORM THE INDUSTRY TO ADJUST IT TO A MARKET ECONOMY.

"WE WOULD LIKE OUR LEGACY TO BE A NEW, EFFICIENT SYSTEM, AND NOT A MESS," HE SAID.

MOSCOW (OCT. 2) TASS - SIX SOVIET JOURNALISTS CONTENDING FOR A FLIGHT IN SPACE, BEGAN THEIR TRAINING SESSIONS ON MONDAY AT THE GAGARIN CENTRE TO TRAIN COSMONAUTS.

THE JOURNALISTS ARE A. ANDRYUSHKOV AND V. BABERDIN (KRASNAYA ZVEZDA NEWSPAPER) YU. KRIKUN (UKRAINIAN TV FILM STUDIO), P. MUKHORTOV (SOVETSKAYA MOLODYOZH NEWSPAPER, RIGA), S. OMELCHENKO (DELOVOI MIR NEWSPAPER) AND V. SHAROV (LITERATURNAYA GAZETA).

TOGETHER WITH THE JOURNALISTS, SPECIALISTS FROM THE USSR HEALTH MINISTRY, MILITARY PILOTS, REPRESENTATIVES OF THE ENERGIA SCIENTIFIC AND PRODUCTION ASSOCIATION AND THE USSR MINISTRY OF CIVIL AVIATION WILL TRAIN AS COSMONAUT-RESEARCHERS.

"THE JOURNALISTS' TRAINING WILL CONTINUE UNTIL FEBRUARY 1992," PILOT-COSMONAUT OF THE USSR ALEXEI LEONOV, DEPUTY HEAD OF THE FLIGHT AND SPACE TRAINING CENTRE TOLD TASS.

"THE TRAINING PROGRAMME INCLUDES PHYSICAL TRAINING, THE THEORY OF PILOTING, THE FUNDAMENTALS OF SPACE NAVIGATION, THE STUDY OF SYSTEMS OF THE SOYUZ-TM SPACESHIP, THE ORBITAL COMPLEX MIR AND SPECIALISED MODULES.

"THE CONTENDERS FOR THE SPACE FLIGHT WILL MAKE TEN TRAINING PARACHUTE JUMPS,

LEARN TO FLY A PLANE AND UNDERGO TRAINING ON A SPECIALLY EQUIPPED IL-76, WHICH SIMULATES ZERO GRAVITY FOR 30 SECONDS DURING A SPECIAL AERODYNAMIC MANOEUVRE," LEONOV SAID.

TWO FIRST CANDIDATES FOR THE FLIGHT WILL THEN BE DETERMINED. THEY WILL CONTINUE TRAINING AMONG THE MAIN AND BACK-UP CREWS. THE JOURNALISTS' SPACE FLIGHT IS SCHEDULED FOR 1992, WHICH THE UNITED NATIONS HAS DESIGNATED AS THE INTERNATIONAL SPACE YEAR.

MOSCOW (OCT. 2) TASS - BY TASS CORRESPONDENT FROM THE MISSION CONTROL CENTRE:

THE NINTH WEEK OF THE TWO SOVIET COSMONAUTS' STAY IN ORBIT IS OVER. IN THE PAST DAYS GENNADY MANAKOV AND GENNADY STREKALOV ENGAGED IN ASTROPHYSICAL, TECHNOLOGICAL AND TECHNICAL EXPERIMENTS, ROUTINE PREVENTIVE MAINTENANCE WORK ABOARD THE ORBITAL STATION AND MODULES, AND THE TRANSFER OF CARGOES FROM THE PROGRESS M-5 AUTOMATIC SUPPLY CARGO SPACECRAFT.

UNDER THE RESEARCH PLAN, THE COSMONAUTS CONTINUE EXPERIMENTS TO GAUGE SPATIAL-AND-ENERGY CHARACTERISTICS OF COSMIC-RAY RADIATION AND TO EVALUATE THE EFFECT OF OPEN SPACE FACTORS ON THE PROPERTIES OF VARIOUS STRUCTURAL MATERIALS MOUNTED ON THE OUTER SURFACE OF THE STATION.

A REGULAR CYCLE OF THE GROWING OF SEMICONDUCTOR MONOCRYSTAL OF ZINK OXIDE HAS BEEN COMPLETED ON THE GALLAR TECHNOLOGICAL INSTALLATION.

TODAY THE CREW ARE REPLACING THE EQUIPMENT OF THE HEATING LOOP OF THE STATION'S THERMAL REGULATION SYSTEM AND ARE TESTING THE ONBOARD TELEVISION EQUIPMENT VIA A RELAY SATELLITE.

ON MONDAY THE CREW CARRIED OUT AN ADJUSTMENT OF THE FLIGHT PATH OF THE ORBITAL RESEARCH COMPLEX MIR BY MEANS OF THE SOYUZ TM-10 TRANSPORT SPACECRAFT.

THE PARAMETERS OF THE SPACECRAFT'S ORBIT FOLLOWING THE ADJUSTMENT ARE AS FOLLOWS:

- THE MAXIMUM DISTANCE FROM THE EARTH'S SURFACE -- 439 KILOMETRES,

- THE MINIMUM DISTANCE FROM THE EARTH'S SURFACE -- 379 KM,

- ORBITAL PERIOD -- 92.4 MINUTES,

- INCLINATION -- 51.6 DEGREES.

THE COSMONAUTS ARE FEELING WELL. WORK IN ORBIT IS GOING ON.

MOSCOW (OCT. 2) TASS - PRESIDENT MIKHAIL GORBACHEV HAS SENT A MESSAGE OF GREETINGS TO RICHARD VON WEIZSAECKER AND HELMUT KOHL, IT WAS ANNOUNCED HERE TODAY.

THE MESSAGE READS:

"DEAR MR. FEDERAL PRESIDENT,

"DEAR MR. FEDERAL CHANCELLOR,

"PLEASE ACCEPT MY CONGRATULATIONS TO YOU AND ALL GERMAN PEOPLE. THE UNIFICATION OF GERMANY, WHICH TAKES PLACE IN FULL ACCORD WITH NEIGHBOURS AND OTHER STATES AND NATIONS, IS A GREAT EVENT NOT ONLY FOR GERMANS.

"IT OCCURS AT THE WATERSHED OF TWO EPOCHS. IT HAS BECOME A SYMBOL AND I HOPE IT WILL BE A FACTOR IN ESTABLISHING A UNIVERSAL ORDER OF PEACE.

"UNIFICATION COULD NOT HAVE TAKEN PLACE IF THERE HAD NOT BEEN PROFOUND INTERNAL DEMOCRATIC CHANGES IN OUR COUNTRIES, IF THE RIGHT CONCLUSIONS FROM THE TRAGEDY OF THE MOST HORRIBLE WAR HAD NOT BEEN REFLECTED IN REAL LIFE.

"ON THIS REMARKABLE DAY I WANT TO PAY TRIBUTE TO ALL THOSE IN MY COUNTRY AND IN YOUR COUNTRY WHO, OVERCOMING SORROWS, REMEMBERING LOSSES AND HONOURING THE

DEAD, DID NOT YIELD TO PREJUDICE AND FEARS, BUT PERSISTENTLY WORKED FOR THE FUTURE, MAKING THIS PEACEFUL AND WORTHY SOLUTION OF THE 'GERMAN ISSUE' POSSIBLE.

"WE EXPECT MUCH OF OUR NEW RELATIONS WITH GERMANY. HISTORY, THE DEEP ROOTS OF MUTUAL INFLUENCE AND GRAVITATION, THE POSITION OF OUR COUNTRIES IN EUROPE AND THE WORLD, AND THEIR COLOSSAL AND MUTUALLY SUPPLEMENTING POTENTIAL MAKE MANY-SIDED COOPERATION BETWEEN THEM POSSIBLE AND NATURAL.

"I HOPE THE TREATY ON GOOD-NEIGHBOURLY RELATIONS, PARTNERSHIP AND COOPERATION, WHICH WILL BE CONCLUDED SOON AND WHICH SHOULD LAY THE FOUNDATION FOR OUR RELATIONS, WILL HELP ACHIEVE THIS GOAL.

"I WISH THE GREAT GERMAN NATION HAPPINESS, PROSPERITY AND ETERNAL PEACE IN GOOD-NEIGHBOURLINESS AND FRIENDSHIP BETWEEN THE EUROPEAN PEOPLES."

MOSCOW (OCT. 2) UPI - McDonald's of Moscow has nearly doubled its hamburger prices and is now charging more than half an average day's wages for a Big Mac the newspaper Izvestia reported.

The Moscow McDonald's business manager told Izvestia Monday that the price increase - from 3 rubles, 50 kopecks to 6 rubles, 95 kopecks - was necessary because of increases in the cost of meat and the flour for hamburger buns.

At the official exchange rate, the new price for a Big Mac is equivalent to about $11.95, but at the more realistic official ''tourist'' rate it is $1.15 and at black market exchange rates it would be about 25-50 cents.

But since average monthly wages in the Soviet Union are about 250 rubles, with the new prices a Muscovite could easily spend a day's pay for a hamburger, french fries and a milkshake.

Since the McDonalds on Moscow's Gorky Street opened early this year, it has served an estimated 9 million people who wait in hours-long lines in all kinds of weather for Western fast food.

#90275u0134 10/02/1990 ~United Press International

UNITED NATIONS (OCT. 2) UPI - The beginning of a possible deal to end the Persian Gulf crisis emerged in President Bush's speech to the United Nations General Assembly.

Taken together with speeches in the past week by Iraqi President Saddam Hussein and French President Francois Mitterrand, Monday's proposal involves

an old diplomatic ploy: taking an intractable dispute and raising the possibility of a solution by linking it with a larger series of issues.

The diplomatic ''pathway'' - to use the latest State Department buzz word - emerged first on Aug. 12 in a speech by Saddam in which he said he would pull his forces out of Kuwait if Israeli occupation in the West Bank and Gaza and the Syrian occupation of the Bekaa Valley of Lebanon would end.

Within hours, the proposal was rejected by the White House and the State Department as something that was designed as a diversion and trick to cover a totally different kind of situation involving brutal, naked aggression.

But the spark of that idea emerged again last week on Sept. 24 when Mitterrand talked to the General Assembly and, among other things, suggested that Saddam could emerge from this crisis as a heroic, historic figure if the settlement of the gulf crisis could be used as a key to solve larger problems in the Middle East, including the Arab- Israeli dispute.

The State Department expressed its annoyance with Mitterrand with an expression of contempt. Five days after the Mitterrand speech, a senior administration official who is a key in Middle East policy, said he had been too busy attending other meetings to even read the French president's speech.

But Saddam was not apparently so busy, because on Sunday he made another one of his televised addresses, and suggested ''a debate'' or diplomatic contact with the French about the Mitterrand plan.

The next development came when Bush signalled a shift in U.S. policy and also appeared to accept the idea of linking the Gulf crisis with Mitterrand's suggestion of linking it to the Arab-Israeli dspite.

While insisting on Iraq's unconditional withdrawal from Kuwait, Bush suggested - for the first time for an American official - that the ''peoples of the region'' take this as an opportunity ''to settle the conflict that divides the Arabs from Israel.''

At a news conference, Bush denied any intent to signal ''flexibility or shift in position.'' But the mere mention of the Arab-Israeli conflict, which he earlier labeled ''separate and apart'' from the gulf crisis, underscored the search for a face-saving formula for Iraq to relinquish Kuwait.

It also followed signs last week, some from the administration, of diminishing hopes for a diplomatic solution, which sent a shock through the world oil market and rattled financial markets around the globe.

The next step will probably be the sound of a muffled diplomatic explosion coming from Israel, which has adamantly refused to link its continued occupation of the West Bank and Gaza with anything else. The Israeli's worst

nightmare is a scenario in which the Arab world finally unites against Israel. An even scarier possibility, for the Israelis, is that the Arabs would be backed and supported by the United States, joined by its new talking partner, the Soviet Union.

Many things tend to go wrong in Middle East diplomacy, and this is especially true when involved with an unpredictable element like Saddam.

But the shift of emphasis in the U.S. policy, which follows Saddam's offer to talk to the French, offers the embryonic shadow of a hope that the gulf crisis could end - to use Winston Churchill's phrase - with talk-talk, rather than war-war.

(OCT. 2) UPI - French officials say they're happy that Iraq is promising to release nine French hostages being held in Baghdad. The announcement Monday came one day after Iraqi President Saddam Hussein expressed interest in pursuing a French peace proposal. There was NO word on when the captives would be released. .

There was more talks of peace Monday concerning the Persian Gulf crisis as President Bush sought to calm fears of war among United Nations members. Bush stressed a peaceful outcome and even spoke of ''opportunities'' that Iraq could receive if it withdraws from Kuwait. But Bush insisted that aggression will NOT be rewarded.

Senior citizen groups Monday expressed outrage at proposed increases in the amount that Medicare patients will have to pay under a budget deficit reduction agreement between President Bush and Congress. Bush said it was

impossible to please everyone. But the groups say they'll get revenge on election day.

11 former skippers of the U-S-S Blueback submarine were on hand in San Diego Monday as the last American sub running on conventional power was put into mothballs. The de-commissioning of the Blueback completes the Navy's move into the nuclear age. A number of the Blueback's former crewmen hung their heads as ''Taps'' was played alongside the vessel.

(OCT. 2) UPI - Mexican authorities say police in the northwestern part of the country shot down a plane loaded with 14-hundred pounds of cocaine with a street value of more than 50-Million dollars. Officials say the plane, flown by Colombian drug traffickers, was headed for the United States. Three men were arrested.

Actor Corey Feldman pleaded innocent Monday to a heroin possession charge resulting from his latest drug-related arrest. The 19-year-old star the movies as ''Stand By Me'' and ''The Goonies'' is free on five- thousand dollars bail. He was ordered to return to a Los Angeles court for a preliminary hearing next month.

#90275u0221 10/02/1990 ~United Press International

MARCH AIR FORCE BASE, Calif. (OCT. 2) UPI - Gen. Curtis LeMay, the blunt-spoken warhawk who helped smash Germany and Japan, then commanded America's airborne nuclear deterrent at the height of the Cold War, is dead at 83.

LeMay, a legendary soldier who ran for vice president with George Wallace in 1968, died Monday of heart failure at the 22nd Strategic Hospital near the retirement home for Air Force officers where he had spent his declining years.

Regarded as the father of the Strategic Air Command, the airborne arm of America's three-pronged nuclear deterrent, LeMay had lived for a number of years at Air Force Village West, a retirement community about 6 miles from the Southern California air base.

The cigar-chomping LeMay, a four-star general who ran SAC when its nuclear-armed bombers were aloft around the clock in the 1950s and 60s, was regarded as a super hawk and was proud of it.

After 35 years of distinguished military service that included bombing raids against Germany and Japan and Air Force command of the Berlin Airlift, LeMay signed on as the vice presidential running mate of George Wallace in their unsuccessful third party bid. Ironically, LeMay was in the position of taking

orders from a man - Wallace - who had served under him as a sergeant while LeMay commanded the 20th Air Force in World War II.

The gruff, stocky Lemay was a colonel in the 395th Bomber Division in England in the early days of the aerial war against Germany, when he acquired his reputation for cold courage and absolute dedication to military results.

LeMay decided that his B-17 Flying Fortresses could wreak more havoc on German cities if they flew straight through anti-aircraft fire rather than flying the zigzag pattern previously considered necessary to minimize losses.

Characteristically, LeMay - known to his troops as ''Old Iron Pants'' - piloted the lead bomber in the first test of his theory, which was generally adopted by Army Air Corps units in Europe.

LeMay was transferred to the Pacific Theater after the fighting ended in Europe and played a major role in the devastating B-29 raids against Japan, including the atomic bombing missions on Hiroshima and Nagasaki that ended the war.

After the war, he became U.S. Air Force commander in Europe and in that capacity was an architect of the 1948-49 Berlin Airlift.

Shortly thereafter, he became commander of SAC, which went from 600 bombers at 18 bases to 3,000 B-52s and smaller planes carrying hydrogen bombs from 50 bases worldwide. He became Air Force chief of staff in 1961, remaining in that job until he retired Feb. 1, 1965.

LeMay went to work for Networks Electronics Corp. of Chatsworth, Calif., as a highly paid consultant. He was fired as chairman of the board in 1968, and decided to run with Wallace on the American Independent Party ticket.

Uncomfortable in the role of politician, he would not or could not abandon his candid style of speaking his mind. He complained of a national ''phobia'' about nuclear bombs and said they were ''just another weapon in the arsenal.'' He was criticized for suggesting that if peace talks failed, North Vietnam be bombed ''back into the Stone Age.''

He said he could understand conditions under which the atomic bomb could be used in Vietnam.

''If you're in a poker game with a bunch of card sharps and you tell them you never bluff and you never draw to an inside straight, I guarantee you you're not going to do very well in that poker game,'' he said.

LeMay bridled at accusations he was what one political opponent called ''the big bomber general, with a thunderbolt in one hand and a nuclear warhead in the other.''

He called the accusation a scare tactic and said, ''The real war mongers are those who would needlessly prolong the Vietnam War.''

LeMay was born Nov. 15, 1906, in Columbus, Ohio. He received an engineering degree from Ohio State University and won his wings in 1932 when he signed up as a cadet in the Army Air Corps.

In later years, LeMay lived quietly in a retirement community in Newport Beach Calif., where he said he was ''as retired as I can be'' although he was still called upon for consulting jobs and traveled occasionally.

In his book, ''Mission With LeMay,'' he said he had ''blood on my hands ... not because I preferred to bathe in blood. It was because I was part of a primitive world where men still had to kill in order to avoid being killed, or in order to avoid having their loved nation stricken and emasculated.''

(OCT. 2) UPI - Iraq's promise to free nine French hostages increased hopes Saddam Hussein wants to pursue a French peace proposal, and President Bush offered the Iraqi leader political and economic incentives to withdraw his troops from Kuwait.

Bush told the U.N. General Assembly Monday that Baghdad could help bring an end to longstanding gulf disputes and even a resolution to the Arab-Israeli conflict if Saddam agrees to an unconditional withdrawal from Kuwait.

The mere mention of the Arab-Israeli conflict, which Bush earlier labeled as ''separate and apart'' from the gulf crisis, underscored the search for a face-saving diplomatic formula for Iraq to relinquish Kuwait.

Amid the peace overtures Monday, Israel announced it will distribute gas masks to its more than 4.7 million citizens but played down links to the Persian Gulf crisis. Israel has considered the move since Saddam threatened to destroy ''half of Israel'' with poison gas before his Aug. 2 invasion of Kuwait.

An aide to Israeli Prime Minister Yitzhak Shamir said Monday that the phased distribution of gas masks, scheduled to begin next week with Arab and Jewish citizens in three towns, was strictly a ''precautionary measure.''

Israel also is purchasing gas masks for the estimated 1.7 million Palestinians

in the occupied West Bank and Gaza Strip. Palestinians will have to buy the approximately $100 gas masks, while Israelis will receive them without charge because they are covered under national insurance payments.

The official Iraqi News Agency said Saddam ordered nine Frenchmen released and said they could depart Iraq with a delegation from the France-Iraq Friendship Association now in Baghdad. INA did not say when they would leave.

The Frenchmen are part of a larger group of Western nationals described by Iraq as ''guests'' and held as human shields against attack. The Iraqi government has detained Westerners near key military and other installations as a response to the U.S.-led military deployment in the gulf region.

The French government estimates some 350 French nationals are being detained against their will by Saddam, 85 of them in Kuwait. It believes 67 are being used to discourage a U.S. bombing attack.

A spokesman for President Francois Mitterrand confirmed the release would take place, but insisted there had been no negotiations between Paris and Baghdad.

''Nine persons are free, who would not be happy?'' spokesman Hubert Vedrine said. ''But that does not change anything. What is expected from Iraq is the liberation of all the hostages, French and foreigners, without exception.''

He said ''routine'' conversations between Iraqi and French diplomats involved only the issue of French hostages being held in Iraq and Kuwait.

Saddam issued a statement Sunday saying he was interested in discussing the French proposal, which calls for opening a dialogue in return for Iraq stating its ''intention'' to withdraw from Kuwait and free Western hostages.

On the ABC news program ''Nightline, correspondent Pierre Salinger said Monday night that sources close to Mitterrand indicated the proposal was spurred by his ''fundamental belief'' the gulf crisis will become a military operation.

Mitterrand believes ''it is important for a country like France to state the desire to negotiate in the Middle East and be in the position to become the mediator after that war is over,'' Salinger said, adding, ''I think that Mitterrand would like to be in that role after the military operaton.

The French proposal left open the possibility for free elections in Kuwait after the withdrawal - a marked difference from the Bush administration's insistence that Kuwaiti Emir Jaber al-Ahmad al-Sabah be returned to power and Iraq actually withdraw from Kuwait before discussions with Baghdad begin.

But Bush, in language that embraced elements of the French peace proposal, said in his speech before the United Nations Monday ''there may be opportunities'' for Saddam if he is willing to pull his troops out of Kuwait.

Among the political and economic prospects forwarded by Bush were a permanent settlement of oil-related territorial and financial claims Saddam used to justify his takeover of Kuwait and, ''for all the states and the peoples of the region to settle the conflict that divides the Arabs from Israel.''

He insisted, however, that the world remains united behind the U.S. position that ''the annexation of Kuwait will not be permitted to stand.''

Soviet Foreign Minister Eduard Shevardnadze said he would not call Bush's address to the General Assembly ''conciliatory.''

Iraq's U.N. Ambassador, Abdul Amir Al-Anbari, said, ''We disagreed on everything he (Bush) said. ... We remain hopeful that the crisis will be solved in a peaceful means.''

In other developments related to the gulf crisis:

-Egyptian President Hosni Mubarak said in an interview published by a French newspaper that if the U.N. embargo against Iraq fails, war ''will be inevitable.''

-The U.S. House went on record Monday in support of the administration's actions so far in the Persian Gulf. The House approved a resolution applauding the deployment of troops in the gulf region and urging Bush to ''continue to emphasize the use of diplomatic and non- military means'' to resolve the crisis.

-The U.S. military identified two U.S. airmen killed Sunday in the gulf region as Maj. Peter Samuel Hook, 36, of Bishop, Calif., and Capt. James Bernard Poulet, 34, whose hometown was not released. They were killed when an Air Force F-15E fighter crashed during a training mission.

#90275u0304 10/02/1990 ~United Press International

BEIRUT, Lebanon (OCT. 2) UPI - The Israeli-backed South Lebanon Army freed 40 Moslem prisoners in a move believed to be related to the plight of 13 Western hostages held in Lebanon, security sources reported.

The sources said Monday that most of the released detainees from the Khiam prison near the Christian town of Marjeyoun, 37 miles south of Beirut, were residents of the Israeli-designated ''security zone'' in south Lebanon.

The freed prisoners, mostly Shiite Moslems, were among 300 Arab detainees held on terrorist charges or involvement in hit-and-run attacks against Israeli or South Lebanon Army targets.

Gen. Antoine Lahd, the commander of the estimated 2,500-strong South Lebanon Army, which patrols the frontier zone along with Israeli military personnel, confirmed the release.

In the United States, White House press secretary Marlin Fitzwater welcomed the release as ''consistent with our position that, for humanitarian reasons, all persons being detained without legal basis in the Middle East should be released immediately.''

Fitzwater used the occasion to reiterate the call for the ''immediate and unconditional release'' of American hostages in Lebanon.

The initiative was a response to demands by Moslem and Christian clerics in south Lebanon who had requested a positive gesture on the occasion of the Prophet Mohammed's brithday, Lahd said in a broadcast interview.

''Israel shares (with) me my hopes to find a solution to the problem of all hostages and detainees held in Lebanon,'' Lahd said.

There are 13 Western hostages being held captive in Lebanon. The Christian militia commander also alluded to three Israeli prisoners held by Moslem militiamen in Lebanon and an unspecified number of local detainees held by various Lebanese militias.

The kidnappers of the foreigner captives, including six U.S. nationals and four Britons, have repeatedly mentioned the release of the Khiam prisoners as a principal condition to free their captives.

Most of the foreign hostages are believed held by Hezbollah, a Shiite fundamentalist militia founded by Iran in 1982.

#90275u0333 10/02/1990 ~United Press International

(OCT. 2) UPI - Boston clinched a share of the AL East title and left pitcher Tom Bolton in charge of guiding the Red Sox to its playoff destiny.

The Red Sox, seeking its third division title in five years, came closer to making it a reality Monday night with a 4-3 victory over the Chicago White Sox.

The win put second-place Toronto, which lost 6-3 to Baltimore, at a disadvantage. If Toronto fails to wins its final two games or if Boston wins either of its remaing pair, the Red Sox would capture the AL East.

If Toronto and Boston are tied at the end of the regular season, they will meet Thursday at Toronto for a one-game playoff. The winner would host the Oakland A's in Saturday's opener of the league championship series.

Boston's win also left Bolton, the next scheduled starter, in a situation most pitcher's would envy.

''It's my last start of the season and I want to get the big one,'' said Bolton, 10-5. ''I would like to finish it off. I feel I'm the luckiest guy in the clubhouse to get the chance to do this.''

Chicago starter Greg Hibbard said that Boston will have to work hard against his team to earn the division title. ''In the next two games, we're going to make them go out and play. It's not going to be easy for them,'' Hibbard said. ''You go out there and try to give them a run for their money - give them a good game and make them earn it.''

Boston would rather do just that than back into the divison title. In 1988, Boston learned it had won the title while waiting at a Cleveland hotel.

''We don't want to back in, like we did in '88, we want to win this one ourselves,'' Dwight Evans said.

Mike Greenwell agreed. ''We want to win by winning,'' he said.

''If we win, we have the luxury of going out and saying, 'We corraled our own destiny,''' Wade Boggs said.

Dwight Evans singled in the go-ahead run in the eighth inning and Jeff Reardon 5-3, hurled 1 1-3 innings of relief for the win.

Reardon wasn't oblivious to the noise the Fenway Park fans made when they saw the final score in Baltimore.

''I knew what it was but I looked up on the scoreboard to make sure it was over,'' Reardon said.

In other American League action, Detroit blanked New York 2-0, Baltimore downed Toronto 6-3, Minnesota dropped Seattle 7-5, Texas beat Milwaukee 4-2 and California caged Oakland 2-0.

In the National League it was: New York 4, Pittsburgh 1; Philadelphia 7, Chicago 6; Cincinnati 4, Houston 3; Montreal 15, St. Louis 9; Atlanta 5, San Francisco 3; and Los Angeles 2, San Diego 1.

-- AROUND THE AL --

Tigers 2, Yankees 0

At New York, Frank Tanana allowed three hits through 7 1-3 innings and Travis Fryman hit a two-run home run to pace Detroit. Tanana, raised his record to 9-8. Jerry Don Gleaton notched four outs to earn his 13th save. Chuck Cary, fell to 6-12.

Orioles 6, Blue Jays 3

At Baltimore, Mike Devereaux socked a two-run home run and Bob Melvin added an RBI single in the sixth, rallying the Orioles. The loss dimmed the Blue Jays hopes of defending their American League East Division crown. Devereaux's homer, his 12th of the year, came off David Wells, 11-6. Jose Mesa, 3-2, got the win. Gregg Olson recorded three outs for his 37th save.

Twins 7, Mariners 5

At Minneapolis, Scott Leius drove in two runs and scored twice to lead the Twins. Kevin Tapani, 12-8, got the win. Richard Garces got the last three outs for his second save. Russ Swan, 2-3, took the loss.

Rangers 4, Brewers 2

At Milwaukee, Bobby Witt, Mike Jeffcoat and Jeff Russell combined on a four-hitter and Julio Franco drove in two runs to pace Texas. Jeffcoat, 5-6, allowed one unearned run on a hit in two innings of relief. Russell pitched the ninth for his 10th save. Robinson, 12-5, was tagged with the loss.

Angels 2, Athletics 0

At Oakland, Calif., rookie Joel Grahe pitched a three-hitter to pace California. Grahe improved to 3-4. Brian Harvey got the final two outs for his 25th save. Dave Stewart, 22-11, pitched his league-leading 11th complete game and took the loss.

(OCT. 2) UPI - India's Supreme Court has ordered the government to halt its plan to reserve some government jobs for lower social classes. It will consider the constitutionality of the plan October 25th. The plan has brought violence and suicides in protest. 75 people have been killed since it was announced in August.

Lebanese security sources say the release of 40 Moslem prisoners may affect the fate of 13 western hostages held in Lebanon. The 40 were freed by the South Lebanon Army, backed by Israel. The kidnappers of the westerners have repeatedly demanded the release of the Moslem prisoners.

Emergency flights began in western Sudan yesterday to get food to an estimated 50-thousand refugees. They are victims of Sudan's seven-year civil war. A spokesman for a church relief organization says famine threatens all 23-Million people in Sudan. The Sudanese economy has been nearly destroyed.

A search has ended off the Oregon coast for a missing Navy helicopter. The three crewmen are presumed dead. U-S and Canadian naval ships and the Coast Guard found debris, but NO sign of the missing men. The helicopter was making an emergency approach to a guided missile frigate when it went down Sunday.

The Supreme Court has refused to hear the appeal of Joseph Giarratano, a convicted Virginia killer fighting to win a new trial. The high court gave NO reason for its decision. Amnesty International and conservative columnist James Kilpatrick are among those who have supported the death row inmate's efforts to win a new trial.

#90275u0344 10/02/1990 ~United Press International
(OCT. 2) UPI - Monday night, the sturdy right arm of Ramon Martinez made room in a post-game ice bucket for a bottle of champagne.

Martinez became the youngest Dodger in 43 years to win 20 games when Eddie Murray singled home Jose Offerman from second base with none out in the ninth to give Los Angeles a 2-1 triumph over the San Diego Padres.

''I have it, I feel so excited,'' the Dominican right-hander said after allowing only five hits in his big-league best 12th complete game of the season. ''I never felt anything like I feel today.''

After Juan Samuel tied it 1-1 with an eighth-inning homer, Chris Gwynn led off the ninth with a single off Andy Benes, 10-11, and continued to second on center fielder Joe Carter's error. Offerman ran for Gwynn, and Murray grounded a 1-1 pitch into right field for the game-winner.

''(Martinez) was giving it his best and that's what we were doing, too,'' Murray said after driving in his 94th run of the season. ''It's nice it worked out.''

Martinez, 22, became the youngest Dodger to win 20 games since 21- year-old Ralph Branca accomplished the feat in 1947. He also became the first in franchise annals to reach the plateau in his second season since Jeff Pfeffer in 1916.

''A guy like that comes around only once in 10 or 15 years,'' Carter said. ''He's going to be around a long time.

''He had our number. He had the Natonal League West's number all year long. He's lost a little pop, but for him losing a little pop is as hard as somebody else's best stuff in July.''

Martinez, who entered second in the National League with 220 strikeouts, fanned just three but improved his record against NL West teams to 13-0 this season.

A solid contender for the Cy Young Award, Martinez finished the year with a 2.92 ERA. He said he doesn't usually sip champagne, but would make an exception.

''Today, I'm gonna drink,'' he said.

The Dodgers, limited to three singles, tied it 1-1 in the eighth when Samuel, another Dominican, ripped a 2-0 pitch over the left center-field wall for his 13th homer of the season. Benes had retired 10 straight batters before the

blast.

''I know this game was on TV down there (in the Dominican),'' Samuel said. ''A lot of people were watching. I'm glad (Martinez) got it done.''

Benes, who had an upset stomach and got sick throughout the game, permitted just seven hits and no walks. He is winless in eight starts since Aug. 24.

Mike Pagliarulo had opened the fifth with only his sixth homer of the season to open the scoring.

The Dodgers snapped a four-game losing streak and moved into sole possession of second place in the West, one game ahead of San Francisco.

In other National League action, New York downed Pittsburgh 4-1, Philadelphia edged Chicago 7-6, Cincinnati shaded Houston 4-3, Montreal pounded St. Louis 15-9, and Atlanta dropped San Francisco 5-3.

In the American League it was: Detroit 2, New York 0; Boston 4, Chicago 3; Baltimore 6, Toronto 3; Minnesota 7, Seattle 5; Texas 4, Milwaukee 2; and California 2, Oakland 0.

-- AROUND THE NL --

Mets 4, Pirates 1

At Pittsburgh, David Cone scattered three hits in pitching his sixth complete game and also drove in two runs to help New York. Cone, 14-10, struck out 12 to push his league-leading total to 233 and walked four in lifting his record to 3-0 against the Pirates this season. Zane Smith, 12-9, lost for only the second time in 10 starts for the Pirates.

Phillies 7, Cubs 6

At Philadelphia, John Kruk knocked in three runs and the Philadelphia Phillies clinched at least a tie for fourth place in the NL East. Chicago's Ryne Sandberg hit his 40th home run of the season, joining Hank Aaron and Jose Canseco as the only players to have at least 40 home runs and 25 stolen bases in the same season.

Reds 4, Astros 3

At Cincinnati, Ron Oester scored the winning run on a wild throw by shortstop Rafael Ramirez with one out in the ninth inning to lift Cincinnati. Randy Myers, 4-6, pitched the ninth for the win. Brian Meyer, 0-4, took the loss. The victory ended a three-game Reds losing streak.

Expos 15, Cardinals 9

At Montreal, Tim Raines knocked in four of his career-high five runs with a grand slam to guide Montreal. Tim Burke, 3-3, picked up the victory in relief. Mike Perez, 1-1, was the loser.

Braves 5, Giants 3

At San Francisco, Francisco Cabrera belted a three-run homer and John Smoltz limited San Francisco to three hits leading Atlanta. Smoltz, 14- 11, recorded his first victory in five decisions against the Giants this season. Trevor Wilson, 8-7, lost his first start after making six relief appearances.

#90275u0421 10/02/1990 ~United Press International

SEATTLE (OCT. 2) UPI - A female reporter covering the Cincinnati Bengals-Seattle Seahawks game Monday night said she was barred from entering the Bengals locker room to interview players after the game.

Denise Tom, a sports writer with USA Today for five years who has covered the San Francisco 49ers since 1986 and reported on five Super Bowls, said Cincinnati Coach Sam Wyche refused to allow her to enter the locker room after the Bengals' 31-16 loss to the Seahawks.

Two weeks ago, a female reporter was sexually and verbally harassed by five players in the New England Patriots locker room.

It is NFL policy that women reporters be allowed into locker rooms. USA Today sports editor Gene Policinski plans to file a protest with the league, Tom said.

''They didn't give me a reason at the time, but I understand Wyche said afterwards it was his decision,'' Tom said. ''He did not want a female reporter in his locker room because it would not be fair to his players or their wives.''

Wyche, reached at his hotel room, refused to answer questions.

On Sept. 17, Boston Herald reporter Lisa Olson was in New England's locker room when several naked Patriots players approached her and made lewd suggestions. Olson says receiver Zeke Mowatt, while ''egged on'' by several other players, suggested she perform oral sex on him in the locker room.

A team official told Tom he would bring out any player she needed to talk to, she said, but because she was on deadline she only had time to talk to Bengals quarterback Boomer Esaison.

''If I had been allowed to go into the locker room, as was my right, I could have done my job,'' Tom said. ''My credentials were in plain sight.''

Tom said she encountered no resistance at the Seahawks locker room, although one player yelled '''Hey, there's a woman in here,''' she said.

''It's something that's always gone on and usually something I ignore,'' she said. ''It wasn't a lewd comment, it was just a remark.''

She said she has had no problems with the 49ers, who wear bathrobes or wrap towels around themselves.

''It's such a simple solution,'' she said.

#90275u0461 10/02/1990 ~United Press International

BEIRUT, Lebanon (OCT. 2) UPI - The Christian region controlled by maverick Gen. Michel Aoun observed a general strike Tuesday to mourn the 25 people killed while protesting a five-day government siege of their enclave, witnesses said.

Shops, schools and businesses were closed throughout the 100-square- mile territory as church bells tolled and the Lebanese Radio station, operated by Aoun followers, broadcast somber classical music, the witnesses said.

Late Monday, 25 people were killed and 82 others were wounded when gunmen opened fire on thousands of demonstrators who marched to the demarcation lines around Aoun's region in protest of a blockade imposed by the government of President Elias Hrawi.

Hrawi's troops last Friday began to block all passageways around Aoun's enclave, barring the entry of all food, gasoline and other essential materials.

The move was aimed at forcing Aoun to end his two-year mutiny and turn over control of the presidential palace.

Aoun accused Hrawi's government and the Christian Lebanese Forces militia of Samir Geagea, which backs Hrawi, of being responsible for ''such a terrible crime.''

The Lebanese Forces militia said the violence was prompted by provocative shots by Aoun's troops, while Hrawi's army, under the command of Gen. Emile Lahoud, denied any involvement in the incident.

A collective burial of the victims was planned for Wednesday, sources in east Beirut said.

Another person was killed early Tuesday by sniper fire while crossing the Dog River passegeway in Christian east Beirut.

The Lebanese Forces-run Voice of Lebanon radio station said the victim, an employee of Middle East Airlines, was shot by Aoun's troops at the crossing while heading to work in the Moslem part of the capital.

Aoun, a former army commander, has defied Hrawi and refused to relinquish powers. He has remained in control of some 15,000 troops stationed in east Beirut.

Hrawi, with 20,000 loyalist regular troops, was elected president as a result of a peace agreement that was worked out last October by the Lebanese parliament in Taif, Saudi Arabia.

The Taif accord gave Moslems a larger share of power in a bid to end 15 years of bloody Christian-Moslem violence, but Aoun has rebuffed it as failing to ensure a speedy and complete withdrawal of Syria's 35,000 troops from the country.

Aoun's troops have been engaged in a military campaign against Geagea's militiamen since last January.

#90275u0465 10/02/1990 ~United Press International

(OCT. 2) UPI - Flood watches were posted throughout the Southwest as showers continued Tuesday after days of heavy rains while another storm doused the Northwest and cool weather hit the northern half of the nation.

Tropical storm Rachel, located in the Pacific Ocean southwest of the southern tip of the Baja Peninsula, pumped moisture into New Mexico, western Texas and Arizona causing scattered showers on already saturated ground.

A flash flood watch was posted for the entire day Tuesday in several counties in southeast New Mexico but no flooding had been reported in the area that received up to 2 inches of rain over the past two days.

Light rain covered southwest Texas west of a Lubbock-Sanderson line and the showers were moving eastward.

Cold, stormy weather continued in the Cascades mountains of Washington state, where rain and snow showers combined with temperatures in the 40s to allow snow accumulations of 6 inches near the 5,000-foot level.

Along the Northwest coast, clouds, showers and isolated thunderstorms continued as a cold front moved across the region bringing winds that reached 15 mph and temperatures around 50.

Cool temperatures and clear skies covered much of the Northeast and New England while skies over Pittsburgh were cloudy and the thermometer dipped into the upper 40s.

The South was clear and dry but summer refused to loosen its grip on the

region Monday as temperatures soared to 93 degrees in McComb and Meridian, Miss., and 92 in Dothan, Ala.

#90275u0530 10/02/1990 ~United Press International

(OCT. 2) UPI - Here is a roundup of the latest major events in the Persian Gulf crisis stemming from the Aug. 2 Iraqi invasion of the oil-rich emirate of Kuwait:

UNITED NATIONS - President Bush held out the prospect of a peaceful outcome to the Persian Gulf crisis in a subtle offer of political and economic incentives for Saddam Hussein to get out of Kuwait. In a speech to the U.N. General Assembly Monday, Bush said the world is united behind the U.S. position that ''the annexation of Kuwait will not be permitted to stand.'' But in language that embraced elements of a French overture to Saddam last week, Bush said ''there may be opportunities'' for Iraq in leaving Kuwait, including a permanent resolution of their longtime disputes over territory, money and oil, as well as settlement of ''the conflict that divides the Arabs from Israel.''

CAIRO, Egypt - Japanese Premier Toshiki Kaifu traveled to Cairo Tuesday on the first leg of a seven-day Middle East tour expected to focus on Japanese aid to states suffering economic hardship because of the Persian Gulf crisis.Kaifu's tour is the first to the region in 12 years by a Japanese prime minister in office and was also expected to take him to Jordan, Saudi Arabia, Oman and Turkey.

JERUSALEM - The Israeli military said it will distribute gas masks to the nation's more than 4.7 million citizens. Iit also is buying gas masks for the estimated 1.7 million Palestinians in the occupied West Bank and Gaza Strip.

Prices for crude oil plunged by more than $2 a barrel and for gasoline by nearly 5 cents a gallon after Iraq indicated over the weekend it would like to explore a resolution of the Persian Gulf crisis. As a result, stock prices closed sharply higher Monday on the New York Stock Exchange.

WASHINGTON - The House Monday approved a resolution applauding the deployment of troops in the gulf region and urging President Bush to ''continue to emphasize the use of diplomatic and non-military means'' to resolve the crisis.

WASHINGTON - ABC News, quoting sources close to French President Francois Mitterand, said his peace plan was spurred by his ''fundamental belief'' the gulf crisis will become a military operation. Mitterand believes it is important for France to be in a position to become the mediator after the war is over, the network reported on its ''Nightline'' program.

EASTERN SAUDI ARABIA - Elements of the 101st Airborne Division honed urban warfare skills in the rubble of an abandonded oasis village, skills that could

be used to liberate Kuwait City or defend Saudi Arabian towns. With hand signals, shouts and even grunts, riflemen worked their way through rooms, diving through windows and bursting through doors. To the east, elements of the 101st's artillery units went through their own set of drills Monday, in case they were called upon to back Saudi and Gulf Cooperation Council forces deployed ahead of them.

CAIRO, Egypt - The official Iraqi News Agency reported President Saddam Hussein ordered nine Frenchmen released and said they could leave Iraq with a delegation from the France-Iraq Friendship Association now in Baghdad. INA did not say when the released Frenchmen would leave Baghdad.

WASHINGTON - The Pentagon identified two U.S. airmen killed Sunday in the gulf region as Maj. Peter Samuel Hook, 36, of Bishop, Calif., and Capt. James Bernard Poulet, 34, whose hometown was not released. They were killed when an Air Force F-15E fighter crashed during a training mission.

#90275u0605 10/02/1990 ~United Press International

(OCT. 2) UPI - Chinese officials and Western diplomats say hijackers took over a jetliner during a domestic flight over southern China today and exploded a bomb as it landed... possibly killing more than 100 people. Chinese news reports, officials and diplomats say the state-owned Boeing 737 had just landed at the main airport in Canton when it was engulfed in a fireball. It hit two other planes... one empty and one loaded with passengers.

The Senate today will take up a resolution to support the actions of President Bush in the Middle East. The House yesterday voted overwhelmingly in favor of the deployment of troops in the Persian Gulf region while urging the administration to use ''diplomatic and NON- military means'' to end the crisis. But Senator Edward Kennedy is urging his colleagues to reject the resolution... saying it could give President Bush the power to launch war.

The state of Alaska this month will start mailing checks for almost 953 dollars to every man, woman, and child who lives in the state. The annual giveaway comes from taxes and royalties from oil companies which lease state lands. A family of four will make 38-hundred dollars on the deal. Alaska also has NO state income tax... but the cost of living in the 49th state is much higher than in most areas of the country.

A female reporter covering the Cincinnati Bengals-Seattle Seahawks game last night says she was barred from the Bengals' locker room. U-S-A Today reporter Denise Tom... who has covered pro football since 1986... says Cincinnati Coach Sam Wyche refused to let her do her job... despite N-F-L policy allowing women reporters in locker rooms. Two weeks ago... a female reporter was sexually harassed in the New England Patriots' locker room.

-30- 1922
#90275u0615 10/02/1990 ~United Press International
(OCT. 2) UPI - Federal investigators reportedly are looking for links between two assassination attempts against officials of a Chicago Teamsters Union local. A newspaper report yesterday said investigators believe the botched hits are part of an organized crime struggle for control of the Teamsters local. The victims of the attacks are a father and son who were union officials.

An Israeli military court has convicted four soldiers of beating two Palestinian residents of a Gaza refugee camp... including one who later died from his injuries. Israeli Army Radio reports a battalion commander also wasconvicted in Jerusalem of giving the order to beat the Arabs in early 1988. At the time... Defense Minister Yitzhak Rabin announced a policy of beatings to disperse Palestinian demonstrators.

An air traffic controller says he saw Pan Am Flight 103 break into four or five pieces on his radar before disappearing when it was blown apart by a terrorist bomb over Lockerbie, Scotland, nearly two years ago. Controller Alan Topp testified yesterday in Dumfries before a panel reviewing security and other factors leading up to the bombing. Topp said he was very worried at the time... but couldN'T immediately confirm his worst fears.

Eight historic Philadelphia sites are closed to the public today... victims of a federal budget crunch. The buildings will remain locked until Congress decides how much money to allocate to the National Park Service. The Liberty Bell and Independence Hall remain open. But the Second Bank of the United States... which hosted 140-thousand visitors last year... is among the sites shuttered until further notice.

-30- 1820
#90275u0675 10/02/1990 ~United Press International
MINNEAPOLIS (OCT. 2) UPI - Minnesota Vikings defensive tackle Keith Millard was to have major reconstructive surgery on his right knee Tuesday and will be out for at least the remainder of the season.

''It's career-threatening,'' Millard said Monday. ''It's going to take a hell of an effort, an every-day process just to get back to where I can use it. But if there's a person who can do that, Keith Millard can do it.''

Dr. David Fischer, the Vikings' medical director, said Millard tore his medial collateral and anterior cruciate ligaments in the third quarter of the Vikings' 23-20 overtime loss to Tampa Bay Sunday. Fischer sounded cautiously optimistic about Millard's chances of making a comeback.

''It's a major injury to his knee joint,'' Fischer said. ''We don't expect it

to interfere with his playing pro football, but certainly it's an injury of that magnitude. ... I think we're aiming toward Keith's playing his position next year. ... I think Keith's goal would be to put him in a position to play, where he can put his great love of the game, his desire and his athleticism to work for him.''

Millard, 28, a key leader of the Vikings' defense, said his wife Sal came into the locker room after he was hurt and reminded him that Chicago Bears tackle Dan Hampton survived 10 knee operations and is still playing.

''But Dan Hampton never had anything like this,'' Millard said. ''I'm not making light of his injuries, but I talked to Dr. Fischer this morning. He said, 'You'll be in uniform next season, but who knows how well you'll be able to play?' But I told Sal, we're set financially, if my career is over. I won't have to go out and get a job for some time.''

Other Vikings have suffered similar injuries, including quarterback Rich Gannon, former linebacker Jesse Solomon and former defensive end Doug Martin. Gannon recovered in one offseason, Solomong did not return to 100 percent for about one year and Martin recovered but the injured probably hastened his retirement.

Millard's injury came on the Metrodome's artificial turf when he leaped over a Tampa Bay player in an attempt to get quarterback Vinny Testeverde. When he landed, his cleats caught and his knee buckled. He was not hit by another player.

''When I came down, it felt like the impact of a hit,'' Millard said. ''It hurt more than anything I've ever felt in my life.''

Teammates Chris Doleman, Henry Thomas and Al Noga helped restrain him after the injury.

''I was rolling around and they were trying to calm me down,'' Millard said. ''All I wanted to do was get at my knee. They couldn't keep me from screaming. I think they were trying to prevent me from going into shock because the pain was unbelievable.''

Millard's abscence leaves the already-struggling Vikings defense in an even bigger hole. General Manager Mike Lynn says Thomas Strauthers probably will start in Millard's place and that the club will try to sign or trade for a backup tackle. One possibility is to bring in Ken Clarke, who was among the final players cut in presason.

''I'm excited,'' said Strauthers, 29. ''It's a challenge for me. I want to show (the coaches) they made a good decision in bringing me here. I'm really trying not to put pressure on myself, saying, 'Millard's down, I've got to play up to his standards.' No. Keith is a great player. I can't go in and do

the things he did.''

The Vikings, the defending NFC Central champions, are off to a 1-3 start. But Coach Jerry Burns is not ready to concede the title.

''We're still talking about winning the division, not a wildcard spot,'' he said.

Lynn also said he is not panicking.

''This team could just as easily be 4-0,'' Lynn said. ''We've lost three games by three points (each).

''It's not like we're getting blown out 30 to nothing. I would be really concerned if we were getting blown out by two or three touchdowns. I don't believe in any blakc-cat theory or snake-bit theory.''

In other developments, the Vikings have signed three practice players, safety Pat Eilers, running back. J.J. Flannigan and offensive lineman James Harper. Safrety Ken Stills and receiver Pat Newman, coming off injured reserve, also will join the practice squad.

The team was expected to re-sign wide receiver-punt returner Leo Lewis Tuesday.

Burns also said punter Harry Newsome was better than average Sunday, meaning he will be kept around for another week.

Cornerback Reggie Rutland was feeling better after suffering a concussion Sunday and should be able to play this week. Guard Randall McDaniel won't practice for a couple of days because of a sprained right ankle.

#90275u0678 10/02/1990 ~United Press International

PORTLAND, Maine (OCT. 2) UPI - Lobster prices, kept down all summer by oversupply and weak demand, have plummeted to the lowest level that industry officials can remember in many years.

Prices for soft-shell lobsters at some Portland retail markets dropped last week to $1.99 a pound. Some restaurants have been offering lobster dinners for $5.95.

Edward Blackmore, president of the Maine Lobstermen's Association, said Monday he could not remember the last time retail prices dropped below $2 a pound.

''My memory does not go back that far,'' Blackmore said.

Industry officials cannot say if the low prices are a record because there is

no official system to track lobster prices on the retail level.

Lobster prices in New England have been below average for most of the year because of the large size of this year's catch of the softer-shell lobsters and the region's sluggish economy, which has weakened demand.

Lobster dealers said they expect prices to begin gradually climbing this week and next.

Lobstermen have reported harvesting more hard-shell lobsters, which can be sold at a higher price because they contain more meat and can be transported to markets around the world.

#90275u0686 10/02/1990 ~United Press International

(OCT. 2) UPI - The Tokyo stock market, which had been suffering from its worst battering since October 1987, rebounded Tuesday to post its largest daily advance ever as bargain hunting combined with good news concerning interest rates, hopeful signs in the Middle East and a boost from Japan's Finance Ministry.

The blue-chip Nikkei Average of 225 selective issues, which plunged 761.64 points Monday, rocketed 2,676.55 points - or 13.2 percent - to 22,898.41.

The surge was a record jump in both number and percentage, topping the previous mark of 2,037.32 points set Oct. 21, 1987, and a record 11.3 percent jump in prices in December 1949.

The broader-based Tokyo Stock Exchange Price Index, which dropped 47.52 points Monday, jumped 145.40 points to 1,668.83.

Volume was strong as an estimated 550 million shares changed hands, compared with 429 million shares Monday.

Advances overpowered declines 768 to 64, while 24 issues remained unchanged.

''The mood was incredible,'' said Chris Schreiber, a broker with New Japan Securities Co.

''Everybody had been down for months, but today you got people clapping in the dealing room. In the international department they were telling jokes.''

''Roll out the superlatives,'' added George Nimmo, a manager with SBCI Securities. ''If we hadn't been up today, we might have just as well packed up and gone home.

Analysts pointed to several positive signs that led to the turnaround:

-President Bush's speech to the United Nations and Iraq's release of French hostages coupled with declines in oil prices.

-The agreement between Bush and congressional leaders on the budget deficit increased the likelihood of lower interest rates.

-A promise from Japan's Ministry of Finance to ease margin requirements - or deposits - eased pressures on individual investors to sell.

Analysts however were divided on whether the rally would last.

''Nobody is convinced that the market has bottomed out,'' said Schreiber. ''Nobody sees interest rates coming off in a big way. You are going to have to see a slowdown.''

''I think we have seen the bottom,'' said Nimmo. ''In September the stock market lost 15 percent. That was overdone on the downside.''

Shares ended higher across the board with blue chip issues showing the largest gains, analysts noted.

Elsewhere in Asia, stocks soared in heavy trading on the Hong Kong Stock Exchange as prices rallied on encouraging news from the Persian Gulf.

The key Hang Seng Index, gained 30.44 points Monday, surged 114.22 points to 2,905.48.

Among the narrower indexes, financials climbed 46.96 points, industrials rose 97.28, utilities surged 169.18 and properties jumped 212.94 points.

Volume was active as an estimated 1.1 billion shares chanded hands, well abovethe 463 million shares changing hands Monday.

''It was a good day compared to some of the days that we've had recently, but our volume is still not of the scale of New York,'' said Howard Gorges of South China Securities.

In Singapore, stocks closed sharply higher in fairly active trading on the Singapore Stock Exchange in reaction to the surge in Japan.

The Straits Times Industrial Index, which gained 4.76 points Monday, climbed 33.77 points to 1,137.21. The broader-based All Singapore Index rose 10.64 points to 319.04.

Volume amounted to an estimated 77.3 million shares, more than double the 31.3 million shares changing hands Monday.

Blue chips and quality stocks were picked up favorably by bargain hunters.

''Investors were having a heyday in the market,'' one local analysts said.

On the trading floor, Jurong Shipyard paced the advancing issues followed by Singapore Airlines domestic shares and Singapore Airlines foreign shares.

UAC Berhad led the declining stocks followed by Khong Guan Flour and Perlis Plant.

In Bangkok, stocks finished stronger on the Thailand Stock Exchange boosted by the rise in other world stock markets and the easing of tensions in the Middle East.

The Stock Exchange of Thailand Index, which gained 12.83 points Monday, jumped 50.12 points or 7.7 percent to 704.51.

Volume amounted to around 2 billion shares, compared with 1.4 billion shares Monday.

Advances outpaced declines 152 to only 5.

The best-performing sectors were finance, banking, commerce, textiles and construction.

''The market was active with buyers because of several pieces of good news, including lower oil prices and the easing of tensions in the Middle East'' said Worakit Disayabuth, a SET.

In Australia, stocks closed sharply higher on the Sydney Sharemarket following strong performance in Tokyo.

The All Ordinaries Index, which added 3.9 points Friday, gained 20.4 points to 1,406.1. The All Industrials index rose 46.5 points to 2,086.1 and the All Resources index gained 2.1 points to 875.2.

Markets in Sydney were closed Monday for a national holiday.

An estimated 81.9 million shares changed hands, compared with 101.7 million shares last Friday.

Brokers said the long awaited rally was triggered by Wall Street's performance and was carried forward by Tokyo.

News Corp. gained 60 cents to $7.10. Brambles rose 30 cents to $12.90, Lend Lease added 30 cents to $12.80 and Adsteam jumped 17 cents to $2.57.

(OCT. 2) UPI - More than 100 people are feared dead in an aircraft disaster today in southern China caused by hijackers. Chinese officials say the hijackers commandeered a Boeing 737 jetliner and forced it to fly to Canton where they set off an explosion. As the plane crashed, it slammed into other planes in a huge fireball. All three planes were operated by Chinese airlines.

Conservative Republicans in the House are revolting against the five- year, 500-BILLION-dollar budget deal. House Republican leader Newt Gingrich says it will kill jobs and weaken the economy.

Confirmation proceedings begin in the Senate today for Supreme Court nominee David Souter. He is expected to be approved. The high court opened its fall session yesterday with only eight members.

The House has passed a bill strengthening security to fight airline terrorism. The bill is a response to the 1988 bombing of Pan Am Flight 103 over Lockerbie Scotland. Senate passage is expected.

U-S and Soviet diplomats have agreed on military cuts in Europe. The breakthrough could be announced tomorrow after talks between Secretary of State Baker and Soviet Foreign Minister Shevardnadze.

The political wall comes down tonight between East and West Germany. For the first time since World War Two, Germany will be united into one nation. The new population will be 80-Million and the capital will be Berlin.

Polish President Wojciech Jaruzelski has signed a law calling for a new presidential election, probably November 25th. Solidarity leader Lech Walesa has announced he is running.

A buffer zone has been set up in Monrovia, Liberia's capital. Troops from a west African peace force moved into the center of Monrovia yesterday to separate rebels and government soldiers.

-30- 1936
#90275u0757 10/02/1990 ~United Press International
LAHORE, PAKISTAN (OCT. 2) UPI - Thousands of supporters of Benazir Bhutto chanting ''Benazir is innocent'' briefly occupied a courtroom Tuesday where the ousted prime minister faced a hearing on charges of corruption while she was in office.

The protest in the northeastern city of Lahore forced the hearing to take place in the judge's chambers.

Bhutto supporters began surrounding the court building early Tuesday morning.

After Bhutto and her lawyers arrived at the court, the crowd of more than 7,000 broke through police barricades and stormed the building.

Police attempted to beat the people back with a baton charge, but finally withdrew and the crowd surged into the building, occupying the courtroom with chants of ''Benazir is innocent'' and ''Future Prime Minister Bhutto.''

While the protesters occupied the courtroom, officials said the hearing took place in the judge's chambers, where Bhutto - represented by her lawyers - was ordered to reappear before the court next Tuesday. Bhutto remained in an anteroom of the court during the hearing and protest.

Two hours later, the demonstrators left the building peacefully. Bhutto, 37, later left Lahore to continue her campaign, launched Monday for the Oct. 24 elections.

Officials of Bhutto's Pakiston People's Party accused the government of Punjab Province, of which Lahore is the capital, of stage managing the protest to discredit the party.

Bhutto's hearing before the special court was based on charges she used her influence to attempt to obtain prime land in Islamabad at nominal rates for a London-based hotel company.

She has denied the accusations and has challenged the validity of the special courts, which were set up by President Ghulam Ishaq Khan to try Bhutto and members of her administration on charges of corruption while in office.

The former prime minister also appeared before a special court in the southern port of Karachi on Sunday, but that hearing was adjourned until Oct. 10.

If found guilty on any of the charges, Bhutto could be barred from politics, including participating in the Oct. 24 elections, for seven years.

Bhutto's husband, businessman Asif Ali Zardari, also faces bank fraud charges and is free on bail.

Ishaq Khan dismissed Bhutto's 20-month-old administration on Aug. 6, accusing it of corruption and nepotism and failing to control law and order, and appointed opposition leader Ghulam Mustafa Jatoi as interim prime minister until elections.

Tuesday's hearing was to have taken place in the same Lahore high court building where Bhutto's father, late Prime Minister Zulfikar Ali Bhutto, was sentenced to death on March 18, 1978 for conspiring to murder a political opponent. The supreme court upheld the sentence and the elder Bhutto was hanged the following year.

''We kept quiet in 1978. We won't keep quiet now,'' Bhutto's supporters shouted in the courtroom Tuesday.

Zulfikar Ali Bhutto was overthrown by then Army Chief of Staff Mohammad Zia ul-Haq in a bloodless 1977 coup. Zia ruled for 11 years, eight of them as head of a military government, until his death in a mysterious August 1988 plane crash.

Benazir Bhutto assumed office in December of that year following the first free elections in the country since 1977.

#90275u0828 10/02/1990 ~United Press International

MOSCOW (OCT. 2) UPI - The site of the execution of Russia's last czar will be handed over to the Russian Orthodox Church for a memorial shrine, it was disclosed Tuesday.

The merchant's house in the Ural Mountains city of Sverdlovsk, where Czar Nicholas II and his family met their death on July 16, 1918, was razed in the mid-1970s by Russian Federation leader Boris Yeltsin, then head of the Sverdlovsk Communist Party, on the orders of Leonid Brezhnev.

In response to thousands of letters demanding that the site be made a shrine, the current Sverdlovsk city council has decided to hand it over to the church, the official news agency Tass reported Tuesday.

The Orthodox Church canonized the czar following his brutal death at the hands of Bolshevik revolutionaries, and many believers want to build a cathderal on the execution site.

''So far there is only a wooden cross on the spot, but according to Russian Orthodox Church tradition it should be replaced with a chapel or a church,'' Tass said.

Czarina Alexandra, her four daughters, and the heir to the throne, the hemophiliac Alexei, were shot to death with the czar in the cellar of the Ipatiev house in Ekaterinburg, as Sverdlovsk was then called.

The house has become a place of pilgrimage for monarchists, Russian Orthodox believers or those simply curious about Russia's imperial past, long a taboo subject until Mikhail Gorbachev's glasnost reforms.

Forced to abdicate in 1917 during the upheaval just before the Bolshevik Revolution, the czar, with his family, was first confined to their palace in Petrograd and then moved to Ekaterinburg.

The new Communist leadership in Moscow ordered the czar's execution to prevent a rescue by White Russian anti-Communist forces that were in the area and threatening the city.

The death of the czar is the subject of a current hit play in Moscow, and the interest in his reign has grown as the Soviet Union shucks its Communist ideology.

Monarchists want a ''cathedral of blood'' built at the site of the execution, while other groups desire that a memorial plaque be placed where the Ipatiev house stood.

While Brezhnev ruled the Soviet Union from 1964 to 1982, he tried to stem interest in its imperial past, but Gorbachev has allowed such curiosity to flourish.

Yeltsin, popular head of the giant Russian republic, said in a recent television interview that he twice ignored orders to tear down the house where the czar was killed when he ran the Sverdlovsk party organization.

Anti-Communists argue that the execution was the Bolsheviks' first major crime. They also claim that subsequent obfuscation about who ordered the killing set a pattern for seven decades of dishonesty by the Soviet leadership.

Extreme right-wing and outright anti-Semitic grups such as the Pamyat organization blame the czar's killing on Jews and say that the last Romanov was ''ritually slaughtered.''

The various charges and counter-charges have been treated in depth by the Soviet press.

#90275u0841 10/02/1990 ~United Press International

WEST BERLIN (OCT. 2) UPI - Chancellor Helmut Kohl said Tuesday Germany has

learned the lessons of World War II and pledged the unified nation being created Wednesday will be a good neighbor, dedicated to democracy and peace.

On the eve of German unification, Kohl, in a radio and television address, thanked President Bush and the leaders of France and Great Britain for helping bring about ''unity in freedom.''

He also thanked Soviet President Mikhail Gorbachev for accepting Germany's right to end the division that began with the Nazi surrender in 1945.

''We Germans have learned from history,'' said Kohl, who was to become the chancellor of the new, sovereign, unified Germany just after midnight Tuesday.

''We are a peace-loving and freedom-loving people and never again will surrender our democracy to the enemies of peace,'' he said. ''For us, love of the fatherland, love of freedom and the spirit of good neighborliness always belong together. We want to be good friends. There is only one place for us in the world: at the side of the free nations.''

Kohl told Germans in both East and West they faced a difficult task in solving the economic problems produced by 40 years of Communist rule in the German Democratic Republic. He said they would not be solved overnight, but expressed confidence the free market economy being introduced would make East Germany ''bloom.''

''In a few hours, our dreams will come true,'' he said. ''After 40 bitter years of division, Germany, our fatherland is again united. For me, this moment is the happiest of my life.''

Kohl recalled that the division of Germany had torn families apart, and that political prisoners had been jailed and people killed trying to reach the West over the wall built by the Communists to halt the mass flight of refugees.

''We owe it to our children and grandchildren that such things never happen to them,'' he said.

#90275u0846 10/02/1990 ~United Press International

BRUSSELS, Belgium (OCT. 2) UPI - The European Community warmly welcomed 16 million new citizens into the 12-nation grouping as the two German states became one.

''The unification of Germany opens the door toward the unity of all of Europe '' the EC Commission said in a statement in anticipation of the merger of East and West Germany just after midnight Tuesday.

''The integration of the former East Germany enriches the identity of the

Community as a whole,'' the commission statement said.

The president of the European Parliament, Enrique Baron of Spain, also said German unification could be a ''stimulus'' toward greater political integration of Europe.

A special EC conference begins in December, in Rome, aimed at forging further ''political union'' in the 12-nation community, perhaps including a common security policy.

France, in particular, wants to speed up EC political integration in order to firmly anchor a united Germany in Europe.

The EC has adopted temporary emergency measures, including exemptions from some environmental laws, to help ease the transition of eastern German territory into the wealthy community.

#90275u0863 10/02/1990 ~United Press International

(OCT. 2) UPI - At least 120 people are believed dead in an aviation disaster in China that was caused by hijackers. Chinese officials and Western diplomats say the hijackers commandeered a Boeing 737 jetliner during a flight over southern China. At first, the officials said there was an explosion as the plane landed at Canton airport. Later, they said there was NO blast, but there was a fight in the cockpit. .

The plane plowed into other two aircraft creating a huge fireball a Westerner says turned the jet into a ''crematorium.'' At least two Americans were on the hijacked flight. One is in good condition... the other is missing.

The inquiry in Scotland into the 1988 bombing of Pan Am Flight 103 has been adjourned because of the death of a lawyer representing relatives of American victims. Scottish lawyer Michael Hughes was killed in a collision of his car and a truck yesterday. The judicial inquiry into the terrorist bombing that killed 270 people began yesterday.

The Tokyo stock market had a record gain today because of favorable interest developments and news about the Middle East. The key Nikkei Average rose 13 percent. This was a bigger percentage increase than the previous record 41 years ago. Other Asian markets- Hong Kong, Singapore, Bangkok and Sydney- also had higher prices.

Several days of heavy rains have brought the threat of floods to the Southwest. The ground in New Mexico, western Texas and Arizona already was saturated when a tropical storm off lower California brought more rain. Cold weather in Washington state's Cascade Mountains allowed up to six inches of snow to accumulate at higher levels. Cool temperatures covered most of the

Northeast this morning, while it was warm in South.

Israel is handing out gas masks to its nearly five-Million citizens. Officials say recent threats by Iraq have NOTHING to do with the distribution, which they call a precautionary measure. Israel is also buying gas masks for the one-point-seven-Million Palestinians in occupied territories. However, the Palestinians will have to pay about 100 dollars for each mask. Israelis will get the masks free.

WASHINGTON (OCT. 2) UPI - Sales of new single-family homes tumbled 1.4 percent in August after declining 0.2 percent in July, the government said Tuesday.

The drop was generally in line with economists' expectations in the aftermath of Iraq's Aug. 2 invasion of Kuwait and the shock waves the raid sent through an already weak domestic economy.

In June, sales of new single-family homes had increased 4.3 percent, according to the report compiled by the Commerce Department and the Housing and Urban Development Department.

-30- 698

#90275u0907 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - Sales of new single-family homes tumbled 1.4 percent in August after declining 0.2 percent in July, the government said Tuesday.

The drop was generally in line with economists' expectations in the aftermath of Iraq's Aug. 2 invasion of Kuwait and the shock waves the raid sent through an already weak domestic economy.

In June, sales of new single-family homes had increased 4.3 percent, according to the report compiled by the Commerce Department and the Housing and Urban Development Department.

By region, August sales of new single-family homes were:

-Unchanged in the Northeast after falling 7.2 percent in July.

-Down 3.2 percent in the Midwest after dropping 2 percent in July.

-Off 2 percent in the South after shooting up 5 percent in July.

-Up 0.7 percent in the West after declining 3.5 percent in July.

Compared with a year ago, sales nationwide plummeted 23.5 percent in August to 550,000 at an annual rate, adjusted for seasonal factors, from 719,000, the departments said.

July's annual rate was 558,000 houses vs. 559,000 homes in June.

The median price of a new single-family home, meanwhile, moved up to $120,200 in August from $120,000 in July. In June, the median price of a new dwelling stood at $125,000.

''New home proces are at a major disadvantage in the current housing market,'' according to a market letter by Mitsubishi Bank in New York. ''New home prices are about 30 percent higher than existing prices.''

The government also reported a 7.7-month supply of unsold homes at the current sales rate at the end of August, unchanged from July and slightly better than a 7.8-month supply at the end of June.

#90275u0924 10/02/1990 ~United Press International

JERUSALEM (OCT. 2) UPI - An air raid siren, which went off because of a malfunction, frightened residents of a Jerusalem neighborhood Tuesday and sent some hurrying to bomb shelters a day after Israel announced its decision to distribute gas masks.

''For the years that these machines have existed, a malfunction never occurred '' said Jerusalem Mayor Teddy Kollek. ''Only today it had to happen.''

The siren went off at 9 a.m. in the Romema neighborhood near Jerusalem's central bus station and several government ministry offices, interferring with the transmission of the state-owned radio station. Some residents entered bomb shelters in response to the rising and falling pitch of the siren, the warning of a possible attack.

Within 30 minutes, Israel Radio and Army Radio broadcast messages to calm the residents's fears and attributed the siren to a malfunction.

Israel announced Monday the military would distribute gas masks to its more than 4.7 million citizens, but denied that recent threats against the country by Iraqi President Saddam Hussein had sparked the decision.

-30- 1271

#90275u0926 10/02/1990 ~United Press International

WEST BERLIN (OCT. 2) UPI - The chairman of the Central Council of Jews in Germany said Tuesday that a united Germany must end ''once and for all'' every form of racism, anti-Semitism and neo-Nazism.

''The increased importance (of Germany) will - particularly in view of the dreadful past - also mean a dramatically increased responsibility,'' said Heinz Galinsky, who heads the organization.

''Once and for all, it must be demonstrated that, in this country, racism, anti-Semitism, hatred of foreigners, neo-Nazism and right-wing radicalism finally belong to the past and may never surface again in the future,'' he said.

Galinsky made the comments in a statement released hours before the historic merger of East and West Germany just after midnight Tuesday. Because it joins West Germany's federal republic, East Germany was simply ceasing to exist.

Galinsky said that marks the disappearance of a state ''for which we will not shed any tears, because it already gave up long ago its right to existence through most unpleasant events,'' an apparent reference to the persecution of Jews by the Stalinist former East German leadership.

By the time the Communist authorities were ousted from power last fall, there were only an estimated 400 Jews living in East Germany.

Galinsky said unification was an occasion to rejoice, but he also complained that authorities had not clearly stated in the new introduction to the German Constitution that ''the division was clearly the result of the (Nazi) rule of terror, from which results an indebtedness toward the victims and the survivors.''

#90275u0954 10/02/1990 ~United Press International

CHICAGO (OCT. 2) UPI - The Chicago Health Department Tuesday tried to determine the cause of the apparent food poisoning of more than 150 people attending the Tru-Value Hardware chain convention.

Officials said the apparent cause was food served Sunday evening at the Hyatt Regency Hotel but said it could be several days or weeks before a determination is made.

A survey of more than a dozen hospitals showed at least 155 people were treated for symptoms of food poisoning and at least 35 were admitted.

Some of the victims began feeling ill Monday morning but many did not suffer the symptoms of food poisoning until later in the day.

A majority of the victims were taken by ambulance from the Executive House Hotel Monday night after complaining of vomiting, diarrhea, dizziness and fainting spells. Others were staying at the Hyatt and the Swiss Grand Hotel.

More than a dozen hospitals reported treating victims.

Ambulances remained outside the hotels much of the night, anticipating more victims, Fire Department spokesman Tom Sheppard said.

He said the Executive House was 90 percent empty after paramedics conducted a door-to-door search for guests who may have been affected.

In addition to those taken to hospitals by ambulances, the hospitals reported

an unspecified number of walk-in victims throughout the day Monday seeking emergency treatment.

In all, about 1,800 people attended a welcoming dinner for the franchise owners Sunday night at the Hyatt. The meal included a green salad, chicken stuffed with wild rice and a bread pudding with a cream sauce.

Many of the victims said they believe it was the bread pudding that caused their illness.

Hyatt Regency Manager Rita Goetz refused comment Monday night.

Officials said about 3,300 distributors were attending the bi-annual convention.

#90275u0982 10/02/1990 ~United Press International

BEIJING (OCT. 2) UPI - A jetliner hijacked over south China crashed on landing at Canton airport Tuesday as its crew fought with the hijackers, careening into two other planes in a fireball that killed at least 120 people, official reports and Western diplomats said.

The Chinese-operated Boeing 737 slammed into an empty jetliner and another loaded with passengers on the runway, skidded across the tarmac and burned, witnesses reported. At least two Americans, other foreigners and overseas Chinese were aboard the planes.

''There wasn't much left of the plane,'' said a Westerner who visited Bai Yun airport in Canton, southern China's biggest metropolis, after the morning crash. ''It was just a crematorium.''

The hijacked plane carried 104 passengers and crew on a domestic flight from the east coast city of Xiamen, airport officials said. The plane on the ground was a Chinese Boeing 757 bound for Shanghai, but the number of people aboard was not certain, they said.

The official Xinhua news agency, in a sketchy report, said at least 120 people were confirmed dead and 100 known to have survived, of whom 53 were injured. The majority of those killed were aboard the hijacked plane, officials said.

In Beijing, U.S. Embassy spokesman Sheridan Bell said an American aboard the hijacked flight, Erin L. Thomas, believed to be from Oklahoma, was reported in good condition at Canton's Nanfang Hospital. But another American aboard remained missing.

According to accounts from local officials reached by telephone, Xinhua and diplomats, the plane belonging to the state-run Xiamen Airline Co. departed

before 7 a.m. and was hijacked during the short flight to Canton, also known as Guangzhou.

The crew alerted Canton airport authorities. Police sealed off the airport around 8:30 a.m. and sent fire trucks and ambulances to stand by, foreign witnesses in the city said.

Diplomats first quoted airport officials as saying the hijackers set off an explosion as the plane reached the runway, but later said survivors reported no blast. Survivors said the crew was struggling with the hijackers in the cockpit before impact.

''The plane skidded across the runway out of control,'' a diplomat said.

The careening 737 slammed into an empty Boeing 707 and struck above the wing of a Boeing 757 waiting to take off for Shanghai before skidding further down the runway and burning, diplomats said.

Hong Kong television showed still photographs of the wreckage of the 737, with only the nose and tail intact and most of it charred metal. Xinhua said the 757 also ''was destroyed.''

The hijack motive was not known, but Xiamen is in coastal Fujian Province, from where planes have been hijacked before to fly to Nationalist-held Taiwan just east across the Taiwan Strait.

Xinhua said the Canton airport had returned to ''normal operations'' by mid-evening. Canton is a hub for transport in the area and to nearby Hong Kong.

Xinhua also reported Chinese Premier Li Peng flew from Beijing to the scene to inspect the accident, arriving in early afternoon. He was accompanied by senior local officials.

In Tokyo, the Japanese Foreign Ministry said at least one Japanese national, Tomohide Yamamoto, 38, was injured aboard the Shanghai-bound flight. A Swedish national was also reported to have been aboard but was apparently uninjured.

A Japanese television report said the hijacked 737 was also carrying a group of Taiwan tourists, but their fate was unknown.

Hijackings are not common in China but have been on the rise in recent years, prompting aviation and law enforcement authorities to experiment with various counter-measures including deception.

In April 1988, the pilot of a hijacked CAAC airliner pretended he was complying with a demand to fly to Taiwan but instead landed at a mainland city. After leaving the plane, the hijacker detonated a homemade bomb, killing himself and wounding two passengers.

In Tuesday's incident, Xinhua said ground officials authorized the pilot of the hijacked plane ''to land at any airport, domestic or otherwise, to ensure the safety of the airliner and passengers.''

Last December, a man claiming to be a leader of 1989's crushed democracy movement hijacked an Air China flight from Beijing, landing in Japan. Japanese authorities arrested and returned him to China, where he was sentenced to eight years in prison.

DUMFRIES, SCOTLAND (OCT. 2) UPI - A judicial inquiry into the bombing of Pan Am Flight 103 was adjourned Tuesday after a lawyer representing relatives of American victims died in a car crash.

Michael Hughes, 37, was killed as drove to his hometown of Glasgow to meet a New York lawyer after Monday's session. His car was struck by a truck that went out of control on the M74 highway just south of Glasgow, police said.

Hughes, a father of five, had worked with the U.S. group of relatives since the disaster, which cost 270 lives, 21 months ago.

The inquiry was adjourned until Thursday when witneses of the aircraft crash in Lockerbie, Scotland, will be heard.

News of his death stunned lawyers, officials and victims' relatives at the inquiry. Many of them learned of the tragedy just before the session was due to start.

The Scottish Lord Advocate, Lord Fraser of Carmyllie, said he had been devastated to learn of Hughes' death.

''He rightly enjoyed the highest of professional respect,'' he said, offering his condolences to Hughes' wife and young children.

His lifelong friend, lawyer John Baird, who also is appearing at the inquiry, said, ''I am devastated. We grew up together and went to school and university together. This a terrible loss.''

Hughes was adviser to Lee Kreindler, a New York attorney who is acting on behalf of many of the families and has filed for damages in New York courts. Hughes was on his way to meet Kreindler, who was flying in from New York, when he died.

A few miles south of Glasow a southbound truck apparently went out of control, crossed a strip separating the lanes of traffic, crashed into a van, then hit

Hughes' car, police said.

Hughes died instantly in the wreckage.

The truck driver suffered from shock and the van driver was uninjured. No one else was involved.

Police took possession of Hughes' legal documents relating to the inquiry.

Monday was the first day of the inquiry into the terrorist bombing of the Boeing 747 that was en route from Frankfurt, West Germany, to New York after stopping in London on Dec. 21, 1988.

The inquiry is not seeking to determine criminal responsibility for the deaths of the 259 people who were aboard the plane and 11 people on the ground in Lockerbie, where the plane fell. The question is being handled by police and various international agencies.

It is considering events leading up to the attack, including whether proper security precautions were carried out at London's Heathrow Airport.

The inquiry is being held at Easterbrook Hall on the grounds of Crichton Royal Hospital, Dumfries, 12 miles from where the plane fell to the ground in chunks of tangled metal.

George Kavanagh, Hughes' partner in the Glasgow law firm of Hughes and Dowdall has taken his place at the inquiry.

''I wept when I heard the news,'' he said. ''I have lost a very close and generous friend and partner. He was a leading Scots solicitor and a gentleman ... a real gentle man.''

American attorney Frank Granito Jr. said, ''The U.S. contingent has been shocked by the news. Our hearts go out to Michael's family, particularly his wife and children.

''I know Lee Kreindler relied greatly upon him and found him most helpful and generous.''

Nine American attorneys, representing the relatives of some of the 188 U.S. citizens who were killed, were among the more than 45 lawyers present for Monday's first session.

Among the other attorneys were ones representing Pan American World Airways, the British Airport Authority, the Civil Aviation authority, the Department of Transport, Hull War Risks Insurance, which insured the aircraft, and George Esson, chief constable of Dumfries and Galloway, who is in charge of the separate criminal investigation.

OLONGAPO, PHILIPPINES (OCT. 2) UPI - Philippine and U.S. officials failed Tuesday to reach agreement to end a general strike over wage disputes by Filipino workers at the largest U.S. military bases overseas.

Meanwhile, a Filipino striker was slightly injured when a U.S. vehicle in a convoy leaving Clark Air Base with prior union approval struck a wooden barrier that hit him, Clark spokesman Maj. Wayne Crist said.

Aside from the incident, which is under Philippine investigation, the strike by the 22,000-member Federation of Filipino Civilian Employees Associations at Clark, Subic Bay Naval Base and four smaller facilities has been generally peaceful, officials said.

The strike was called Sunday night to protest a 3.5 percent cap on pay raises by Congress, preventing U.S. officials here from implementing an agreement raising local salaries by 18 percent.

Federation President Roberto Flores said the U.S. panel headed by Embassy labor attache James Peter Dodd presented a memorandum of agreement during a four-hour meeting of Philippine and U.S. panels, but this was ''unacceptable'' to the strikers.

''The talks will continue tomorrow to thresh out the unacceptable wordings of the memorandum of agreement,'' Flores said at the end of the meeting at a resort in Olongapo, which adjoins Subic.

''In the meantime, the picket will continue. We want no less than a full compliance,'' Flores said.

Clark, home of the 13th Air Force, and Subic, the repair and logistics center for the 7th Fleet, are the oldest and largest U.S. facilities overseas. The bases located 50 miles north of Manila are manned by more than 15,000 troops.

Subic civilian spokesman Robert Coble said volunteers were keeping essential services going.

''Things get done, but its not like when you have the Filipinos around,'' he said.

Some of the jobs were filled by dependents of military and civilian employees.

HANOVER, NH (OCT. 2) UPI - The editors of the Dartmouth Review, a controversial off-campus weekly, say an unknown prankster was responsible for slipping a quote from Adolf Hitler into an issue released during an important Jewish holiday.

The anti-semitic quote, from Hitler's book ''Mein Kampf,'' was carried on the paper's masthead.

It prompted an outcry from students, who have scheduled an anti- Review rally for Thursday, and college officials. Dartmouth President James O. Freedman Monday attacked the paper for showing ''appalling bigotry.''

The quote, ''Therefore I believe today that I am acting in the sense of the almighty Creator: by warding off the Jews I am fighting for the Lord's work,'' appeared in the middle of a quote from Theodore Roosevelt, which the paper calls its ''credo.''

Dartmouth Review editors disavowed the Hitler quote and offered ''heartfelt apologies to Jews at Dartmouth and to the Dartmouth community at large.'' They also pledged to find out who is responsible for putting it in the paper.

''This cancer amongst our ranks will be sought out and thoroughly punished,'' they said in an open letter to the campus. ''When the person who did this is found, let us all berate him together - let us not fight against each other.''

The letter also pleaded with the Dartmouth community to prevent the story from being spread off campus.

''Please, those of you who want to again drag Dartmouth into national media think before you cast your log upon the fire,'' it said.

Dartmouth students were circulating a petition pledging to ''formally sever all association'' with the Dartmouth Review, and condemning it for contributing to an atmosphere of intolerance.

Freedman, who is Jewish, also blasted the paper.

''For 10 years the Dartmouth Review has consistently attacked blacks because they are black, women because they are women, homosexuals because they are homosexuals, and Jews because they are Jews,'' Freedman said in a statement. ''Now, in an act of moral cowardice that extends that reprehensible patter, it relies upon Hitler's Mein Hampf on the day of Yom Kippur. Appalling bigotry of this kind has no place at the college or in this country.''

The Review, which has the backing of William F. Buckley and other well-known conservatives, is published by Dartmouth students but has no direct affiliation with the college.

The newspaper and its staffers have been involved in a number of controversial incidents, including attacks in print on a black professor of music and an assault with sledge hammers on shanties built on the college green to protest apartheid.

#90275u1017 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - Capital spending by subsidiaries of U.S. companies operating overseas is expected to increase 1 percent to $56.6 billion in 1991, the Commerce Department said Tuesday.

Europe, with the collapse of communism, and Asia, with its emerging industries are considered especially attractive for business investment by American firms.

There are also vast oil and gas reserves abroad.

''If 1991 plans are realized, capital spending in both 1990 and 1991 will be significantly higher than in the 1980s,'' the government said. ''The level of capital expenditures indicates that U.S. parent companies plan to maintain their recent emphasis on overseas operations.''

Petroleum and manufacturing companies are expected to increase spending 18 percent this year vs. 1989 to $15.6 billion and $28 billion, respectively, the department's Bureau of Economic Analysis said.

Last year, overseas capital spending by petroleum companies fell 1 percent, while spending by manufacturers was up 17 percent.

In 1991, petroleum companies are expected to increase spending 2 percent over 1990 to $15.9 billion and manufacturers are expected to increase spending 1 percent to $28.2 billion.

''Petroleum firms - attracted by host government incentives and potentially exploitable oil and gas reserves than those in the United States - have been increasing their overseas spending, relative to their domestic spending, for exploration and development,'' the government said.

''Manufacturers have been attracted by several favorable conditions abroad: increasing economic integration in the European Communities, movement toward market-oriented economic systems in Eastern Europe, an improved investment climate in Latin America, and rapid economic growth in East Asia,'' the government said.

#90275u1027 10/02/1990 ~United Press International

MOSCOW (OCT. 2) UPI - A Soviet lawmaker warned Tuesday of a ''mutiny of the naked'' by consumers angry about shortages of clothes and other goods that, at present rates of growth, may not be resolved until the middle of the 21st century.

In another sign of the severity of the Soviet Union's economic crisis, government clerical workers got orders to pick potatoes in fields surrounding Moscow. The Soviet oil minister resigned in frustration over the fall of domestic crude output in recent months, the government newspaper Izvestia said.

Gennady Kiselyov, chairman of the Soviet Parliament's Consumer Goods Committee said that unsatisfied demand for such products now stands at 100 billion rubles - the equivalent of $172 billion - and is on the rise.

''In the stores, both in the capital (Moscow) and in the provinces, there are no suits, jackets, raincoats, ladies' coats, men's shirts, tights, baby carriages, socks, underwear, shoes or hats,'' he said.

At the present rate of development in the light industries that produce consumer goods, the Soviet people's demand for socks would not be fully satisfied until the year 2020, the deputy said. Shoes will not be in ample supply until 2058, he said.

Current clothing production yields one shirt or blouse a year for each of the country's 86 million youth, he said. There is one new coat per 20 pensioners and one suit for 30 retirees.

The central government is having more difficulty pursuing its past policy of filling the consumer market with imported products because its foreign currency holdings have dwindled, Kiselyov said.

''Imports have been sharply reduced,'' he said. ''Our normal reserves (of goods) have already been used up to the sum of over 5 billion rubles ($1.85 billion). To reduce them further, in fact, means to envision a mutiny of the naked.''

Kiselyov's report at a legislative hearing, published in the Communist Party newspaper Pravda, indicated that the Soviet Union's troubled movement from centralized planning to a free-market economy is creating new problems for its already beleaguered consumers.

Workers are leaving light industries for higher-paying jobs with semi-private service cooperatives, Kiselyov said. At the same time, he said, local regions and enterprises exercising their new powers are exporting raw materials for scarce hard currency.

The Central Asian republic of Uzbekistan ''is not completely fulfilling its (quota of) cotton supplies to the state ... not because it has run out, but

because it wants to sell it abroad for hard currency or at greater profit within the Soviet Union,'' Kiselyov said.

Soviet Premier Nikolai Ryzhkov, in a nationally televised speech Saturday, warned against economic warfare and said that different regions of the vast country are withholding products from one another in acts of blackmail to get desired goods in return.

Nikolai Lemaev cited similar concerns Monday in disclosing he had resigned his post as oil minister. He said that local authorities now tell oil workers not to obey orders from Moscow and environmental activists demand the closure of refineries.

''There is practically no one left to work,'' Lemaev said. ''Many ministry workers have left for cooperatives or joint ventures (with foreign firms). Those remaining see no future prospects. Society is against them. They do not feel like working. What should the minister do? Hold onto his job?''

Soviet government officials have also their cited old, dilapidated equipment and the lack of money to replace it as another cause of problems in the world's No. 1 oil producer.

With the severe Russian winter approaching, central and local government officials have marshaled their forces to bring in the potato harvest from the Moscow region.

An employee at a Soviet ministry in the capital told United Press International everyone in her office had been directed to come to work at 8 a.m. Wednesday, when a bus was to take them to potato fields outside Moscow.

The Moscow city council asked all area residents to pick potatoes this weekend and said local officials would join the effort. The Moscow Communist Party also urged its members to help in the fall harvest.

Fyodor Synko, deputy premier of Byelorussia, which supplies the Moscow region with about half of its potatoes, said Monday huge amounts of the starchy staple were rotting in fields turned into swamps by recent heavy rainfall. He said that 125,000 schoolchildren were helping to collect the harvest.

An additional 10 percent of the area formerly used for potato growing in his republic, Synko said, cannot be cultivated because the land is contaminated by radiation from the April 1986 explosion at the Chernobyl nuclear power plant just across Byelorussia's border in the neighboring Ukraine.

WASHINGTON (OCT. 2) UPI - Sales of new single-family homes tumbled 1.4

percent in August after declining 0.2 percent in July, the government said Tuesday.

The drop was generally in line with economists' expectations in the aftermath of Iraq's Aug. 2 invasion of oil-rich Kuwait and the shock waves the raid sent through an already weak domestic economy.

''The whole housing sector is sort of in the doldrums, not in the tank, but in the doldrums,'' said Richard Peach, an economist at the Mortgage Bankers Association. ''This is another bit of discouraging news.''

But ''the decline was not that severe given the events in August'' - Iraq, the oil shock and generally higher mortgage rates, Peach said.

In June, sales of new single-family homes had increased 4.3 percent, according to the report compiled by the Commerce Department and the Housing and Urban Development Department.

By region, August sales of new single-family homes were:

-Unchanged in the Northeast after falling 7.2 percent in July.

-Down 3.2 percent in the Midwest after dropping 2 percent in July.

-Off 2 percent in the South after shooting up 5 percent in July.

-Up 0.7 percent in the West after declining 3.5 percent in July.

Compared with a year ago, sales nationwide plummeted 23.5 percent in August to 550,000 at an annual rate, adjusted for seasonal factors, from 719,000, the departments said.

July's annual rate was 558,000 houses vs. 559,000 homes in June.

The median price of a new single-family home, meanwhile, moved up to $120,200 in August from $120,000 in July. In June, the median price of a new dwelling stood at $125,000.

''New home prices are at a major disadvantage in the current housing market,'' according to a market letter by Mitsubishi Bank in New York. ''New home prices are about 30 percent higher than existing prices.''

The government also reported a hefty 7.7-month supply of unsold homes at the current sales rate at the end of August, unchanged from July and slightly better than a 7.8-month supply at the end of June.

#90275u1041 10/02/1990 ~United Press International

BERLIN (OCT. 2) UPI - A West German Lufthansa airplane with about 100 West German members of Parliament landed in Berlin's Tegel airport Tuesday for the first time since the end of World War II, when air traffic rights were reserved for the victorious allied powers.

In a special flight from the Cologne-Bonn airport, the Boeing 737-300 transported the West German politicians Tuesday morning to Berlin to participate in German unification festivities.

Two other special flights - from Hamburg and the Cologne-Bonn airport - also were scheduled to leave Tuesday for Tegel in the western part of the city.

''Today is a great day,'' said Lufthansa chairman Heinz Ruhnau, as he greeted the airplane in Berlin. ''Berlin has a big future as an air traffic city.''

West German airlines had not been allowed to fly to Berlin since 1945 because the four World War II victorious allied powers - Britain, France, the Soviet Union and the United States - had reserved all rights for air traffic to Berlin for their own airlines.

With the reunification of East and West Germany, the four allied powers relinguished their occupation rights in Berlin, allowing Lufthansa to resume flights to the city in which it was born in 1926.

Daily flights to Berlin's Tegel and Schoenfeld airport outside the eastern part of the city will start Oct. 28. In the year 2000, about 20 million passengers are expected to take off from Berlin, the largest city between Paris and Moscow.

(OCT. 2) UPI - The death toll is now put at 120 in the hijacking of a domestic airline flight in China. Survivors are quoted as saying there was a fight in the cockpit as the Boeing 737 was landing at the Canton airport. The aircraft bounced off two other jetliners and exploded in a ball of flame. One American... a woman identified only as Erin Thomas, possibly from Oklahoma... survived. She is in a Canton hospital. A second unidentifed American woman is missing.

It may be several days or possible weeks before the exact cause of a suspected mass food poisoning is known in Chicago. As many as 155 people attending a hardware company convention were treated at various Chicago hospitals and at

least 35 are still hospitalized. They were overcome at various times yesterday at different hotels in downtown Chicago. All of them had attended a so-called ''open dinner'' Sunday night.

Senate Republican embraced the bipartisan budget deficit-cutting package, but conservative G-O-P House members rebelled, charging that the plan will cost the nation jobs and weaken the economy. The package cuts the deficit by 500-BILLION dollars during the next five years through a combination of tax hikes and spending cuts. House G-O-P leader Newt Gingrich of Georgia said- quoting now- ''we need to do better than this.''

-30- 1477

#90275u1080 10/02/1990 ~United Press International

CHICAGO (OCT. 2) UPI - Weather conditions provided underlying support for the grain market Tuesday, although the early trading was relatively quiet.

Grain and soybean futures were mostly higher at midmorning on the Chicago Board of Trade.

Forecasters called for rain over wide areas of the Midwest for a couple of days which could interrupt the corn and soybean harvest. Country movement is relatively light, even though harvest activity is picking up.

Professionals and commission houses were featured buyers across the floor. Some of the demand was linked to ideas that Monday's losses were overdone.

The weekly crop reports indicated a slight improvement in the condition of the corn and soybean crops.

Wheat rallied on fairly good buying interest in the wake of Monday's contract lows.

Interior and Gulf basis levels were mixed.

The midmorning prices:

Corn Dec 2.24 1/2 up 1 1/2; Mar 2.34 up 1 1/4; May 2.39 3/4 up 1 1/2.

Soybeans Nov 6.05 1/4 up 3/4; Jan 6.20 1/4 up 3/4; Mar 6.33 1/2 up 1; May 6.43 1/2 up 1 3/4.

Wheat Dec 2.69 up 1 1/4; Mar 2.83 up 1 3/4; May 2.90 3/4 up 1 1/4.

Oats Dec 1.20 3/4 up 1 1/2; Mar 1.31 up 1 1/2; May 1.37 1/2 up 1.

-30- 1348

#90275u1082 10/02/1990 ~United Press International
(OCT. 2) UPI - Japanese Prime Minister Toshiki Kaifu arrived in Cairo today to open a seven-day trip through five of the front-line states in the Persian Gulf crisis. Kaifu will visit Egypt, Jordan, Saudi Arabia, Oman and Turkey. He is expected to focus on Japanese aid to the states that are bearing the economic brunt of the sanctions against Iraq. Japan already has pledged a two-BILLION-dollar aid package to the nations.

If you love lobster you may want to head to Maine, if you are NOT there already. Over-supply and weak demand have combined to drive lobster prices in Maine to their lowest levels in years. Some retail markets in Portland, Maine, are quoting prices of one dollar 99 cents a pound for soft-shell lobster. And some restaurants are offering lobster dinners for under six dollars.

NEW YORK (OCT. 2) UPI - Latest metal market prices as quoted Tuesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 81.50 c-lb.

Antimony, domestic, refined in alloy, $1.40-2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 131.63-135.00 c-lb.

Lead, common, U.S. primary producers 45.00-58.00 c-lb.; U.S. non- primary (secondary) producers 54.00-58.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $260.00-$270.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $102.00-$107.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $457.50-$459.00; dealer- approx., $459.00-$460.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $113.00-$118.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 280.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 82.00-88.00 c-lb.

#90275u1143 10/02/1990 ~United Press International
TOKYO (OCT. 2) UPI - New IBP Inc. meatpacking plants in Nebraska and Iowa will help the U.S. meat industry meet the growing demand for high- quality beef and pork in Japan, company Chairman Robert Peterson said Tuesday.

Peterson told reporters a Lexington, Neb., plant would give IBP the capability to produce beef products specifically for the Japanese.

The Lexington plant, scheduled to open later this fall, would supplement exports by IBP's other beef facilities, including part of its headquarters Dakota City, Neb., beef-packing complex that produces a variety of special cuts in accordance with Japanese specifications.

IBP, the largest U.S. exporter of red meat and meat by-products, opened a new pork-packing complex in Waterloo, Iowa, last May.

The Waterloo plant would help IBP meet Japanese demand for high quality, boneless pork loins, Peterson said.

Pork consumption has doubled in Japan since 1965. In the same period, beef demand has grown 350 percent, IBP said.

Peterson said U.S. suppliers would have complete access to the Japanese market for the first time in April 1991, when Japanese import quotas are abolished.

''IBP will be in position to make the most of this opportunity because of the quality product we market and the progressive service we provide our international customer base,'' he said. ''Capital investments will continue to be made in modern refrigeration, packaging, and other technology to ensure we continue to meet our customer needs.''

#90275u1144 10/02/1990 ~United Press International

STRASBOURG, FRANCE (OCT. 2) UPI - Hungarian Prime Minister Jozsef Antall hinted Tuesday that he would like to see his country join NATO and threatened to withdraw Hungary from the Warsaw Pact if the organization is not abolished by the end of next year.

Antall made his comments during a news conference following a unanimous vote by the Council of Europe's Parliamentary Assembly urging that Hungary become the first former Eastern European country to be admitted to its ranks.

The Council of Europe, which regroups the democratic governments of the continent, drew up the European Declaration of Human Rights as well as declarations on the rights of migrant workers and on the repression of terrorism. It carries out a wide array of cooperation programs among its members in all areas except defense.

''If the Warsaw Pact is not liquidated between now and the end of next year, we will leave it,'' Antall said.

Asked if we would like to see Hungary become a member of the North Atlantic Treaty Organization, the prime minister replied:

''I am a convinced partisan of the Atlantic idea. During two world wars it as proven that the fate of Europe is linked to that of the United States.''

But he added he did not think joining NATO would be possible for at least two to three years and admitted with a smile that NATO may not be eager to invite Hungary to its ranks.

Earlier, in a speech to the Council of Europe's assembly, Antall announced that his country would sign the European Declaration of Human Rights.

''Today Hungary has a president of the republic, a government, and local authorities that have been freely and democratically elected,'' he said.

''It also has a multi-party parliament that works and that in the past few months has given the country a new constitution.''

The assembly vote urged the European foreign ministers that make up the 23-member Council to admit Hungary ''without further delay.'' The foreign ministers are expected to approve Hungary's application when they meet in Rome Nov. 5.

During the assembly's debate Tuesday, the body's Judiciary Committee questioned whether Hungary's fast-growing unemployment rate could not lead to the return of an authoritarian form of government.

But other speakers, recalling the anti-Communist revolution of 1956, argued that the European community should have faith in the Hungarian people.

Unemployment in Hungary is expected swell to between 80,000 and 100,000 by the end of the year as a result of structural adjustments in the economy.

In his speech before the assembly Antall said his country intends to sign the European Declaration of Human Rights, predicting it would be ratified by the Hungarian parliament within one year.

He also said his country ''is firmly determined to contribute in constructive and exemplary manner to the resolution of the problems of minority populations both within and outside its frontiers.''

Hungary, with the largest Jewish population in Eastern Europe, has been the scene of anti-Semitism sentiment that is sweeping the former Moscow satellites.

Antall said his country intended to contribute to the construction of a united Europe and said it hoped to become an associate member of the 12-nation European Community.

#90275u1160 10/02/1990 ~United Press International

NEW YORK (OCT. 2) UPI - Arnold Schoenberg's ''Moses und Aron,'' the sacred monster of modern opera, gets an outstandingly effective first New York staging at the New York City Opera, a company that is blossoming under the direction of Christopher Keene.

Keene conducts Schoenberg's difficult 12-tone score, once the bete noire of opera orchestras, so cogently that its brilliant instrumentation and many passages of transparent beauty are fully realized for audiences traditionally reluctant to sit through an evening of Schoenberg's music. The cast is equally compelling.

This is certainly an opera worth experiencing before its last performance at New York State Theater Oct. 12. It is a recreation of the 1978 Cologne Opera staging, the first to capture the theatricality of this Biblical work completed by Schoenberg, an Austrian musical maverick, in 1932 but not sung in public until 1954 and not staged until 1957.

The Cologne team of director Hans Neugebauer, set and costume designer Achim Freyer and lighting designer Hans Toelstede have created a uniquely imaginative work in the confines of what appears to be a huge barn with a rear door that profers a glimpse of the Promised Land.

The entire production - sets, modern dress costumes, and makeup - is the color of desert sand, with one exception. It is the red of blood that spurts from the necks of four nude virgins sacrificed during an occasionally frenzied religious orgy inspired by Aron's unveiling of the Golden Calf for the Children of Israel.

The Israelites make up a chorus that carries much of the opera's musical message. They are weary of waiting for the visionary Moses to clarify the superior qualities of his unseeable, unknowable, intangible Jehovah over their old pantheon of gods worshiped as idols. The Golden Calf represents compromise between the ideal and the practical.

The theological debate between Moses and his brother Aron, who acts as salesman for the the new deity because of Moses' inability to express himself in public, is the crux of the opera. Thanks to surtitles translating the German text, the audience is able to follow its intellectual argument with understanding, without which ''Moses und Aron'' would be a trying experience indeed.

Moses, given a monumental performance by baritone Richard Cross, declaims his lines lumberingly in what Schoenberg called ''sprechstimme'' or speak-sing. Aron is mellifluously sung by Thomas Young, a tenor of impressive talent who

is given the more theatrical role as a sort of theological con man.

The City Opera chorus, beautifully prepared by chorus master Joseph Colaneri, deserves the highest praise for coping masterfully with some of the most difficult music ever written for the operatic stage.

Some choristers sing onstage and others from the orchestra pit covered by scrim to keep the audience's eyes from straying from the stage's sun-burnished rectangle where a moral dilemma as ancient as man is being enacted.

This is a two-hour, two-act opera. Schoenberg intended a third act for which he wrote the text but not the music.

As the opera stands, it ends with Moses destroying the tablets of God's law, lamenting the impossibility of his mission, instead of the more optimistic third act ending in which Moses declares that the Israelites will complete their mission - ''Unity with God.''

Despite the downbeat ending of this unfinished opera, ''Moses und Aron'' is one of the musical treasures of the 20th century which has more of a future than it has had a past.

#90275u1167 10/02/1990 ~United Press International

PITTSBURGH (OCT. 2) UPI - An association of Polish electric utilities has selected a consortium led by Westinghouse Electric Corp. to conduct a $3 million study to evaluate the potential for modernizing Poland's fossil-fueled power plants, Westinghouse said Tuesday.

Westinghouse, through its Power Generation Business Unit in Orlando, Fla., will manage the study of several power plants to determine how to improve their efficiency, output and environmental performance, the company said.

The study will take about six months to complete. Recommended changes could take 10 years or more to implement and be a source of significant future business to the consortium, spokesmen said.

The consortium is composed of Westinghouse and three prominent Polish companies - Mera, an instrumentation and control supplier; Rafako, a leading boiler manufacturer; and Elektro-Mantaz Export, a noted electrical manufacturer and erector of power generating equipment.

The Trade and Development Program, a U.S. government agency, is supporting the study with a $2 million grant to Poland.

#90275u1198 10/02/1990 ~United Press International
BERLIN (OCT. 2) UPI - Thousands of Berliners, visitors, artists, street vendors and police thronged the Brandenburg Gate for Tuesday's unification celebrations.

Bright sunshine greeted the crowds as they ambled under the arches of the famous gate a few hours before the celebrations were scheduled to kick off.

At the stroke of midnight, the black, red and gold flag under which Germans will reunite was to be hoisted in front of West Berlin's Reichstag to mark the end of more than four decades of division.

In sight of the Reichstag, the former German Parliament building, an organ grinder stood on the western side of the Brandenburg Gate playing a tune he said he renamed ''We celebrate German unity.''

''I can remember how the song went. We usually sang, 'The small comrades starve while the big ones celebrate,''' he said, grining and pointing to where the Berlin Wall used to prevent him from crossing to East Berlin.

Many in Europe have feared the unification of Germany, remembering the aggressor nation that fought two world wars this century. Many in Germany, even if they embrace unification, express the same sort of fear.

''I feel particularly good. ... but I hope that Germany will not become a mighty nation again,'' said West Berlin artist Eberhard Franke, 59.

Tom Hoover, 22 of Los Gatos, Calif., does not believe it will.

''Before I got here, I had mixed emotions about the whole thing. Now I'm very happy about it. It's a very good thing to see all these happy people,'' said Hoover, who is vacationing through Europe after completing his studies in political science.

''It will probably be the most historic thing I'll ever witness,'' he said.

Several visitors sported East German or Soviet military caps, sold by curbside vendors whose displays also include the East German flag, which was to be lowered for the last time Tuesday.

Vendors also reported a booming trade in what were claimed to be fragments of the wall, some of which appeared to be freshly painted.

On the eastern side of the gate - long a symbol of the city's division - a hot air balloon lay ready for takeoff later in the evening, its basket bedecked with the European and German flags as well as those of Britain, France, the Soviet Union and the United States.

Those are the four major wartime Allies who have officially relinquished their occupational rights, returning full sovereignty to the united Germany.

A crane held aloft a Trabant, a small two-stroke East German car that for many has come to symbolize the state that will now disappear.

A few yards away, hundreds of food and drink kiosks, open-air music and theater stands and powerful spotlights were set for the ''festival of German unity.''

Thousands of security forces, many in riot gear, positioned themselves along East Berlin's famed Unter den Linden avenue, around the Reichstag and at other key spots around the city.

Officials feared celebrations could be marred by clashes between West Berlin's notorious leftists, known as ''chaotics,'' and neo-Nazi ''skinheads.''

In both East and West Berlin, posters plastered on walls called for anti-unification protests under the motto ''Germany, shut up.''

#90275u1212 10/02/1990 ~United Press International

ILLEREICHEN, GERMANY (OCT. 2) UPI - The vast majority of Germans are happy about the country's unification and believe it will promote European unity, a poll released Tuesday said.

The Wickert Institute, a West German public opinion institute, said it questioned 7,044 adults in 422 cities and towns in East and West Germany Sept. 7-27 in what it called the first such extensive all-German poll since the end of World War II.

The results contradicted those of another recent poll that indicated Germans were growing cool toward unification. The Wickert Institute said its findings were that 87.7 percent of Germans in East and West were happy about

unification, which was to occur just after midnight Tuesday.

Another large majority, 92.3 percent, said unification would promote the growing together of European nations, and 88.3 percent said it would help reduce tension in Europe and the world.

Germans also were optimistic about the future, with 79.3 percent saying unification in the long run would bring more advantages to them personally than disadvantages. Seventy-eight percent thought that, within five years, there will be little difference economically between East and West Germany. Ninety percent believed the mark, Germany's currency, will remain strong.

On relations with the United States, 85.7 percent were convinced that friendship with the United States ''is of great importance'' for Germany.

#90275u1224 10/02/1990 ~United Press International

SIDON, LEBANON (OCT. 2) UPI - Guerrillas loyal to PLO chief Yasser Arafat discovered a booby-trapped car that was set to go off in a crowded vegetable market Tuesday, security sources said.

The sources said members of the Palestine Liberation Organization's mainstream Fatah group questioned four occupants of a German-made BMW car as they parked the vehicle at the entrance of the crowded place in the refugee camp of Ein El Helweh on the outskirts of Sidon, 24 miles south of Beirut.

During a heated conversation, one of the gunmen in the car opened fire, prompting Arafat's men to fire back instantly killing him and wounding his three other companions, the sources said.

Fatah guerrillas, after discovering device-equipped bombs set to go off in the car, pulled the vehicle to an open area, put the body of the gunman inside it and blew it up, the sources said.

The sources said the four gunmen were members of the renegade Palestinian group Al Fatah-Revolutionary Council of Abu Nidal.

Abu Nidal broke away from Arafat's Fatah 17 years as a result of a power struggle.

Arafat's followers have recently dealt Abu Nidal's men a harsh blow in several rounds of violence in Lebanon.

Papal Nuncio Pablo Puente, meanwhile, said he would exert fresh peace-seeking efforts with rival Christian leaders, pro-Syrian President Elias Hrawi and rebel Gen. Michel Aoun in a bid to spare Lebanon more bloodshed.

''I ask for 48 hours to meet Hrawi and Aoun to reach a settlement that may not be ideal, but could stop this cycle of painful and insane death,'' Puente said at a news conference held at the Papal Embassy in Harissa, northeast of Beirut.

Puente expressed deep sorrow over the death of 25 people who were slain in East Beirut Monday while protesting a five-day government siege on Aoun's 100-square-mile turf.

-30- 2047

#90275u1227 10/02/1990 ~United Press International

BERLIN (OCT. 2) UPI - A lone bugler sounded the end of 45 years of Allied occupation of West Berlin Tuesday, Germany's final day as a divided nation.

The West German airline Lufthansa flew to Berlin for the first time since World War II, ferrying in parliamentary deputies for the unification ceremonies that were to culminate in the formal reunion of East and West Germany just after midnight.

West German Chancellor Helmut Kohl - as of Wednesday, the chancellor of all of Germany - flew in from Hamburg after a triumphant election as head of the merged Christian Democratic parties of the two nations.

The moment of unification was to be heralded by the midnight ringing of the Freedom Bell - cast in the image of Philadelphia's Liberty Bell - in what has been West Berlin since the end of World War II.

That was to be followed by fireworks, public festivals and private parties throughout the new single nation and a national holiday on Wednesday.

Thousands of Berliners, visitors, artists, street vendors and police thronged the Brandenburg Gate, long the symbol of a divided city, under bright sunshine Tuesday in readiness for the celebrations. Vendors reported a booming trade in what were claimed to be fragments of the dismantled Berlin Wall, though some appeared to be freshly painted.

In sight of the Reichstag, the former German Parliament building, an organ grinder stood on the western side of the Brandenburg gate playing a traditional tune he said he renamed ''We celebrate German unity.''

''I feel particularly good,'' said Eberhard Franke, 59, a West Berlin native who added he will never forget that for half his life he could not visit friends in East Berlin.

But in a comment that reflected a nagging worry in some minds in Germany and the rest of Europe as unification approached, he added, ''I hope that Germany will not become a mighty nation again.''

Guenther Grass, a leading West German author, was one of the few voices dissenting from the widespead optimism.

''This unification is ugly. It divides,'' Grass said in an address at the Reichstag, which was to be the focus of ceremonies marking the end of more than four decades of German division.

Grass warned that the economically powerful unified nation could pose a serious threat to its neighbors and that East Germans would become ''perpetual underdogs and second-class citizens'' in a united Germany.

''Should the world fear Germany again? No longer in military terms, but certainly in economic terms,'' he said.

The unification was formally an incorporation of the East German state into the existing West German federal republic, putting West German law in force in what had been East German territory. The West German Parliament, expanded with East German members, will govern until all-German elections in December.

The separate Germanys were created in the aftermath of Nazi Germany's surrender in World War II. The capitalist West Germany and West Berlin, an enclave in East Germany's heart, were crafted from the zones of occupation controlled by the United States, Britain and France. The communist East, including East Berlin, were formed from turf controlled by the other major victor, the Soviet Union.

As anti-Communist fervor swept Eastern Europe last year, a headlong rush to unification began with the fall of the Communist government and the breaching of the Berlin Wall. It accelerated with increasingly evident collapse of the East German economy.

On July 1, the economies of the two states were united as the West German deutsche mark replaced the ost mark as the legal currency in the East.

The merger is already causing wrenching economic, political and social changes in both halves of the new nation. East German factories are closing and unemployment is skyrocketing as government subsidies end and industry is forced to make it on its own in a free market.

The post-war American, British and French occupation of West Berlin, being terminated as part of the agreement that led to unification, ended Tuesday when the flags of the three nations were lowered and a bugle sounded at a final parade of the Allied Kommandatura.

''We want you to know that history will praise your achievements. You will not be forgotten,'' the U.S. commander in Berlin, Maj. Gen. Raymond Haddock, told the assembled troops.

''The Allies leave not as occupiers, but as partners,'' West Berlin mayor Walter Momper said in a speech.

Although the formal occupation is over, Allied troops will remain in Berlin during a transition period until Soviet troops leave what was formerly East German soil.

Authorities mobilized 15,000 police and border troops in Berlin Tuesday, fearing clashes during the unification celebration between notorious leftist and neo-Nazi groups.

The first trouble erupted Monday night in simultaneous firebomb attacks on the huge KaDeWe department store in West Berlin and the conterpart Centrum store in East Berlin.

Police said both stores were extensively damaged, but nobody injured.

#90275u1232 10/02/1990 ~United Press International

(OCT. 2) UPI - One American woman is known to have survived a air hijacking that turned into a major tragedy in China earlier today. Witnesses said the Boeing 737 was turned into a ''crematorium'' after it crashed and burned while landing at the Canton airport, apparently after a fight between the crew and the hijackers.

Warning shots were fired in the Middle East today by a French frigate looking for violators of the U-N trade embargo against Iraq. Sources say the French ship fired warning shots across the bow of the North Korean merchant ship that refused to stop for inspection. The French ship first issued a verbal warning.
.

The action took place off Djibouti on Africa's east coast, in the strait connecting the Red Sea and the Gulf of Aden. After the warning shots, the North Korean ship stopped and an inspection team boarded the vessel. It was NOT immediately clear what cargo the ship contained.

East and West Germany cease to exist at one minute past midnight tomorrow morning and a unified Germany will take their place. Chancellor Kohl already has pledged that the unified nation will be dedicated to peace and democracy and will be a good neighbor to other European nations. .

The 12-nation European Community is ready to welcome the 16-Million residents of East Germany. The E-C already has adopted a number of temporary emergency measures to help speed German unification, including exemption from some environmental laws.

-30- 1621
#90275u1235 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - Congress's adjournment express is picking up speed day by day and threatening to derail major legislation in its headlong rush to end the session.

The target date for wrapping up the 101st Congress appears to be Oct. 19, just about the latest members up for re-election can wait before hitting the campaign trail full time before the Nov. 6 election. All 435 House seats, plus one-third of the Senate, are at stake in the voting.

The last three weeks of a session, often the graveyard for legislation, are a fertile period for opponents who can stymie bills with a filibuster, refusal to negotiate a compromise or a variety of parliamentary delaying tactics.

In addition, several major measures that could determine success or failure for the 101st Congress are under the threat of a veto by President Bush.

The problems are compounded this year by the fixation on the $500 billion budget agreement that, if approved, will force Congress to concentrate on legislation to implement the five-year package of spending cuts and tax increases.

Sen. Steve Symms, R-Idaho, gave a perfect example Tuesday of the pitfalls that await bills in the closing weeks of a session.

Symms, objecting to action on a bill to control money-laundering, pointed to the budget mess and said, ''We really don't have the time to be talking about a money-laundering or any other bill of this importance.''

Yet, the final weeks of a Congress are also conducive to last-minute rescues of bills, written off as dead for the year. To date, Democratic leaders have not given up on any of the big bills:

Civil rights - Despite continued veto threats, Senate and House negotiators have a compromise on the civil rights bill that reverses Supreme Court decisions on discrimination in the workplace and caps damage payments. Prospects for the bill are rated excellent.

Crime - The Senate has passed a sweeping anti-crime bill that greatly expands the death penalty, bans some assault weapons and makes other major changes. The House so far has failed to act. The best shot, if there is any, is a bill that only includes parts of the anti-crime package.

Child care - Legislation to help working families get child care assistance has been in conference since last year. Negotiators are virtually finished although there is still disagreement on financing the program. Hopes for a resolution are still alive.

Clean air - Negotiators have been working steadily to find a compromise on legislation to cut back air pollution. Bush and most members want a bill before adjournment, giving the measure a good shot at enactment.

Housing - The Senate and House have passed sweeping reforms of the nation's housing laws and have started negotiations on a common bill. The prospects for agreement and passage are rated good.

Political campaign reform - Legislation to revamp campaign financing is hung up on a partisan dispute over candidate spending levels. The chances for this bill are considered nil.

The adjournment rush has already taken a toll.

Hosue Speaker Thomas Foley, D-Wash., said Sunday that, due to the press of other business, the House would not act this year on the ''Brady bill'' legislation to require a week's waiting period before a person could buy a handgun.

And last week, filibusters claimed four major bills and there is little hope they can be resurrected before adjournment.

The Senate refused to kill talkathons blocking extension of a 20-year program of helping poor pregnant women with counseling; legislation to increase voter turnout by requiring states to mail registration forms with car registration renewal notices; and a bill to require car manufacturers to make models that get better gas mileage.

A mere objection by Sen. Timothy Wirth, D-Colo., killed for this year a bill to curb the rising rates charged viewers by cable television companies.

-30- 4154
#90275u1243 10/02/1990 ~United Press International
(OCT. 2) UPI - Supreme Court nominee David Souter faces his final Senate test today when the full chamber begins its confirmation proceedings. Souter is expected to sail through. The Senate Judiciary Committee approved Souter's nomination on a 13-1 vote last week.

A multi-state task force has been set up to see if there is any common link in the deaths of 10 men from Indianapolis whose bodies have been found in rural areas of Ohio and Indiana over the past decade. Most of the victims were said to be homosexuals. Seven of the 10 had been strangled.

-30- 705
#90275u1256 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - The Federal Reserve Board's policy-making committee met Tuesday and economists expected the powerul panel will act to lower interest rates after the agreement to slash the federal budget becomes law.

Although the final decision of the Federal Open Market Committee will be kept secret until after the next scheduled meeting Nov. 13, lower rates could become a reality in a matter of days on everything from mortgages to credit cards.

The minutes of FOMC are routinely kept under wraps until for about six weeks in an effort not to influence financial markets.

''We think they're probably talking in terms of a directive that will be biased toward easing, but it'll probably have a lot of conditions on it,'' such as passage of the $500 billion budget pact, said Robert Dieli, an economist at Northern Trust in Chicago.

Dieli also said the Fed is taking another ''environmental factor'' into account - the Iraq crisis.

Norman Robertson, chief economist at Mellon Bank in Pittsburgh, agreed.

''I suspect might wait until the budget deficit reduction package has passed the Congress and they might ease policy a notch,'' Robertson said, adding the Fed is awaiting the latest unemployment figures, set for release Friday, before taking action.

Most analysts predict a September jobless rate of 5.7 percent - an increase over the August rate of 5.6 percent.

Samuel Kahan, an economist at Fuji Securities in Chicago, said it appeared the Federal Reserve may have already started adding reserves to the monetary system Tuesday in an effort to lower rates.

''I kind of think they move already,'' Kahan said.

But Norman Mains, chief economist for Bateman Eichler, Hill Richards of Los Angeles, said in an interview on the Financial News Network, ''I don't really expect the Federal Reserve ... will take any meaningful move.''

''You may get some sort of token kind of move out of them in the next two or three weeks, to largely sort of put down their critics in Congress,'' Mains said. ''But other than that it's business as usual.''

Mickey Levy, chief economist at CRT Government Securities in New York, also in an interview with FNN, called the budget accord ''very, very disappointing,'' but he also anticipates slightly lower rates.

#90275u1257 10/02/1990 ~United Press International

LINCOLN, Neb. (OCT. 2) UPI - Duncan Aviation and Rinaldo Piaggio S.p.A. of Genoa, Italy, announced an agreement Tuesday for co-production of an Italian turboprop aircraft, probably at Duncan's plant in Lincoln.

Duncan President Robert Duncan announced at a news conference that the two firms plan to work together to produce the Avanti P180.

The partnership has tentatively targeted Lincoln as the location for final assembly and completion of the aircraft. Final selection is contingent upon approval of an application for Community Development Block Grants and loans and training funds through the city, Lancaster County, the Lincoln Airport Authority and the state.

The fuselage of the plane will be manufactured in Wichita, Kan., while the wings will be manufactured in Genoa, where Piaggio is based. The balance of the components will come from other vendors, with the final assembly in Lincoln, Duncan said.

The firms plan for assembly of the aircraft to begin in 1991 and 36 aircraft could be assembled a year by 1994. Duncan said his firm will expand its workforce by 200 technical employees.

''Duncan has all the ingredients we need for a North American partner,'' Rinaldo Piaggio, president of the firm, said in a statement released at the news conference. He was to announce the venture later Tuesday at a news conference in New Orleans.

The P180, which costs about $4 million apiece, is extremely fuel efficient. Duncan said it can travel 1,800 nautical miles without refueling, and therefore can fly from Lincoln to anywhere in the United States non-stop.

The planes travel at near jet-speed at 400 nautical miles an hour, but use half the amount of fuel a jet uses, he said. The planes are just starting to be sold to corporations.

Duncan said Lincoln was selected for the assembly plant because the city has a healthy business community and because of state tax incentives under the state's Employment and Investment Growth Act.

He also credited the Legislature for making technical changes to the state income tax code to allow the purchase of an aircraft in Nebraska without paying sales taxes if it is to be flown out of the state within 10 days.

Gov. Kay Orr, who attended the news conference, said Duncan's entrepreneurial spirit helped bring the assembly plant to Lincoln.

Mayor Bill Harris said landing the plant was part of the concept of an international partnership the city is trying to form.

The manufacturing partnershp is the first such venture for the Duncan firm, which was among several alternatives for the partnership with Piaggio. Wichita was reported to be competing with Lincoln.

''I am proud to play a part in the assembly and introduction of the Avanti P180,'' Duncan said. ''The P180 is a significant engineering achievement and will serve corporate operators for many years to come.''

#90275u1268 10/02/1990 ~United Press International

NEW YORK (OCT. 2) UPI - NBC was back on top of the ratings chart for the second week of the new season - after CBS took the opening week - and ABC's ''Twin Peaks'' failed to pique the interest of the Sunday movie audience, it was reported Tuesday.

None of the season's new shows were in the top 10. All were half-hour comedies except ''60 Minutes'' (CBS), which came in No. 2 behind top- ranking ''Cheers' (NBC).

''Twin Peaks,'' the most talked-about, written-about show on network television, made its season debut and came in last in the three-network Sunday movie contest. The Sunday champ was ''Perry Mason: The Case of the Defiant Daughter'' (NBC) in 24th place, followed by ''The Face of Fear'' (CBS), tied for 30th, with ''Twin Peaks,'' tied for 41st.

The PBS Series ''The Civil War'' also was a factor last week.

''PBS averaged seven share points higher than it normally does Monday through Thursday,'' said Curt Block, NBC vice president, media relations. ''We're estimating it took four share points away from the networks. More power to them - it was a terrific show.''

It did not stop NBC from winning, however. In the ratings for the week ending Sept. 30, according to the A.C. Nielsen Co., NBC won with a 12.9 rating and a 22 share. CBS was second with a 12.3 rating and a 21 share, edging out ABC which posted a 12.0 rating and a 20 share.

The NBC lead last week was enough to put it ahead in the 2-week-old season-to-date contest, which shows NBC with a 13.2 rating and 22 share, followed by CBS with a 12.9 rating and a 22 share, while ABC has a 12.6 rating and a 21 share.

CBS appears to be making a comeback, however, according to David Poltrack,

senior vice president, planning and research, CBS/Broadcast Group, who said:

''CBS's strength is really dramatized when you compare each network's season-to-date performance with its performance in the fourth quarter of 1989.''

He said 64 percent of the programs on the CBS schedule are performing above the time period performance of last fall and 62 percent of the network's returning programs are performing above their 1989 fourth quarter average.

For ABC, Poltrack said, the figures are 38 percent of all programs and 29 percent of returning programs performing above the 1989 time period average. For NBC, he said, 17 percent of all shows are performing above last year's time period average, and none of their 15 returning shows are above last year's average.

As for the new shows, the highest rated is ABC's ''America's Funniest People '' this year's twist on the wildly successful ''Funniest Videos,'' in 13th place.

''Fresh Prince of Bel Air'' (NBC) was next in line among the newcomers, tied for 26th, followed by ''Uncle Buck'' (CBS) and ''Married People'' (ABC), tied for 37th; ''The Trials of Rosie O'Neill'' (CBS), 40th; ''The Flash'' (CBS) and ''Ferris Bueller'' (NBC) tied for 48th; ''Fanelli Boys'' (NBC), 50th; ''American Dreamer'' (NBC), 51st, ''Going Places'' (ABC), tied for 52nd; ''Cop Rock'' (ABC) and ''Get A Life'' (Fox) tied for 56th. A special showing of ''Cop Rock'' came in 82nd.

The other new shows were ''Good Grief'' (Fox), 58th; ''Evening Shade'' (CBS) and ''Gabriel's Fire'' (ABC), tied for 61st; ''Working It Out'' (NBC), 64th; ''Parenthood'' (NBC), 71st; ''Family Man'' (CBS), 78th; ''Lenny'' (CBS), 79th; ''Lifestories'' (NBC), 81st; ''Hull High'' (NBC), ''Babes'' and ''Parker Lewis'' (both Fox), tied for 83rd; ''E.A.R.T.H. Force'' (CBS), 86th; ''True Colors'' (Fox), 87th; ''Against The Law'' (Fox), 92nd; ''DEA'' (Fox), 93rd.

Night-by-night competition saw NBC win Tuesday, Thursday and Saturday. CBS won Sunday and Monday and ABC took Wednesday and Friday.

ABC's ''World News Tonight'' was No. 1 for the 38th consecutive week, with a 10.0 rating and a 21 share. ''CBS Evening News'' with Dan Rather moved back into second with an 8.6 rating and an 18 share, while ''NBC Nightly News'' with Tom Brokaw dropped to third with an 8.5 rating and an 18 share.

Each ratings point represents about 921,000 households. A share is the percentage of TV sets in use that are tuned to a particular show or network.

The top 10 programs for the week ending Sunday, Sept. 30, according to the A.C. Nielsen Co., were:

1. Cheers (NBC)
2. 60 Minutes (CBS)
3. The Cosby Show (NBC)
4. Murphy Brown (CBS)
5. (tie) Golden Girls (NBC)
6. Designing Women (CBS)
7. Roseanne (ABC)
8. Empty Nest (NBC)
9. America's Funniest Home Videos (ABC)
10. A Different World (NBC)

#90275u1278 10/02/1990 ~United Press International

WEST BERLIN (OCT. 2) UPI - A leading West German author, speaking hours before the historic merger of East and West Germany, said Tuesday the economically powerful, unified nation could pose a serious threat to its neighbors.

''This unification is ugly, it divides,'' he said in an address at the Reichstag, the former German Parliament that will be the focus of ceremonies marking the overcoming of more than four decades of German division,

Guenter Grass, addressing parliamentarians from the environmentalist, left-leaning Greens party, also warned that when the East German state disappears, absorbed in the republic of its powerful neighbor, East Germans will become ''perpetual underdogs and second class citizens.''

''Without needing to invest, West German businessmen forced East German goods from the market and got the GDR (East Germany) at a bargain basement price,'' he said.

When the East German economy finally recovers from the ruins of 40 years of communism, it will be an economy ''clearly in favor of the West Germans, which can lead to jealousy and hatred'' within Germany, Grass said.

And he warned that similar feelings could arise between Germany and its neighbors.

''Should the world fear Germany again? - No longer in military terms, but certainly in economic terms,'' he said.

Grass, the aging bard of postwar, left-wing Germans, said he was at a loss to describe the exact nature of Germany's new-found power.

''I cannot find a conclusive term for this because here, real hate seldom expresses itself, but rather a kind of bureaucratic coldness that can lead to

inhuman excesses,'' he said.

Once a respected and heeded social critic, Grass admitted he felt events of the last 12 months passed over his head.

He said he considered himself as a critical patriot but that ''in its feeling of renewed power, the new nation will hardly miss such a patriot.''

#90275u1289 10/02/1990 ~United Press International

LONDON (OCT. 2) UPI - Stock prices surged Tuesday for the second consecutive trading session on London International Stock Exchange, buoyed by a strong Wall Street opening and by a record-setting rally earlier in Tokyo.

Stocks also closed higher in brisk trading on the Frankfurt Stock Exchange.

In London, the blue-chip Financial Times 100-stock index, which jumped 40.6 points Monday, gained another 27.7 points to 2,058.5. The narrower top 30 industrial average jumped 21.7 points to 1,594.7.

Volume amounted to around 430 million shares, well above the 328 million shares changing hands Monday.

Analysts said prices were boosted by the strong performance in Tokyo, where the closely watched Nikkei Average posted its largest single daily advance, surging 2,676.55 points - 13.2 percent - to 22,898.41.

Analysts also said London stocks, particularly blue-chips, were boosted by lower oil prices on world markets.

Market watchers said a deal to reduce the U.S. budget deficit, which could lower interest rates and improve the economic climate there, gave London investors a shot of enthusiasm.

But pessimists noted the question of whether there would be a diplomatic solution in the Persian Gulf or whether there would be a worsening of tensions and possible war continued to hang over the markets.

Chemical giant Imperial Chemical Industries climbed 41 cents to $15.35 while Glaxo, still enjoying the glow of reports it has applied to the U.S. Food and Drug Administration for approval to market a new heart drug, rose 54 cents to $14.16.

In a mixed oil sector, Shell gained 8 cents to $8.25 and British Petroleum remained unchnaged at $6.25.

In Frankfurt, stocks closed higher as the German Stock Index, which surged 85.84 points Monday, gained 24.16 more points to 1,444.89, a 1.67 percent advance.

Traders attributed the strong performance of the closely watched index to the rise in Tokyo.

#90275u1299 10/02/1990 ~United Press International

CAPE CANAVERAL, FL (OCT. 2) UPI - Engineers prepared Tuesday for the overnight start of the shuttle Discovery's countdown to blastoff Saturday, with environmentalists fighting to ground the ship and its nuclear cargo.

Struggling to end a launchless summer of repeated setbacks and delays, engineers at launch pad 39B planned to start Discovery's intricate countdown at 3:30 a.m. EDT Wednesday, 12 hours before the ship's five-man crew was scheduled to arrive at the Kennedy Space Center for final preparations.

With an 80 percent chance of good weather expected, Discovery is scheduled to blast off at 7:35 a.m. Saturday to finally end a five-month launch drought caused by multiple hydrogen fuel leaks that grounded the shuttles Columbia and Atlantis in May, July and September.

Engineers said they have no reason to expect any leaks with Discovery, but they will not know for sure until around midnight Friday, after they begin pumping supercold liquid hydrogen rocket fuel into the shuttle's giant external tank.

Only a handful of problems were under discussion Tuesday, including debate over what to do about a stripped bolt, one of four used to attach cooling lines to the cargo's nuclear generator. It likely will be cleared to fly without being repaired.

The goal of the 36th shuttle mission is the launch of the European- built Ulysses probe, an 850-pound nuclear-powered robot built to fly over the uncharted poles of the sun in a $750 million mission to study Earth's star in three dimensions for the first time.

Ulysses' electrical generator is loaded with 24 pounds of highly- toxic plutonium 238 dioxide. Anti-nuclear activists went to court Friday seeking to ground the mission, saying NASA underestimated the odds of a radiation release in the event of a launch catastrophe.

A hearing is scheduled Thursday before U.S. District Judge Oliver Gasch in Washington and a decision is expected Friday, the same day activists plan to mount a demonstration at the Kennedy Space Center to protest the flight.

A similar legal effort to ground the Galileo Jupiter probe failed last year and NASA officials, who claim the atomic powerpacks are safe, were confident the court would dismiss the action this time around, clearing the way for launch.

At the controls will be commander Richard ''Dick'' Richards, 44, and co-pilot Robert Cabana, 41. Their crewmates are flight engineer William Shepherd, 41, Bruce Melnick, 40, and Thomas Akers, 39.

Assuming an on-time launch, Ulysses, built by the European Space Agency, will be released from Discovery's 60-foot cargo bay at 1:36 p.m. EDT Saturday. A unique three-stage solid-fuel booster is scheduled to fire at 2:42 p.m. to kick off a five-year voyage over the poles of the sun.

To reach such an orbit, Ulysses must first journey to distant Jupiter so it can use the planet's titanic gravity to bend its trajectory down, out of the plane of the solar system and back toward the south pole of the sun.

Data from Ulysses will give scientists their first look at the sun in three dimensions, vastly superior to the limited view available from Earth's orbit about the star's equator.

The probe's launch is a major milestone for the European Space Agency, which originally hoped to get the craft into space in 1986. But the Challenger shuttle disaster grounded the program and along with it, Ulysses.

The launch Saturday is equally important to NASA, which has struggled through a leak-plagued summer of delays amid intense criticism over problems with the

Hubble Space Telescope and the agency's planned space station project.

Discovery made the most recent previous shuttle flight when it carried Hubble into orbit April 24. Since then, four attempts to launch Columbia ended in failure - three because of elusive hydrogen fuel leaks - and Atlantis was grounded in July by a similar problem.

Columbia, still mounted atop launch pad 39A, is scheduled to be moved to Discovery's pad next week for at least two more fueling tests to isolate the crippling leak that has repeatedly delayed the ship's takeoff on an astronomy mission.

The repaired shuttle Atlantis, meanwhile, will be hauled to pad 39A later next week for blastoff around Nov. 7 on a secret military mission. If Columbia's leak can be found and repaired in time, the veteran spaceplane could be ready for a fifth launch attempt in early December.

#90275u1337 10/02/1990 ~United Press International

WARSAW, POLAND (OCT. 2) UPI - Poland's first general presidential election, perhaps pitting Solidarity founder Lech Walesa against the now politically estranged aide who became prime minister, will be held Nov. 25, it was announced Tuesday.

The speaker of the Sejm, or lower house of Parliament, Mikolaj Kozakiewicz, set the date under the provisions of a new constitutional amendment providing for direct election of the state president, the Polish news agency PAP said.

The legislation was passed by the Sejm last week and approved by the Senate Saturday.

Walesa has already declared his candidacy to replace the former Communist Party leader and current president, Wojciech Jaruzelski. Solidarity Prime Minister Tadeusz Mazowiecki has not announced his decision.

Mazowiecki, returning from a visit to the United States Tuesday with no concrete offer of help on Poland's staggering $42 billion debt to the West, refused to say yet if he will run.

''I said I would talk about this issue in Poland, but I don't think I can do it in the first minutes after arrival, because I have to read the documents adopted by the Sejm,'' he told reporters on his arrival at the Warsaw airport.

''I think the time is coming when I will have to pronounce myself on the issue '' he said.

Walesa and Mazowiecki, an intellectual stalwart of the Solidarity movement

during its struggle for recognition in the 1980s, have differed greatly in recent months over the pace of political and economic reform.

Walesa has sought the ouster of Jaruzelski, the last former high- ranking Communist in the government, and also has sought to soften the impact on working people of Poland's wrenching shift from a subsidized but inefficient economy to a free-market system.

Jaruzelski was elected to the presidency by Parliament as part of the 1989 deal between the outgoing Communist regime and Solidarity that also provided for partially free elections.

Although, under the deal, his term would last until 1994, Jaruzelski has agreed to step down in the face of Walesa's demands.

Mazowiecki had been in New York for the U.N. conference on children, but also met with President Bush on the Persian Gulf situation as well as several bilateral issues.

''I did not expect any decisions to be made during that meeting,'' he said. ''I can only say there is an understanding of our situation and of the fact that this (debt) problem is a burden on Poland and that a solution is needed to ease it.''

Adding to its economic burden, Poland is expected to suffer losses of up to $11 billion, mainly due to lost oil deliveries, while adhering to the international embargo against Iraq for its invasion of Kuwait.

The government announced a tenfold jump in international train fares effective Jan. 1 to put them in line with market prices. The fares will be calculated in dollars.

#90275u1339 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - As a Supreme Court Justice, David Souter will step into not only a new job but also a new way of life, leaving his rustic New Hampshire homestead for the fishbowl of the nation's capital.

President Bush nominated the scholarly bachelor to become the nation's 105th Supreme Court justice, to take a $118,600-a-year job inside a marble building that is virtually self-sufficient and where everything is aimed at facilitating the work of the nine highest-ranking judges in the land.

Gary Born, a Washington lawyer and former Supreme Court law clerk, likens what Souter faces to ''culture shock.''

''He's coming from a very different background,'' said Born, comparing

Souter's experience to the pre-Supreme Court experience of Justice Sandra Day O'Connor, whose work had been largely in the state courts in Arizona.

But Peter Keisler, a law clerk for Justice Anthony Kennedy during his first term in 1988 and now a practicing lawyer, said the major adjustments Souter faces involve his personal life.

''I don't think the professional transition is difficult at all. I watched Justice Kennedy sail into it like he'd been in it all his life,'' said Keisler. ''For an experienced judge, I think it's not culture shock. The only culture shock is with the Washington culture.''

Initially, Souter will hire a staff of as many as seven people with whom he will spend most of his time: four law clerks, two secretaries and a messenger. Among other duties, the staff takes care of a paper flow generated by some 4,500 cases the court must either hear or reject each year.

Keisler concedes the volume of work Souter will immediately face is probably greater than at the 1st U.S. Circuit Court of Appeals or the New Hampshire Supreme Court, but said much of the difficult work will come later in the term when more opinions are written.

''It's not going to hit him in an extreme way,'' said Keisler. ''It's not like he's going to be sailing into a hurricane.''

And Souter will not be working in a vacuum.

Despite being next door to the Library of Congress, the court has its own library of some 1 million volumes - not to mention a 75-member police force, cafeteria, laundry, woodworking shop and barber shop, most of which will be at Souter's disposal.

''This is a staff of 319, 310 of whom are dedicated to essentially supporting the work of the other nine,'' said Supreme Court spokeswoman Toni House.

Souter will move into the chambers occupied last session by Justice Antonin Scalia, who - by virtue of seniority - has moved into the larger chambers occupied by Justice William Brennan until his retirement this summer.

The three-room chamber - there is a marble fireplace in the justice's office - have been painted antique white, but Souter will select the carpeting and drapery.

It remains unclear exactly when Souter will take his place on the high court, which began its term Monday. The court has no official contact with a nominee until he is confirmed, said House, slowing down the transition.

And there is tradition to be upheld.

''No justice actually sat on the bench without a formal investiture, at least not in this century,'' said House.

The investiture, a gala swearing-in inside the courtroom, is open to invited guests and organized by the chief justice, and normally would take time to prepare, said House. Souter also will take a constitutional oath, probably at the White House.

In the courtroom itself, the next justice's 4 1/2-foot-high mahogany chair has been newly made, but the black leather upholstery has yet to be completed. Brennan's chair will be purchased by the other justices and presented to him as a gift, said House.

The court, too, is facing transition.

Supreme Court justices oversee the 13 federal judicial circuits, roughly by geography, for responsibilities such as deciding whether to grant emergency stays of execution in capital punishment appeals. The court must now redefine which justices are responsible for which circuits, said House.

Also, the seating arrangement for the courtroom itself - based on seniority - has changed due to Brennan's departure. As always, however, the junior justice will be seated farthest from the chief justice on his left.

#90275u1349 10/02/1990 ~United Press International

MONROVIA, LIBERIA (OCT. 2) UPI - The West African peacekeeping force in the Liberian capital of Monrovia Tuesday launched heavy artillery attacks on troops of the main rebel leader Charles Taylor.

''We are trying to push back Taylor's men so as to establish a buffer zone between them and the government soldiers, Ghanaian Sergeant Nick Gbedawah said standing at his frontline checkpoint beside the Ministry of Internal Affairs

in Monrovia city center.

Smoke hung over government buildings close to the Executive Mansion from where the remaining soldiers loyal to the late President Samuel Doe also fired rockets at Taylor's position in the east of the city.

Charles Taylor's National Patriotic Front of Liberia forces have attacked the presidential mansion twice in the last two days. The mansion was hit by Taylor's rocket fire Sunday.

Peacekeeping troops of the Economic Community of West African States have separated remnants of Doe's Armed Forces of Liberia and followers of a second rebel leader, Prince Johnson. Johnson's forces, who favor the presence of the peacekeeping force, took control of much of the city center over a month ago.

After a day of heavy street fighting Monday between government soldiers and Johnson's men, the two warring factions now stand within sight of each other's positions in the city center.

Reporters who crossed the buffer zone spoke, for the first time since the death of Doe three weeks ago, to hungry and desperate government soldiers who had gathered fifty yards from Monday's frontline.

A peacekeeping officer briefly addressed the mainly young, nervous fighters asking them to move back to the Barclay military barracks adjacent to the mansion.

''Leave the job here to me and wait for me to establish peace,'' the officer told them, adding, ''I will help to see to your needs. But I demand that the center of the city is ours.''

One government soldier mumbled; ''Death before dishonor'' in his response to the commander's request. But most of his companions seemed willing enough to comply with the demand.

Some of the troops, who refused to give their names, told reporters they would be prepared to lay down their arms in order to achieve a peaceful settlement. But others strongly objected, reflecting the tense relations within the embattled government force after months under siege in the city center.

Up to 20 people die each day from disease and hunger in and around the mansion where people have been killing dogs for food, an expatriate couple living nearby said Tuesday.

Remaining government forces number up to 1,000 soldiers, plus their families, they said.

''They will never run out of ammunition. They have it piled up to the ceiling

in the barracks,'' the couple said.

#90275u1366 10/02/1990 ~United Press International

(OCT. 2) UPI - The Pentagon today sent the aircraft carrier U-S-S Independence into the dangerous Persian Gulf, where U-S warships have been damaged by Iraqi missiles and Iranian mines in recent years. The Independence is the first carrier sent into the waterway since 1974. It carries a crew of about five-thousand and some 75 combat planes... including F-14 Tomcat and F-A-18 Hornet fighters. A Navy spokesman says the carrier is ''highly defendable''... that there's little risk to the ship. .

Iraq says it is ready to destroy its vast arsenal of chemical weapons and other weapons of mass destruction... if Israel were to do the same. The announcement was one of a string of seemingly conciliatory messages from Iraq since President Saddam Hussein said on Sunday that he's willing to consider a French peace plan calling for the complete withdrawal of Iraqi troops from Kuwait.

Two Americans were aboard a hijacked Chinese jetliner that crashed while trying to land at Canton. One of them- Erin Thomas of Oklahoma City- is reported in good condition in a Canton hospital... the other is missing. The Boeing 737 skidded into two other airliners on the tarmac and exploded into a fireball. China's official news agency says at least 120 people were confirmed dead and there are 100 known survivors. The majority of those killed were aboard the hijacked plane.

They started to get sick one by one... then by twos and threes... then by even larger numbers in what eventually became a case of mass food poisoning in Chicago yesterday. Windy City area hospitals report treating more than 150 people who attended a Tru-Value Hardware convention. At least 35 people were admitted for further treatment. They were staying at various hotels but all had attended the same banquet Sunday night. Health officials are checking to see if that dinner was the source of the food poisoning.

LONDON (OCT. 2) UPI - Amnesty International, in a report to be released Wednesday, condemned Iraq for executing and torturing civilians opposed to its invasion of Kuwait and for human-rights abuses against Western detainees.

The international human-rights watchdog organization said Iraqi troops were

''summarily executing'' Kuwaitis for possession of the Kuwaiti flag or pictures of the deposed emir of Kuwait, or even for failing to follow orders to post photographs of Iraqi President Saddam Hussein.

Iraq overran its tiny neighbor Aug. 2 after a period of building tension over a border and oil dispute. Despite international condemnation and U.N. sanctions, it has since annexed the oil-rich emirate.

The Iraqi military has routinely used torture against detainees, Amnesty International said, detailing cases of beatings and electric shocks administered to Kuwaitis rounded up since the invasion.

Kuwaitis have had limbs broken, their hair plucked out with pincers, and their fingernails and toenails pulled out, and have been threatened with rape and murder, Amnesty said.

''We cannot even publish more details on former torture victims in case they or their families are identified and suffer reprisals,'' the organization said.

It said the group had interviewed civilians who had fled Kuwait to gather evidence.

This testimony, along with a report from Amnesty representatives in Bahrain ''builds up a horrifying picture of widespread arrests, torture under interrogation, summary executions and mass extrajudicial killings, '' Amnesty said.

Iraqi troops have hanged mass groups of people on the grounds of Kuwait University for alleged opposition to Saddam. Boys as young as 15 have been shot through the head in street executions. Doctors were forced to sign false death certificates alleging murder victims died natural deaths in hospitals, Amnesty said.

Amnesty also condemned the detention of Westerners in Iraq and Kuwait by Saddam as hostages against possible attack.

''These detentions are arbitrary and constitute a violation of human rights norms,'' Amnesty said.

Amnesty said it opposed the death penalty imposed by Iraq on Kuwaitis found harboring Westerners, looting or hoarding food.

So far, one Kuwaiti has been reported to have been executed for hiding an American citizen and at least 10 people have been killed for looting, the report said.

#90275u1381 10/02/1990 ~United Press International

NEW YORK (OCT. 2) UPI - Twenty-two American corporations Tuesday launched an alliance with the United Nations in an effort to save the lives of millions of children worldwide.

Responding to the recent World Summit for Children, the leaders of the Corporate Alliance for Child Survival said they would donate money to projects supported by the United States Committee for Unicef, the United Nations Children's Fund.

''The founding of the alliance by leaders from major American corporations is an endorsement from this nation's business community of the goals established by the summit,'' the alliance said in a statement.

The summit that ended Sunday called for a reduction in infant mortality and malnutrition, and other improvements including the provision of clean water and primary education.

Lawrence E. Bruce, Jr., president of the U.S. Committee for Unicef, said 40,000 children die each day from five main preventable diseases - pneumonia, tetanus, whooping cough, measles, and, the biggest killer, dehydration from diarrhea.

Participants in the alliance include American Express Co.; General Mills Inc.; Merrill Lynch & Co.; Pepsico Worldwide Beverages; Nabisco Brands Inc.; Kraft General Foods Inc. and Pier 1 Imports Inc. The heads of the 22 participating corporations will act as co-chairmen.

The alliance will be chaired for its first two years by James Wood, chairman and chief executive officer of the Great Atlantic and Pacific Tea Company.

Wood, a member of the U.S. Committee for Unicef, told a news conference at the United Nations that the alliance had raised $600,000 in its first four weeks and looked like it would exceed its goal of $1 million in the first two years.

The alliance has committed itself to support the committee until the year 2000.

Wood said the money raised so far indicated a healthy atmosphere of corporate support. ''But as we have learned from global leaders who attended the world summit this past weekend, the children of the world have vast and growing needs.

He said the three main objectives of the alliance would be to set the tone for corporate support of Unicef; to increase public awareness of the need for such support, and to provide continuity after the launch.

Hugh Downs, the broadcaster who chairs the U.S. Committee for Unicef, said, the alliance ''launches an exciting partnership between the committee and our

nation's leading corporations to save, potentially, millions of children's lives in the next decade.''

A simple remedy to dehydration from diarrhea, known as oral rehydration therapy, currently saves 1 million lives a year, Bruce said.

He added, ''The world has known for a long time what needs to be done to save and improve children's lives, but has always placed other priorities first. Today, Mr Woods and his corporate colleagues are telling the world that children must be a top priority.''

The other particpating corporations are: American Home Products; Becton Dickinson & Co.; Conagra Inc.; Deloitte & Touche; Goya Foods Inc.; Grand Metropolitan Food Sector; ICI Americas Inc.; Johanna Dairies Inc.; Johnson & Johnson; Marcal Paper Mills Inc.; Schering-Plough; Sunshine Buiscuits Inc.; Tengelmann Group and Warner-Lambert.

In a separate annoncement, American Express said Tuesday that as its contribution to the alliance, it would donate $100,000 to the U.S. Unicef Committee to aid refugee families dislocated by the Iraq/Kuwait conflict.

#90275u1387 10/02/1990 ~United Press International

(OCT. 2) UPI - It will be the middle of the next century before Soviet industry catches up with demand for consumer goods as simple as shoes or socks. That assessment comes from the head of the Consumer Goods Committee for the Soviet Parliament. Demand is so far ahead of development of light industries that socks won't be in good supply until the year 2020... shoes until 2058. All of this is coming to light now as the Soviet Union switches from a rigidly centralized economy to a free-market system.

The strike of civilian Filipino employees at major U-S military bases in the Philippines is in its second day with NO indication of any settlement. Attempts at forging an agreement failed earlier today. The workers are supposed to get 18 percent pay raises, but the U-S Congress has placed a three-point-five percent cap on any increase. The strike has been relatively peaceful and volunteers are keeping essential services going.

The death of a Scottish lawyer in an autombile accident near his home has led to a temporary adjournment of the judicial inquiry into the bombing of Pan Am Flight 103 two years ago. Lawyer Michael Hughes had worked with the group of American relatives since the disaster. His car was hit by an out-of-control truck as Hughes drove to his hometown of Glasgow. The inquiry will resume on Thursday.

#90275u1400 10/02/1990 ~United Press International

HOLLYWOOD (OCT. 2) UPI - Moviegoers have paid $3.7 billion so far this year at the box office, about 2 percent behind 1989's record-setting pace, when ticket sales topped $5 billion by year's end.

With the romance-thriller ''Ghost'' and new hits ''Pacific Heights,'' ''GoodFellas'' and ''Postcards From the Edge'' keeping sales up, the year-to-date box-office total hit $3.7 billion over the weekend, vs. the $3.77 billion recorded in the same period last year, Daily Variety reported Tuesday.

In 1988, the total at the same juncture had reached $3.34 billion.

The top 10 movies of last weekend - led by the yuppie thriller ''Pacific Heights'' - took in $32.8 million, off 4 percent from the previous weekend's $34.2 millio, but up 18 percent from the $27.7 million scored by the top 10 a year ago.

For the latest week, the total domestic box office reached $68.3 million, off slightly from the year-earlier $70.5 million. In 1988, the same week produced ticket sales of $49.4 million.

The major release for the coming weekend is Twentieth Century-Fox's ''Marked for Death,'' the latest Steven Seagal shoot-'em-up. Seagal's previous movie, ''Hard to Kill,'' was a surprise hit this spring.

Also going into limited release this weekend are a restored version of Disney's ''Fantasia,'' ''Desperate Hours'' with Mickey Rourke and ''Listen Up: The Lives of Quincy Jones.''

Paramount's ''Ghost,'' shaping up to become the year's biggest hit, has taken in $155.3 million in 12 weeks, second only to Disney's ''Pretty Woman,'' which has grossed $173.5 million in 29 weeks. ''Ghost'' crossed the $150 million benchmark in just 78 days of release, while ''Pretty Woman'' hit the same total in 103 days.

The third-highest grosser of the year, New Line's ''Teenage Mutant Ninja Turtles,'' has taken in $133.1 million in 27 weeks, while Paramount's ''Hunt for Red October'' has reached $120.6 million in 29 weeks and Carolco's ''Total Recall'' has grossed $118 million in 18 weeks.

Fox's ''Die Hard 2'' has pulled in $113.3 million in 13 weeks and Disney's ''Dick Tracy'' has grossed $103.7 million in 12 weeks.

#90275u1414 10/02/1990 ~United Press International

AMMAN, JORDAN (OCT. 2) UPI - She is from Sri Lanka, one of thousands of Asian refugees stranded in desert camps amid the Persian Gulf crisis. She is

one of the lucky ones about to go home, but she fears she will only trade one camp for another.

Andalus refugee camp in Jordan is the last stop for Asians who - after spending weeks in other camps - usually stay only a day or two before hopping a bus to the international airport in Amman for flights home. It is a place where happiness and fear are magnified by the reality of returning.

The camp is dominated by lines: lines for rice and yogurt, neat lines of 300 tents, lines of freshly washed clothes strung on tent ropes. And lines of exhausted and mostly happy Asian refugees with luggage preparing to board air conditioned buses heading for the airport.

Andalus is usually a short stopping place, but refugees may start facing longer waits. Jordan said Tuesday it would be unable to continue financing the transport of Asians without aid.

The government also said Saturday it faced serious difficulties in providing basic refugee facilities and could not continue without international help. Jordan said although the government had been promised $100 million in refugee aid, only $1.7 million had been received.

The problem for the Sri Lankan woman, however, was more imminent. An ethnic Tamil from the Indian Ocean island a few miles off India's southeast coast, she said many of her relatives had fled massacres of Tamils by the Sinhalese majority in the strife-torn nation. They are now in a refugee camp in India - and she predicted that after going home, she would end up there as well.

Like the Sri Lankan woman, who asked not to be named, Tamil men also are concerned amid reports Sri Lankan authorities have arrested Tamil men as soon as they land in the capital of Colombo.

And camp deputy director Barakat Abbadi said six Liberians at the camp would prefer to go to countries other than their own, which has been torn by a bloody civil war for nine months.

Still, for many going home is a long awaited quest and memories fade quickly of their flight from Iraq and Iraqi-occupied Kuwait, as well as weeks of waiting at other camps.

Wackaram Pauaseeli, a Sri Lankan who worked in Kuwait as housemaid, lived 16 days at a previous camp and less than 24 hours at the Andalus.

Asked if she had a difficult time at the camps, she replied: ''Never mind. Today I go back to Sri Lanka.''

The Asians, mainly Bangladeshis, Sri Lankans and Indians, live in Andalus after coming from the Azrak desert camps near the Jordanian- Iraqi border. For

many, it is a ''five-star'' camp, as one Bangladeshi described it, compared to the Azrak camps where they wait weeks for their turn to fly home.

The number of refugees at Andalus fluctuates daily between 2,000 to 3,000, according to camp official Abbadi. He said the camp, set up Aug. 28 with a capacity for 3,000 if 10 are kept in each tent, on one day had as many as 6,000 Asians.

To kill time, men walk aimlessly, sleep or sit in tents talking or playing cards. The women wash their clothes and talk.

But despite the organization evident at Andalus, there are problems. The ground is littered with garbage that did not make it to the trash bins and zinc-roofed latrines near the highway exude the stench of urine, which mixes with the smell of cooked rice and vegetables.

Refugees fill plastic containers from water tanks with faucets along the highway, or slosh water from the faucets over their dusty bodies.

Even once white tents are crusted brown with sand.

The cleanest part of the camp is the shower room area, built with cement blocks and covered with green plastic curtains. A camp official said they were built for the women, but have been untouched. The women prefer to bathe from the water tanks near the road while fully-dressed, he said.

#90275u1415 10/02/1990 ~United Press International

NEW YORK (OCT. 2) UPI - Besieged by demands for action after a long, violent summer, New York Mayor David Dinkins Tuesday unveiled a $1.8 billion ''battle plan against fear'' to take back New York City's crime-ridden streets with a massive army of new police.

The mayor's program called for hiring nearly 8,000 more police, bringing the nation's largest force to almost 32,000 officers - the highest in its history.

It also calls for a sweeping reorganiziation of the department, the first in decades, to emphasize community patrol.

Called ''Safe Streets, Safe City,'' the plan follows a summer of violence that saw the homicide rate soar to a record height. Eight children were slain and at least 15 more were wounded.

Calls for action reached their peak with the killing of a Utah tourist slain while trying to protect his mother from subway muggers.

Police brass said that once fully implemented by next October the program will

mean there will be one officer on foot patrol on every block in the 319-square mile city and an officer on every subway after school and at night.

The program also proposes major new spending for the city's overburdened jails and its courts and features a renewed effort to deter youth crime through special education, job training and recreation programs.

It will be paid for through a mix of property tax increases, a payroll tax on residents and commuters and a 25-cent surcharge on $1 lottery tickets sold in the city to finance the education-related portion of the plan.

''Fear is the ugliest of emotions,'' Dinkins said. ''Unchecked it may become the greatest criminal of all, robbing us of every freedom, crushing our birthright and burning our future before us. Today we present our battle plan against fear.

''With it as our guide, we will flood the streets with an army of police officers, men and women trained in a funadmentally different manner to reach into every corner of our communities to capture fear and lock it away,'' he said.

By all accounts, the mayor's plan - which requires council and state legislative approval - has turned out to be much larger than they ever expected.

It will more than double the number of city police on patrol each day by increasing the number of officers and civilians in the department and by freeing uniform officers from desk jobs and eliminating some elite units.

The effort also calls for beefing up security on the subways, placing transit police on subways after school and from 8 p.m. to 4 a.m.

The program would require all new police to be city residents to make sure they are more sensitive to community concerns and features a special effort to recruit minority officers.

#90275u1446 10/02/1990 ~United Press International

BELGRADE, YUGOSLAVIA (OCT. 2) UPI - Croatia sought Tuesday to cool tensions between Yugoslavia's two main ethnic groups, announcing a withdrawal of paramilitary forces from Serbian-dominated towns and an amnesty for Serbs who stole weapons from police stations.

Yugoslavia's eight-man federal presidency met in emergency session to discuss the 4-day-old crisis as thousands of Serbs in Serbia held a second day of anti-Croatian rallies. Militants began enlisting volunteers to defend Serbs in Croatia who declared autonomy from the republic's government.

The Croatian Interior Ministry said normalcy was returning to five Serbian-dominated towns where clashes erupted Friday, Saturday and Sunday between Serbs and paramilitary forces.

''The withdrawal of special police forces is underway and they are being replaced by regular police organs, which are in charge of those regions,'' a ministry statement said.

There was no independent confirmation of the pullouts.

The ministry urged Serbs to return weapons stolen from police stations during the disturbances, saying those who did would not be prosecuted.

''No one who returns weapons will be held responsible,'' it said.

The unrest, in which a paramilitary officer and several reporters were injured and large numbers of Serbs arrested, erupted when police tried to transfer reserve police weapons out of several towns dominated by members of Croatia's 600,000-strong Serbian minority.

The raids reinforced fears of persecution among Serbs, who for months have been inundated by anti-Croatian propaganda from Serbian leaders using nationalist appeals to move into a power vacuum left by the demise of 45 years of communist rule.

Contributing to the frictions have been belligerent anti-Serbian statements from the Croatian government of President Franjo Tudjman, which rode to power on a wave of Croatian nationalism in April in the republic's first free assembly polls since the end of World War II.

Serbs claim Tudjman plans to deprive them of their civil and human rights. Tudjman charges Serbs are being instigated by Serbia's communist regime, which has become stridently nationalist in a bid to survive Dec. 9 multi-party assembly elections.

Serbia opposes Tudjman's call for converting Yugoslavia from a loose federation of six republics of 23 million into a confederation of independent states. Croatians and other minorities fear Serbian domination.

The dispute has reignited hatreds between the 4.6 million Roman Catholic Croats and 8.5 million-strong Orthodox Serbian majority, which still remembers atrocities committed against it by a pro-Nazi puppet regime that ran Croatia during World War II.

The latest frictions on Monday prompted the Serbian National Council, which represents Croatia's Serbs and is based in the town of Knin, to declare autonomy, saying it was assuming political control of the republic's Serbian enclaves.

Witnesses said armed Serbian vigilantes were maintaining road and rail blockades Tuesday to prevent Croatian police from moving into the Knin area, the largest Serbian enclave in Croatia, and reasserting government authority.

#90275u1475 10/02/1990 ~United Press International

MOSCOW (OCT. 2) UPI - Soviet Premier Nikolai Ryzhkov and Lithuanian Vytautas Landsbergis began ground-breaking talks Tuesday to pave the way for formal negotiations between Moscow and Vilnius.

The two sides issued a one-page joint communique in which they pledged to reach a bilateral trade and economic accord by next year. They also set up a working group to address ''logistical concerns and procedural questions of future negotiations.''

''We would like to hope that this meeting marks a turning point in our relations,'' Landsbergis told reporters after the session. ''Further meetings will show if it is so.''

The initial meeting took place less than eight months after Lithuania declared independence in a defiant act that led Soviet President Mikhail Gorbahev to impose a seven-week economic blockade of the Baltic republic.

''We will have to cover a long road of similar meetings before we can begin official talks, but a first step has been made, and we didn't stumble,'' Landsbergis said.

Landsbergis, former head of the Sajudis nationalist group that took control of the Lithuanian Parliament in February parliamentary elections, said the two delegations had shown more willingness to compromise than he had expected. He did not elaborate.

The delegations, the joint communique said, gave the joint working group a

two-week deadline to develop ''concrete proposals'' for further high-level talks leading up to formal negotiations.

''The delegations have agreed that their further activities will be conducted according to bilateral trade and economic mutual agreements for the year 1991 '' the communique said.

Lithuanian Prime Minister Kazimiera Prunskiene, who also participated in the talks, said that ''such an (economic) agreement would create the conditions to escape from a blind alley.''

Prunskiene said she was hopeful another meeting of the Ryzhkov- Landsbergis delegations could be held in two weeks.

There was no immediate comment from Ryzhkov or other Soviet officials who joined what the official Tass news agency described as a ''consultative meeting.''

Lithuania, annexed by the Soviet Union in 1940, declared independence March 11 and insists that formal negotiations be conducted between two independent states, a condition Moscow has rejected.

''The current meeting cannot be regarded as the beginning of official negotiations because a joint protocol on its conditions has yet to be signed '' Lithuanian government spokesman Lenginas Vasiljauskas told Tass.

In early August Lithuania submitted a draft protocol of terms for official negotiations, but there has been no agreement.

#90275u1497 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - The United States put on a show of strength in the Persian Gulf Tuesday, sending an aircraft carrier into the dangerous waters for the first time in 16 years and staging a 15,000-Marine mock amphibious assault.

The moves were disclosed by the Pentagon only one day after President Bush, in remarks to the United Nations, offered new optimism that the crisis with Iraq could be settled without war.

''They're not conflicting signals,'' Pentagon spokesman Pete Williams said, when asked to reconcile the apparent discrepancy. ''Things like exercises ... are what you do to keep up the readiness of your forces.

''We exercise Marines in amphibious landings all the time ... that's not a political message,'' he added.

Williams said at a Pentagon briefing that the 4th Marine Expeditionary Brigade - a force of 15,000 Marines, mostly from Camp Lejeune, N.C. - was staging amphibious landings on a remote beach in the northern Arabian Sea.

He said 18 ships and 90 helicopters were involved in the exercise that began Monday and would continue through Friday.

Williams declined to identify the host country, but other defense officials who asked not to be identified said the Marines were staging the mock assaults on the beaches on southern Oman.

Williams said no reporters would be allowed to witness the amphibious assault exercise - believed to be the largest by Marines in more than a decade - because the host government did not want the American press there.

At the same time, the Pentagon disclosed that the Independence moved from the Gulf of Oman, through the Strait of Hormuz and into the Persian Gulf Monday night, making it the first carrier to enter the gulf since 1974.

A Pentaon statement said the carrier would remain in the gulf for a ''short period,'' and Williams declined to elaborate. The ship carries a crew of 5,000 and 75 combat planes including F-14 Tomcat and F/A-18 Hornet fighters.

Navy leaders refused to send carriers into the gulf during the escort operation involving Kuwaiti tankers in 1987, arguing the huge ships would be a large target in a small area and were at risk of being bottled up.

In seeking to defend the apparent change in tactics, a Navy spokesman said Tuesday that the carrier ''was highly defendable'' and indicated there was little risk to the ship.

Williams said the Independence was sent into the gulf to ''conduct normal operations'' and ''to provide an opportunity for the carrier battle group to become familiar with some of the unique operating conditions in the Persian Gulf.''

The Pentagon also said that the Independence also would ''provide a visible demonstration of the operational capabilities of a carrier battle group to our friends and allies in the region.''

Williams denied that the movement of the carrier into the gulf was intended to increase tension in the region, where more than 170,000 U.S. soldiers and sailors are facing off with Iraqi forces occupying Kuwait.

''Although the movement of one of our carrier battle groups into the Persian Gulf is unusual,'' Williams said, ''it is not unprecedented and is not meant in any way to increase regional tensions.''

The last American aircraft carrier to enter the Persian Gulf was the USS Constellation in 1974, while Iran was still a U.S. ally and the region was generally peaceful.

In May 1987, when Iraq was still at war with Iran, an Iraqi warplane hit the guided-missile frigate USS Stark in the Persian Gulf with two French-made Exocet missiles, killing 37 American sailors and injuring 21 others.

Iraq apologized, saying the attack was a case of mistaken identity.

Nearly a year later, in April 1988, the frigate USS Samuel B. Roberts hit an underwater mine in the gulf, causing major damage to the ship and injuring four sailors. The mine was believed planted by Iran.

The Roberts is back in the region, in the northern Red Sea, as one of the U.S. warships supporting Operation Desert Shield.

The Pentagon has refused to publicly disclose the number of U.S. forces or military hardware in the region other than to give general approximations.

In keeping with that policy, Williams said there are now more than 170,000 U.S. personnel in the region - including those on ships at sea. Last week, he said there were more than 150,000.

He also said the number of Iraqi troops in Kuwait and southern Iraq remained at about 430,000, the same number for more than a week and perhaps an indication that Iraq has stopped its military buildup in the area.

Williams also said a total of 26,806 reservists and National Guard members were called to active duty in the past eight weeks to support Operation Desert Shield, falling far short of the Pentagon's original estimate that 50,000 would be called by Oct. 1.

Williams said the military services found they did not need as many reservists as they originally thought.

#90275u1507 10/02/1990 ~United Press International

(OCT. 2) UPI - Stock prices surged Tuesday on major global exchanges as the price of oil fell, easing worries of higher interest rates and the likelihood of a recesssion.

Cash heavy investors searched out selected unvalued blue-chip stocks, which recently have fallen to their lowest level in years from Tokyo to New York sending key market indexes surging sharply higher in activity described as moderately active.

In Tokyo, on the world's largest stock market, investors enjoyed their largest single day gain in history.

Analysts in New York said stocks climbed as the price of oil fell sharply on spot markets following comments from leaders of Iraq and the U.S. that are said to be dovish on the standoff in the oil rich Persian Gulf.

Analysts said crude prices, which have surged more than 70 percent since Iraq invaded Kuwait on Aug. 2, took another hit from speculators in the crude oil pits when the world supply of oil appeared far from a supply squeeze.

The drop in oil prices, which is an indicator of inflation, in turn sparked rallies on stock markets around the globe, however, analysts warned the rallies may not last.

In New York, stocks climbed on the New York and American Stock Exchanges. The Dow Jones Industrial Average, which surged 63.36 points Monday, was ahead 28.22 points to 2544.06 around 1:45 p.m. EDT.

In Europe, stocks surged for the second consecutive trading sessions in London Frankfurt and Paris.

In London, the blue-chip Financial Times 100-stock index, which jumped 40.6 points Monday, gained another 27.7 points to 2,058.5.

Analysts in London said stocks, particularly blue-chips, were boosted by lower oil prices on world markets, but, pessimists noted the question of whether there would be a diplomatic solution in the Persian Gulf or whether there would be a worsening of tensions and possible war continued to hang over the market.

In Frankfurt, the German Stock Index, which surged 85.84 points Monday, gained 24.16 points or 1.67 percent to 1,444.89.

In Paris, the French CAC-40 Index climbed 32.13 points to 1,572.94.

In Asia, the Tokyo stock market, which had been suffering from its worst battering since October 1987, rebounded to post its largest daily advance ever as bargain hunting combined with good news concerning interest rates and hopeful signs in the Middle East.

The Nikkei Average, which plunged 761.64 points Monday, rocketed 2, 676.55 points - or 13.2 percent - to 22,898.41.

The surge was a record jump in both number and percentage, topping the previous mark of 2,037.32 points set Oct. 21, 1987, and a record 11.3 percent jump in prices in December 1949.

''The mood was incredible,'' said Chris Schreiber, a broker with New Japan Securities Co in Tokyo.

''Everybody had been down for months, but today (Tuesday) you got people clapping in the dealing room. In the international department they were telling jokes.''

''Roll out the superlatives,'' George Nimmo, a manager with SBCI Securities in Tokyo said. ''If we had not been up, we might have just as well packed up and gone home.

''Nobody is convinced that the market has bottomed out,'' said Schreiber. ''Nobody sees interest rates coming off in a big way. You are going to have to see a slowdown.''

''I think we have seen the bottom,'' said Nimmo. ''In September the stock market lost 15 percent. That was overdone on the downside.''

Elsewhere in Asia, stocks soared on encouraging news from the Persian Gulf on the Hong Kong Stock Exchange. The Hang Seng Index, which gained 30.44 points Monday, surged 114.22 points or 4 percent to 2,905.48.

In Singapore, stocks climbed on the Singapore Stock Exchange. The Straits Times Industrial Index, which gained 4.76 points Monday, climbed 33.77 points or 3.45 percent to 1,137.21.

''Investors were having a heyday in the market,'' one local Sinagpore analysts said.

Stocks also surged in Bangkok on the Thailand Stock Exchange boosted by the rises on other world markets and the easing of tensions in the Middle East.

The Stock Exchange of Thailand Index, which gained 12.83 points Monday, jumped 50.12 points or 7.7 percent to 704.51.

Stocks also climbed in Australia following the strong performance in Tokyo. The Sydney Sharemarket's All Ordinaries Index gained 20.4 points or 1.5 percent to 1,406.1.

In Wellington, New Zealand stocks climbed for their third consecutive session as the Barclays Share Price Index surged 32.91 points or 2.2 percent to 1,512.14.

Investors also sent stocks sharply higher in Taipei and Manila.

#90275u1511 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - The ''green revolution'' of high-yield varieties of wheat and rice that staved off famine in the developing world has a little-noticed but increasingly important ally - the potato.

Domesticated some 5,000 years ago in the high plains of the Andes, the potato is becoming a major source of food and income in the tropical world, home to three-fourths of the world's more than 5.1 billion people.

''In Asia and Africa, potato production is increasing faster than any other food crop. Indonesia is doubling production every seven to 10 years,'' said Richard Sawyer, director general of the International Potato Center in Lima, Peru.

''In all, the potato has become the most important diversification crop for those countries reaching self-sufficiency in rice, such as Bangladesh, the Philippines and Vietnam.''

Sawyer, other scientists and food industry experts celebrated the virtues of the potato at a two-day symposium, ending Tuesday, at the Smithsonian Institution. Scientist Carlos Ochoa described the tuber as the world's most important food crop after wheat, corn and rice.

Potatoes also are a profitable export item for U.S. firms, who have found a booming market in Japan and other Asian countries for frozen fried potatoes. About 150,000 metric tons, or 165,000 short tons, were sold in Japan last year.

One-third of the world potato crop is grown in developing nations. Yields have doubled since 1950 and production has tripled, researchers say.

Potatoes are a valuable crop in developing nations because they can be grown in rotation with rice and wheat, Sawyer said.

''The potato fits well into cereal-based farming systems because the plants don't have to grow to maturity,'' Sawyer said in a lecture at the symposium. ''Harvest time can be when the rice crop has to be planted.''

Sawyer and anthropologist Robert Rhoades said about 45 percent of potatoes grown in the developing world are produced in the lowlands. Researchers were surprised in the early 1970s to see the potential for potatoes in the tropics. Edible potatoes can be grown in 40 days, half the time needed for cereal crops.

With food demand rising due to rapid population growth in the developing nations but little highly productive new land available, farmers will have to boost their yields on the land now available, Sawyer said.

''This means a change from extensive agriculture to intensive agriculture,'' he said. ''This means increasingly a change from cereal production to tuber and vegetable production, since one can produce more calories and high-quality

protein per square meter per day with potatoes than with any other major plant food.''

One major obstacle to potato production in developing nations has been the high cost of seed tubers - often half the entire cost of the crop. The International Potato Center, a part of a worldwide network of agricultural research centers, is reducing that barrier through use of tissue cultures and development of so-called true seed.

The world produces more than 299 million metric tons of potatoes each year from 20 million hectares, or 329 million short tons from 50 million acres. U.S. production in 1989 was projected as 370 million hundredweight.

ORLANDO, FLA. (OCT. 2) UPI - The average price of gasoline nationwide surged 3.6 cents a gallon during the past week, recording the steepest rise in five weeks, the American Automobile Association said Tuesday.

The average price of a gallon of regular gasoline sold at self- service pumps nationwide rose to $1.346 a gallon, up from $1.31 a gallon last week, to the highest level since Thanksgiving 1981, when the price hit $1.349 a gallon.

The average price is now 27.1 cents a gallon higher than on Aug. 1, the day before Iraq invaded Kuwait and triggered the recent runup in fuel prices.

The average prices for mid-grade and premium gasoline rose 3.7 cents a gallon over the past week, to $1.428 and $1.513, respectively, AAA said.

The AAA said prices rose in all parts of the nation during the past week. The steepest hikes were seen in the Great Lakes region, followed by those in the Mid-Atlantic, Southeast and Midwest, AAA said.

#90275u1547 10/02/1990 ~United Press International
(OCT. 2) UPI - Iraq is offering to destroy all its weapons of mass destruction if other nations in the region, including Israel, do the same. The announcement from Baghdad is the latest in a number of apparently conciliatory

moves. They follow the announcement on Sunday that Iraq is willing to consider a French peace plan to end the Persian Gulf crisis. There is NO immediate reaction from any other nation to the Iraqi offer. .

The massing of arms close to Iraq continues with word that the conventionally powered aircraft carrier Independence is now operating inside the Persian Gulf. It has a crew of five-thousand and carries 75 combat aircraft, including FA-18 Hornets. The Independence is the first U-S aircraft carrier ordered into the Gulf since 1974.

One of two Americans believed aboard a domestic Chinese airliner is known to have survived the fiery crash of the Boeing 737 in Canton. It had been hijacked earlier today and crashed in a fireball as the crew allegedly fought with the air pirates. Chinese authorities report 120 confirmed deaths in the tragedy while at least 100 survivors are reported. The hospitalized American is identified as Erin Thomas, a woman believed to be from Oklahoma.

Efforts to reach a settlement between rival black groups in South Africa have been dealt a blow with word that Zulu chief Mangosuthu Buthelezi won't meet with Nelson Mandela, head of the rival African National Congress. The Friday meeting also is to include leaders of five other black homelands in South Africa. Urban violence in South Africa has claimed at least 700 lives since August.

#90275u1550 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - The decision by conservative Rep. Newt Gingrich, the No. 2 House Republican leader, to oppose the administration-backed budget agreement not only endangers the plan but could pose a threat to the GOP's old guard leadership, sources said Tuesday.

White House officials were described as ''very upset'' with Gingrich, R-Ga., not only for his decision to oppose the package but the ''very vocal'' way he chose to do so.

Gingrich, who had participated in earlier negotiations on the $500 billion, five-year deficit-cutting plan, announced Monday that he would oppose the final version of the package worked out by top congressional and administration officials.

He was joined in the defection by five assistant leaders who normally would be expected to work at securing GOP votes for the administration.

Gingrich caused a stir Sunday when he skipped the White House news conference where President Bush, surrounded by the other House and Senate leaders, announced agreement on the budget package.

Gingrich's defection left House Republican leader Robert Michel, of Illinois, with the task of rounding up support for the controversial package of spending cuts and tax increases.

Michel said Tuesday he was ''disappointed when the leadership can't all be working together. We're a minority party. We can't afford to be fractured.''

''I just don't think it reflects well on our party, particularly when we have our president on the line,'' he added.

Others suggested the split could endanger Michel's position and possibly lead to a Gingrich-Michel fight for the top leadership post when the Republicans gather in December to organize for the new Congress.

''At the very least this is a fight for control over the direction of the Republican conference in the House,'' said a Democratic leadership aide.

He said the outcome will determine ''whether the old guard is going to be totally swept away by the hezbollah.''

Gingrich's allies denied he was maneuvering for his own advantage.

Rep. Vin Weber, R-Minn., said Gingrich ''is not dumb enough to pick a fight with the president of the United States ... to advance his own interests.''

Rep. Steve Gunderson, R-Wis., said ''everybody is working very hard to keep this an orderly, family dispute.''

''People should not in any way, shape or form see this as a contest between Gingrich and Michel. That is clearly what the Democrats are trying to make it and what Newt's opponents are trying to make it for their benefit,'' Gunderson said.

Others declined to comment on whether Gingrich might be ousted from the leadership in December as a result of his defection.

In his first bid for a leadership post in March 1989, Gingrich won a surprising and narrow victory for the post of assistant House Republican leader, defeating a main-stream candidate backed by Michel.

Previously, Gingrich had developed a reputation as a conservative firebrand whose primary function was to attack Democrats. When Republicans elected him to the leadership members of both parties questioned whether he could moderate his style and learn to work effectively with the Democratic leadership as well as the administration.

A few months after his elevation Gingrich was rebuked by Michel for publicly disparaging a bipartisan effort to draft a campaign finance reform bill. That

effort subsequently collapsed.

#90275u1554 10/02/1990 ~United Press International

MILWAUKEE (OCT. 2) UPI - A doubling of the beer tax, as proposed in the federal budget compromise, might flatten anticipated growth in the brewing industry and will be felt more by smaller breweries, an industry analyst said Tuesday.

President Bush's proposed deal with congressional leaders would double the tax to 32 cents a six-pack, an increase The Beer Institute, a trade group, estimates would lead to a 4 percent drop in sales.

Breweries fought hard against the increase, with the nation's largest brewer, Anheuser-Busch Inc., starting an advertising campaign, ''Can the Beer Tax,'' that included a petition drive.

''It looks once again that the beer drinker is going to shoulder the burden of the deficit-reduction compromise,'' said Steven Forsyth, communication director at Miller Brewing Co. of Milwaukee.

Anheuser-Busch said only that it would continue to ''seek a fair deficit-reduction plan.''

Gary Langbaum, a brewing industry analyst at Kemper Financial Services, Inc., of Chicago, said in a telephone interview the increased tax could flatten growth.

''Without the increase, industry growth probably would be up somewhat next year, maybe 1 percent,'' Langbaum said. ''Maybe this takes it to flatish, but not severely damaging the rate of growth as some people are projecting.''

The nation's three largest breweries, Anheuser-Busch, of St. Louis, Miller Brewing and Adolph Coors Co., of Golden, Colo., will pass off the increase to consumers and continue heavy marketing, Langbaum said.

However he said smaller breweries like Stroh Brewery Co. of Detroit and G. Heileman Brewing Co. of La Crosse, Wis. could feel the effects of the higher tax.

''It will hurt the smaller ones more,'' Langbaum said. ''They are not going to be able to compete with the larger ones if the larger ones opt to continue their strategy on marketing.

''That's what's going to happen. The larger brewers will take this as a cost, pass it to the consumer and continue on the marketing side. The smaller guy will have trouble competing at that level.''

Stroh, in a statement, said it believed the increased price would help sales of its lower-cost beers Old Milwaukee, Schlitz and Schaefer.

''Consumers seeking alternatives to the higher prices imposed by the excise tax increase will still be able to afford'' those beers, the company said.

Officials at Heileman were not immediately available for comment.

Employment at large breweries, which are heavily automated, will not be adversely affected, Langbaum said. However, there could be some reductions in the workforces at smaller breweries and distributorships.

''Of the majors it will probably be marginal if at all,'' he said. ''The smaller guy, the guy who is losing volume already, probably is making cuts already. And distributors might feel inclined to cut their cost.''

''I would expect the companies to raise prices before the excise tax goes into effect so that the consumer would not see one big price increase,'' Langbaum said. ''I think you'll see a small increase before the end of the year, then another one when the excise tax goes up. Then again in February when normal prices go up. That way the consumer will not be seeing sticker shock.''

(OCT. 2) UPI - The Supreme Court should be up to its full complement of nine justices later today with the expected confirmation of New Hamsphire jurist David Souter. The Senate Judiciary Committee approved his nomination to the high court on a 13-1 vote last week and full Senate proceedings begin today. Souter will become the 105th justice to serve on the nation's highest court.

The European Community is giving a warm welcome to East Germans coming into the 12-nation organization. The E-C says in statement that the unification of Germany- quote- ''opens the door toward the unity of all of Europe'' and ''enriches the identity of the Community as a whole.'' The statement comes just hours in advance of the merger of East and West Germany.

Top-level Soviet and Lithuanian delegations opened talks in Moscow today on conditions for formal negotiations on future relations between the two sides. Lithuania- annexed by the Soviet Union in 1940- declared independence from Moscow last March and insists that any formal negotiations be conducted between two independent states. The Kremlin says negotiations should be between the Soviet Union and one of its 15 republics.

#90275u1571 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - The Senate Foreign Relations Committee Tuesday unanimously approved the treaty providing for the reunification of Germany.

A spokesman for Committee Chairman Claiborne Pell, D-R.I., said he hoped the 17-0 vote would pave the way for consideration of the treaty by the full Senate on or before Oct. 3, when the division of Germany officially ends.

The treaty was signed Sept. 12 by the four occupying powers from World War II, the United States, the Soviet Union, Great Britain and France, as well as West and East Germany.

Key provisions end four-power rights over Germany and Berlin and confine the united Germany to the borders of the two current German states.

Soviet forces would have to withdraw from what is now East Germany by 1994, while U.S., British and French troops would remain in Berlin through 1994 at the request of the Germany government.

The united Germay would remain in NATO, but following the withdrawal of Soviet troops, the treay would bar NATO from stationing nuclear weapons or non-German NATO forces in what had been East German territory.

The Germans also renounced aggressive war and any intention to manufacture, possess, or control nuclear, biological or chemical weapons, and pledged to reduce their combined armed forces from the current 600,000 to 370,000.

#90275u1601 10/02/1990 ~United Press International
WARSAW, POLAND (OCT. 2) UPI - Thousands of East Germans crossed the Polish border for last-minute bargains as reunification approached amid concerns in Poland about the economic powerhouse arising on its Western flank.

Nearly 80,000 East Germans crossed the Oder-Neisse in the Szececin area on the Baltic coast during the weekend, the Polish news agency PAP reported.

They bought up food, denim clothing, wicker baskets, kitchenware and bicycles. Some purchased huge quantities of butter, sugar and meat, while car owners filled up their tanks.

In Warsaw, some Poles expressed concern about the new economic power on their Western border.

''Today, just like Japan, Germany - because of its economic power - is more dangerous than the Wehrmacht (the German army in World War II) or than Japanese batallions,'' said Marian Podkowinski, a writer and expert on German issues.

''We see that both of these countries are coming back to the international arena, not as military but as economic powers. For economically weak Poland, this is as dangerous as German troops,'' Podkowinski said in Trybuna, the newspaper of the former Polish Communist Party, which now calls itself Social Democracy.

Podkowinski said he was concerned especially about the reaction of the

population of the former East German state.

''In East Germany, nationalistic tendencies can grow, because, in that area, people who for 40 years had to keep silent now will be allowed to speak out,'' he said.

Following Germany's defeat in World War II, it was forced to give up East Prussia and areas south of the Oder and east of the Neisse river to which Poland had no real historical claim. Poland lost 20 percent of its pre-war territory to the Soviet Union in the east.

Both Germanys gave formal assent to the current German-Poland border in the agreement that led to unification, but some Poles remain uneasy.

''I would like to be a bad prophet,'' former Prime Minister Mieczyslaw Rakowski said. ''But I do not exclude the appearance, toward the end of this century, of the (renewal of) demands concerning our western territories.''

The newspaper Gazeta Wyborcza reported that some 800,000 East Germans crossed during the past two weeks to the border town of Zgorzelec, which has 37,000 inhabitants. The influx was equal to the total number of East Germans who visited Poland during the last year.

The Zgorzelec marketplace was filled to overflowing with vendors selling everything from panties to Danish deep freezes.

Two young engineers from the Famango engine factory sold a carload of Christmas tree ornaments in one day.

As of the moment of unification at midnight, Poles were to need a visa to enter the new unified Germany. Previously, Poles needed only a valid passport to travel to East Germany.

#90275u1619 10/02/1990 ~United Press International

CHICAGO (OCT. 2) UPI - A top executive of the Chicago Board of Trade said Tuesday many decision-makers mistakenly believe the United States occupies a dominant position in the financial markets around the world.

''How else can you explain the proposals coming from Washington that have been put to the financial community throughout the past year?'' CBOT President and Chief Executive Officer Thomas Donovan said, ''Proposals such as a transaction tax on every futures and securities trade, an 11-cent tax on every futures trade and the Stability and Fairness Act, which sounds good until you look past the title.''

Donovan, speaking to the annual conference of the Financial Executives Institute, cited the growing threat of international competition to U.S. financial markets.

He said the growing presence of foreign markets has made a great impact on the futures industry. While the CBOT expects to trade around 160 million contracts this year, an increase of more than 90 percent over 1985, the U.S. market share of worldwide futures trading is only 61.5 percent, down from 81.9

percent five years ago.

''But losing some market share is not as bad as it seems because some nations are coming to us to learn and other nations are breaking free of the reins of communism and exploring the virtues of free market economies,'' Donovan said. ''Because these countries are finding that a true free market must include a futures market, our future is bright.''

He said foreign governments are taking steps to free their markets from heavy regulatory burdens, and the Bush administration is out of step with the rest of the world.

''On the very same day the Japanese government called for reducing its transaction tax by 90 percent, President Bush proposed an 11-cent tax on every futures transaction,'' Donovan said.

He also chided federal officials for proposals to transfer jurisdiction over stock index futures - now regulated by the Commodities Futures Trading Commission - to the Securities and Exchange Commission, saying the move would provide foreign competition with a competitive edge.

''America's financial industry is not opposed to all regulation, but we want regulation that is fair, that helps us protect our customers, and most of all that still allows us to be competitive,'' Donovan said. ''We don't want regulation that will stifle our growth and essentially make our competitors more attractive to our customers.''

#90275u1621 10/02/1990 ~United Press International

UNITED NATIONS (OCT. 2) UPI - Saudi Arabia, in a clear rebuttal to French President Francois Mitterrand's initiative linking the Persian Gulf crisis to the Arab-Israeli conflict, said Tuesday he rejected any ''alternative'' plans to end the Iraqi occupation of Kuwait.

''There is no need for vacillation between word and deed, or contradictions between declaration and implementation,'' the Saudi foreign minister, Prince Saud Al-Faisal, said in a speech to the U.N. General Assembly.

''There is no place for alternative proposals, or for circulating initiatives which belong to the arena of wasted time,'' he said.

U.N. resolutions condemning the Aug. 2 Iraqi invasion of Kuwait demand the unconditional withdrawal of Iraq from the occupied emirate.

But Mitterrand proposed last week to resolve the crisis in four stages, beginning with the withdrawal of Iraqi trooops from Kuwait, restoration of sovereignty to that country and the release of hostages. He said ''everything

becomes possible'' after the first stage.

The French leader called for free elections to decide the future of the country, reconciliation among Arab nations, an international conference on the Middle East and disarmament for region's countries.

President Bush, addressing the General Assembly Monday, also appeared to tie the resolution of the gulf crisis with Mitterrand's suggested idea to link it with the Israeli-Arab conflict.

The U.N. Security Council swiftly condemned the invasion, demanded Iraq's withdrawal and ordered Aug. 6 a worldwide trade and arms embargo on Iraq. It added an air traffic ban on Sept. 25.

Al-Faisal said a ''decisive judgement'' against Iraq depends on a proper choice of a solution that ''cannot be complete except by preventing the aggressor from reaping the fruits of aggression.''

He said a total of 26 countries have come to assist Saudi Arabia to halt the advance of Iraqi forces to Saudi oilfields.

''We have assured that the presence of sisterly and friendly forces on Saudi territory is a temporary one,'' he said. ''It was in response to our request.''

He said the invasion of Kuwait took his government by ''surprise'' and the situation in the Persian Gulf teetered between the ''drums of war and the bells of peace.''

Britain, France and the Netherlands have sent ground troops and naval ships to the area to join the U.S. forces. In addition thousands of Arab soldiers were sent from Egypt, Syria and Morocco.

The Saudi government said it will contribute at least $12 billion for the upkeep of the U.S.-led multinational force in the gulf and give financial compensations to countries affected by anti-Iraq U.N. sanctions such as Turkey Egypt and Jordan.

Al-Faisal said his government plans to give the same compensations to Syria, Lebanon, Pakistan, Bangladesh, Somalia, Djibouti and ''many other countries proven to have suffered.''

#90275u1635 10/02/1990 ~United Press International

BERLIN (OCT. 2) UPI - East German Prime Minister Lothar de Maiziere bid farewell Tuesday to the East German state in a televised speech hours before the country was to cease to exist.

East Germany will be absorbed by its powerful neighbor West Germany at the stroke of midnight Wednesday.

''I know it is unusual that a state voluntarily bids its farewell from history '' de Maiziere said, ''but just as unusual was the division of our country.''

In his final act as head of government, De Maiziere was to deliver a speech at an official ceremony Tuesday night at East Berlin's 19th century Schauspielhaus concert house.

The East German state will fade into history to strains of Beethoven's Ninth Symphony performed by Leipzig's Gewandthaus Orchestra.

''We are leaving behind a state which called itself democratic without being democratic,'' de Maiziere said, referring to his country's formal name, the German Democratic Republic.

But he warned German unity would not be fully accomplished just because East Germany disappears from the map. ''It also has to be desired in the heart, he said.

The prime minister acknowledged the fears many his countrymen have about the future. Suddenly forced to compete with the capitalist West, East Germany's inefficient state industries are in crisis and unemployment has risen sharply in recent months.

''But we have the advantage in knowing we have a strong partner (West Germany) on our side,'' de Maiziere said. ''Our problems are minor when compared with the living standards of our neighbors in Eastern Europe.''

De Maiziere paid tribute to the citizens groups who led the push for democratic change in East Germany in recent years.

''They were able to enforce freedom because they had freed themselves from fear,'' he said.

#90275u1644 10/02/1990 ~United Press International

PEORIA, Ill. (OCT. 2) UPI - Members of three United Auto Workers locals warned Caterpillar Inc. dealers Tuesday that relations between the union and the company's upper management are deteriorating.

UAW locals from Pontiac, Decatur and Peoria handed out leaflets to dealers attending a Peoria convention.

''We at one time felt we were on the road to improving relations, but it appears now that top-level management would rather fall back to an adversarial

position,'' the UAW statement read.

The union said it has no argument with the dealers, but wanted to warn them about the situation.

UAW Local 974 President Jerry Brown of Peoria said the company's decision to fill janitorial positions with non-union personnel brought the situation to a head. He said UAW members had filled those jobs since 1947.

The UAW and Caterpillar are in the final year of a three-year contract. A bitter strike marred contract talks in 1982, but agreements were reached in 1985 and 1988 without a walkout.

#90275u1697 10/02/1990 ~United Press International

(OCT. 2) UPI - At least two Americans were aboard a hijacked Chinese jetliner that crashed on landing in Canton, China, today. At least 120 people died. Official reports say the Boeing 737 slammed into an empty jetliner and another loaded with passengers on the runway and burst into flames. One Westerner says ''it was just a crematorium.'' At least one of the Americans was among the 100 survivors.

The United States ordered an aircraft carrier into the Persian Gulf today for the first time since 1974. The U-S-S Independence carries a crew of about five-thousand and some 75 combat planes, including F-14 Tomcat and F-A-18 Hornet fighters. Navy leaders in the past had argued that the huge ships would be a large target in a small area and were at risk of being bottled up.

Germany becomes a unified state at one minute after midnight, German time, for the first time since Hitler's Third Reich was crushed and quartered by the Allies. Economically devastated East Germany effectively will be absorbed by the hugely prosperous western Federal Republic with the pealing of a bell cast in the image of America's Liberty Bell.

Economists expect the Federal Reserve Board's powerful policy-making committee will move to lower interest rates after the agreement to slash the federal budget becomes law. The Federal Open Market Committee panel met today, but its final decision will be kept secret until after the next scheduled meeting on November 13th.

New York Mayor David Dinkins today unveiled his long-awaited anti- crime plan. Dinkins labeled the plan a ''battle plan against fear.'' It calls for a massive one-point-eight-BILLION-dollar program that will include hiring nearly eight-thousand additional police over the next 19 months.

-30- 1917

#90275u1707 10/02/1990 ~United Press International
(OCT. 2) UPI - Authorities in Brentwood, Tennessee, say a tractor-trailer rig on its first run plowed into two parked passenger buses on Interstate 65 early today, killing one person and injuring at least 14. Six of the injured were listed in critical condition. One of the buses and the tractor- trailer rig caught fire.

A judge in Philadelphia ordered Temple University faculty members to end their 29-day-old strike and return to classes tomorrow while contract talks continue. The walkout has brought daily protests from many of the university's 34-thousand students who were in danger of losing a semester's classes.

Hungary's prime minister hints that he'd like to see his country join NATO... and withdraw from the Warsaw Pact if the organization is NOT abolished by the end of 1991. Jozsef Antall spoke after the Council of Europe's Parliamentary Assembly urged Hungary to become the first former Eastern European country to join the group.

In New Delhi, fierce clashes police and demonstrators over a controversial federal job program marred today's commemoration of the birth of India's independence leader- Mohandas ''Mahatma'' Gandhi. The violence came at the end of a massive demonstration of about 100- thousand protesters when police opened fire on a crowd throwing stones at them. Three people were killed in the clash.

#90275u1715 10/02/1990 ~United Press International
WASHINGTON (OCT. 2) UPI - Up to 20 percent of disinfectants on the market may not kill germs as advertised because the Environmental Protection Agency does no independent testing to verify manufacturer claims, congressional investigators said Tuesday.

The investigators told Congress the EPA's regulatory program was ''a standing joke'' within the industry because agency officials rely solely on laboratory testing data supplied by manufacturers to determine if a disinfectant is effective.

The joke, the investigators said, is that when testing produces inconsistent findings, some companies withhold data that shows their disinfectants do not work and give the EPA only positive results.

''We attended (industry) conferences where it was a standing joke that you only submitted data that showed your product was effective,'' said Richard Hembra, an investigator with the General Accounting Office, the auditing arm of Congress. ''In general, the view is it's a widespread practice.''

As a result, Hembra said hospitals, restaurants, schools and consumers have no

assurance that EPA-approved disinfectants will adequately clean medical instruments, bathrooms, food preparation tables and other areas possibly carrying disease-causing germs.

''Our work shows that EPA does not know whether disinfectants work,'' he told a House Government Operations Subcommittee on the Environment. ''Although the true extent to which ineffective disinfectants are marketed is unknown, evidence from the EPA, the states, and others indicates that up to 20 percent of disinfectants on the market may be ineffective.''

Hembra said the public health impact of disinfectant failure is not clear, but he noted federal studies show 5 percent of all hospital patients get infections after being admitted. He said research has linked some of those infections - including fatalities - to contaminated medical instruments.

EPA officials acknowledged regulatory lapses, but said only a ''small number'' of the 8,000 EPA-approved disinfectants on the market pose a potential health problem due to ineffectiveness.

They also said hospitals routinely take measures to assure disinfectants are applied in concentrations and amounts sufficient to kill germs.

''(Hospital officials) rarely cite concern over the efficacy of disinfectant products as a likely factor in the occurrence of infection, '' said Linda Fisher, assistant EPA administrator for pesticides and toxic substances. ''The agency believes the public can have confidence in hospital infection control programs.''

At the same time, Fisher expressed concern that disinfectants - which are classified as pesticides - may pose toxic hazards greater than previously believed.

She said a preliminary review of toxicological data raised questions about 600 EPA-approved disinfectants that now are undergoing more intensive examination.

In addition, Fisher said the EPA's initial request for toxicological data had resulted in another 2,500 products being voluntarily taken off the market, suspended by the EPA or otherwise removed from sale.

While all pesticides undergo review for toxicity, disinfectants are unique in that the EPA requires manufacturers to submit data proving that their products work as advertised.

Hembra said the EPA in the early 1980s did its own laboratory work to determine if disinfectants were effective, but that the agency's independent testing program was canceled in 1982 due to budget pressures.

He recommended the agency resurrect its testing program, calling it the only

way EPA can determine whether manufacturers are manipulating effectiveness data. ''Without an independent testing program, you have nothing,'' he said.

#90275u1753 10/02/1990 ~United Press International
JERUSALEM (OCT. 2) UPI - Israeli soldiers killed three Palestinians Tuesday in the West Bank town of Jenin, and the military continued its gradual process of resuming formal education in the Israeli-occupied territories with the reopening of Bethlehem University.

A lower level of violence had prevailed in the occupied territories in recent months, prompting Israeli authorities to open two smaller West Bank colleges this summer. The military closed all colleges and universities in the territories a month after the Palestinian uprising began in December 1987, saying they were centers of unrest.

But the relative calm and cases of few deaths in recent months in the occupied territories was shattered Tuesday by the slayings in West Bank town of Jenin and the death of a fourth Arab at a Jerusalem hospital of wounds suffered during a clash with soldiers last week.

Military sources said soldiers in Jenin killed a 20-year-old Palestinian wanted by security forces - and identified by Palestinian sources as an escaped inmate - when he tried to escape attempts to arrest him.

Violent demonstrations erupted in the West Bank town in the wake of Maher Aqel's death during which Israeli soldiers shot and killed two Palestinians, Palestinian sources said. The military said it was investigating the two other deaths.

Since the start of the nearly 34-month-old Palestinian uprising at least 684 Palestinians have been killed by Israeli soldiers or civilians.

In the West Bank town of Bethlehem Tuesday, Bethlehem University became the first four-year university to open. The university is considered a test case for resumption of classes at other universities, said Musa Darwish, a Bethlehem University spokesman.

''The school opened without any conditions, but we are aware that if something happens, the authorities will close the university,'' he said. ''But what we are seeing is a willingness to open the universities.''

The military closed the Roman Catholic university, run by the Franciscan order in October 1987 for three months after a violent clash between Israeli soldiers and students that left one Palestinian dead. The closure order was extended when all colleges and universities in the Israeli-occupied West Bank and Gaza Strip were shut in January 1988.

Elementary and secondary schools also were closed for much of the first two years of the uprising. The schools were gradually reopened this year.

During the university's closure, students studied unofficially and illegally in churches, hotels and clandestine classrooms, but degrees and classroom time from this period are not recognized by the authorities. About 1,400 students registered for classes at Bethlehem University for this fall.

''They are determined to to continue learning. The students will do their best to jump over the damage of three years of closure,'' Darwish said. ''I hope the soldiers will stay away from the campus to create a good climate to study in and to avoid provoking conflict.''

In the Arab neighborhood of Isawiyah Tuesday, police fired tear gas and rubber bullets to disperse an estimated 200 Palestinian youths in the latest violence in East Jerusalem. No injuries were reported.

In the Gaza Strip, Palestinian sources said soldiers shot and wounded one Arab during confrontations in the area of Khan Younis while masked men burned an Israeli bus after forcing the driver and Gazans on their way to jobs in Israel out of the vehicle.

-30- 3718
#90275u1760 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - Supplies of most fuels are expected to be adequate although more expensive, this winter, in the wake of the Persian Gulf crisis, a panel of energy experts said Tuesday.

No shortages are expected in supplies of gasoline, jet fuel and heating oil. But supplies of propane already are at levels lower than last year and could present a ''potentially serious problem'' this winter, said Calvin Kent, of the federal Energy Information Administration.

Propane is used in great amounts by farmers and other food producers to dry crops and as a chemical feedstock. It is also used for heating and cooking.

''If we have a below average winter I think it is entirely possible to have a (propane) shortage,'' Kent said during a winter fuel outlook sponsored by the Petroleum Industry Research Foundation and the Department of Energy.

The Farmers Almanac has forecast the coming winter to be colder than last winter.

The EIA said propane stocks, as of Sept. 21, stood at 53 million barrels, down from 60.4 million barrels one year ago.

Heating oil stocks, however, remain abundant and no shortages are expected, Kent said.

Crude oil stocks have increased from year-ago levels to 367.4 million barrels from 334.9 million barrels and are adequate. The agency said gasoline stocks appear adequate at 222.2 million barrels, down from 227 million barrels a year ago.

Kerojet fuel stocks, used as aviation fuel, ''bear watching,'' Kent said. Supplies of kerojet fuel stood at 43.8 million barrels at Sept. 21, up from 41.1 million barrels a year ago.

''The supply is not as adequate as we would like,'' he said.

Refinery capacity is about the same this year while refinery utilization is running higher than year-ago levels.

The Persian Gulf crisis, which erupted following Iraq's Aug. 2 invasion of Kuwait, is expected to creat a shortfall of about 1 million barrels of oil daily worldwide by the end of the fourth quarter, Kent said.

''Anytime you have a shortfall there is a tendency for people to stockpile,'' he said, adding that this is one cause of rising oil prices.

John Lichtblau, chairman of the Petroleum Industry Research Foundation, said oil prices are expected to rise substantially should war break out in the

Middle East. Oil prices have more than doubled to $37 since the invasion.

''We have heard prices could reach $60, $65, even $100 a barrel,'' he said of various scenarios of wartime oil prices.

''It's very difficult (to predict),'' he said. ''It depends on how long a war would last. The initial impact would be a sensational oil increase. When the crisis is over the first thing you would see is a substantial decline.''

Richard Schmalensee, a member of the Council of Economic Advisers, said increased oil prices are likely to further slow the already sluggish U.S. economy.

Higher oil prices would force the United States to pay more for imports, reduce real income and consumption spending and contract already tight credit, he said.

''There is a wide consensus that increased oil prices would temporarily increase inflation and slow economic growth,'' he said.

-30- 3386

#90275u1776 10/02/1990 ~United Press International

NEW YORK (OCT. 2) UPI - A federal judge decided Tuesday to hear arguments about a number of crimes prosecutors claim fallen financier Michael Milken committed - but has not confessed to - before she sentences him on crimes he has admitted.

The hearing, to begin Oct. 9, will focus on four charges, including insider trading and stock manipulation, in the government's presentencing report, which accuses the former junk-bond king of a web of crimes far beyond those he has admitted.

The hearing will mark the first time witnesses against Milken will testify publicly in the case.

Milken, the former head of the high-risk, high-yield bonds at Drexel Burnham Lambert Inc., has pleaded guilty to six felonies, including conpsiracy and mail fraud. The plea-bargain agreement reached with the government allowed him to avoid the toughest charges in a 98-count indictment he faced.

The list of possible government witnesses at the hearing includes Ivan Boesky, the former Wall Street arbitrageur turned government informant. Assistant U.S. Attorney John Carroll said he had not decided whether Boesky will in fact be called to the witness stand.

The government's presentencing memo, released publicly last week, accuses Milken, 44, of committing a three-year string of crimes with Boesky and

insider-trading schemes.

U.S. District Court Judge Kimba Wood has said she wants to limit the hearing to two weeks and to restrict each side to presenting 20 hours of testimony.

Arthur Liman, Milken's defense attorney, who has claimed the memo is ''grossly distorted,'' objected that he cannot fully refute prosecutors' claims nor cross-examine witnesses in that limited a time period.

The judge, who wants to use the allegations of other crimes to evaluate Milken's character, told Liman she wants ''as full a picture as you can present in the time available.''

The government said it will focus on four transactions involving MGM/UA Entertainment Co., Wickes Companies Inc., Caesars World Inc. and Storer Communications Inc.

According to the government, Milken gave Boesky confidential information on a proposed takeover of MGM by Turner Broadcasting System. Boesky then bought more than $3 million worth of MGM stock, and the two men secretly agreed to share the profits or losses, the government charged.

By doing so, Milken created ''false demand and support for MGM stock and ... he misappropriated information from Turner and MGM to generate illegal trading profits,'' the government memo charged.

In the Wickes case, Milken and Boesky manipulated stock prices on behalf of the California-based home products company that was a Drexel client, the government charged.

Milken also had Drexel use his personal retirement account to trade Caesars securities and earned a profit, even though Drexel's role in advising Caesars limited its trading for its own account, the government said.

Details of the Storer transaction were deleted from the public version of the government memo, which was edited to remove names of unindicted co-conspirators.

However, Lowell Milken, Milken's brother and former aide at Drexel, has since dropped his objections, so prosecutors will be able to release a fuller version of the Storer deal, attorneys said.

Criminal charges against Lowell Milken were dropped as part of his brother's plea bargain.

Michael Milken, who pleaded guilty in April, originally was scheduled to be sentenced Oct. 1. He faces a maximum possible sentence of 28 years in prison.

Boesky pleaded guilty to one felony count and agreed to pay $100 million in fines and penalties. In 1987, he was sentenced to three years in prison and was released from a Brooklyn, N.Y., halfway house last spring.

As part of his plea bargain, Milken, who earned as much as $550 million a year while at Drexel, has agreed to pay $600 million and to cooperate with the government after his sentencing.

Milken's attorney has asked that he be sentenced to probation and community service.

Drexel, citing liquidity problems, filed for federal bankruptcy protection in February.

#90275u1792 10/02/1990 ~United Press International

CINCINNATI (OCT. 2) UPI - A museum curator, testifying Tuesday at the obscenity trial of an art gallery and its director, compared Robert Mapplethorpe to Vincent Van Gogh.

Robert Sobieszek, curator of the Eastman House in Rochester, N.Y., testifying by videotape, also said art - by definition - cannot be obscene or pornographic.

The Cincinnati Center for Contemporary Arts and its director, Dennis Barrie, are on trial in Hamilton County Municipal Court on charges of pandering obscenity and using a minor in nudity oriented material.

It is the first time an art gallery has faced obscenity charges. At issue are seven of 175 photographs displayed last spring in the exhibit ''Robert Mapplethorpe: The Perfect Moment.''

Five of the photographs depict sadomasochistic homosexual acts and the other two show children with their genitals exposed.

Also testifying Tuesday, by written deposition, was Lady Beatrix Mary Nevill of London, the mother of one of the two children in the pictures.

The photograph, taken in 1976 when the girl, Rose Bowdrey, was 2, shows her sitting on a porch, with her genital area exposed.

In the deposition, Nevill said she met Mapplethorpe at a friend's wedding and gave him permission to photograph her daughter.

''I think it's a very charming photograph,'' she said.

Nevill said she gave Mapplethorpe her consent to have the photograph displayed

in exhibitions. She also gave written permission for the picture to be published, although she admitted under cross-examination that her permission for publication did not come until after she saw the picture in a book of Mapplethorpe photos in 1985.

The girl was her daughter from her first marriage and she also admitted under cross examination that the girl's father had not approved.

Sobieszek said Mapplethorpe's depiction of homosexual acts was, in effect, an autobiography.

''It's not unlike Van Gogh painting himself with his ear torn off,'' he said. ''That's what happened in Van Gogh's life. Visual artists do that often.

''The Mapplethorpe exhibit told a story. The story was of a very full and rich artist who was interested in documenting what he felt was beautiful and elegant on one hand and ... tortured and troubled and his own personal experience (on the other hand).''

He strongly disagreed with Cincinnati authorities' contention that the photographs are obscene.

''If it's in the art museum, it's intended to be art,'' he said. ''If it's art it cannot be pornography.''

Sobieszek also discussed the selection process when a gallery decides to obtain an art exhibition.

He said a curator will look for a ''slant or bias'' in an artist's work and try to evaluate it to see if the exhibit is worthy of display.

''A curator is a mediator between the artist and the public,'' he said. ''They help try to deliver the message of the artist.''

When asked on cross-examination if Barrie had properly taken the Cincinnati community's values into consideration when deciding to obtain the Mapplethorpe photos, he said, ''There are checks and balances by the community and within the museum when it comes to responsibility for the artwork.

''They (museum officials) always think of the community and try to get as broad a range of public opinion as possible.''

#90275u1797 10/02/1990 ~United Press International

DEARBORN, Mich. (OCT. 2) UPI - United Auto Workers President Owen Bieber said Tuesday the union could reach tentative agreement with Ford Motor Co. as early as this week on a new labor pact patterned after the one achieved at

General Motors Corp. Sept. 17.

But Peter Pestillo, vice president of corporate relations for Ford, called that ''an ambitious target,'' saying there were still several issues to be resolved before the GM contract could be fitted to Ford's needs.

While Pestillo said there was ''still an abundance of good will'' at the bargaining table, he cautioned that Ford ''would not follow any agreement lock step, willy-nilly.''

''It would be foolish of us to make an agreement with which we could not live '' he told reporters following a 25-minute maintable session with union negotiators at the No. 2 automaker's Dearborn, Mich., headquarters.

One issue may be the maximum $5 an hour penalty on overtime that is part of the GM contract - a concern to Ford since it relies the most heavily of the nation's Big Three automakers on the use of overtime.

The UAW negotiated stricter penalties against the use of excessive overtime at GM, requiring the automaker to pay into a joint skills and training fund proportionately higher overtime penalties.

Those penalties now range from the old maximum of $1.25 an hour under the old GM agreement, to $5 an hour for time worked in excess of 19 percent of straight-time pay.

Bieber said the union most likely would not set a deadline for completion of the talks, which affect about 100,000 hourly workers at Ford.

''We have not drawn that line in the sand,'' he said, adding that during the meeting, he urged both sides to step up the pace of bargaining now that they have had a chance to look over the GM/UAW pact, which won an 80 percent approval rate by GM workers over the weekend.

UAW Vice President Ernest Lofton, head of the union's Ford Dept., echoed Bieber by saying the GM/UAW pact is ''a contract that Ford workers feel very comfortable with, and one I think that Chrysler workers will feel equally comfortable with.''

''The pattern agreement has been set,'' Bieber said.

Pestillo did not appear concerned about whether the Persian Gulf crisis or threats of an economic recession would have any more of a bearing on the labor talks at Ford than it did with GM.

''Let's hope it is both modest in length and short in length,'' Pestillo said of any recession, adding that ''I don't think we know the depth of the downturn or the impact of the recent runup in fuel prices.''

Following ratification by Ford workers, the UAW will next take the GM/UAW pact to third-ranked Chrysler Corp. Industry observers expect the union may have a tough time there, since top Chrysler executives have openly labeled the pact as ''unaffordable.''

On other matters, Bieber said the UAW was ''very unhappy'' with the proposed budget compromise to reduce the federal deficit by $500 billion over the next five years, and that it will lobby against it.

''We have continuously opposed the idea of an increased tax on gasoline,'' Bieber said, adding that ''we think it hurts those who can least afford it.

''The budget proposal is, in our way of thinking, a regressive proposal,'' he said. ''It places an unacceptable, heavy and unfair burden on the lower- and middle-income Americans, and frankly, doesn't place enough responsibility on those who really enjoyed the wine and cheese during the last decade.''

Among other problems with the package, Bieber said he was especially upset over the part that proposes a mandated two-week waiting period before laid-off workers can receive unemployment compensation.

#90275u1799 10/02/1990 ~United Press International

HONOLULU (OCT. 2) UPI - A Navy submarine has located and recovered the second half of a cargo door that tore off a United Airlines flight near Hawaii last year, killing nine people, officials said Tuesday.

The Sea Cliff, diving to the ocean floor 14,000 feet below the surface 100 miles south-southwest of Hawaii, found the top half of the door Monday during the eighth dive of its 17-day search, Navy Lt. Cmdr. Sandy Stairs said.

''They brought it up with the sub's mechanical jaws, just like they did with the other half, with a safety line connected to the bottom so they wouldn't lose it if it slipped out of the jaws,'' Stairs said.

The bottom 6-by-10-foot half of the door was recovered last Wednesday by the 31.5-foot, 58,000-pound Sea Cliff in what was called the second- deepest manned recovery ever attempted.

Both door sections will now be turned over to the National Transportation Safety Board.

The door and part of the fuselage ripped from the Boeing 747 at 22, 000 feet shortly after United Flight 811 left Honolulu bound for New Zealand on Feb. 24 1989 with 355 people aboard. The nine killed were swept from the plane.

The NTSB had said a preliminary examination of the top half of the door revealed that it had sustained a fracture near its midspan latch position.

An NTSB investigator said the door's master latch lock handle was locked but that, while the eight latch lock sectors were in the locked position, ''all of them are deformed.''

The safety board earlier this year blamed the accident on improper latching and flawed design of the cargo door locking mechanism, as well as maintenance and inspection problems.

But, the board, Federal Aviation Administration, United, and Boeing are anxious to examine the door to make a final determination of the cause of the accident.

GENEVA (OCT. 2) UPI - More than 5,000 new cases of AIDS were reported to the World Health Organization in September, mostly from Europe and the Americas, officials said Tuesday.

WHO officials said the cumulative total of documented cases since the U.N. agency began keeping figures a decade ago has risen to 288,337.

No new figures were received from the major AIDS-affected countries of East Africa - Zaire, Kenya, Uganda and Tanzania - the organization said.

Most of the 5,337 new cases reported since Sept. 1 came from the United States Germany, Switzerland and The Netherlands, all of which reported new figures.

The United States, with 144,221 reported cases over the decade, continued to provide slightly more than 50 percent of the total numer of documented cases.

However, WHO officials noted that the true figure of AIDS cases worldwide is far more than reported. Dr. Michael Merson, head of the Global AIDS Program said at a press conference in late September his best guess is there are 800,000 AIDS cases worldwide.

The discrepancy in reported cases versus actual cases comes from the lack of regular reporting from African countries, which lack the infrastructure to provide monthly figures, officials said.

Following the United States in the Oct. 2 report, the countries with the most reported AIDS cases were Uganda (12,444 cases), Zaire (11,732), Brazil (11,070), France (9,718), Kenya (9,139), Malawi (7,160), Italy (6,701) and Spain (6,210).

#90275u1834 10/02/1990 ~United Press International
TORONTO (OCT. 2) UPI - General Motors of Canada Ltd. said Tuesday that production at its Scarborough, Ontario van plant will continue until spring 1993 - the second time its 2,700 workers have been given a reprieve this year.

Originally, the full-size Chevrolet and GMC van plant was to close in August, 1991. But in March, GM Canada said production would continue to August 1992.

GM Canada said the second extension was resulted from its ''current projection of market demand.''

Canadian Auto Workers union President Bob White said the plant will not be running ''as long as we would like, but it is a step in the right direction.''

White said the decision was not being viewed as part of the current round of negotiations, adding: ''It's not tied to any concessions.''

''We didn't try to wrap this up in a big red bow and take it back to the local as part of an overall agreement and say we've won something wonderful here,'' White said.

The CAW has set a Oct. 10 midnight deadline for a new three-year deal with GM Canada. The deal will be based on a CAW agreement reached last month with Ford Motor Co. of Canada.

GM Canada President George Peapples said in a statement that consolidation of the Scarborough plant with the GM's Flint, Mich., Truck and Bus operations would start in 1992 as planned.

But Peapples said ''another year is required to effectively coordinate (moving) tooling and equipment from Lordstown, Ohio and Scarborough to the Flint facility.''

Shifting production to Flint is a three-step process that involves halting production at Flint in the fall of 1991, ceasing production at Lordstown in 1992 and shifting equipment from Lordstown and Scarborough to Flint for a late summer 1992 startup.

Production at Scarborough is now scheduled to continue until the end of the model year in spring 1993 and then cease. A joint union and company committee looking into alternatives for the Scarborough plant has made little headway, White said.

The CAW wants the plant to remain open until Sept. 1993, when the contract currently being negotiated would expire. The CAW also wants the employees safeguarded under a new worker income security program.

Union officials argued that the plant could possibly become the sole manufacturing facility for GM's vans if there is a further decline in market share for large vans.

Bob Ryan, president of CAW Local 303 at the Scarborough plant, said the facility is ''incredibly profitable'' due to a $8-an-hour labor cost saving

vs. the two U.S. full-size van plants. He said the two-shift, five-day-a-week work schedule produces about 90,000 units a year.

The new consolidated Flint operation has a projected production level of 170,000 units a year.

GM Canada employs 36,500 CAW workers at 12 assembly, fabrication, trim and engine plants and a parts warehouse in Ontario and Quebec. The main complex in Oshawa, Ontario includes assembly plants for the Chevrolet Lumina, Buick Regal light duty and full-size trucks, plus two parts-making facilities.

White said despite a lot of meetings at the master, sub-committee and local bargaining levels, ''progress has been very, very slow.''

''The talks are not moving quickly,'' White said. ''There's no real momentum here yet.''

White said he expects GM Canada to meet the basic economic pattern set at Ford Canada.

After a nine-day strike Ford Canada's 13,000 workers accepted a deal that will give them raises of 3 percent in the first year and 2 percent in each of the second and third years, plus cost-of-living allowances.

The Canadian subsidiaries of Detroit's Big Three automakers - General Motors Corp., Ford Motor Co. and Chrysler Corp. - negotiate their agreements with the CAW separately from labor pacts negotiated between the parent carmakers and the U.S.-based United Auto Workers union.

#90275u1837 10/02/1990 ~United Press International

ISLAMABAD, PAKISTAN (OCT. 2) UPI - A rocket fired by U.S.-backed Afghan guerrillas slammed into a residential area of the capital Tuesday, killing at least 25 people and wounding 22 others in the bloodiest such attack this year, official Kabul radio reported.

It said the shell exploded in a group of people waiting to collect coal rations at a distribution point in the northern Sher-e-Nau neighborhood, where many foreign residents live.

The Pashto-language broadcast said at least 25 civilians died and 22 were wounded.

Kabul has suffered frequent rocket bombardments since April by the Moslem guerrillas, who are based mostly in Pakistan and backed by the United States and Saudi Arabia. Officials of the communist Afghan government say shelling have killed or wounded hundreds of people.

But Tuesday's casualty toll was the highest from any single such attack this year. In November 1989, at least 18 people died and many more were wounded when a shell hit a crowded cinema.

Afghan resistance leaders based in Pakistan recently have said they are preparing for a major assault against Kabul and appealed to civilians to vacate areas around military installations in the city.

Analysts see such a move as last-ditch bid by the guerrillas to prove they are still capable of overthrowing the communist government and thus encourage continued military backing by the United States.

Western diplomats in Pakistan have also reported increased military activity around Kabul recently.

The guerrillas have had little success on the battlefield despite the February 1989 withdrawal of Soviet troops backing the government. President Najibullah, meanwhile, has defied Western predictions of his swift overthrow following the pullout.

WASHINGTON (OCT. 2) UPI - Chanting AIDS activists besieged the Health and Human Services Department Tuesday, claiming the government is wrongly denying disability benefits to women infected with the deadly AIDS virus.

Police arrested 18 of about 130 protesters when they obstructed a street in front of the department's headquarters, snarling traffic just a couple blocks from the Capitol.

The activists contend the Social Security Administration has unfairly denied disability benefits to women who have serious illnesses due to infection with the AIDS-causing human immunodeficiency virus or HIV.

Coming from as far as New York, Philadelphia and Oberlin, Ohio, the protesters many of whom belong to the AIDS Coalition to Unleash Power or ACT UP, marched in a circle for at least two hours, staging ''die- ins'' and waving cardboard tombstones.

They also blew whistles and shouted slogans like: ''How many women have to die before you say they qualify?'' and ''Health care is a right, not just for the male and white.''

Homosexual men were the group hardest hit in the early years of the AIDS epidemic, first recognized in 1981. But the rate of infection is rising rapidly among women, and the number of AIDS cases reported among females shot up 45 percent in the last 12 months.

HIV is spread by sexual or blood-to-blood contact, like drug users sharing needles. It can also be transmitted from an infected woman to her baby. Ten years or more can pass from the time a person is infected with HIV until he or she develops full-blown AIDS.

The protesters claim the government relies primarily on the federal Centers for Disease Control's definition of acquired immune deficiency syndrome when deciding who gets disability benefits. That definition is outdated is because it is based on HIV-related symptoms found in white homosexual men, activists said.

Examples of illnesses that afflict HIV-infected women, but not men, are chronic pelvic inflammatory disease, vaginal thrush and cervical cancer. About two-thirds of HIV-infected women currently die without meeting the CDC's definition of full-blown AIDS.

Social Security Commissioner Gwendolyn King responded to the protest by saying her agency is not limited by the CDC's definition of AIDS in awarding disability benefits.

''The Social Security Administration is committed to assisting men, women and children ... with HIV who might qualify for monthly disability benefits to receive those benefits as expeditiously as possible,'' King said in a statement.

Phyllis Sharpe, 39, of New York, who is infected with the AIDS virus along

with her 3-year-old daughter, said she applied for disability benefits in April 1989 and was told her application was lost. Sharpe reapplied again in January 1990 and is still awaiting a decision.

The former transit worker, who is troubled by shortness of breath, severe vaginal infections, diarrhea and fatigue, said ''you have to be half-dead to be declared disabled.''

Dr. Suzanne Phillips of New York's Brooklyn Hospital also took part in the demonstration. Phillips said HIV-infected women often suffer from ''very severe and painful gynecological problems'' that fail to respond to treatment the way they would in women with healthy immune systems.

Karl Soehalein of New York came to Washington for the protest even though he was white, male and not infected with the AIDS virus.

''One goal of ACT UP is to end the AIDS crisis ... that includes women,'' Soehalein said. ''Men need to be there for women; women need to be there for men.''

The AIDS activists, who also filed a class-action lawsuit Monday, want the Social Security Administration to pay ''presumptive disability'' benefits to all HIV-infected claimants who have a doctor's report saying they cannot work. Such payments start almost immediately and continue for several months while the government investigates the patient's eligibility for long-term benefits.

#90275u1896 10/02/1990 ~United Press International

SAN FRANCISCO (OCT. 2) UPI - U.S. District Judge Thelton Henderson, a former Kennedy-era civil rights attorney, will become the first black to preside as chief judge in any of the nine western states of the 9th Circuit.

Henderson, 56, takes over the post Nov. 16 now held by Chief Judge William Ingram, who has presided for two of the Northern California court's most tumultuous years.

The amiable and softspoken Henderson takes over Ingram's post through a seniority system within the court.

He will direct operations of the San Francisco-based 15-judge court with jurisdiction from San Jose to the Oregon state line and east to the Sacramento Valley.

U.S. District Judge Jack Tanner in Tacoma, Wash., who is also black, is next in line as a chief judge in the Western Washington area.

Tanner and Henderson are two of just six black district judges in the 9th

Circuit, which stretches from Montana west to Guam and from Alaska south to Arizona.

Henderson said Tuesday he considers the job ''a tremendous honor and a tremendous challenge. I really didn't want to take the job... I'm not certain about my inclinations as an administrator.''

But Henderson said, ''I got calls from every black federal judge in the country urging me to take the job. I don't know who put out the word but they convinced me it was important place of visibility for the black legal community.''

''It was that primarily that convinced me I ought to do it,'' he said.

Henderson broke the color barrier in the court as the first black appointed federal judge in Northern California when he was named by President Carter in 1980. He remains the only black jurist in the Northern California federal district.

In the 1960s, Henderson was arrested for a traffic violation in Mississippi, struck, called a ''nigger'' and jailed before he could show his credentials as a Justice Department civil rights attorney.

In 1986, while traveling in South Africa to share American civil rights experience with black lawyers fighting apartheid, Henderson was detained and questioned by South African police for several hours.

Henderson drew the envy of many of his judicial colleagues when he was tapped by filmmakers to play the role of a judge in the movie ''True Believer,'' starring James Woods.

During his ten years as a judge in the San Francisco-based court he gained a reputation for upholding discrimination claims and coming down hard on violent criminals.

He issued heavy sanctions against State Farm General Insurance Co. for discriminating against as many as 1,250 women in job applications.

Henderson also awarded $85,000 to a female San Francisco police trainee for on-the-job sexual harassment.

Federal judges wield immense power. Henderson has used his to hold jail conditions in Sonoma County unconstitutional. In 1982 he ordered construction of a new facility.

During the sentencing he said, ''It is ironic that the black community you... say spawned you is the same black community you... have terrorized and victimized by the violence of your drug addition.''

The Northern California court has been wracked in the past two years by the trial and conviction of fellow judge Robert Aguilar on a charge of conspiring with criminal defendants to obstruct justice.

The court has also been in the throes of a shortage of judges because a stalemate in Washington has prevented appointment of new jurists to fill vacancies.

Ingram, 66, said Tuesday Aguilar, who was in line for the job ahead of Henderson, has formally declined to serve.

Aguilar's volunteering to step aside frees the court of any potential embarrassment at having to contest giving the top job to a judge awaiting sentencing in a criminal case.

Ingram said he will retain a partial caseload when he steps down Nov. 15 to become a senior judge, a semi-retirement status.

#90275u1900 10/02/1990 ~United Press International

LOS ANGELES (OCT. 2) UPI - The City Council voted Tuesday to outlaw animal sacrifice, making Los Angeles the first city in the nation to ban ritualistic slaughter under any circumstances.

The council voted 10-1 to enact the ordinance, making such killings punishable by up to six months in jail and a fine of up to $1,000.

Dissenting was Councilman Robert Farrell, who has argued such a law would restrict religious freedoms. He said in many immigrant communities, animal sacrifice is ''an expression of people's faith,'' particularly by those who practice Santeria, a form of Caribbean voodoo mixing Catholic and African rituals.

Although animal sacrifice is banned under state law, enforcing it requires prosecutors to prove that the animal was tortured, which is nearly impossible in most cases. The city law makes any ritualized maiming or killing of any animal other than for food preparation purposes a misdemeanor.

As many as 300 animal sacrifices have occurred in Los Angeles during the past year, leaving a trail of mutilated carcasses of all sorts of animals, but particularly dogs and cats, many of which were stolen pets that are often returned to their owners' lawns after being beheaded or disembowled.

The city's Department of Animal Regulation receives hundreds of complaints each year about animal sacrifices, but department officials believe hundreds more go unreported. A large number of killings have been linked to satanic

cult practices in addition to the Santeria groups.

Michael Burns, a city animal abuse expert, said officials have seen cases involving the beheading of not only dogs and cats, but pigs and cows. There was even one case involving a cape buffalo.

''Where they got a cape buffalo is beyond me,'' Burns told a City Council committee hearing when the ordinance was first being considered.

The ordinance was sponsored by Councilman Richard Alatorre and City Attorney James Hahn and drawn up after animal rights activists complained last October about the rise in animal mutilations.

''It's outrageous that in a civilized society people are using animals for such practices,'' Alatorre said.

Under the provisions of the ordinance, the city's Human Relations Commission will contact leaders in the Santeria community to explain the new law. There are no accurate figures of the number of city residents practicing Santeria, but some estimates run as high as 50,000.

UNITED NATIONS (OCT. 2) UPI - Countries hurt by the Persian Gulf embargo will receive close to $1.5 billion in economic assistance from 33 European nations, the United States and Canada, it was announced Tuesday.

The 35 members of the Conference on Security and Cooperation in Europe, known as the CSCE, will provide the short-term financial assistance first to the three countries most affected by the embargo of Iraq - Egypt, Turkey and Jordan, said Gianni DeMichelis, Italy's Foreign Minister and Chairman of the European Community.

Foreign Ministers of the CSCE nations were holding a two-day conference in New York in conjunction with the annual session of the United Nations General Assembly.

DeMichelis said that all CSCE members are ''fully implementing the embargo'' and see it as ''the essential condition for bringing about a peaceful solution to the crisis.''

''The Council is conscious of the grave burden which the present crisis imposes on the economy of many countries and in particular that steming from a rigouous application of the embargo,'' DeMichelis said.

The European Community will contribute about $500 million to the assistance program, while the remaining $1 billion will come from voluntary bilateral contributions from the remaining CSCE members.

The assistance will given in the form of grants, DeMichelis said, ''but provisions will also be made for the possibility of according loans or other forms of financial assistance.''

Countries other than Egypt, Jordan and Turkey who also will bear a heavy economic cost as a result of the land, air and sea embargo of Iraq, may be extended similar economic relief, as agreed upon by the CSCE's General Affairs Council on Sept. 17, the minister said.

In another developments at the CSCE conference, DeMichelis said 12 European Community ministers had discussed Monday a meeting with their Arab counterparts to discuss how best to move towards a peaceful resolution of the crisis.

The CSCE foreign ministers also discussed the future of Europe in the post-Cold war period and outlined some problems expected to alter the current rosy climate of cooperation, officials at the two-day conferencxe in new York said.

''Europe is still marked by substantial imbalances, especially in the economy and in the quality of envirionmental conservation,'' said Jiri Dienstbier, foreign minister of Czechoslovokia.

He spoke only hours before East and West Germany were to be reunited, a move many predict will open a whole new series of problems because of East Germany's ruined envirionment and economic destitution.

Dienstbier said, ''We fear that the building of a new Europe will not be successful if it does not lead to the establishment of an all- European economic, as well as social equilibirium.''

He said a planned CSCE summit meeting in Paris in November should lay out the framework for the future structure of Europe.

Hungarian Foreign Minister Geza Jeszensky raised another unsettled issue that is already beginning to cast a shadow over the post-Cold War period in Europe: the problem of national minorities, some of them living against their will in other countries because of borders that were arbitrarily drawn in 1945.

Hungary has raised the matter of ethnic Hungarians living in the Transylvanian section of Romania.

Jeszensky said, ''It is inconceivable to ensure the passage from the past to

the future without having found adequate answers'' to the nationality problems.

He proposed another meeting next year to consider the specific matter of ethnic minorities, separated by borders from their mother communities.

The 35 nations are generally agreed that the CSCE should institutionalize itself, that is, create a permanent secretariat, a parliamentary assembly and schedule regular sessions like the one held this week in New York.

#90275u1917 10/02/1990 ~United Press International

NEW YORK (OCT. 2) UPI - An injectable, long-lasting birth control method received high marks from women in recent tests but was sent back to the drawing board to improve its reliabilty, researchers said Tuesday.

Norethindrone Microspheres prevented pregnancies for up to three months and 96 percent of the women who used it rated the approach ''very favorably,'' the researchers said. But the failure rate was deemed too high, they said.

The drug, made by Stolle Research and Development Corp. of Cincinnati, is a synthetic form of the commonly used contraceptive hormone progesterone. It is encased in polymer spheres of varying sizes that dissolve over time after being injected into a muscle.

''It's injected in the back hip,'' said Dr. Gary Grubb of Family Health International of Research Triangle Park, N.C., a non-profit group specializing in contraceptive research, at a meeting of the American Public Health Association.

Grubb and his colleagues surveyed 245 of 1,036 women involved in tests of the new contraceptive at 11 foreign medical centers and four centers in New York, Houston, Minneapolis and Charlottesville, N.C.

The tests were discontinued in April 1989 after scientists found methods for large-scale manufacturing of the steroid resulted in higher unwanted pregnancy rates at the preferred lower doses. At higher doses, the failure rate was 2.5 percent per year, versus 4 percent per year at lower doses, Grubb said.

The only side effects were irregular menstrual bleeding, headaches, nausea and weight gain, he said.

It may be five years before large-scale human studies are completed and the Food and Drug Administration can approve the drug, which would be first long-term injectable contraception licensed for American women, Grubb said.

Dr. Louise Tyrer of the Planned Parenthood Federation of America praised the drug. ''Any women who wants long-acting contreception without having to

remember to do anything, take a pill, check an IUD string or put something in prior to intercourse, is going find this an attractive method,'' she said.

The FDA is currently reviewing a similar approach known as Norplant, which is six matchstick-sized silicone rods that are surgically inserted under the skin of a woman's arm. The rods slowly release tiny amounts of a widely used synthetic hormone and can prevent pregnancy for five years.

#90275u1936 10/02/1990 ~United Press International

CHICAGO (OCT. 2) UPI - United Airline employees, using more than $200 million in fees as bait, have lured some 20 banks into a syndicate to provide $2 billion in financing for a $3.7 billion buyout of UAL Corp., sources close to the deal said Tuesday.

''They're still working out some of the details but the financing is locked up '' said an investment banker familiar with the negotiations.

''It's just a matter of crossing the T's and dotting the I's,'' the banker said. ''They should have everything in place by tomorrow (Wednesday).''

A spokeswoman for the employee group, however, refused to comment on the group's progress in obtaining financing. UAL also declined comment.

UAL stock closed up $8.625 Tuesday at $112 on volume of 525,500 shares.

The employee group - United Employee Acquisition Corp. - had set Wenesday as its target date for arranging financing for its scaled-down bid.

UEAC must still sell the scaled-down deal to UAL directors.

The UAL board approved a $4.4 billion, $201 a share buyout bid from UAEC last April and gave the employee group until Aug. 9 to finance the deal.

The board extended the deadline to Oct. 9 when UAEC ran into trouble lining up financing.

But Iraq's invasion of Kuwait - and the resulting higher fuel costs and lower earnings for airlines - made that deal unfinanceable.

UEAC now hopes to sell directors on the scaled-down bid, hoping they can win support if they have financing in place.

UEAC pitched the proposal to 26 banks in hope of lining up $2 billion in bank financing. As an incentive, it offered bank and loan syndication fees totaling around $210 million.

Under the new proposal, the employee group would acquire 80 percent of UAL for about $175 per share - $150 of it in cash, and the remainder in preferred stock and a ''stub.''

Billionaire Marvin Davis, who withdrew his own bid for UAL Corp. last year, offered to join a proposed employee buyout last week but UEAC turned down the offer.

UEAC Chief Executive Officer Gerald Greenwald said the group was optimistic it could swing the deal without Davis' input.

But UAL Chairman Stephen Wolf is adamantly opposed to any scaling down of the $4.4 billion bid, a source close to Wolf said.

Wolf and UAL Exeecutive Vice President John Pope, the company's chief financial officer, are backing restructuring and expansion as the best course for bolstering stock value, the source said.

Going into a board meeting last week, UAL's 11 outside directors were reported almost evenly divided between working with the employee group on the revised buyout plan and Wolf's plan.

But a board source said the employee group could win support if it can show it has financing solidly in place.

The deciding factor is likely to be Coniston Partners, UAL's biggest stockholder.

Coniston, a New York investment group that holds nearly 10 percent of UAL' stock, pressured the board last spring to pursue the employee buyout instead of restructuring.

A Coniston spokesman, contacted Tuesday, refused to say if the group would back the scaled-down employee bid.

But analysts said Coniston - and UAL directors - probably would be hesitant to turn down the deal if it is fully financed.

#90275u1985 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - The United States and Soviet Union have agreed to take part in an international observer force to police a potential cease-fire and elections to end Angola's 15-year civil war, officials said Tuesday.

Word of the superpower agreement came as President Bush met with Angolan rebel leader Jonas Savimbi at the White House and expressed his continued support for the rebel National Union for the Total Independence of Angola, or UNITA, and Savimbi's efforts to win the cease-fire and free elections.

Savimbi, in town to shore up support as Congress is considering whether to continue aid to the oil-rich Southern African nation, welcomed the direct U.S.-Soviet role in peace efforts and reported that the talks to end the conflict between the rebels and the leftist Angolan government were on track.

''I think the negotiations are going well with the MPLA,'' Savimbi said of the government's Popular Movement for the Liberation of Angola. ''We think it's just a matter of more rounds of talks and then we may get (a cease-fire.)''

Moscow, backed by Cuban troops that are now withdrawing from the country, has supported Angola with 1,100 advisers and $800 million in annual military aid while Washington backs UNITA with $60 million in covert military assistance.

A senior administration official, who attended the Bush-Savimbi session, said the superpowers had agreed to accept an invitation from the two sides in the standoff to join an international force to oversee a cease-fire followed by elections as observers.

The official, who asked not to be identified, said the force would be modeled after the U.N.-sponsored group that helped settle the fighting between South Africa and a guerrilla group in Namibia in 1989. ''It would be patterned after that,'' said the official, although no U.N. connection was envisioned at this point.

Savimbi said he would welcome the U.S.-Soviet participation.

''Yes, we do, and we were also instrumental to that the Americans and the Russians should participate also in negotiations,'' he told reporters.

The rebel leader also reported that Bush ''thinks that's a good thing so that the Russians can also cooperate in Angola to find a peaceful solution as they did in other parts of the world.''

The U.S. official said Bush listened to Savimbi's ''analysis of the negotiations, express(ed) optimism ... saying we continue to support Dr. Savimbi's objectives of a free election.''

Savimbi's visit coincided with a move in Congress, as well as among some black leaders, to end the aid to UNITA, which, because it is covert, has been provided without open debate in the House and Senate.

UNITA opponents, several of whom demonstrated loudly across the street from the White House while Savimbi was inside, argue that Savimbi is an opportunist rather than a champion of democracy and that his record included torture.

The administration official said human rights issues were not discussed between Bush and the rebel leader, and he opposed a move under consideration by the House Rules Committee to make debate on renewing the aid public.

''We would prefer to keep it in the covert action channel,'' the official said because of the ''lot of legal requirements'' that would ensue.

White House press secretary Marlin Fitzwater said continued support for the rebel leader was critical to finally winning peace in the conflict that has cost hundreds of thousands of lives.

''The president believes that the steadfastness of that support is a key factor in pushing the current negotiations to a successful conclusion,'' Fitzwater said.

NEW YORK (OCT. 2) UPI - Chester Dorough, an octogenarian from Birmingham, Ala., will collect $8 million as the first winner in an NBC-McDonald's promotion, it was announced today.

Dorough, 80, who retired in 1969 after 33 years with the Alabama Social Security office, said he would use the money to help his children - to pay off his debts and theirs.

''Maybe I'll buy me a new suit,'' he said.

He doesn't plan to replace his car - a 1979 Toyota Corolla hatchback - because

he said, it runs fine.

Dorough was the first winner in the ''McMillions On NBC'' promotion, in which cards you pick up at the fast-food franchises carry numbers. The winning number is revealed during an NBC show. When the $1 million prize is unclaimed, it rolls over and is added to the next one.

Since the contest began on Sept. 24, Dorough has been going to McDonald's for one or two meals every day - and to pick up a ticket. On Oct. 1, he ate breakfast, lunch and dinner at the fast-food restaurant and then watched ''Ferris Bueller'' that night for the winning number.

Dorough has three son and one daughter, 12 grandchildrern, two great grandchildren and a third on the way.

The new millionaire said he attributes his good health to giving up smoking years ago except for an occasional cigar, no drinking and good overall nutrition.

(OCT. 2) UPI - Oil prices plummeted Tuesday, with crude falling more than $3 a barrel and heating oil 8 cents a gallon on perceptions Middle East tensions are easing and the Persian Gulf crisis may be heading toward a peaceful settlement.

Following Monday's $2.42-a-barrel plunge on the New York Mercantile Exchange, the benchmark West Texas Intermediate crude for November delivery dove $3.14 from Monday's close to $33.95 a barrel, a drop of 14 percent over two days of trading.

Home heating oil for November delivery fell 8 cents on the day to 92.03 cents a gallon with December and other later-month delivery contracts dropping the Merc's 4-cent limit.

November delivery unleaded gasoline plummeted 6.98 cents to 91.5 cents a gallon with later-month delivery contracts also plunging the exchange's 4-cent limit.

Sun Co., Radnor, Pa., and Marathon Oil Co., the Findlay, Ohio-based unit of USX Corp., dropped the posted price they will pay for crude at the wellhead by $3 a barrel to $32.75 a barrel for WTI.

The two companies also had reduced their posted prices by $2 or more a barrel Monday.

''The market has been trading on news and has to be constantly fed. There has been no news except for slightly conciliatory statements by President Bush and Saddam Iraqi President Hussein,'' said Ernie Stamper, administrative vice president of Ashland Oil Inc., Ashland, Ky.

''It's basically the same scenario as Monday - an easing of tensions in the Middle East. People feel a peaceful settlement can be reached through negotiations. That's why we're down,'' said Thomas Blakeslee of the Pegasus Econometrics Group of Hoboken, N.J.

Stamper said trading Tuesday was predicated on prices going lower.

''Sellers were saying prices may be lower tomorrow and capturing some profits today. If I'm a buyer maybe I can get a better price later so why not wait until tomorrow,'' said Stamper, who buys Ashland's crude.

''It's a typical reaction; it's the magnitude that scary,'' he added.

On future prices, Stamper said, ''It's impossible to discern any trend here. We're trading headline to headline.''

The drop in oil prices was reflected in a rise, if only temporary, in stock prices on the world stock markets.

In Tokyo, the Nikkei index rose a record 2676.55 points on the day. After being up 33 points as a result of lower oil prices, profit taking later drove the Dow industrials down 10.64 points on the New York Stock Exchange.

On the European spot market, where crude is bought and sold for cash, Britain's widely traded North Sea Brent was down $3.30 to $35.20 a barrel, bringing its two-day drop to $5.60, or 13.7 percent. It had fallen $2.30 a barrel Monday.

The United Arab Emirates' Dubai Light - the key OPEC crude from the Middle East shipped mainly to the Far East - declined $3 to $30.80 a barrel.

On the U.S. Gulf Coast spot market, prompt-delivery WTI was down $3.10 to $33.95 a barrel.

In his speech Monday to the United Nations in New York, Bush held out hopes of a diplomatic settlement of the Gulf crisis ''in the aftermath of Iraq's unconditional departure from Kuwait,'' occupied since the Aug. 2 invasion.

Bush's overture followed statements Sunday by Saddam that Iraq would seek to open discussions with France on the basis of settlement terms French President Francois Mitterrand offered last week in a U.N. speech.

The French government, however, denied Monday Saddam's assertion Baghdad and Paris had established special contacts to discuss the crisis.

In his U.N. speech, Mitterrand had said all the issues brought up by Saddam, including demands for setting up a Palestinian homeland, could be discussed once Iraq withdrew from occupied Kuwait.

#90275u2032 10/02/1990 ~United Press International
NEW YORK (OCT. 2) UPI - Interest-rate considerations pushed the dollar down against the key European currencies in lackluster New York trading Tuesday, but it held firm against Japan's yen despite a rally in Tokyo stocks.

Currency analysts related the strengthening of the German mark, Swiss franc and other main European units to follow-up dollar selling in the wake of the Washington proposal to slash the U.S. budget deficit.

The Federal Reserve is expected to bring down short-term U.S. interest rates in response to the pact, making the dollar less competitive.

In late New York trading, the dollar was quoted at 1.5485 an ounce, down from 1.5575 marks Monday, and at 136.75 Japanese yen, up from 136.60.

Chief dealer John McCarthy of the Amsterdam-Rotterdam Bank voiced perplexity at the yen's poor performance despite a record rally of 2,677 points Tuesday by the Tokyo Stock Exchange's blue-chip Nikkei average.

''The yen is in its own world, it just moves where it wants to,'' he said. But he advanced the theory that international market participants saw the Tokyo rally as mainly technical and unlikely to have a follow- through.

Hongkong & Shanghai Bank vice president Audrey McNiff, too, cited a ''somewhat skeptical reaction'' to the Nikkei's takeoff. She said the yen fell against the mark, with the result that it also weakened versus the dollar.

Though expectations of lower U.S. interest rates hurt the dollar on balance, McNiff reported ''a mixed signal'' as to what the budget agreement means. Lower interest rates might hurt the dollar, but rising stock and bond markets could brace it by attracting roving global funds.

The British pound ended at $1..8920 an ounce, up from $1.8840.

Other New York dollar rates: 1.2880 Swiss francs, down from 1.2960; 5.1900 French francs, off from 5.2190; and 1,159.30 Italian lire, off from 1,167.25.

In Europe, the dollar closed higher against the major currencies, trading in a narrow range as players awaited new market-moving factors.

''There's not an awful lot happening. The dollar is range trading. As soon as it hits the top of the range, everyone turns around and off we go down again '' said Jerry Hughes, a currency dealer at Barclays de Zoete Wedd Bank.

''It's very quiet, very nervous. The market is just waiting for something to happen,'' he added.

In London, the pound eased against the dollar to end at $1.8870 vs. $1.8890.

The dollar closed higher in Frankfurt at 1.5579 German marks vs. 1.5511, and was also higher in Zurich, at 1.2955 Swiss francs from 1.2865.

The dollar was unchanged in Paris at 5.2220 French francs vs. 5.1945, and in Milan was also unchanged at 1,162.55 Italian lire. But it rose in Brussels to 32.07 Belgian francs vs. 31.93 Monday.

Earlier in Tokyo, the dollar fell against the yen as dollar-selling continued under the influence of the U.S. budget-deficit pact. The U.S. unit closed at 136.73 yen, off from 137.15 at close of trading Monday.

But dealers said they expected bargain hunters to repurchase the dollar after it had reached a market floor. Sumitomo Bank analyst Masato Nakamura said he believed the dollar had about reached that point.

Gold closed lower in Zurich at $388.75 an ounce vs. $395.50. It also slipped in London, to $388.50 an ounce vs. $396.50.

Republic National Bank in New York closed cash gold at $389.50 an ounce, up from $387 Monday. The New York Commodity Exchange settled contract gold at $389.10 an ounce, down from $386.60.

Silver closed lower in Zurich at $4.70 an ounce vs. $4.75. In London it fell to $4.71 an ounce from $4.80.

Republic closed cash silver at $4.70 an ounce, off from $4.665. Comex silver finished trading at $4.679 an ounce, up from $4.61.

#90275u2048 10/02/1990 ~United Press International
(OCT. 2) UPI - The United States flexed its military muscle in the Persian Gulf a day after President Bush offered fresh optimism that the crisis could be resolved peacefully, and Iraq made its third conciliatory gesture Tuesday in as many days.

''Iraq is ready to destroy weapons of mass destruction provided this measure included all the states of the region, including Israel,'' an Iraqi Foreign Ministry spokesman was quoted as saying by the official Iraqi news agency.

Iraq's latest announcement comes one day after Iraq released nine French hostages who had been held along with other Westerners at key sites as a human shield against possible attack by the U.S.-led multinational force in the gulf region, and two days after an announcement by Iraqi President Saddam Hussein that he was willing to consider a French plan to resolve the crisis.

The French plan, proposed by President Francois Mitterrand during a speech to the United Nations last week, differed from other peace initiatives by linking the invasion of Kuwait with the Palestinian problem, which the United States has contended is a separate problem.

President Bush, in a speech at the United Nations Monday, praised the French plan and told Saddam Hussein that pulling out of occupied Kuwait may raise new ''opportunities.'' He also called for the destruction of weapons in the region particularly Iraq's chemical arsenal.

Less than 24 hours after Bush's remarks offered new optimism that the crisis with Iraq could be settled without war, the United States put on a show of strength, sending an aircraft carrier into the dangerous waters of the Persian

Gulf for the first time in 16 years and staging a 15,000-Marine mock amphibious assault.

The Pentagon disclosed that the USS Independence aircraft carrier battle group moved from the Gulf of Oman, through the Strait of Hormuz and into the Persian Gulf Monday night, making it the first carrier to enter the gulf since 1974.

And the 4th Marine Expeditionary Brigade - a force of 15,000 Marines, mostly from Camp Lejeune, N.C. - was staging amphibious landings on a remote beach in the northern Arabian Sea. A Pentagon spokesman said 18 ships and 90 helicopters were involved in the exercise that began Monday and would continue through Friday.

Like the United States, Iraq also alternated its concilatory approach with saber rattling.

Iraqi newspapers said Baghdad was responsible for ''finding a reasonable and comprehensive settlement to the issues in the region.'' But in case the West concluded Iraq was ready for peace at an price, the newspapers included warnings that the Iraqi military would inflict severe damage if war were to break out.

And an official Iraqi spokesman was quoted by the official Iraqi News agency as criticizing Bush's speech, saying the U.S. president had ''concealed in his oily words about destructive weapons and peace, his premeditated aggressive intentions and acts against the Arab nation.''

Analysts say that by linking his withdrawal from Kuwait with the Israeli occupation of the West Bank and Gaza Strip, Saddam hopes to emerge from the crisis as a hero to the Arab world rather than a loser forced out of the tiny emirate by the U.N.-imposed economic embargo and the U.S.-led multinational military force in the region.

In other developments Tuesday:

-A French frigate off the coast of Djibouti fired across the bow of a North Korean merchant ship that refused to stop for inspection in compliance with the U.N. trade embargo against Iraq. Navy sources in Paris said the frigate Doudart de Lagree patrolling in the strait of Bab El-Mandeb, connecting the Red Sea and the Gulf of Aden near the Arabian Sea, gave a verbal warning and fired blank warning shots at the cargo ship Sam Il Po. When the ship failed to respond, the frigate blasted a warning shot from close range across its bows and the vessel subsequently stopped. A French inspection party boarded the vessel. It was not immediately clear what the ship's cargo contained.

-Japanese Prime Minister Toshiki Kaifu arrived in Egypt on the first stop in a Middle East tour expected to focus on Japan's aid to countries hurt economically by the crisis. Kaifu is scheduled to leave for Jordan Wednesday,

where he is expected to meet with Jordan's King Hussein. Japan has pledged $4 billion to help fund the international response to Iraq, but has been criticized by some for not sending military personnel as well.

-On the eve of Kaifu's arrival, Jordan said it would be unable to continue to help financing the transport of Asian refugees without aid. Jordan said although the government had been promised $100 million in refugee aid, only $1.7 million had been received so far.

-The Simon Wiesenthal Center charged that more than 200 Western companies, including 86 West German firms, supplied Iraq with components for chemical weapons as late as 1989. According to a report released by the center, the national Centers for Disease Control in Atlanta also inadvertently provided Iraq with a strain of virus that ended up in biological warheads.

Lethal chemicals continue to filter into Iraq ''to this very date,'' enabling a single Iraqi plant to produce 5,280 tons of deadly nerve gases each year, the Wiesenthal Center's Rabbi Marvin Hier alleged.

-Egyptian President Hosni Mubarak charged that Saddam Hussein held covert talks with Israel and that his occupation of Kuwait helped the Jewish state by giving it a pretext to refuse to withdraw from Lebanon and the occupied territories. Mubarak also told French television the Iraqi leader had never exerted any effort to solve the Palestinian problem until the multinational response to the invasion of Kuwait backed him against a wall.

-The U.S. Senate adopted a resolution supporting Bush's handling of the Persian Gulf crisis amid assurances from Democratic leaders that the measure would not hand the president a ''blank check'' for future military action. The resolution approved 96-3 came one day after the House voted 380-29 for a resolution that also applauded the president while urging Bush to emphasize ''diplomatic and non-military means'' in solving the crisis.

-Amnesty International condemned Iraq for executing and torturing civilians opposed to its invasion of Kuwait and for human-rights abuses against Western detainees. The international human-rights watchdog organization said Iraqi troops were ''summarily executing'' Kuwaitis for possession of the Kuwaiti flag or pictures of the deposed emir of Kuwait, or even for failing to follow orders to post photographs of Saddam Hussein.

#90275u2057 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - President Bush, previewing a pitch he planned for a speech to the nation Tuesday, urged opponents of a compromise budget plan to cut spending and boost taxes to support the measure because ''the country is at stake.''

Bush, who scheduled a 10-minute televised talk at 9 p.m. EDT, spent much of the day privately pleading with reluctant House Republicans to support the $500 billion deficit reduction plan he announced with congressional leaders on Sunday.

During one of those White House meetings, ''the president made a personal appeal'' for support, said House Republican leader Robert Michel of Illinois, who was there.

'''Help me', I think he said. 'I need help,'' Michel quoted Bush as telling the GOP lawmakers. Many House Republicans have said they would oppose the budget deal when it comes up for a House floor vote on Thursday.

Quick action is needed since the government is now operating under a temporary spending measure that expires Friday.

The budget deal, worked out under the gun of automatic spending cuts that would have taken effect Monday with the beginning of the 1991 fiscal year, is aimed at erasing the budget deficit.

Over five years, it would generate $134 billion in revenue from increased taxes on such American staples as beer and gasoline, as well as on luxury items like fur coats and fancy cars, and by changing some tax rules.

The spending cuts would strike hardest at the Pentagon, in the Medicare health program for the elderly, and farm programs.

Bush announced his plans to use a TV address to lobby for the budget compromise during a speech to business leaders.

''The budget is tough, it really is,'' Bush said. ''It is a solid package to boost economic growth and solve long-term problems without having the burden fall entirely on any one group.

''I would like those who have reservations to take a hard look at it, study it consider the fact that alternatives have been tried but we weren't able to get them through. ... The country is at stake here.''

Acknowledging the plan includes something for everyone to hate, Bush told critics of the deal, ''You can pick the package apart but you cannot realistically put a better package together.''

Senate Democratic leader George Mitchell of Maine arranged to give a Democratic response after Bush's address.

On Capitol Hill, House Democratic leaders delayed the first scheduled vote on the budget from Wednesday until Thursday to give Bush and Michel more time to nail down a majority of House Republicans to back the deal.

Facing the realities of an election year, negotiators decided any agreement must win the support of a majority of both Democrats and Republicans in both the House and Senate to prevent one party from blaming the other for the painful effects of the accord.

Rep. Vin Weber, R-Minn., an opponent of the budget deal, told reporters that as of mid-day Tuesday there were ''90 guys ... against the deal'' - more than half the 176 House Republicans. But he added, ''The president, if he wants to, can probably win this fight. If he makes it a personal loyalty test, he'll win.''

Michel said Bush's message to the Republicans was that he had ''put a lot on the line'' by abandoning his ''no new taxes'' campaign pledge to strike a deal with Congress.

He said Bush told them the plan holds real savings in expensive benefit programs, had limited military spending cuts to acceptable levels, had prevented income tax rates on the rich from rising, as Democrats wanted, and includes firm limits on future spending.

After meeting with Bush, Reps. Thomas Coleman, R-Mo., and Don Sundquist, R-Tenn., said they had been persuaded to back the package.

Rep. Clay Shaw, R-Fla., who represents many elderly in the Fort Lauderdale area, said that even though the package gives him ''major heartburns'' because of the Medicare cuts, ''I'm leaning very heavily in support of the package.''

House Speaker Thomas Foley, D-Wash., said he was ''not pessimistic'' about chances the budget deal will pass but that ''there's always a chance'' it would fail.

#90275u2070 10/02/1990 ~United Press International

MOSCOW (OCT. 2) UPI - Mikhail Gorbachev, whose new diplomacy made the reunification of Germany possible, congratulated the German nation Tuesday on its unification and said ''we expect much of our new relations.''

In a telegram sent to German President Richard Von Weizsaecker and Chancellor Helmut Kohl on the eve of unification, the Soviet President said: ''Please accept my congratulations to you and all the German people.''

''The unification of Germany, which takes place in full accord with neighbors and other states and nations is a great event not only for Germans.''

In his message, Gorbachev did not dwell on the immense losses the Soviet Union suffered at the hands of Germany during World War II but instead referred to

it as a lesson for all.

''It (unification) occurs at the watershed of two epochs,'' he said. ''It has become a symbol and I hope it will be a factor in establishing a universal order of peace.

''Unification could not have taken place if there had not been profound internal democratic changes in our countries, if the right conclusions from the tragedy of the most horrible war had not been reflected in real life.

''On this remarkable day I want to pay tribute to all those in my country and in your country who, overcoming sorrows, remembering losses and honoring the dead, did not yield to prejudice and fears, but persistently worked for the future, making this peaceful and worthy solution of the German issue possible.''

Gorbachev, whose troops' exit from the eastern part of Germany will be paid for by the Germans, said he looked forward to growing ties with the now united giant state in the middle of Europe and viewed Germany as a natural Soviet partner.

''We expect much of our new relations with Germany,'' he said. ''History, the deep roots of mutual influence and gravitation, the position of our countries in Europe and the world, and their colossal and mutually supplementing potential make many-sided cooperation between them possible and natural.

''I hope the treaty of good neighborly relations, partnership and cooperation, which will be concluded soon and which should lay the foundation for our relations, will help achieve this goal.

''I wish the great German nation happiness, prosperity and eternal peace in good-neighborliness and friendship between European peoples,'' he said.

#90275u2097 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - President Bush, in a taped message from the Oval Office, congratulated the people of Germany Tuesday for the reunification of their long-divided nation.

''Today, the German nation enters a new era,'' Bush said. ''An era, in the words of your national anthem of 'unity and justice and freedom.'... Let me say on behalf of all Americans, may God bless the people of Germany.''

Bush declined an invitation to go to Germany's for the reunification ceremony, set Wednesday, saying he did not want to become a foreign distraction at an emotional national event.

But the president planned to host a ceremony of his own in the Rose Garden Wednesday to celebrate Germany's unification as well as German- American Day.

Earlier Tuesday, the Senate Foreign Relations Committee unanimously approved the treaty that provided for the reunification of Germany and sent the measure to the full Senate for consideration.

The treaty was signed Sept. 12 by the four occupying powers from World War II - the United States, the Soviet Union, Great Britain and France - as well as West and East Germany. Key provisions end four-power rights over Germany and Berlin and confine the united Germany to the borders of the two current German states.

Bush taped his message to the German people for broadcast on German television.

In it, the president noted the United States' role in helping reunify Germany - a nation divided 45 years ago after being defeated in World War II - and obtain full membership for it in the North Atlantic Treaty Organization.

''America is proud to count itself among the friends and allies of free Germany, now and in the future,'' Bush said.

The president also noted the fall of the Berlin Wall, long the symbol of the Cold War. ''Today, the wall lies in ruins and our eyes open on a new world of hope,'' he said.

He said, ''The last remnants of the wall remain, there at the hearts of a free Berlin - a ragged monument in brick and barbed wire - proof that no wall is ever strong enough to strangle the human spirit; that no wall can ever crush a nation's soul.''

#90275u2107 10/02/1990 ~United Press International

NEW YORK (OCT. 2) UPI - Stocks closed mixed Tuesday in active trading after a late wave of profit taking and program selling wiped out gains in the Dow industrials. The broad market closed higher.

The Dow Jones industrial average, which registered its second-biggest gain of the year Monday with an advance of 63.36 points, lost 10.64 to close at 2505.20. The Dow hovered with a gain of about 25 points for much of the session.

The Dow transportation average, meanwhile, whose issues are heavily dependent on oil prices, responded to a $3.14-a-barrel plunge in crude oil with a gain of almost 2.5 percent. The Dow transports surged 21.64 to 894.79.

Among broad market gauges, the New York Stock Exchange composite index rose

0.37 to 172.59 and Standard & Poor's 500-stock index gained 0.27 to 315.21. The price of an average share gained 6 cents.

Advances led declines 1,001-581 among the 2,006 issues crossing the NYSE tape. Volume was 188,320,000 shares, down from 202,210,000 traded Monday.

Analysts said the Dow succumbed to late profit taking after Monday's strong rally as well as to program selling and technical selling when the Dow failed to rise above a certain level.

''It was basically profit taking, but when we couldn't break above 2550 people saw it as a good opportunity to sell. And it was especially good to sell into a rally, considering that we're in a bear market,'' said Dale Tills, manager of institutional equity trading at Charles Schwab & Co. in San Francisco.

''Then programs kicked in late in the day and took prices down further,'' he said, referring to the computerized selling technique that involves selling stocks and buying stock index futures to profit from the price spread between them.

Tills noted that all the other factors that supported stocks Monday were still in force Tuesday, such as plunging oil prices and a stable bond market. Treasury bonds were up about 1/4 point in late trading.

Stocks got an early boost from the Tokyo market, which had been in the midst of its worst battering since October 1987 but which posted its biggest surge ever Tuesday.

The blue-chip Nikkei Average of 225 issues, which plunged 761.64 points Monday rocketed 2,676.55 points - 13.2 percent - to 22,898.41.

The surge was a record jump in terms of both points and percentage, topping the respective marks of 2,037.32 set Oct. 21, 1987, and 11.3 percent set in December 1949.

On the trading floor, Unisys was the most active issue, plunging 1 1/8 to 3 7/8. The company, which suspended payment on the quarterly dividend on common stock last week, said Tuesday it ''fully supports'' the continued payment of its preferred dividend.

But Moody's Investor Service downgraded Unisys debt and preferred stock, saying the company's prospects for higher profits appear gloomy. Some analysts say the company likely will not resume common stock dividends until the third quarter of 1991 as the ailing computer manufacturer goes through a restructuring.

Following Unisys was General Electric, off 1/2 to 55 3/4. Philip Morris was third, up 1/8 to 47 7/8.

Among other blue chips, AT&T fell 1/2 to 31 3/4, IBM lost 3/4 to 108 1/4 and Merck lost 1 to 79 1/4, but Woolworth surged 1 1/8 to 25 1/8.

Eastman Kodak sank 1 5/8 to 38. The company is waiting for a federal court to set damages Kodak must pay for infringing on instant-camera patents held by Polaroid, which closed up 2 5/8 to 33 1/8. Several analysts were said to lower earnings estimates for Kodak.

Primerica plunged 1 1/4 to 18 1/2. The company said it knew of no reason for the drop in the price of its stock, but reports said the shares were pressured by rumors that it might buy another brokerage firm. Primerica already owns Smith, Barney, Harris Upham & Co.

A company official was said to issue a denial of the rumor but to confirm that Primerica would cut Smith Barney's work force in some areas.

Oil stocks were mostly lower. Chevron fell 3/8 to 73 1/4, Exxon lost 1/8 to 49 1/2, Amoco slid 7/8 to 54 7/8 and Mobil tumbled 1 1/8 to 62.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 225,482,020 shares, compared with 235,957,110 shares traded Monday.

Prices were higher in active trading on the American Stock Exchange.

The Amex Market Value index rose 1.19 to 309.63. Advances led declines 338-230 among the 805 issues traded. The price of an average share added 4 cents. Composite volume was 18,523,400 shares vs. 19,388, 730 traded Monday.

Energy Service led the Amex issues, unchanged at 3 1/2.

The National Association of Securities Dealers composite index rose 1.74 to 356.39.

#90275u2152 10/02/1990 ~United Press International

(OCT 2) UPI - Thunderstorm rains sent the Rio Grande River spilling over its

banks along the Texas-Mexico border Tuesday and rain raised the threat of flooding elsewhere in Texas and New Mexico.

Flooding on the Rio Grande closed 30 miles of Highway 170 between Lajitas and Presidio, Texas. Normally dry Cibolo Creek was 4 feet deep at Shafter, Texas, near Presidio, authorities said.

The National Weather Service posted flood warnings for southwest Texas and southeast New Mexico.

Afternoon rainshowers extended over parts of Texas, Oklahoma, New Mexico, Colorado, Nebraska, Wyoming, Montana, Utah and Arizona. Showers also were scattered over northern New England and southern Florida.

Winds gusted in excess of 40 mph in the northern and central Plains on the front edge of a cold front.

An advisory for frost and freezing temperatures was posted for Tuesday night in northern Nevada.

Tropical storm Rachel, located in the Pacific Ocean southwest of the southern tip of the Baja Peninsula, pumped moisture into New Mexico, western Texas and Arizona causing scattered showers on already saturated ground.

A flash flood watch was posted for the entire day Tuesday in several counties in southeast New Mexico but no flooding had been reported in the area that received up to 2 inches of rain over the past two days.

Cold, stormy weather continued in the Cascades mountains of Washington state, where rain and snow showers combined with temperatures in the 40s to allow snow accumulations of 6 inches near the 5,000-foot level.

#90275u2173 10/02/1990 ~United Press International
NEW YORK (OCT. 2) UPI - Henry Hill, whose life as a mobster is documented in the hit film ''GoodFellas,'' says he is now just working a ''regular'' job and lives with a clean conscience.

Hill, 46, identified as a member of the $5 milllion 1978 Lufthansa conspiracy at Kennedy Airport - the largest robbery in U.S. history - told ''Inside Edition'' the movie is a true-to-life portrayal of his life in the mob.

''That movie was 99 percent accurate,'' Hill said in the interview, to be broadcast Wednesday. ''That's the way we lived; that's (the way) we treated our wives; constantly on a hustle,'' he said. ''That's the way they live today ... that's the real Mafia.''

Hill turned state's evidence against his best friend, James ''Jimmy the Gent'' Burke, the mastermind of the heist who is now serving 20 years in prison for the crime.

About a dozen of people associated with the case have been rubbed out.

Although no longer in the federal witness protection program, Hill's identity was being withheld and he appeared ''incognito,'' according to a statement from the producers of the program.

Hill has remarried and has a new son.

His story became well known in Nicholas Pileggi's book, ''Wise Guy.'' In the movie ''GoodFellas,'' he is portrayed by Ray Liotta, while the Burke character is portrayed by Robert De Niro.

''I spend a lot of time on the phone with De Niro, coaching him for playing Jimmy the Gent,'' said Hill.

Asked about the differences between then and now, Hill said, ''I can kiss my son good night in the evening (and) I can put my head on the pillow and not have to worry about a phone call in the middle of the night to 'come and meet me with a shovel ... come to the bar, bring a couple of pistols with you.'

''All that craziness - that insanity - is gone from my life,'' he said. ''I sleep a full night now and I'm able to say, 'I don't hurt nobody today, I don't have to hurt nobody.'''

#90275u2188 10/02/1990 ~United Press International

BERLIN (OCT. 2) UPI - Tens of thousands of revelers, many waving German flags and hoisting champagne bottles, massed around the Brandenburg Gate Tuesday for a wild celebration marking the end of more than four decades of division.

''This is the biggest moment in my life,'' said 23-year-old Maik Peter, who stood on West Berlin's Square of the Republic to witness the raising of the black, red and gold flag over a reunited Germany at the stroke of midnight Tuesday.

The moment of unification was to be heralded by the midnight ringing of the Freedom Bell - cast in the image of Philadelphia's Liberty Bell - in what has been West Berlin since the end of World War II.

That was to be followed by fireworks, public festivals and private parties throughout the new single nation and a national holiday on Wednesday.

The crowds began gathering under the arches of the famous gate, long a symbol of division, early Tuesday under bright sunshine as a lone bugler sounded the end of 45 years of Allied occupation of West Berlin Tuesday, Germany's final day as a divided nation.

The West German airline Lufthansa flew to Berlin for the first time since World War II, ferrying in legislators for the unification ceremonies that were to culminate in the formal reunion of East and West Germany.

By evening, street festivals with champagne and dancing and fireworks were well under way everywhere.

Thousands of security troops, many in riot gear, positioned themselves along East Berlin's famed Unter den Linden avenue, around the Reichstag and at other key spots around the city.

As expected, celebrations turned sour in the Kreuzberg district of West Berlin where leftist and neo-Nazi groups fought police. Authorities said one police officer was stabbed in the arms and another injured by gas pellets and firework rockets. No other details were immediately available.

West German Chancellor Helmut Kohl, who automatically becomes leader of the new all-German government, flew in from Hamburg after a triumphant election as head of the merged Christian Democratic parties of the two nations and appealed for all Germans to work together to heal 45 years of bitter division.

''More than 40 years of communist dictatorship have cut deep wounds, particularly in people's hearts,'' Kohl said.

''The third of October is a day of joy, gratitude and hope. The young

generation of Germans have every chance of spending their whole lives in peace and freedom,'' he said.

''We know that our joy is shared by many people throughout the world. With them we share our feelings at this moment - Germany is our fatherland, the united Europe is our future.''

East German Prime Minister Lothar De Maiziere said East Germany had no regrets in disappearing from the map and joining the West German Federal Republic.

''It is a time of great joy and a farewell without tears,'' he said. ''We are leaving behind a state which called itself democratic without being democratic.''

The East German flag was to be lowered for the last time Tuesday evening at U.N. headquarters in New York.

Soviet President Mikhail Gorbachev, whose new diplomacy made the reunification of Germany possible, sent German leaders a congratulatory message saying ''we expect much of our new relations.''

President Bush also sent a taped message congratulating the people of Germany, saying, ''Today, the German nation enters a new era. An era, in the words of your national anthem of 'unity and justice and freedom.'... America is proud to count itself among the friends and allies of free Germany, now and in the future.''

Earlier Tuesday, the Senate Foreign Relations Committee unanimously approved the treaty that provided for the reunification of Germany and sent the measure to the full Senate for consideration.

Many of the tens of thousands of Berliners and visitors who thronged the streets around the Brandenburg Gate came armed with German flags, wine bottles and beer cans. Vendors reported a booming trade in what were claimed to be fragments of the dismantled Berlin Wall, though some appeared to be freshly painted.

A crane held aloft a Trabant, a small two-stroke East German car that for many has come to symbolize the state that will now disappear.

Within sight of the Reichstag, the former German parliament building, an organ grinder stood on the western side of the Brandenburg gate playing a traditional tune he said he renamed ''We celebrate German unity.''

''I feel particularly good,'' said Eberhard Franke, 59, a West Berlin native who added he will never forget that for half his life he could not visit friends in East Berlin.

But in a comment that reflected a nagging worry in some minds in Germany and the rest of Europe as unification approached, he added, ''I hope that Germany will not become a mighty nation again.''

Guenther Grass, a leading West German author, was one of the few voices dissenting from the widespead optimism.

''This unification is ugly. It divides,'' Grass said in an address at the Reichstag, which was to be the focus of ceremonies marking the end of more than four decades of German division.

Grass warned that the economically powerful unified nation could pose a serious threat to its neighbors and that East Germans would become ''perpetual underdogs and second-class citizens'' in a united Germany.

''Should the world fear Germany again? No longer in military terms, but certainly in economic terms,'' he said.

The unification was formally an incorporation of the East German state into the existing West German federal republic, putting West German law in force in what had been East German territory. The West German Parliament, expanded with East German members, will govern until all-German elections in December.

The separate Germanys were created in the aftermath of Nazi Germany's surrender in World War II. The capitalist West Germany and West Berlin, an enclave in East Germany's heart, were crafted from the zones of occupation controlled by the United States, Britain and France. The communist East, including East Berlin, were formed from turf controlled by the other major victor, the Soviet Union.

As anti-communist fervor swept Eastern Europe last year, a headlong rush to unification began with the fall of the communist government and the breaching of the Berlin Wall. It accelerated with increasingly evident collapse of the East German economy.

On July 1, the economies of the two states were united as the West German deutsche mark replaced the ost mark as the legal currency in the East.

The merger is already causing wrenching economic, political and social changes in both halves of the new nation. East German factories are closing and unemployment is skyrocketing as government subsidies end and industry is forced to make it on its own in a free market.

The post-war American, British and French occupation of West Berlin, being terminated as part of the agreement that led to unification, ended Tuesday when the flags of the three nations were lowered and a bugle sounded at a final parade of the Allied Kommandatura.

''We want you to know that history will praise your achievements. You will not be forgotten,'' the U.S. commander in Berlin, Maj. Gen. Raymond Haddock, told the assembled troops.

''The Allies leave not as occupiers, but as partners,'' West Berlin mayor Walter Momper said in a speech.

Although the formal occupation is over, Allied troops will remain in Berlin during a transition period until Soviet troops leave what was formerly East German soil.

#90275u2234 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - The Senate confirmed David Souter of New Hampshire as an associate justice of the Supreme Court on a 90-9 vote Tuesday that could fundamentally alter the delicate balance on the nation's highest judicial body.

Final confirmation of President Bush's first high court nominee came five days after the Judiciary Committee endorsed Souter by a 13-1 vote.

Souter, 51, has been a member of the 1st U.S. Circuit Court of Appeals since April and has served as a member of the Supreme Court and a trial judge in New Hampshire. He also was the state's attorney general.

Souter, who will become the 105th member in the history of the Supreme Court, replaces Justice William Brennan, whose July 20 retirement after 34 years as a leading liberal voice on the court opened the door for the eighth straight appointment by a Republican president to the nine-member court.

With the court standing at a 4-4 deadlock between liberals and conservatives on divisive social issues such as abortion, Souter is likely to become the swing vote on the court's most important cases.

During three days of testimony during confirmation hearings, the circumspect New Englander disarmed opponents and enhanced his reputation for judicial excellence.

But he refused, despite repeated questioning, to specify his views on abortion saying that would be ''inappropriate'' because of the likelihood that the court will face a challenge to the 1973 Roe vs. Wade decision that established a woman's right to an abortion. With the court split down the middle on abortion, Souter could cast the tie-breaking vote on the issue and could also do so on other explosive matters, including civil rights, privacy and school prayer.

Souter, seen as a solid conservative entering the confirmation hearings, embraced several moderate views that left both supporters and opponents

guessing about his judicial philosophy.

Souter's confirmation could ''alter the course of this nation for decades to come,'' Judiciary Committee Chairman Sen. Joseph Biden, D- Del., said on the Senate floor.

Biden, a prominent liberal, and conservative Sen. Strom Thurmond, R- S.C., the committee's ranking GOP member, opened the body's consideration with contrasting reasons for support.

Biden praised Souter's views on freedom of speech and religion and on a pledge to interpret the Constitution more broadly than many conservative judges, but faulted the nominee for a ''mixed record'' on sex and race discrimination. He also termed ''troubling'' Souter's refusal to reveal his views on privacy rights, including the right to abortion established in the Roe vs. Wade.

But Biden said Souter ''is not an ideological right-wing conservative'' and ''genuinely seems to be open minded.''

Thurmond hailed Souter as ''a man of keen intellect who is devoted to the law.''

Abortion alone should not determine a senator's vote, Thurmond said, noting, ''A member of the Supreme Court makes decisions in a vast array of areas and is not put in place to make short-term decisions to satisfy any political constituency, any one individual or any particular group.''

Sen. Edward Kennedy, D-Mass., the lone dissenter in the Judiciary Committee, spoke against Souter.

''I am troubled that if Judge Souter joins the current closely divided Supreme Court, he will solidify a 5-4 anti-civil rights, anti- privacy majority inclined to turn back the clock on the historic progress of recent decades,'' he said.

Souter avoided the rancor that torpedoed the 1987 nomination of Robert Bork to the Supreme Court, with the liberal coalition that actively worked against Bork failing to resurface. But Souter was hotly opposed by several women's and abortion rights groups who fear he will cast the vote overturning Roe vs. Wade.

Another Souter opponent, Sen. Alan Cranston, D-Calif., said on the ''unhappy day'' Souter casts the deciding vote to overturn Roe vs. Wade, he will introduce legislation to make the ability to choose to have an abortion a statutory right.

Sen. Timothy Wirth, D-Colo., Souter's Harvard classmate, said he spoke with many of Souter's old friends before deciding to vote for the nominee. Wirth said one friend told him, ''How does Bush know any more about him than we do?

How could he? He's an intensely private person.''

Before being sworn in as an associate justice, Souter will have missed two of the most important cases before the the court during its 1990-91 term, which opened Monday. On Tuesday, the court heard arguments in an Oklahoma case involving school desegregation that could affect hundreds of school districts nationwide and, on Wednesday, the court was slated to hear an Alamaba case that could lead to limits on multimillion-dollar damage awards.

The first major case Souter will consider is a Wisconsin dispute, to be argued Oct. 10, on whether employers can use ''fetal protection'' policies to bar women of child-bearing age from certain jobs because the work could lead to birth defects.

A Supreme Court spokesman said no date has yet been set for Souter's swearing in by Chief Justice William Rehnquist.

-30- 5402

#90275u2243 10/02/1990 ~United Press International

NEW YORK (OCT. 2) UPI - The nation's supplies of crude oil fell sharply for the third consecutive week as the Persian Gulf crisis cut deeply into imports from the Middle East, the American Petroleum Institute reported Tuesday.

Inventories and imports of gasoline, however, rose, the API's weekly industry survey found.

For the week ended Sept. 28, crude oil inventories fell 9.4 million barrels to 354.6 million from 364.0 million in the prior week but remained above year-ago levels of 333.3 million barrels.

In the two prior weeks, stocks had fallen by 5.9 and 4.5 million barrels respectively.

Daily imports of crude dove to 5.0 million barrels from 5.7 million in the previous week and were substantially lower than year-ago imports of 6.3 million barrels a day. Three weeks ago, imports were 6 million barrels daily.

On a daily basis, the U.N. embargo on oil imports from Iraq and Kuwait, ordered Aug. 6 in the wake of Iraq's invasion of Kuwait four days earlier, has left the world short about 1.5 million barrels of crude, even after Saudi Arabia and other producers raised output.

Since it takes tankers four to five weeks to reach the United States from the Middle East, the decline in imports and inventories as a result of the embargo did not begin to register until three weeks ago.

With U.S. crude inventories still 21.3 million barrels above last year's level

the nation still has a buffer against declining imports - but one that is rapidly disappearing.

Gasoline supplies rose to 223.9 million barrels from 222.3 million in the prior week and were marginally ahead of the year-ago amount of 223.7 million.

Stocks of unleaded gasoline, which accounts for more than three- quarters of the domestic market, also increased, to 172.0 million barrels from 171.4 million a week earlier, and remained significantly higher than year-ago levels of 161.7 million barrels.

Daily gasoline production moved up to 7.3 million barrels from 7.2 million in the previous week and was higher than the year-ago daily output of 6.9 million barrels.

Daily gasoline imports increased substantially to 480,000 barrels from 215,000 in the previous week and were well above year-ago imports of 301,000.

U.S. refineries operated at 91.2 percent of capacity last week, compared with 92.8 percent a week earlier and 89.4 percent a year ago.

Inventories of distillate - used for home-heating oil and diesel fuel - slipped to 134.8 million barrels from 136.5 million a week earlier, when a five-year high was set, but remained above year-ago levels of 122.9 million barrels.

Daily distillate production was 2.9 million barrels, the same level as in the preceding week and as a year ago.

Distillate imports jumped to 337,000 barrels a day from 220,000 in the previous week but were much higher than year-ago daily imports of 95,000 barrels.

Daily imports of all refined products rocketed to 2.4 million barrels from 1.5 million in the preceding week and were significantly higher than year-ago imports of 1.8 million barrels.

#90275u2275 10/02/1990 ~United Press International

(OCT. 2) UPI - Officials in Honolulu say a Navy submarine has located and recovered the second half of a cargo door that tore off a United Airlines flight near Hawaii last year, killing nine people.

The policy-making panel of the Federal Reserve Board met in Washington today, apparently to discuss ways to ease interest rates once the budget compromise becomes law. Also of interest to the FED- new jobless figures due Friday.

Rwanda declared a state of emergency today and imposed a nationwide dusk-to-dawn curfew, claiming the tiny east African country had been attacked, apparently by Rwandan rebels from neighboring Uganda.

Soviet and Lithuanian leaders began ground-breaking talks in Moscow today in advance of formal talks between the two sides. They issued a joint communique pledging to reach a bilateral trade and economic accord by next year.

It's NOT every kid who can put a town on the map. But thanks partly to a letter from 10-year-old Chris Muncy of Mishawaka, Indiana, the 1991 Rand McNally atlas will include his grandparents' town of Parrott, Virginia... population 800.

DETROIT (OCT. 2) UPI - General Motors Corp., while expressing reservations about a gasoline tax increase, came out Tuesday in support of the agreement to cut the federal budget deficit and said ''nothing should be done to jeopardize'' its passage by Congress.

The agreement ''should result in real reductions of the budget deficit,'' GM said in a prepared statement.

''We understand Congress will have the opportunity, within the framework of the agreement, to remedy unintended problems, but we believe nothing should be done that would jeopardize passage.''

GM noted the single largest revenue raiser in the package is a significant increase in the federal tax on gas, saying it ''will result in real energy

conservation as people cut back on driving and move to more fuel-efficient vehicles.''

However, ''we believe a broader-based energy fee or tax would have been more equitable in spreading the burden and cost of conservation,'' the GM statement said.

''Unfortunately, a gasoline tax places a disproportionate share on the highway user, especially since a portion of it will be used for deficit reduction instead of funding for highways and bridges,'' GM said.

''Nonetheless, this gasoline tax is the kind of market-based approach to conservation that will be effective, as opposed to the disruptive and inefficient Corporate Average Fuel Economy program.'' The so-called CAFE program set mpg targets for the nation's automakers in an effort to improve overall fuel efficiency of cars.

Chrysler Corp. Chairman Lee Iacocca endorsed the budget agreement after it was announced Sunday.

The first of a number of votes by Congress on legislation emerging from the agreement reached last weekend by Bush administration officials and congressional leaders is set to take place Thursday in the House.

#90275u2294 10/02/1990 ~United Press International

BERLIN (OCT. 2) UPI - Tens of thousands of Germans cheered wildly, danced and drank champagne at the historic Brandenburg Gate early Wednesday as they witnessed the rebirth of a united Germany and the end of more than four decades of postwar division.

''This is the biggest moment in my life,'' said 23-year-old Maik Peter, who stood on West Berlin's Square of the Republic to witness the raising of the black, red and gold flag over a reunited Germany at the stroke of midnight.

The moment of unification was heralded with the ringing of the Freedom Bell - cast in the image of Philadelphia's Liberty Bell - as fireworks exploded in the sky over what had been West Berlin since the end of World War II.

Revelers sang the national anthem and waved flags in Berlin in an emotional celebration as leaders of the unified nation shook hands and embraced each other. Public festivals and private parties were scheduled throughout the new single Germany and a national holiday was declared on Wednesday.

The crowds began gathering under the arches of the famous gate, long a symbol of division, early Tuesday under bright sunshine as a lone bugler sounded the end of 45 years of Allied occupation of West Berlin Tuesday, Germany's final

day as a divided nation.

The West German airline Lufthansa flew to Berlin for the first time since World War II, ferrying in legislators for the unification ceremonies that culminated in the formal reunion of East and West Germany.

By evening, street festivals with champagne and dancing and fireworks were well under way everywhere.

Thousands of security troops, many in riot gear, positioned themselves along East Berlin's famed Unter den Linden avenue, around the Reichstag and at other key spots around the city.

As expected, celebrations turned sour in the Kreuzberg district of West Berlin where leftist and neo-Nazi groups fought police. Authorities said one police officer was stabbed in the arms and another injured by gas pellets and firework rockets. No other details were immediately available.

West German Chancellor Helmut Kohl, who automatically became leader of the new all-German government, flew in from Hamburg after a triumphant election as head of the merged Christian Democratic parties of the two nations and appealed for all Germans to work together to heal 45 years of bitter division.

''More than 40 years of communist dictatorship have cut deep wounds, particularly in people's hearts,'' Kohl said.

''The third of October is a day of joy, gratitude and hope. The young generation of Germans have every chance of spending their whole lives in peace and freedom,'' he said.

''We know that our joy is shared by many people throughout the world. With them we share our feelings at this moment - Germany is our fatherland, the united Europe is our future.''

East German Prime Minister Lothar De Maiziere said East Germany had no regrets in disappearing from the map and joining the West German Federal Republic.

''It is a time of great joy and a farewell without tears,'' he said. ''We are leaving behind a state which called itself democratic without being democratic.''

The East German flag was to be lowered for the last time Tuesday evening at U.N. headquarters in New York.

Soviet President Mikhail Gorbachev, whose new diplomacy made the reunification of Germany possible, sent German leaders a congratulatory message saying ''we expect much of our new relations.''

President Bush also sent a taped message congratulating the people of Germany, saying, ''Today, the German nation enters a new era. An era, in the words of your national anthem of 'unity and justice and freedom.'... America is proud to count itself among the friends and allies of free Germany, now and in the future.''

Earlier Tuesday, the Senate Foreign Relations Committee unanimously approved the treaty that provided for the reunification of Germany and sent the measure to the full Senate for consideration.

Many of the tens of thousands of Berliners and visitors who thronged the streets around the Brandenburg Gate came armed with German flags, wine bottles and beer cans. Vendors reported a booming trade in what were claimed to be fragments of the dismantled Berlin Wall, though some appeared to be freshly painted.

A crane held aloft a Trabant, a small two-stroke East German car that for many has come to symbolize the state that will now disappear.

Within sight of the Reichstag, the former German parliament building, an organ grinder stood on the western side of the Brandenburg gate playing a traditional tune he said he renamed ''We celebrate German unity.''

''I feel particularly good,'' said Eberhard Franke, 59, a West Berlin native who added he will never forget that for half his life he could not visit friends in East Berlin.

But in a comment that reflected a nagging worry in some minds in Germany and the rest of Europe as unification approached, he added, ''I hope that Germany will not become a mighty nation again.''

Guenther Grass, a leading West German author, was one of the few voices dissenting from the widespead optimism.

''This unification is ugly. It divides,'' Grass said in an address at the Reichstag, which was to be the focus of ceremonies marking the end of more than four decades of German division.

Grass warned that the economically powerful unified nation could pose a serious threat to its neighbors and that East Germans would become ''perpetual underdogs and second-class citizens'' in a united Germany.

''Should the world fear Germany again? No longer in military terms, but certainly in economic terms,'' he said.

The unification was formally an incorporation of the East German state into the existing West German federal republic, putting West German law in force in what had been East German territory. The West German Parliament, expanded with

East German members, will govern until all-German elections in December.

The separate Germanys were created in the aftermath of Nazi Germany's surrender in World War II. The capitalist West Germany and West Berlin, an enclave in East Germany's heart, were crafted from the zones of occupation controlled by the United States, Britain and France. The communist East, including East Berlin, were formed from turf controlled by the other major victor, the Soviet Union.

As anti-communist fervor swept Eastern Europe last year, a headlong rush to unification began with the fall of the communist government and the breaching of the Berlin Wall. It accelerated with increasingly evident collapse of the East German economy.

On July 1, the economies of the two states were united as the West German deutsche mark replaced the ost mark as the legal currency in the East.

The merger is already causing wrenching economic, political and social changes in both halves of the new nation. East German factories are closing and unemployment is skyrocketing as government subsidies end and industry is forced to make it on its own in a free market.

The post-war American, British and French occupation of West Berlin, being terminated as part of the agreement that led to unification, ended Tuesday when the flags of the three nations were lowered and a bugle sounded at a final parade of the Allied Kommandatura.

''We want you to know that history will praise your achievements. You will not be forgotten,'' the U.S. commander in Berlin, Maj. Gen. Raymond Haddock, told the assembled troops.

''The Allies leave not as occupiers, but as partners,'' West Berlin mayor Walter Momper said in a speech.

Although the formal occupation is over, Allied troops will remain in Berlin during a transition period until Soviet troops leave what was formerly East German soil.

#90275u2320 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - Exxon Corp. has filed legal papers charging Coast Guard negligence contributed to the Exxon Valdez oil spill and claiming the agency is ''wholly or partially liable'' for more than $2 billion in cleanup and related costs, Exxon officials confirmed Tuesday.

In an apparent effort to complicate the government's criminal case against Exxon for the March 24, 1989, spill, the oil company said it filed a ''notice

of claims for indemnity'' with the Coast Guard. The papers say the agency shared the blame for the accident and should take some measure of financial responsibility.

Among other items, the notice of claims said the Coast Guard should help defray ''Exxon's contribution to expenditures totalling in excess of $2 billion for cleanup for which the Coast Guard is wholly or partially liable.''

In essence, the legal papers served notice on the government that if Exxon was to be held criminally responsible for negligence causing the accident, it would turn the same negligence charges against the Coast Guard.

For example, the papers noted the Justice Department had accused Exxon of negligence in allowing Joseph Hazelwood to serve as master of the Exxon Valdez even though he had a history of drinking problems.

''If, as alleged by the government in a pending criminal case against (Exxon), Joseph J. Hazelwood was not competent to serve as the master of the Exxon Valdez, the Coast Guard was negligent to issue Hazelwood a master's license,'' the papers said.

Exxon officials refused to comment on reasons for the legal maneuver. The company issued a brief statement that said in part: ''The notice of claims is solely an administrative requirement under the law in order to preserve future legal options with regard to any potential litigation involving the federal government.''

In response to the papers, the Coast Guard issued a statement saying, ''We are not aware of any legal basis that would justify Coast Guard liability to either Exxon or any other parties in connection witrh the Exxon Valdez oil spill.''

Justice Department officials were not available for comment.

The papers also accuse the Coast Guard of negligence in the operation of its vessel traffic control system in Prince William Sound on the night of the accident. The papers said Coast Guard officials failed to warn the Exxon Valdez about Bligh Reef, the rock upon which the ship ran aground, spilling nearly 11 million gallons of crude oil.

On a third issue, Exxon accused the Coast Guard of negligence in failing to promptly authorize the use of oil dispersants to break up the spreading slick after the accident.

State and federal officials feared possible toxic effects from use of chemical dispersants, but Exxon's claim said those concerns were unfounded and based on ''lack of training and misinformation'' among Coast Guard officials.

Because dispersants were not used in a timely manner, ''the impacts of the spill were at least twice as great as they would have been had (Coast Guard officials) acted with due care,'' the papers said.

#90275u2333 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - A Senate subcommittee approved a $15.1 billion 1991 foreign aid bill Tuesday that includes a provision barring aid to countries that do not comply with U.N. sanctions against Iraq.

The bill sailed through the foreign operations subcommittee as members agreed to delay debates on several controversial issues until the full Appropriations Committee considers the measure on Thursday.

Among those issues were two provisions in the bill that have prompted White House veto threats - one halving military aid to El Salvador and the other allowing funds for groups that support abortion.

Another provision opposed by the administration would cut off $7 million in non-lethal aid to the non-communist guerrillas in Cambodia, but debate on that question also was left to the full committee.

The House passed a $15.6 billion aid bill in June, meaning the Senate panel was left with the task of crafting a bill reflecting the impact of Iraq's invasion of Kuwait.

A Senate Appropriations Committee spokeswoman said the subcomittee's bill would authorize a total of $15.063 billion in aid in the 1991 fiscal year.

The measure responds to the Persian Gulf crisis by granting President Bush's request for authority to forgive Egypt's $6.7 billion military debt and by barring aid to any country that violates the U.N. sanctions against Iraq, unless the president determines such assistance is in the national interest.

Sen. Frank Lautenberg, D-N.J., who sought the provision on Iraqi sanctions, said Jordan, which would receive $85 million in aid under the House bill, is among the countries that could be affected by the provision.

Turkey, which has cut off its oil pipeline with Iraq, would receive $545 million in military aid in the subcommittee bill, compared with $497 million in 1990 and $430 million in the House bill.

Morocco, which sent troops to help defend Saudi Arabia, would receive $52 million in military aid, compared with $43 million in 1990.

Overall, the largest beneficiaries of aid again would be Israel, with $3 billion, and Egypt, with $2.1 billion, the same amounts as in the House bill.

However, in order to help Israel during the Persian Gulf crisis, the subcommittee approved an amendment that would allow the Jewish state to shift $200 million of its economic aid to military purposes.

Sen. Robert Kasten, R-Wis., the panel's ranking Republican, who offered the amendment, said it has been estimated Israel faces $1 billion in extra costs from the crisis and added that he was working on other measures to help Israel respond to the threat poses by Iraq.

#90275u2344 10/02/1990 ~United Press International

WASHINGTON (OCT. 2) UPI - The Senate confirmed David Souter of New Hampshire as an associate justice of the Supreme Court on a 90-9 vote Tuesday that could fundamentally alter the delicate balance on the nation's highest judicial body.

Final confirmation of President Bush's first high court nominee came five days after the Judiciary Committee endorsed Souter by a 13-1 vote.

Souter, 51, has been a member of the 1st U.S. Circuit Court of Appeals since April and has served as a member of the Supreme Court and a trial judge in New Hampshire. He also was the state's attorney general.

Souter, who will become the 105th member in the history of the Supreme Court, replaces Justice William Brennan, whose July 20 retirement after 34 years as a leading liberal voice on the court opened the door for the eighth straight appointment by a Republican president to the nine-member court.

Forty-six Democrats and 44 Republicans voted in support of Souter, while all nine votes against the nomination were cast by Democrats. Sen. Pete Wilson, R-Calif., did not vote.

A Supreme Court spokesman said Chief Justice William Rehnquist will swear in Souter next Tuesday, Oct. 9.

At the White House, press secretary Marlin Fitzwater said, ''We're obviously very pleased that Congress has confirmed this nomination. We think Judge Souter will be an outstanding justice for many years. He will render many learned decisions.''

With the court standing at a 4-4 deadlock between liberals and conservatives on divisive social issues such as abortion, Souter is likely to become the swing vote on the court's most important cases.

During three days of testimony during confirmation hearings, the circumspect New Englander disarmed opponents and enhanced his reputation for judicial excellence.

But he refused, despite repeated questioning, to specify his views on abortion saying that would be ''inappropriate'' because of the likelihood that the court will face a challenge to the 1973 Roe vs. Wade decision that established a woman's right to an abortion. With the court split down the middle on abortion, Souter could cast the tie-breaking vote on the issue and could also do so on other explosive matters, including civil rights, privacy and school prayer.

Souter, seen as a solid conservative entering the confirmation hearings, embraced several moderate views that left both supporters and opponents guessing about his judicial philosophy.

Souter's confirmation could ''alter the course of this nation for decades to come,'' Judiciary Committee Chairman Sen. Joseph Biden, D- Del., said on the Senate floor.

Biden, a prominent liberal, and conservative Sen. Strom Thurmond, R- S.C., the committee's ranking GOP member, opened the body's consideration with contrasting reasons for support.

Biden praised Souter's views on freedom of speech and religion and on a pledge to interpret the Constitution more broadly than many conservative judges, but faulted the nominee for a ''mixed record'' on sex and race discrimination. He also termed ''troubling'' Souter's refusal to reveal his views on privacy rights, including the right to abortion established in the Roe vs. Wade.

But Biden said Souter ''is not an ideological right-wing conservative'' and ''genuinely seems to be open minded.''

Thurmond hailed Souter as ''a man of keen intellect who is devoted to the law.''

Abortion alone should not determine a senator's vote, Thurmond said, noting, ''A member of the Supreme Court makes decisions in a vast array of areas and is not put in place to make short-term decisions to satisfy any political constituency, any one individual or any particular group.''

Sen. Edward Kennedy, D-Mass., the lone dissenter in the Judiciary Committee, spoke against Souter.

''I am troubled that if Judge Souter joins the current closely divided Supreme Court, he will solidify a 5-4 anti-civil rights, anti- privacy majority inclined to turn back the clock on the historic progress of recent decades,'' he said.

Souter avoided the rancor that torpedoed the 1987 nomination of Robert Bork to the Supreme Court, with the liberal coalition that actively worked against

Bork failing to resurface. But Souter was hotly opposed by several women's and abortion rights groups who fear he will cast the vote overturning Roe vs. Wade.

Another Souter opponent, Sen. Alan Cranston, D-Calif., said on the ''unhappy day'' Souter casts the deciding vote to overturn Roe vs. Wade, he will introduce legislation to make the ability to choose to have an abortion a statutory right.

Sen. Timothy Wirth, D-Colo., Souter's Harvard classmate, said he spoke with many of Souter's old friends before deciding to vote for the nominee. Wirth said one friend told him, ''How does Bush know any more about him than we do? How could he? He's an intensely private person.''

Before being sworn in as an associate justice, Souter will have missed two of the most important cases before the the court during its 1990-91 term, which opened Monday. On Tuesday, the court heard arguments in an Oklahoma case involving school desegregation that could affect hundreds of school districts nationwide and, on Wednesday, the court was slated to hear an Alamaba case that could lead to limits on multimillion-dollar damage awards.

The first major case Souter will consider is a Wisconsin dispute, to be argued Oct. 10, on whether employers can use ''fetal protection'' policies to bar women of child-bearing age from certain jobs because the work could lead to birth defects.

-30- 5830

#90275u2368 10/02/1990 ~United Press International

SEATTLE (OCT. 2) UPI - NFL Commissioner Paul Tagliabue said Tuesday Cincinnati Bengals Coach Sam Wyche faces a ''stiff fine'' if he barred a woman reporter from entering the team's locker room Monday night.

Denise Tom, a sports writer with USA Today for five years who has covered the San Francisco 49ers since 1986 and reported on five Super Bowls, said Wyche refused to allow her to enter the locker room after the Bengals' 31-16 loss to the Seahawks.

The incident follows the controversy surrounding the New England Patriots and Boston Herald reporter Lisa Olson, who claims she was sexually harassed by five Patriot players while she was working Sept. 17.

Before Monday night's game, Tagliabue reiterated league policy, which is to allow all accredited media equal access to players in locker rooms.

''I don't know much about what occurred last night,'' Tagliabue said at a breakfast honoring him Tuesday. ''But if he in fact excluded this woman from the locker room, then there will be a very stiff fine for Sam Wyche this week.''

Last year, Wyche banned all reporters from the locker room after a loss and was fined by the league. Several years ago he got into a shoving match with a radio reporter.

Tom was barred from the Bengals locker room by a security guard, who said he was following orders. Later, Wyche said it was his decision.

''I'll be out of this business before I let a woman in the locker room,'' Wyche said. ''Our guys don't want a woman to walk into a tight locker room like that. I'm not doing this to these guys. I'm not doing it to their wives.''

Wyche said he also arranged for quarterback Boomer Esiason to talk to Tom, who said she wanted to interview only Esiason because she was on deadline.

''We gave her every courtesy we could,'' Wyche said. ''I personally found out who she wanted to talk to and the player was brought out.''

USA Today Sports Editor Gene Policinski said Tuesday he would file a protest with the league.

''The irony here is that before the game Denise Tom was one of the reporters who heard Tagliabue reiterate league policy and practice,'' Policinski said. ''To be faced with this hours later is ridiculous.''

Tom, who said she had her credentials in plain sight, received no resistance in the Seahawks locker room, although one player yelled '''Hey, there's a woman in here,''' she said.

''It's something that has always gone on and usually something I ignore,'' she said. ''It wasn't a lewd comment, it was just a remark.''

The latest episode involving Wyche apparently had its genesis last week when players noticed a woman without a notebook standing in the locker room.

''The players were upset and came to me about it,'' Wyche said. ''I asked them if they wanted it so the women could talk to whom they wanted outside. They voted for that.''

Olson claims she was in New England's locker room Sept. 17 when several naked Patriots players approached her and made lewd suggestions. Olson says tight end Zeke Mowatt, while ''egged on'' by several other players, suggested she perform oral sex on him.

Tagliabue has appointed Harvard law professor and former Watergate investigator Philip Heymann to investigate Olson's charges. Tagliabue also contacted all NFL teams this week to remind them of league policy.

Patriots owner Victor Kiam initially condoned his players' actions, allegedly calling Olson a ''classic bitch'' and saying women were ''intruders'' in the locker room. He denies making the slur and has since apologized, his first attempt communicated to her by fax. Olson refused his apology.

Kiam has hired a public relations firm in an effort to defuse the controversy. He has taken out newspaper ads and appeared on television shows, trying to explain his position.

Kiam is also the owner of Remington Products Inc., and the locker- room incident has triggered the prospect of a boycott of his shaving company by the National Organization of Women.

''I have sent a letter to Tagliabue, asking for league action on Sam Wyche's barring of Denise Tom, and statements from the NFL and Bengals management on carrying out the league policy and practice involving equal access of media to locker rooms,'' said Policinski. ''What Sam Wyche did was not only a direct violation of league policy, but a slap in the face for Tagliabue, who contacted management of each team this past week and reiterated league policy on the issue.''

#90275u2384 10/02/1990 ~United Press International

ONTARIO, Calif. (OCT. 2) UPI - Discounter Southwest Airlines said Tuesday that it will expand its service from Southern California to Las Vegas, with five daily flights from Ontario on Oct. 28 for a top one-way fare of $59.

Southwest also said it will offer six daily nonstop roundtrip flights from Las Vegas to Reno beginning Nov. 15, also for a $59 top price.

The moves by Dallas-based Southwest could mark the start of a fare war on the busy corridor between Las Vegas and Southern California, which is already served by American, America West, Delta and USAir.

Southwest has been widely credited with forcing down fares among the majors earlier this year along the heavily travelled corridor between the San Francisco Bay Area and Southern California. Those fares, which had been as high as $150 one-way, have been cut in half on many flights in the past six months after Southwest began offering deep discounts on flights between Ontario and Burbank in the south and Oakland in the north.

Southwest said it will also offer advance purchase ''fun fares'' on a restricted basis starting as low as $29 for a 21-day advance purchase fare to Ontario. and $39 to Reno.

-30- 1354

#90275u2388 10/02/1990 ~United Press International
(OCT. 2) UPI - Both the House and Senate now have adopted resolutions supporting President Bush's handling of the Persian Gulf crisis. The Senate voted 96-3 for the measure today. The action comes one day after the House voted 380-29 for a resolution that also applauded the president while urging Bush to emphasize ''diplomatic and non-military means'' in solving the crisis. Senate Democratic leader George Mitchell of Maine sought to calm fears by saying the resolution is NOT an authorization for the use of force, now or in the future. .

At the United Nations today, Saudi Arabia's foreign minister said he rejects any ''alternative'' plans to end the Iraqi occupation of Kuwait. The statement is a clear rebuttal to French President Mitterrand's peace initiative linking the Persian Gulf crisis to the Arab-Israeli conflict. The Saudi official said a ''decisive judgment'' against Iraq depends on solution that- quote- ''cannot be complete except by preventing the aggressor from reaping the fruits of aggression.''

A panel of energy experts says supplies of most fuels are expected to be adequate this winter, though more expensive, in the wake of the Persian Gulf crisis. Calvin Kent of the federal Energy Information Administration says there are expected to be NO shortages of gasoline, jet fuel and heating oil. But Kent says supplies of propane already are at levels lower than last year and could present a ''potentially serious problem'' this winter.

#90275u2404 10/02/1990 ~United Press International
SAN DIEGO (OCT. 2) UPI - Joe McIlvaine, recognized as one of the bright young executives in baseball, was named Tuesday general manager of the troubled San Diego Padres.

McIlvaine signed a five-year deal reportedly worth $1.6 million to replace Jack MeKeon, who was fired last month. The 42-year-old McIlvaine comes to the Padres from the New York Mets where he helped form a management troika with General Manager Frank Cashen and business manager Al Harazin.

Since McIlvaine took over the baseball operations of the Mets in 1985, the club has won two division titles and one World Series. They also finished no worse than second in the National League East.

''I've done it before and I'll do it again,'' said McIlvaine when asked if he could turn the Padres around.

McIlvaine also denied rumors circulating that he left New York because of a conflict with owner Fred Wilpon and Cashen. He said he talked with them in August, explaining that he'd like some time to think the offer over.

''I told them that this is not a ploy to get a better contract,'' he said. ''It was an instinctive feeling to move on. Obviously, they didn't want to see me go.''

The move comes at a time with the Mets facing the possible loss of star outfielder Darryl Strawberry to free agency. The task of finding a replacement would have fallen to McIlvaine. Now the assumption is McIlvaine could be bidding against the Mets for the slugging right fielder.

The Padres, predicted to win the National League West, struggled all season despite the addition of RBI producer Joe Carter. McKeon stepped down as manager in July and was replaced by Greg Riddoch.

McIlvaine, who previously scouted for the Brewers, Angels and Orioles, is credited for supplying the Mets with much of the talent that has produced the major leagues' winningest team since 1984 and a World Series title in 1986.

His strength is judging and obtaining young talent through trades. During his tenure, the Mets received pitchers Ron Darling, Sid Fernandez, David Cone, Frank Viola, Bob Ojeda, John Franco and outfielder Kevin McReynolds. Dwight Gooden was drafted in 1982 while McIlvaine was scouting director.

His biggest blunder was the 1989 trade of center fielder Lenny Dykstra and relief pitcher Roger McDowell to Philadelphia for Juan Samuel.

This season, he made an excellent waiver pickup in center fielder Daryl Boston which helped ease the sting of the Dykstra trade. For the stretch drive, the Mets made three acquisitions - catcher Charlie O'Brien, second baseman Tommy Herr and outfielder Pat Tabler.

Cashen said he will assume the McIlvaine's duties for the Mets and Harazin will have an expanded front office role.

''I now will assume those major-league functions which had been performed by Joe,'' Cashen said. ''Also senior vice president Al Harazin will be given expanded responsibilities. He has long been involved in the decision-making process in our baseball department.''

#90275u2433 10/02/1990 ~United Press International

UNITED NATIONS (OCT. 2) UPI - The United States has agreed to provide Israel with $400 million in housing loan guarantees for Soviet emigres on the condition that the housing is not sited in the occupied territories, Secretary of State James Baker said Tuesday.

Baker said at a newsconference that the United States received assurances that the housing would not be located beyond the ''green line,'' Israeli-recognized

lands occupied from Jordan during the 1967 war.

As described by Baker, those assurances mean that the money would not be spent in East Jerusalem or in the West Bank and Gaza. Baker said the Israelis would monitor the agreement and report to the United States.

In addition, Baker said, the Israelis guaranteed that they would provide ''no special incentives'' to induce recent Soviet emigres to settle in the occupied territories.

The idea that Israel would displace Palestinian Arabs in the occupied territories alarmed some Arab countries. There are about 120,000 Soviets emigrating to Israel each year.

U.S. officials said the assurances given to Baker are the strongest limitations that the Israelis have ever given to the United States, limiting their right to build new civilian settlements in occupied territories.

#90275u2446 10/02/1990 ~United Press International

BOGOTA, Colombia (OCT. 2) UPI - Dynamite and chemicals in a cocaine manufacturing laboratory exploded Tuesday in the city of Medellin, killing at least eight people, including five children, officials said.

The laboratory located in a house exploded about 9:45 a.m., said Rodrigo Palacios, assistant secretary of the city of Medellin, 160 miles northwest of Bogota.

''A laboratory exploded apparently as a consequence of dynamite camouflaged in a floor of the house,'' Palacios told a Bogota radio station. The dynamite was being stored in the home and apparently exploded accidentally, said city spokesman Victor Zulaga,.

Six people died at the scene and two others in hospitals, Palacios said. Another 57 people were wounded, 12 of them seriously, said a spokesman for the city. Five of the dead were children ages 4 and 5.

Six houses were destroyed and another five seriously damaged, along with 18 vehicles, he said. Other buildings in a four-block area were damaged.

#90275u2531 10/02/1990 ~United Press International

(OCT. 2) UPI - Residents of East and West Germany are spending their final minutes as a divided nation. The two countries become one at midnight, German time at the peal of a bell cast in the image of Phildadelphia's Liberty Bell. The unification ends 45 years of Allied occupation of West Berlin. Ceremonies

and festivities are planned across the country to mark the formal reunion.

Survivors of a hijacked Chinese jetliner that crashed in a fireball today in south China say the crew was struggling with the hijackers in the cockpit before impact. 120 people were killed and 100 others survived. Western diplomats say the Boeing 737 skidded across the runway out of control and slammed into an empty plane and another jumbo jet waiting to take off with an undetermined number of passengers.

There was more U-S muscle flexing in the Persian Gulf today. The United States sent an aircraft carrier into the dangerous waters of Gulf for the first time in 16 years and staged a 15-thousand-Marine mock amphibious assault. The move came less than 24 hours after President Bush offered new optimism that the crisis with Iraq could be settled without war.

Supreme Court nominee David Souter is expected to easily win confirmation by the full Senate, with only a handful of senators announcing opposition. The Senate Judiciary Committee endorsed Souter's nomination 13year-old New England jurist would become the 105th justice on the nation's highest court, replacing liberal Justice William Brennan, who retired in July after 34 years on the bench.

#90275u2535 10/02/1990 ~United Press International
(OCT. 2) UPI - The United States, Canada and the 33 European nations will provide almost one-and-one-half BILLION dollars in economic assistance to countries hurt by the Persian Gulf embargo. The 35-member Conference on Security and Co-operation in Europe will provide the short-term financial assistance first to the three countries hardest hit... Egypt, Turkey and Jordan. The aid will be given in the form of grants, but some provisions will also be made for the possibility loans.

Health officials in Chicago are trying to determine the cause of the apparent food poisonings of scores of people attending a hardware convention. Officials say the apparent cause was food served Sunday night at the Hyatt Regency Hotel but say it could be days or weeks before that's known for sure. At least 175 people were treated at more than a dozen hospitals. At least 35 were admitted.

#90275u2683 10/02/1990 ~United Press International
WASHINGTON (OCT. 3) UPI - President Bush, saying the time for ''politics and posturing is over,'' appealed to the nation Tuesday to rally around a compromise budget plan of tax hikes and spending cuts that he said was necessary to thwart economic hardship.

Bush, in a 10-minute speech from the Oval Office directed at a national

television audience and reluctant members of Congress who threaten to derail the complex, $500 billion deficit reduction package, said failure of the measure on Capitol Hill will weaken the already fragile economy.

''Everyone will bear a small burden. But if we succeed, every American will have a large burden lifted. If we fail to enact this agreement, our economy will falter, markets may tumble and recession will follow,'' Bush said.

Quick action on the budget agreement is necessary since the government is operating under a temporary spending measure that expires Friday.

Worked out under the gun of automatic spending cuts that would have taken effect Monday with the beginning of the 1991 fiscal year, the budget deal is aimed at erasing the deficit.

Over five years, it would generate $134 billion in revenue from increased taxes on such American staples as beer and gasoline, as well as on luxury items as fur coats and fancy cars, and by changing some tax rules.

The spending cuts would strike hardest at the Pentagon, in the Medicare health program for the elderly, and farm programs.

On Capitol Hill, House Democratic leaders delayed the first scheduled vote on the budget from Wednesday until Thursday to give Bush and House Republican leader Robert Michel of Illinois more time to nail down a majority of House Republicans to back the deal.

Facing the realities of an election year, negotiators decided any agreement must win the support of a majority of both Democrats and Republicans in both the House and Senate to prevent one party from blaming the other for the painful effects of the accord.

Rep. Vin Weber, R-Minn., an opponent of the budget deal, told reporters that as of midday Tuesday there were ''90 guys ... against the deal'' - more than half the 176 House Republicans. But he added, ''The president, if he wants to, can probably win this fight. If he makes it a personal loyalty test, he'll win.''

Bush did not take a personal tack in his television address, but a national one, appealing to the public to embrace the package and make the vote in Congress less difficult for their representatives. The seats of the entire House and one-third of the Senate are up for grabs in the Nov. 6 general election.

''Tonight I ask for your help,'' Bush said. ''I ask you to understand how important, and for some how difficult, this vote is for your congressman and senator. Many worry about your reaction to one part or another. But I know you know the importance of the whole. And so, second, I ask you to take this

initiative: Tell your congressmen and senators you support this deficit reduction agreement.

''Now is the time for you, the American people, to have a real impact. Your senators and congressmen need to know that you want this deficit brought down. That the time for politics and posturing is over and the time to come together is now.''

In a show of partisan unity, Senate Democratic leader George Mitchell of Maine responded to the president's call by touting the agreement and urging its passage.

''We recognize that this budget demands sacrifice from all Americans. But, if enacted, it holds the promise of restoring a sound economy, from which all Americans will benefit.''

By speaking to the nation, Bush may be able to unite Congress, but he may have a tougher time with the public as a USA Today poll released Tuesday showed that 52 percent of those Americans questioned opposed the deficit deal.

Bush said the agreement was the result of ''eight months of blood, sweat and fears'' of economic ''chaos that will follow if we fail to reduce the deficit.''

Calling it the ''toughest deficit agreement ever,'' Bush said it was the ''best agreement that can be legislated now.''

''It will not raise income tax rates ... it will not mess with Social Security. It will not put America's national security at risk and most of all, it will not let our economy slip out of control,'' Bush said.

''Those who dislike one part or another may pick our agreement apart. If they do, the political reality is no one can put a better one back together again.''

Earlier, Bush lobbied Rebublicans, and according to one top GOP lawmaker, his message was that he ''put a lot on the line'' by abandoning his ''no new taxes'' campaign pledge to strike a deal with Congress.

Michel said Bush told them the plan holds real savings in expensive benefit programs, had limited military spending cuts to acceptable levels, had prevented income tax rates on the rich from rising, as Democrats wanted, and includes firm limits on future spending.

After meeting with Bush, Reps. Thomas Coleman, R-Mo., and Don Sundquist, R-Tenn., said they had been persuaded to back the package.

Rep. Clay Shaw, R-Fla., who represents many elderly in the Fort Lauderdale area, said that even though the package gives him ''major heartburns'' because

of deep Medicare cuts, ''I'm leaning very heavily in support of the package.''

(OCT. 2) UPI - .

President Bush sent a taped message to the German people today, congratulating them for the re-unification of their long-divided nation. The president had declined an invitation to go to Germany to take part in the celebrations. Instead, he'll note the occasion with a Rose Garden ceremony tomorrow that will also mark German-American Day. .

In a telegram to German President Richard Von Weizsaecker and Chancellor Helmut Kohl, Soviet President Gorbachev sent his congratulations to the German nation. Gorbachev says he looks forward to growing ties with the newly united country. In his words- ''We expect much of our new relations with Germany.''

New Hampshire jurist David Souter will become the 105th member in the history of the U-S Supreme Court. The Senate late today voted 90year-old Souter as an associate justice. Souter's appointment could fundamentally alter the delicate balance on the nation's highest judicial body. He replaces Justice William Brennan, whose July retirement after 34 years as a leading liberal voice on the court opened the door for the eighth straight appointment by a Republican president to the Supreme Court.

President Bush spent much of today privately lobbying reluctant House Republicans to support the 500-BILLION-dollar deficit reduction plan he announced with congressional leaders during the weekend. Many House Republicans have said they would oppose the budget deal when it comes up for a House floor vote on Thursday, even though quick action is needed to keep the government operating past Friday. Bush will speak briefly tonight in a nationally broadcast talk about the budget deal.

#90275u2689 10/02/1990 ~United Press International
(OCT. 2) UPI - Oil prices plummeted today on perceptions that Middle East tensions are easing and the Persian Gulf crisis may be heading toward a peaceful settlement. Crude oil fell more than three dollars a barrel and home heating oil dipped eight cents a gallon, to 92 cents. After yesterday's two-dollarcent-a-barrel plunge on the New York Mercantile Exchange, the benchmark West Texas Intermediate crude dropped three dollars 14 cents today to close at 33 dollars 95 cents a barrel. That's a drop of 14 percent during two days of trading.

In Philadelphia, striking teachers at Temple University are returning to the classrooms tomorrow on just a single vote. The teachers voted 200-199 in favor

of obeying a court order, handed down earlier in the day. The order called for the teachers to end their 29-day walkout. Common Pleas Judge Samuel Lehrer contended that the strike by Temple's 11-hundred teachers threatened the welfare of students and the community.

#90275u2906 10/02/1990 ~United Press International

(OCT. 2) UPI - U-S Embassy officials in Beijing say two Americans were aboard a hijacked Chinese jetliner that crashed on landing in Canton today... killing at least 120 people. One of the Americans was injured. The second is missing.

In Scotland, a judicial inquiry into the December 1988 bombing of Pan Am Flight 103 was suspended until Thursday today after a lawyer representing relatives of the American victims was killed in a car crash.

Aviation officials say three people were killed today when their small plane crashed into the side of New Hampshire's Mount Washington... New England's highest peak. The plane was bound from Syracuse, New York, to Bangor, Maine.

The Navy says one of its submarines has recovered the second half of a cargo door that tore off a United Airlines jetliner near Hawaii last year. Officials hope by examining both door sections to make a final determination of the cause of the accident that killed nine people.

Authorities in Medellin, Colombia, say at least eight people were killed and another 57 injured today when dynamite and chemicals in a cocaine manufacturing laboratory exploded. Five of the dead were children.

What Israeli officials call a malfunction set off an air raid siren today in a Jerusalem neighborhood... frightening residents and sending some hurrying to bomb shelters. The mishap occurred one day after the government announced the military would distribute gas masks to citizens.

-30- 1617

#90275u3016 10/02/1990 ~United Press International

(OCT. 2) UPI - President Bush asked the American people to contact their legislators and urge them to support the compromise budget reduction agreement. In a nationally broadcast speech tonight, Bush said failure by Congress to approve the 500-BILLION-dollar package would weaken the already fragile economy and lead to recession. Said the president- ''The time for politics and posturing is over and the time to come together is now.''

Germans are celebrating wildly in the streets tonight, marking the rebirth of a united Germany and the end of more than four decades of post-war division. Revelers sang the national anthem and waved flags in Berlin in an emotional celebration... as leaders of the unified nation shook hands and embraced each

other. The Freedom Bell, cast in the image of Philadelphia's Liberty Bell, heralded the moment of unification and fireworks exploded in the sky over what had been West Berlin.

Newly confirmed Supreme Court Justice David Souter faces what one Washington lawyer likens to a ''culture shock'' as he makes the transition from his rustic New Hampshire homestead to the fishbowl of the nation's capital. The Senate voted 90-9 late today to confirm Souter's nomination to the high court. A high court spokesman says Souter will be sworn in next Tuesday.

A subcommittee of the Senate Appropriations Committee today approved a 15-BILLION-dollar 1991 foreign aid bill. The measure includes a provision barring aid to countries that don't comply with U-N sanctions against Iraq. But the bill also contains two provisions that have prompted White House veto threats... one that cuts in half military aid to El Salvador and the other that allows funds for groups that support abortion. The full panel takes up the measure Thursday.

-30- 1940

#90275u3023 10/02/1990 ~United Press International

(OCT. 2) UPI - Authorities in San Francisco say four people were killed and five more injured late today when an out-of-control car plunged down a steep hill and smashed into 10 other vehicles... one of which burst into flames with a child inside. A police spokesman at the scene says the unidentified elderly driver in the careening car may have suffered a heart attack and was among the dead.

Exxon officials confirm tht the company has filed legal papers accusing the Coast Guard of negligence that contributed to the Exxon Valdez oil spill in Alaska. The papers say the Coast Guard shares the blame for the nation's worst oil spill because, among other things, it licensed the tanker's former skipper Joseph Hazelwood. Exxon claims the Coast Guard is ''wholly or partially liable'' for more than two-BILLION dollars in cleanup and related costs.

#90276b0006 10/03/1990 ~Business Wire

SAN FRANCISCO (OCT. 3) BUSINESS WIRE - McKesson Corp. announced Wednesday that it has acquired a 10 percent equity interest in N.V. Medicopharma.

In addition, McKesson has the option to increase its equity position over the next two years.

Medicopharma, headquartered in Zaandam, The Netherlands, is principally engaged in pharmaceutical wholesaling in The Netherlands and the United Kingdom and manufactures and markets a line of related health care products in The Netherlands and in the United States through Medicopharma Inc. and Pennex.

Medicopharma is also engaged in veterinary wholesaling and production in The Netherlands and Belgium and in the supply of dental products in The Netherlands.

In August, Medicopharma acquired the pharmaceutical wholesale distribution business of Macarthy PLC in the United Kingdom. Earlier this year, Medicopharma acquired Butler Pharmaceuticals, a regional British pharmaceutical distributor. In 1989, those companies had combined sales of approximately $370 million.

In announcing the transaction with Medicopharma, Alan Seelenfreund, chairman and chief executive officer, said: ''Under this agreement, McKesson will take a stake in the growing and consolidating European pharmaceutical distribution market. The U.S. industry has undergone a substantial consolidation in the past decade and it now appears that the European market is poised for a similar move.

''Our investment in Medicopharma will help them finance the acquisition of the Macarthy wholesale business.''

McKesson paid approximately $13 million for its 10 percent equity position in Medicopharma.

McKesson is headquartered in San Francisco. In the fiscal year ended March 31 1990, McKesson reported revenues of $7.8 billion, operating profit of $242 million and net income after taxes of $98.7 million. Distribution of pharmaceuticals and related products accounted for revenues of $6.4 billion, or 82 percent of the total, and operating profit of $138 million, or 57 percent of the total.

In February, McKesson acquired a 50 percent equity interest in Medis Health and Pharmaceutical Services, Canada's largest and only national distributor of health care products with annual sales of about $1 billion. McKesson will acquire the balance of Medis no later than February, 1993.

WALTHAM, MA (OCT. 3) BUSINESS WIRE - SofTech Inc. has reported a net loss for the first quarter of fiscal year 1991 of $471,731 or $.12 per share on 3,852,860 average shares outstanding.

Net income for the comparable period a year ago was $362,562 or $.10 per share on 3,662,358 average shares outstanding.

Revenue during the first quarter, which ended Aug. 31, 1990, was $12,890,972 compared with $10,611,982 reported for the same period last year. This 22 percent increase in revenue was due primarily to the acquisition of Information Decisions Inc. in April, 1990, and the inclusion of that company's revenue in fiscal 1991 results.

Founded in 1969, SofTech Inc. is a publicly held company providing custom software design and development, systems engineering, and integration services to government agencies and commercial companies. Headquartered in Waltham, the company employs approximately 700 people in 18 locations throughout the United States.

SACRAMENTO, CA (OCT. 3) BUSINESS WIRE - First Commercial Bancorp Inc., (NASDAQ/NMS:FCOB) the holding company for First Commercial Bank, reported that third quarter earnings were the highest in its history.

W. Greg Karr, president and chief executive officer, announced third quarter earnings of $1,759,902, compared to $1,365,369 over the like period last year, an increase of more than 28 percent. Earnings per share increased from 28 cents to 37 cents.

Return on Assets and Return on Equity for the third quarter were 1.98 percent and 20.99 percent, respectively, compared to 1.91 percent and 19.59 percent during the third quarter of 1989. Third quarter net income represented the fourteenth consecutive quarter of record earnings for the company.

For the nine months ended Sept. 30, the company's net income was $4,917,091, compared to $3,667,099 over the like period last year, an increase of more than 34 percent. The year-to-date earnings per share increased from 77 cents to $1.03. Book value per share increased to $7.27 at Sept. 30.

Total assets reached a record $371 million at Sept. 30, 1990, compared to $317 million for the like period last year, a 17 percent increase. Total loans were $297 million at Sept. 30, 1990, compared to $203 million at Sept. 30, 1989, a 46 percent increase. Total deposits increased to $334 million at Sept. 30, 1990, compared to $283 million at Sept. 30, 1989, a 18 percent increase. Karr also stated that the board of directors authorized the company to repurchase 100,000 shares of the company's common stock in the open market and negotiated transactions.

This repurchase was successfully completed during the third quarter.

Karr also stated that the bank will open a new branch office at 865 Howe Ave., Sacramento, on Oct. 9, and said the opening of this new office allows the bank to expand its presence in the dynamic Sacramento marketplace.

First Commercial Bank, founded in 1979, and a member of the Federal Deposit Insurance Corp., is an independent bank headquartered in Sacramento.

MOUNTAIN VIEW, CALIF. (OCT. 3) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) Wednesday announced that Digital Equipment Corp. will bundle Adobe's Display PostScript software with Digital's DECwindows workstation software running under the VMS operating system.

Shipments of DECwindows software incorporating Display PostScript software for VMS will begin this month including the upgrading of the installed base. Digital already bundles the Display PostScript System with DECwindows running under its ULTRIX operating system.

The Display PostScript system is a systems software component developed by Adobe for imaging text and graphics on computer displays. It incorporates the same imaging model and language used in printers with PostScript interpreters.

With Display PostScript as part of their computer's systems software, users of Digital workstations will be able to see on their screen exactly what they will get on their PostScript printer. In addition, because displays and printers use the same imaging model, applications become easier to write and easier to transfer from one computer to another.

Applications for the VMS operating system that will support the Display PostScript system include V1.1 of DECwrite, expected to be available from Digital as a separate product later this month. DECwrite is Digital's premier, CDA-capable compound document editor. CDA (Compound Document Architecture) is Digital's software architecture that enables users to create and share revisable compound documents, consisting of text, graphics and images, across a network of mixed-vendor computers.

Adobe Systems Inc., founded in 1982 by Dr. John Warnock and Dr. Charles Geschke, is headquartered in Mountain View. Adobe is the developer of PostScript, the industry-standard page description language for electronic printing and publishing and Display PostScript, a device-independent graphics software component for computer displays.

Digital Equipment Corp., with headquarters in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

STAMFORD, CONN. (OCT. 3) BUSINESS WIRE - A strategic and cooperative marketing agreement involving various products of Xerox Corp. and Interleaf Inc. was announced Wednesday by the two companies.

The alliance, effective Oct. 1, calls for the companies to exchange current and developing technologies and to create and promote products that will enhance the ability to directly interconnect Interleaf software products with Xerox intelligent peripheral publishing products.

No financial details of the transaction were revealed.

Initially, the agreement will be confined to the United States, but the companies said they intend to eventually expand it and other cooperative activities worldwide.

Wayland R. Hicks, Xerox executive vice president, marketing and customer operations, said, ''The arrangement with Interleaf widens our capability to provide additional, proven publishing options to better satisfy the requirements of our customers.''

Robert K. Weiler, president of Interleaf said, ''The agreement is an opportunity for us to broaden our customer base and make our active publishing technology available to even more corporate and government publishing networks.''

The executives said the strategic and cooperative marketing relationship will enable Xerox and Interleaf to deliver a complete range of publishing solutions to their respective customer bases and maximize the strengths of both companies.

Xerox products involved in the transaction with Interleaf are Xerox intelligent peripheral publishing products, including scanners and electronic printers, as well as the Xerox systems integration expertise.

Interleaf active publishing technology provides full solutions for accessing information, transforming it into text and graphics, distributing it electronically or on paper and managing the flow of documents and information.
  With 31 sales offices in the United States and Canada, and subsidiaries and distributors in Europe, Latin America and Asia/Pacific, Interleaf has more than 45,000 users.

Xerox has its headquarters in Stamford. Interleaf is in Cambridge, Mass.

CAMPBELL, CA (OCT. 3) BUSINESS WIRE - Mountain Network Solutions Inc., an industry leader in data management solutions for personal computers, workstations and LANs, Wednesday introduced the ''Performance and Reliability Guaranteed'' program covering its mini-cartridge single-user/personal computing products.

At a glance, the comprehensive customer satisfaction program includes the following product and service features:

o Reduced pricing on FileSafe 4000 tape subsystems, with a new retail price of $389 on all internal configurations.

o Increased capacity through software data compression: 120 MBytes for the FileSafe 4000; up to 304 MBytes for the FileSafe 8000Plus.

o Superior two-year product warranty.

o One-year warranty extension program for the installed base currently under warranty.

o 60-day satisfaction-or-your-money-back guarantee.

o Worldwide technical assistance and support, 24 hours a day.

o Award-winning FileSafe tape backup software.

Effective immediately, retail pricing has been reduced across the board on all

of Mountain's field-proven FileSafe 4000 products. External configurations are priced as low as $599, and all internal versions are now priced at $389 -- a reduction of more than $200.

The two-year warranty -- the longest in the industry -- is complemented by a 60-day, money-back guarantee on Mountain's mini-cartridge line, which has been field-tested across a wide range of operating and network system environments on more than 100 personal computer models. The 60-day satisfaction guarantee will be offered on all tape backup units purchased through year-end.

Mountain's full line of FileSafe tape backup subsystems and FileTalk network data management solutions are marketed through retail and OEM distribution channels worldwide.

The company was founded in 1977 and is a wholly owned subsidiary of Nakamichi Peripherals Corp. Mountain has headquarters at 240 E. Hacienda Ave., Campbell Calif., with engineering and manufacturing facilities in nearby Scotts Valley and advanced software research and development facilities in San Diego.

LOS ANGELES (OCT. 3) BUSINESS WIRE - J.P. Morgan & Co. Inc. Wednesday announced the formation of J.P. Morgan California, a California chartered trust company, to meet the fiduciary, investment management and securities safekeeping needs of clients statewide.

With offices in Los Angeles and San Francisco, J.P. Morgan California will operate as a wholly owned subsidiary of J.P. Morgan & Co.

George Rowe, managing director of J.P. Morgan's California Private Banking Group, was named president of the new trust company and will direct its activities throughout the state. He will continue to oversee the operations of Morgan Guaranty's representative offices in California.

''California is becoming an ever more powerful and pace-setting force on the world economic marketplace,'' Rowe noted. ''During the past year, we have expanded our private banking operations in the state to enable us to offer increasingly sophisticated services. The trust company represents a major next step in our commitment to California.''

As a trust company, J.P. Morgan California will deliver the global resources

of Morgan to meet the sophisticated fiduciary, investment management and securities safekeeping needs of a targeted group of individuals, family groups closely held corporations and philanthropic organizations in the state, Rowe said.

J.P. Morgan & Co. provides banking and other financial services to corporations, governments, institutions and individuals throughout the world. Its activities include providing corporate finance advice and arranging financing for clients, underwriting and trading securities, and managing pension and other investment funds.

Morgan's domestic private banking offices are located in New York, Los Angeles San Francisco, Palm Beach, Fla., and Wilmington, Del.

HONG KONG (OCT. 3) BUSINESS WIRE - Brian L. Baggett has been appointed vice president, project development, for Regent International Hotels, according to Rudolf Greiner, the company's president.

Baggett will head up the already well-established project department, working with Wilfried Wagner, who remains vice president, technical services.

Baggett has over 20 years experience in the construction industry, working both for the contractor and for the developer. He has worked in the development of hotels and resorts since 1972 in various regions of the world. His prior experience includes being director of construction for a major international hotel company, where he was responsible for overseeing design and construction of various properties in the United States, Mexico and Europe and for the project development of a $500 million New York hotel.

During the past two years he has been on the faculties of the College of Engineering and Business Administration at the University of Colorado, lecturing building design systems, construction management and international business management.

Baggett was awarded a master's degree and a doctorate degree in business administration from George Washington University, a master of sciences degree in construction management from Stanford University and a bachelor of sciences degree in civil engineering from the University of California, Berkeley. He is a special member of the ASCE Construction Research Council and is on the International Construction Taskforce of the Construction Industry Institute.

Baggett said, ''I have always admired Regent International Hotels' operation, and I am honored to be able to join the company and continue the Regent philosophy in constructing the world's finest hotels during this time of Regent's continued expansion.''

Bagget will have headquarters at Regent's corporate offices in Hong Kong. He is married and has one child, aged four months.

For further information, contact: Michael M.G. Matthews, Regent International Hotels, New World Centre, Hong Kong, telephone -- 852/366-3361; fax -- 852/721-4400.

#90276b0068 10/03/1990 ~Business Wire

PARIS (OCT. 3) BUSINESS WIRE - ESPRIT's EUROCHIP program for VLSI Design Action Wednesday announced that Mentor Graphics will supply approximately 500 32-bit electronic design workstations to EUROCHIP member universities.

Software for VLSI design includes schematic capture, simulation, IC layout and documentation.

EUROCHIP has member institutions across Europe, so Mentor Graphics' broad European support was a key factor in the decision. Mentor Graphics also has the largest installed base in the electronics industry, making it an appropriate choice for the training of future VLSI designers.

Jean-Claude Caraes, Mentor Graphics vice president of Europe Headquarters, said: ''Starting nine year ago, Mentor Graphics made a conscious commitment to the universities. This contract brings our installed university base, in Europe alone, to approximately 2,000 seats. We believe in the EUROCHIP program as a competitive edge for European electronic firms, and are proud to be a European partner.''

The first training on Mentor Graphics VLSI design systems actually began in July, at the same time as the first systems were delivered. All 500 seats are scheduled to be installed by the end of this year. Financial terms were not

disclosed.

EUROCHIP is focused on five leading European institutions which function as ''design centers'' to support other facilities in their respective regions. These centers are CMP, France; Technical University of Denmark (DTH); the German National Research Center for Computer Science (GMD); Interuniversity Microelectronics Center (IMEC), Belgium; and the Rutherford Appleton Laboratory (RAL); United Kingdom.

The VLSI Design Action is part of Europe's response to the challenge created by increasing use of microelectronics in the rapidly expanding high technology industries. The Commission of the European Community has launched this program, placed under ESPRIT, and has allocated 13.5 million ECU (approximately $17 million) to train an additional 3,000 university students in VLSI design each year. This need in human resources was emphasized during the last ESPRIT Conference, held in Brussels in November 1989.

Mentor Graphics Corp. was established in 1981 to design, manufacture, market and service electronic design automation (EDA) systems. The company is the European and worldwide leader in EDA sales, with global revenues of $437 million over the last 12 months. The company currently employs more than 2,500 people. Mentor Graphics has corporate offices in Beaverton, Ore.; European headquarters in Paris and sales and support offices in 66 locations worldwide.

SAN FRANCISCO (OCT. 3) BUSINESS WIRE - Bank of America Wednesday announced the appointment of three new senior vice presidents in its World Banking Group: J.D. Gordon Branston, Aniruddha Roy and Townsend Walker.

Branston, 38, manages its Asia Division corporate finance activities and is managing director of BA Asia Limited, the bank's Hong Kong-based merchant bank. He joined the bank's Europe, Middle East and Africa Division in 1976, where he held credit and marketing positions of increasing responsibility in London and as manager of the Edinburgh Branch.

He moved to Hong Kong as an investment banking officer at BA Asia Limited in 1987, was named its managing director in 1989 and assumed his corporate finance responsibilities in February.

Branston holds an MA in English from Aberdeen University and an LLM in Law from St. Johns College at Cambridge University.

Roy, 39, has been a senior investment banking officer at the bank's New

York-based Leveraged Finance group since 1988. Roy, who received a BS in Physics from Calcutta University and an MBA in Finance from the Indian Institute of Management, joined the bank as a trainee at the bank's Calcutta Branch in 1975.

He was named senior credit officer at the New Delhi Branch in 1979 and later headed Asia Division's Planning Unit. Roy became a senior credit administrator for the that division in 1983 and was named Asia Division senior credit officer in 1986, the position he held prior to assuming his New York responsibilities in 1988.

Walker, 48, has headed the Risk Management trading and marketing activities of the bank's Capital Markets Division since April. He holds a BS in Foreign Service from Georgetown University, an MA in Economics from New York University and a PhD in Economics from Stanford University.

Walker joined the bank's Europe Middle East and Africa Division in 1972, where he served as a foreign exchange trader and senior international treasury consultant until 1979, when he was named a North America Division global account officer. He moved to the Investment Banking Group in 1984 to serve as a regional investment banking officer and later as manager of Asset Securitization. He was named manager of Risk Management Marketing for the bank's Capital Markets Division in 1989.

SAN FRANCISCO EDITORS NOTE: Townsend Walker also serves as chairman of the board of the nonprofit Chinese Community Housing Corporation, which has provided 500 single room occupancy housing units for low income people in San Francisco and has another 800 SRO units and apartments now in progress.

In addition to his responsibilities as chairman, Walker has worked directly on the financial structuring and financing of several of these projects. He is also chairman of the board of the newly formed nonprofit North of Market Development Corporation.

SAN FRANCISCO (OCT. 3) BUSINESS WIRE - Bank of America has named Paul M. Dorfman, Credit Policy Bankwide, an executive vice president.

With Bank of America since 1973, and in Credit Policy since 1986, Dorfman is responsible for the development and review of credit and country risk policies and for the approval of certain high-dollar-amount lending. He is chairman of the bank's Country Review Committee and vice chairman of the Credit Policy Committee.

''Paul is widely respected by colleagues for his leadership in improving our credit process, and we are pleased to recognize his significant contributions '' said Vice Chairman Glenhall E. Taylor, Jr., head of Credit Policy. Taylor also praised Dorfman's valuable role in working with civic groups, regulators, analysts, and others on credit policy issues.

Dorfman, 51, joined the bank as an account officer in the World Banking Division and later held key credit assignments in Europe and Asia. In 1982, he was appointed a senior vice president. He was named senior credit officer for World Banking in 1985.

A graduate of Princeton University with a B.A. degree in economics, Dorfman also holds a J.D. degree from Yale University Law School. He practiced law in Illinois from 1964 to 1969, and in the early 1970s worked at Continental Illinois Venture Corp. and JMB Realty Corp.

He has been active in Robert Morris Associates, a national association of bank credit and lending officers, and now serves as president of its Northern Caliifornia chapter.

MOUNTAIN VIEW, CALIF. (OCT. 3) BUSINESS WIRE - Two miniature transceivers announced this week by Allied Telesis Inc., (ATI), make it possible for twisted pair or thin Ethernet wiring to replace conventional AUI drop cables that connect computers and workstations to LANs (Local Area Networks).

The new products are compatible with Ethernet 10BASE-T Draft 10 and 10BASE2, and they comply with IEEE 802.3 specifications. They can be plugged directly onto workstations or terminals currently configured with a 15-pin AUI (Attachment Unit Interface) female connector.

The CentreCOM MX Series consists of miniature thin Ethernet transceivers that install directly onto AUI female connectors and provide a BNC connector (10BASE2).

The MX-10 unit is about the size of a business card, with a depth of less than one inch, and it weighs less than three ounces. SQE TEST, or Heartbeat, may be turned on or off via an externally accessible switch. Heartbeat status and DTE power are indicated by a dual color LED. The transceiver complies with IEEE 802.3 specifications.

The CentreCOM 210-T Series is a twisted-pair transceiver that fits over AUI

connectors and provides twisted-pair network connectivity.

The 210-T is the same compact size as the MX-10 (2.36inches by 1.77inches by 0.79inches), with a full complement of indicators that show power present (power supplied by the DTE), Heartbeat (SQE Test) enabled, polarity, active jabber, transmit, receive, valid link and collision status.

Both products are available for immediate delivery at an introductory retail price of $149.95 each; warranty is for two years.

Allied Telesis Inc., provides network building blocks based on industry standards. These include single and multiport transceivers, multimedia concentrators, repeaters, bridges and other related products. The company markets products worldwide through distributors and dealers.

For more information, contact: Allied Telesis Inc., 575 East Middlefield Road, Mountain View, CA 94043. Telephone (415) 964-2771. FAX: (415) 964-0944.

#90276b0096 10/03/1990 ~Business Wire
AUSTIN, TX (OCT. 3) BUSINESS WIRE - Dr. William J. Spencer, group vice president and senior technical officer of Xerox Corp., Wednesday was named president and chief executive officer of SEMATECH.

Spencer replaces the late Dr. Robert N. Noyce, who headed the consortium from July 1988 until his sudden death in June 1990. SEMATECH is a nonprofit industry-government research consortium aimed at restoring U.S. leadership in semiconductor manufacturing.

''I am honored to join the elite team at SEMATECH,'' Spencer told SEMATECH personnel at the employee announcement this morning. ''The national mission we must accomplish is key to America's competitiveness and key to preserving our standard of living for our children and grandchildren. I am confident that by working together, SEMATECH will succeed in its mission.''

Spencer, 60, joined Xerox in 1981 as manager of the Integrated Circuit Laboratory at the firm's Palo Alto Research Center. As group vice president of the corporate research group in Stamford, Conn., Spencer managed Xerox's research and development activities on a world-wide basis.

Before joining Xerox, Spencer was director of Systems Development and Microelectronics at Sandia Laboratories and was a research professor at the University of New Mexico School of Medicine. He began his career at Bell Telephone Laboratories in 1959 after receiving his Ph.D. in physics from

Kansas State University.

''SEMATECH and the semiconductor industry are extremely fortunate to have Bill Spencer as a champion and leader,'' said Charles Sporck, chairman of SEMATECH's board of directors and head of the chief executive officer selection team.

''With his experience in key research positions at Bell Laboratories, Sandia National Laboratories and Xerox Corp., Dr. Spencer has the technical expertise to implement programs which will enable this country to remain globally competitive.

''This was a very gratifying selection process,'' Sporck said. ''There were many excellent candidates who came forward and expressed interest in joining SEMATECH.''

''I congratulate the SEMATECH board of directors on an outstanding choice for CEO,'' said Dr. Turner E. Hasty, SEMATECH's chief operating officer. ''Bill's qualifications for this job are superb. His proven leadership qualities will be very important to the continued success of SEMATECH. On behalf of the men and women of SEMATECH, we are both pleased and excited to have Dr. Spencer on our team.''

Spencer joins the Office of the Chief Executive, which also includes Hasty and Peter H. Mills, chief administrative officer.

As chief executive officer, Spencer will direct SEMATECH's advanced semiconductor manufacturing staff, which is based in Austin. He also will be SEMATECH's primary liaison to its 14 member companies and the federal government.

SEMATECH is developing advanced semiconductor manufacturing methods, equipment and materials in a world-class demonstration facility in Austin. Research results are transferred to member firms and the federal government for commercial and military applications. The federal government actively participates in SEMATECH through the Defense Advanced Research Projects Agency (DARPA) in the Department of Defense.

SEMATECH member firms include Advanced Micro Devices, AT&T, DEC, Harris Corp., Hewlett-Packard, IBM, Intel, LSI Logic, Micron Technology, Motorola, NCR, National Semiconductor, Rockwell International and Texas Instruments.

#90276b0128 10/03/1990 ~Business Wire

HOUSTON (OCT. 3) BUSINESS WIRE - Six interstate natural gas pipeline companies have entered into a letter of intent to own and operate joint-interest onshore and offshore pipeline facilities to transport up to 1.2 billion cubic feet of natural gas per day (Bcf/d) from the Mobile Bay area offshore southern Alabama.

The settlement, which is subject to further negotiation and execution of a definitive agreement among the companies, would consolidate several onshore and offshore projects proposed as a result of the Mobile Bay area open season proceeding before the Federal Energy Regulatory Commission (FERC).

The participants are ANR Pipeline Co., Florida Gas Transmission Co., Southern Natural Gas Co., Tennessee Gas Pipeline Co., Texas Eastern Transmission Corp., and Transcontinental Gas Pipe Line Corp. (TGPL).

The onshore facilities will include TGPL's existing 123-mile, 30-inch pipeline that extends from the Mobile Oil Exploration & Producing Southeast Inc. gas processing plant in Mobile County, Ala., to an interconnection with the TGPL mainline near Butler, Ala. The addition of compression and the construction of pipeline loop will increase the capacity of the onshore system from 300 million cubic feet per day (MMcf/d) to 1.2 Bcf/d.

A proposed 77-mile offshore pipeline system with a capacity of more than 700 MMcf/d will be constructed from Main Pass Area Block 252, offshore Alabama, and extend to a Shell Offshore Inc. plant under construction in Mobile County. Pending FERC approval, construction of the new facilities is expected to begin in early 1991.

Pipeline company officials said that this agreement represents a significant step forward in developing the prolific gas supply potential of the Mobile Bay area and securing a valuable domestic energy source. Access to these substantial gas reserves through the FERC's expeditious approval of this settlement can be a key ingredient in the United States' effort to lessen its dependence on imported oil.

The group noted that essentially all of the pipeline companies that had proposed projects in the Mobile Bay area have now agreed on one project that will best serve the nation's energy needs; producers in the area will benefit from what is expected to be prompt regulatory approval for this settlement; and the increased economic development potential should enhance the southern Alabama business climate.

MENLO PARK, CA (OCT, 3) BUSINESS WIRE - Jim Van Kerkhove has been named vice president of manufacturing for Siltec Silicon, Siltec President and Chief Executive Officer Stanley Myers announced Wednesday.

Van Kerkhove will be responsible for all manufacturing operations, facilities, and production control for Siltec's Salem, Ore., silicon wafer manufacturing facilities, reporting to Myers.

Van Kerkhove has over 20 years experience in a wide range of manufacturing, materials, and facilities management positions, first at Xerox Corp. and since 1978, at Intel Corp.

Most recently, he served as Intel's Systems Group Materials manager for worldwide manufacturing. Van Kerkhove earned his bachelor's of science in industrial engineering from Cornell University and master's of business administration in operations management from Rochester Institute of Technology.

Siltec Silicon, a business unit of Siltec Corp., manufactures and markets silicon wafers, the strategic material from which integrated circuits and semiconductor devices are fabricated. With headquarters in Menlo Park, Siltec's manufacturing operations for both polished and epitaxial silicon wafers are located in Salem. Siltec ownership is shared by three Mitsubishi Group companies.

For further information, please contact Susan Sorem, Siltec Corp. director of human resources, 190 Independence Drive, Menlo Park, CA 94025. Telephone: 415/853-5071.

#90276b0146 10/03/1990 ~Business Wire
DENVER (OCT. 3) BUSINESS WIRE - Nevada Goldfields Corp. reported a loss of US $9,404,000, or $1.04 per share, on revenues of US $11,636,000, for the fiscal year ended June 30, 1990.

This loss includes a write-down on its Empire Project and the five claims comprising the underground ore zone at the company's Kingston Mine. The write-downs and depreciation, depletion and amortization amounted to US $9,650,000. Total gold production for the year was 19,684 ounces of which 13,277 was produced from its Aurora Mine and the balance from its Kingston operations.

Through Sept. 14, 1990, the company has reduced total debt by approximately US $10.1 million since the closure of its Kingston Mine in August 1989. Debt primarily consists of a US $4.5 million gold loan, US $3 million of 10 percent convertible subordinated debentures, due April 1999, and a short-term bank note of US $7 million.

Debentureholders holding approximately US $6.6 million have converted to common stock of the company and the remaining debentureholders have agreed to a two-year moratorium on interest payments in consideration for a reduction in the conversion price.

As part of an agreement with the company's lenders, the US $7 million short-term note is to be cancelled upon payment of US $2 million which is expected to be sourced from the planned US $6 million private placement financing announced on Sept. 11, 1990. As a result of the debenture conversions, and a US $700,000 private placement, the company's outstanding shares on Sept. 14, 1990, increased to 15,953,735.

Since July of 1989, Nevada Goldfields has completed 15,600 ft. of reverse circulation drilling in the Aurora district, of which approximately 10,800 ft. has been reconnaissance drilling. Three additional mineralized target areas were identified for further drilling.

The remaining exploration drilling centered on the Humboldt vein and added to existing reserves. Current mineral inventory in proven and probable categories is 433,000 tons at 0.21 ounces gold per ton. Aurora currently mills ore at a rate of approximately 80,000 tons per year.

Nevada Goldfields Corp. is a Canadian public company with two gold mines in Nevada. Its shares trade on The Toronto Stock Exchange under the symbol NGF, on NASDAQ under the symbol NGFCF, and on the Stuttgart Exchange, West Germany, under the symbol NGF SG.

LAS VEGAS (OCT. 3) BUSINESS WIRE - Electronic Data Technologies is proud to announce Wednesday the appointment to its board of directors of Phil Hannifin.

Hannifin was chairman of Nevada's Gaming Control Board for seven years prior to becoming a senior executive for Summa, Harrah's and now MGM Grand. In all, Hannifin has served 12 years as a senior executive for three of the largest gaming companies in the world.

He has also served as a member of the board of directors of a large regional airline, a leading defense contractor and several companies in the hotel-casino industry.

''We are very excited that Phil has joined our board,'' said Charles N. Mathewson, chairman of the board of Electronic Data Technologies. ''His wealth of experience will add a significant input to EDT.''

CULVER CITY, CALIF. (OCT. 3) BUSINESS WIRE - At the special meeting of stockholders of MGM/UA Communications Co. (MGM/UA) Tuesday, the stockholders approved the adoption of the Agreement and Plan of Merger, providing for the merger of a subsidiary of Pathe Communications Corp. (Pathe) with and into MGM/UA (the ''Merger'').

The Merger had previously been approved by the board of directors of MGM/UA. Under the terms of the Merger, the stockholders of MGM/UA will receive $21.50 in cash for each share of MGM/UA common stock and preferred stock, $4 of which

was paid to stockholders on July 20, 1990, from an account funded by Pathe.

The payment of the remaining $17.50 per share will be paid upon completion of the Merger, which is expected to occur on or before Oct. 23.

SAN DIEGO (OCT. 3) BUSINESS WIRE - Wells Fargo Bank Wednesday announced that it plans to retain 85 percent of Great American Bank's branches in San Diego, Orange and Riverside counties.

This is more than Wells Fargo had originally estimated when the acquisition of Great American was announced in July.

''Great American has offices in many communities Wells Fargo has never served and we want to be there,'' said Drew Tanzman, senior vice president and manager of a new Wells Fargo retail division headquartered in San Diego. ''We intend to serve the communities in these counties with the same dedication that Great American displayed over the years.''

''In San Diego County, we are retaining 90 percent of Great American's branches -- a total of 57 offices out of 64,'' said Tanzman. Combined with 19 Wells Fargo offices the bank is retaining (out of 26), the Great American branches will boost Wells Fargo's total offices in San Diego county to 76, once the integration is completed early next year.

''This will be the largest branch network of any financial institution in the county,'' said Tanzman. Additionally, the combined bank will offer customers access to 1500 ATMs statewide and 24-hour telephone banking service, according to Tanzman.

In Orange County, 12 out of 16 Great American branches will remain open and in Riverside County, nine out of 12 Great American offices will be retained.

Wells Fargo will retain 37 out of 39 branches in Orange County and all of its 9 branches in Riverside County. Once the branch conversions are completed early next year, Wells Fargo will have a total of 47 offices in Orange County and 18 offices in Riverside County.

''All affected Wells Fargo and Great American employees have been notified of the pending changes, which will not take place until early 1991,'' said Tanzman. Tanzman added that final decisions about the branches were made in consultation with Great American officials over the last few weeks.

Both banks have been holding open as many positions as possible since the merger announcement, according to Tanzman. ''Wells Fargo's goal is to offer employment opportunities to anyone who wants to work for the company,'' said Tanzman.

''Given the significant increase in the number of branches we will have in the three counties, as well as our longer hours (9 a.m.- 6 p.m. Monday through Friday, and 9 a.m.- 4 p.m. Saturday), we believe this goal is achievable.''

#90276b0175 10/03/1990 ~Business Wire

NEWPORT BEACH, CA (OCT. 3) BUSINESS WIRE - Quiksilver Inc. (NASDAQ:QUIK), owner of the Quiksilver trademark for the United States and Mexico, and Na Pali, S.A., a privately held French company that holds the license to market Quiksilver products in Europe, issued a joint statement Wednesday announcing that the two companies had entered into a letter of intent contemplating the purchase by Quiksilver of Na Pali.

John C. Warner, chairman of the board and chief executive officer of Quiksilver, stated that Quiksilver's purchase of Na Pali presented a major opportunity for Quiksilver to expand into Europe by joining forces with the existing European company.

Na Pali has been successfully manufacturing and marketing Quiksilver products in Europe since it was founded in 1984. Na Pali is located near Biarritz, France, the ''surfing capital'' of Europe.

Warner stated: ''Na Pali has built a solid base for Quiksilver in Europe. We've always worked closely with Na Pali and have a strong working relationship and synergy with their management. The joining of the two companies is a natural expansion of the Quiksilver family. We think the combined strengths and resources of the two companies will make Quiksilver a more formidable force in the European market.''

Harry Hodge, president and director general of Na Pali said: ''Na Pali is poised to further penetrate and develop the European market. We believe that our market position and image in Europe is well established and similar to that of Quiksilver Inc. four year ago in America. The combination of Na Pali's sales and marketing expertise along with Quiksilver Inc.'s financial strength and strength in product development and control systems will enable us to continue our growth and improve profitability while maintaining a quality, authentic image.''

Na Pali currently markets Quiksilver products in 17 European countries,

including France, Germany, Italy, Spain, Great Britain and Greece, as well as in the French colonies, representing a total market of more than 300 million people.

For its fiscal year ended May 31, 1990, Na Pali reported sales of approximately $21 million (US) and pretax income of approximately $800,000 (US).

Sales and net income for Na Pali were unaudited and stated according to French accounting principles. Quiksilver believes that adjustments would be required to convert Na Pali's May 31, 1990, financial statements and interim financial statements prior to closing to a basis consistent with the financial statements of Quiksilver and that the effect of those adjustments on Na Pali would be to reduce net income or possibly incur a loss for those periods.

Quiksilver strongly believes that the combination of the two companies provides an excellent opportunity for sales growth and substantial earnings improvement in Na Pali.

The letter of intent contemplates that Quiksilver will acquire Na Pali for the purchase price of approximately $10.5 million. It is anticipated that the proposed transaction will be funded through internally generated resources. Of the $10.5 million purchase price $5.5 million will be in cash at the closing with the remaining $5 million to be paid in cash or Quiksilver stock contingent upon the performance of Na Pali over a two-year period following the closing.

At the closing Quiksilver will provide Na Pali with an additional $5 million working capital. Quiksilver's proposed acquisition of Na Pali will be subject to the negotiation of a definitive acquisition agreement as well as the approval of the board of directors of both companies, Quiksilver Garments Pty, Ltd., the Australian licensor of the Quiksilver name and the French Ministry of Finance.

The agreement will also be subject to the successful renegotiation of the license agreement between Garments and Na Pali.

It is anticipated that the transaction will be consummated by Dec. 1, 1990.

Quiksilver designs, arranges for the manufacture of and distributes beachwear, skiwear and casual clothing primarily for young men and boys under the Quiksilver label. The company's products are made primarily in the United States and sold in approximately 2,000 surf shops, specialty store and selected department store locations.

FREMONT, CA (OCT. 3) BUSINESS WIRE - Netcor Inc., a Fremont based manufacturer of computer network connection devices, announced Wednesday that it had made initial customer deliveries of its new ten port Ethernet repeater product.

The new product, designated NC208, provides network connectivity solutions for the interconnection of multiples of network segments using either fiber optic or coaxial cables.

According to Steve Loring, marketing vice president for Netcor, the new product will allow Netcor to participate at a higher level in the computer networking market and sets the stage for the development of Netcor's multi media connectivity center which is planned for initial production during the first half of 1991.

The NC208 is designed for application in large corporate computer networks and contains provisions for the interconnection of network segments as well as the implementation of a network backbone facility using fiber optic cable.

Additionally, Netcor announced that Juan A. Monico has joined the company as vice president, engineering. Monico is a veteran Silicon Valley engineering executive having held key management positions at Fairchild, American Micro Devices and Molecular Computers.

Netcor also announced that it has fully executed its plan for the consolidation of its operations with those of Giltronix Inc., following the acquisition of 85 percent of the shares of Giltronix in January of 1990.

As a result of this consolidation, the monthly expenses of the combined companies have been reduced substantially. Both companies have been relocated to a 16,000-square-foot facility in Fremont, which Netcor has subleased until 1993.

The company also announced that Wells Fargo Bank has agreed to renew the line of credit previously extended to Giltronix Inc., a subsidiary of Netcor until Feb. 28, 1991, in an amount not to exceed $300,000.

HOUSTON (OCT. 3) BUSINESS WIRE - Jack Lascar has been named manager of investor relations at Tenneco Inc.

Lascar earned his bachelor's degree in international relations from the University of Social Sciences in Grenoble, France. He also holds master's of business administration and a master's of economics degrees from the University of Houston.

Lascar joined Tenneco in 1981 as an international economist in the corporate planning and development department. In 1983, he was promoted to the position of senior planning analyst and served in that capacity until being named planning manager in 1986. In 1988, he was promoted to the position of business planning manager at the company's Tenneco Automotive division in Lincolnshire, Ill.

Prior to joining Tenneco, Lascar was employed as an associate economist at Wharton Econometrics Forecasting Associates in Philadelphia.

Tenneco Inc. is a Houston-based, diversified industrial corporation with major business interests in natural gas pipelines, farm and construction equipment, shipbuilding, automotive parts, packaging, chemicals and minerals.

#90276b0246 10/03/1990 ~Business Wire
CHICAGO (OCT. 3) BUSINESS WIRE - United Airlines announced Wednesday that it will offer its popular Mele Kalikimaka (Merry Christmas) fares between Honolulu and the Mainland to Hawaii residents again this year.

The fares represent exceptional values for holiday travel to the Mainland. Sample round trip fares are: $248 from Honolulu to Los Angeles, Oakland, San Francisco, San Diego, Seattle and Portland. Sample round trip fares from Honolulu to interior cities include $298 to Denver and Las Vegas, $348 to Dallas/Ft. Worth, $398 to Chicago, and $448 to New York and Boston.

Outer-island service is available for an additional fare of $20. Mileage Plus accrual, Mileage Plus upgrades and Silver Wings discounts will be allowed in conjunction with the Mele Kalikimaka fares.

The special holiday fares are available to Hawaii residents only and proof of Hawaii residency must be shown at time of purchase. Travel to the Mainland must occur between Dec. 14 and Dec. 27, while the return portion must be completed between Dec. 29 and Jan. 7, 1991.

The fares are non-refundable, and tickets must be paid for within one day after booking the reservation. Seats are limited under these special fares and significant restrictions apply.

United has offered special discount fares to Hawaii residents for travel during the holiday period since 1985.

United's offer takes advantage of the directional nature of heavy holiday traffic from the Mainland, allowing Hawaii residents to travel counter to the Mainland flow at special low fares.

''United is pleased to offer these special fares to our friends in Hawaii for the sixth consecutive year,'' said John C. Pope, executive vice president of marketing and planning.

''The fares benefit both the people of Hawaii and United, and they are our way of saying 'Mele Kalikimaka' to our friends in Hawaii.''

The fares can be booked through travel agents or United Airlines.

BURBANK, CA (OCT. 3) BUSINESS WIRE - Mortgage and Realty Trust (NYSE:MRT), which filed for Chapter 11 bankruptcy reorganization on April 12, announced Wednesday that it has reached an agreement in principle with the Creditors and Shareholders committees on the terms of a consensual plan of reorganization which would replace the plan previously filed by the Trust on Sept. 7, 1990.

The proposed plan would provide for the repayment of the Trust's indebtedness within four-and-one-half years, with interest at an initial rate of prime plus 1 percent, increasing .25 percent every six months.

The parties will proceed promptly with the preparation of a definitive plan and disclosure statement which will be presented to the Bankruptcy Court. After approval of the disclosure statement by the court, consents to the plan will be solicited from parties in interest and the court will hold a hearing on confirmation of the plan.

Mortgage and Realty Trust is a self-administered real estate investment trust with investments in floating-rate real estate loans and real estate equities nationwide. Shareholders' equity as of June 30, 1990, was approximately $180 million. The Trust's 11 million common shares are traded on the New York

Stock Exchange under the symbol MRT.

SAN JOSE, CA (OCT. 3) BUSINESS WIRE - Maxtor Corp. (NASDAQ: MXTR) Wednesday announced the appointment of Stephen R. Strain to the newly created position of vice president, corporate human resources.

He will report to George M. Scalise, Maxtor president and chief executive.

Strain will oversee human resources functions at the corporate level for Maxtor's four operating units: Maxtor California, Maxtor Colorado, Storage Dimensions and Maxoptix.

''Maxtor has grown tremendously in these past few months,'' said Scalise. ''Since the addition of the Maxtor Colorado team, the number of employees in the corporation has doubled.

''Steve brings to Maxtor vast expertise in integrating and coordinating corporate human resource functions worldwide. He will be integral to the success of the new structure we have implemented to manage our growth.'' Maxtor currently employs approximately 9,000 worldwide.

Strain, 49, has spent most of his career in the electronics industry. Prior to Maxtor, he was vice president of human resources for Western Digital. He has also worked as vice president of human resources at Seagate Technology, and in senior human resources positions at AMD and Hewlett Packard.

He is a native of Cincinnati and holds a bachelor's degree from Miami University, Ohio, and an MBA from UCLA.

Maxtor Corp., San Jose, was founded in 1982. Maxtor designs and manufactures high-performance Winchester and optical data storage products in San Jose; Longmont, Colo.; Singapore; Hong Kong and Malaysia. Its products range from 40MB to 2.1GB capacity and are designed for desktop and portable computer systems, workstations, local area networks and mainframes. Its stock is traded under the NASDAQ symbol MXTR.

MARKHAM, ONTARIO (OCT. 3) BUSINESS WIRE - Geac Computer Corp. Ltd. (TSE:GAC) announced Wednesday that Geac and C.U. Processing Inc. of Detroit have agreed to a realignment of their respective U.S.-based credit-union businesses in order to better serve their existing credit-union clients and the U.S. credit-union marketplace.

As a result of the transaction, C.U. Processing, an existing value-added remarketer (VAR) of Geac hardware and software products, will take over the direct sales and support of both its own and Geac's application products. Geac will provide direct technical, system-level and hardware support to both C.U. Processing and the combined customer base.

Stephen J. Sadler, president and chief executive officer of Geac, noted that the realignment of the skills and resources of the two organizations will utilize the strengths of both companies which will result in an enhanced ability to provide Geac technology-based financial solutions for the U.S. credit-union marketplace.

Founded in 1971, Geac Computer is a world leader in the design, integration and manufacture of computer solutions, serving several vertical markets worldwide with revenues of over $72 million. Geac has development centers in Canada, the United States, the United Kingdom and France. Its world headquarters are in Markham.

FORT WORTH, TX (OCT. 3) BUSINESS WIRE - Burlington Northern Railroad Co. (the ''company'' or ''BN Railroad'') announced Wednesday a series of proposed exchange offers to holders of its Great Northern Railway Co. General Mortgage Bonds, 3-1/8 percent Series O due 2000 and 2-5/8 percent Series Q due 2010, Northern Pacific Railway Co. General Lien Railway and Land Grant 3 percent Bonds due 2047 and prior Lien Railway and Land Grants Bonds due 1997, and St. Louis - San Francisco First Mortgage Bonds, 4 percent, Series A due 1997, and Income Debentures, 5 percent, Series A due 2006 (collectively, the ''Old Debt Securities'').

Merrill Lynch Capital Markets will act as Dealer Manager for these exchange offers.

Under the terms of the proposed exchange offers, holders of Old Debt Securities will have the option of exchanging such securities for a like principal amount of bonds of a new series of Burlington Northern Railroad Co. Consolidated Mortgage Bonds. The interest rates and maturities of these bonds have not yet been determined.

The purposes of the exchange offers will be to enable BN Railroad to reflect in its financial statements the current market value of the Old Debt Securites exchanged; to lengthen the average maturity of some of its debt; to eliminate or modify certain restrictive covenants and other provisions contained in certain of the Old Debt Securities; and to consolidate certain of BN Railroad's debt under BN Railroad's Consolidated Mortgage.

BN Railroad expects there to be a number of additional accounting effects from the proposed exchange offers. These include the recognition of the gain, for financial reporting purposes, on the extinguishment of the Old Debt Securites as a result of the discount of their market value; the flow-through of the gain (on an after-tax basis) into stockholder's equity; and the discounting of the new bonds issued in exchange for the Old Debt Securities at their market value upon the consummation date of the exchange offers.

The company has filed a Registration Statement with the Securites and Exchange Commission to register the Consolidated Mortgage Bonds that will be issued in the exchanges for the Old Debt Securites. The exchange offers will be made only by means of a prospectus.

MILPITAS, CA. (OCT. 3) BUSINESS WIRE - Quantum Corp., which has introduced three new families of hard disk drives in the past three months to give it the broadest product line in the industry, Wednesday announced expansion moves in the Far East, where the company anticipates major growth as a result of these products.

Two of the product families, the Go-Drive Series 2-1/2-inch drives and the ProDrive Gem Series small frame 3-1/2-inch products, are designed for use in laptop, notebook, portable and low-end personal computers, which represent the fastest growing markets for Asia/Pacific manufacturers.

In addition, Quantum's new ProDrive 330 and 425 megabyte 3-1/2-inch drives are designed for high-end desktop business personal computers and desktop workstations, which many Pacific Rim companies are beginning to develop.

The expanded Far East operations were announced by Ken Edoff, director, Pacific Rim Sales, in a series of press briefings in Hong Kong, Taipei, and Seoul.

He said the expansion includes: A Singapore Logistics Center to speed distribution throughout Asia; new country managers heading direct sales offices in both Taiwan and Singapore; and strengthening of sales and distribution representation in Hong Kong and Korea, including the signing of a new distribution agreement with Lucky Goldstar.

The Singapore Logistics Center, which begins operations this month, will initially serve as a stocking and distribution center for Quantum disk drives throughout the Far East. It is managed by K.L. Lee, who joined Quantum from Cipher Date where he was purchasing manager.

Edoff said that during the first quarter of 1991, the company plans to have a drive repair capability operational at the Logistics Center. The repair facility will handle warranty and non-warranty service for all countries in this market except Korea and India, where repairs will continue to be handled through distribution channels.

Also in Singapore, Alan Tong has joined the company as country manager, reporting to Edoff. He comes to Quantum from Maxtor, where he was area sales manager for Hong Kong.

In Taiwan, Zachary Wu has been named country manager. He will support Quantum's major OEM customers in that country under Edoff's direction. Wu was previously with Seagate Technology, where he served as area sales manager in Taiwan.

Expanded activities in Korea include an agreement with Lucky Goldstar who will serce as a Korean distributor of Quantum disk drives. Quantum will also continue to work with Excel Associates, its manufacturer's representative for

both Hong Kong and Korea. Excel Associates will service major OEMs while Lucky Goldstar handles all other accounts.

''Excel Associates has done a superb job of assisting Quantum in penetrating large OEMs throughout the Asian market, and we expect to continue our relationship with Excel in the future,'' Edoff said. ''They will, in fact, be assisting Lucky Goldstar in their efforts as a distributor of Quantum drives.''

Edoff said the increase in activities in the Pacific Rim is a natural move for Quantum, particularly now that it has entered the market for low-power, 2-1/2-inch and 3-1/2-inch hard disk drives.

Since its founding in 1980, Quantum Corp. has emerged as a leading independent manufacturer of reliable, high-performance mass storage systems for business, engineering and scientific computing.

Its hard disk drives are marketed to OEMs and distributors worldwide. The publicly held company is recognized for setting new standards of performance, quality and reliability in disk drives destined for demanding desktop workstation and PC applications.

Plus Development Corp., a Quantum subsidiary established in 1983, designs and markets personal computer storage enhancement products for end-users which are marketed through 2,500 dealers worldwide. Quantum has headquarters in Milpitas.

     #90276b0330 10/03/1990 ~Business Wire
BEAVERTON, Ore. (OCT. 3) BUSINESS WIRE - Sequent Computer Systems Inc. said Wednesday it expects to meet or exceed estimates for third-quarter 1990 revenues and earnings per share.

Analysts predict the supplier of UNIX-based computers to report revenues of approximately $65 million, and earnings in the range of $.24 to $.26 per share.

Sequent reported third quarter 1989 revenues of $40.4 million. Net income for the quarter, before extraordinary credits for tax loss carry-forwards, was $4.1 million, or $.20 per share.

''Considering the uncertainty in the economy we are very pleased at how well the company performed during the quarter,'' said Scott Gibson, Sequent president.

''Overall, business has been strong, particularly sales to end-user customers

who continue to invest in automation systems like Sequent's in an effort to become more competitive and productive.''

According to Gibson, well over half of end-user shipments during the quarter represented sales to new customers. ''It is particularly exciting that end user business included multi-system sales to customers such as the U.S. West New Vector Group Inc. and British Petroleum. These orders, combined with our recently-announced development partnership with AT&T's UNIX System Laboratories, are further acknowledgement of Sequent's technological leadership and the viability of our systems in critical business applications.''

In response to concerns about Sequent's relationship with Unisys, Gibson said the company's OEM business also remained on target during the third quarter. OEM sales accounted for approximately 28 percent of total revenues. Orders from Unisys amounted to 18 percent of total sales, down from 27 percent in the previous quarter. Despite the decline in revenues from Unisys, Gibson said the company's overall performance underscores its ability to adjust its mix of sales channels to meet revenue and earnings targets.

''Although we are naturally concerned about the worldwide economic outlook, we remain comfortable with analysts' estimates of $245 million in revenue and earnings of $1.00 per share for fiscal 1990,'' Gibson said.

Sequent Computer Systems Inc. (NASDAQ: SQNT) is a leading provider of open systems computing solutions for the commercial OLTP market. The company, which employs more than 1,500 people, reported 1989 revenues of $145.6 million.

#90276b0602 10/03/1990 ~Business Wire

CONCORD, MA (OCT. 3) BUSINESS WIRE - GenRad Inc. and Ford Motor Co. Ltd. jointly announced agreement on a contract for GenRad to develop a test system which will provide comprehensive fault diagnostics on the electrical and electronic systems in use on all Ford vehicles through the 1990s.

This initial systems development will lead to systems being deployed throughout Ford's European dealer network over the next two to three years.

''In recent years, electronics have been increasingly used to control a variety of vehicle systems,'' noted Emil Pulick, director Service Diagnostic Systems, Ford of Europe. ''In the current decade, automotive electronic controls will play an ever increasing role in meeting legislative requirements for automotive exhaust emission control in addition to providing fuel economy

and performance benefits.

''Electronic controls can also make substantial improvements in automotive safety, comfort and convenience. Ford is meeting these challenges by providing electronic systems throughout our wide range of automotive products. In addition, we are developing comprehensive diagnostic solutions with GenRad to provide our extensive service network with the best diagnostic resources.''

Commenting on the partnership between Ford and GenRad, Peter E. Palmer, managing director, GenRad Ltd., said, ''Our Automotive Test Products division and Ford's European Service Diagnostics Systems group are working together to meet the rigorous diagnostic requirements of on-board vehicle electronics by developing a system capable of identifying and diagnosing system failures quickly and accurately.''

''For the Ford dealer,'' Palmer continued, ''the system will provide the benefits of a cost-effective solution to fault-finding and ensure compliance with legislative mandates on emissions, and to meet safety requirements. For the customer, the system will meet the demands for quality service and repair.''

GenRad Automotive Test Products, a division of GenRad Inc., is a world leader in the supply of test and measurement solutions to the automotive production and service markets. In 1986, GenRad was the first company to introduce a system capable of diagnosing all the electronic systems of a complete vehicle.

Following a joint development with Jaguar Cars -- a manufacturing agreement worth $13 million -- there are now more than 750 such diagnostic systems in use worldwide. Following initial deployment, Jaguar and GenRad have continued to enhance the system through hardware upgrades and new applications software development.

GenRad Inc. is a leading worldwide supplier of integrated software systems and automatic test equipment, to manufacturers and users of electronic and mechanical equipment, for design verification, product testing, and process information management. The company's stock is traded on the New York Stock Exchange; its trading symbol is GEN.

SAN JOSE, CA (OCT. 3) BUSINESS WIRE - Digital Equipment Corp. Wednesday announced a Digital Distributed Software (DDS) licensing agreement with Odesta Corp.

Under the terms of the agreement, Digital will distribute and support a future version of Odesta Document Management Systems (ODMS). ODMS is an object-oriented workflow and document management system that is a key component of Digital's document management program.

During 1991, ODMS will support the entire range of NAS desktop platforms, including MS-DOS PCs using Microsoft Windows 3.0, Apple Computer Macintosh under Macintosh OS, VMS and ULTRIX workstations under Motif, and OS/2 PCs using Presentation Manager.

ODMS will be extended to utilize industry standard SQL database servers, the first of which will be Digital's Rdb relational database. The product supports the CDA standard for the storage and retrieval of compound documents.

ODMS is an object-oriented workflow and document management system for collaborative computing. It is designed to facilitate the collaborative process, adding structure and computer support to the ongoing or ad-hoc processes every workgroup faces.

ODMS is used by knowledge workers and technical professionals who work with and contribute to collaborative documents. Application development is approached from the end-user's perspective. End-users are provided with a visual toolkit that allows them to easily set up and modify workflow in a way that best meets the needs of their workgroup.

Odesta Corp., founded in 1982, develops and markets a broad range of innovative software for the way people work individually and in groups. Its products, designed from a human factors perspective, are the first to provide powerful, visual, object-oriented applications for information management and decision support.

Digital Equipment Corp., headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

CUPERTINO, CA (OCT. 3) BUSINESS WIRE - Cupertino National Bancorp (NASDAQ/NMS:CUNB), parent company of Cupertino National Bank, announced Wednesday that earnings for the third quarter 1990 were $412,000, or 41 cents per share on a fully diluted basis, compared with $278,000, or 38 cents per share, for the like period a year ago.

At Sept. 30, 1990, total assets reached $120 million reflecting a 32.4 percent year-to-year increase, while loans totalled $90.7 million, a 30 percent increase, and deposits were $108.1 million, an increase of 34.5 percent.

Bank President Don Allen stated: ''Since doubling our equity nine months ago, Cupertino National Bank has concentrated on building a quality loan portfolio. Our realization of this goal has brought a return on equity exceeding 15 percent in the third quarter. We view this as a key step in retaining our designation as a premiere bank.''

Cupertino National Bank serves the mid-Santa Clara County market, specializing in commercial loans for local companies, construction lending to quality builders, Small Business Administration lending, and trust services to both individuals and businesses.

The independent bank features a ''one-stop banking'' philosophy emphasizing customized service. CNB has dedicated itself to serving the financial needs of Santa Clara Valley while continuing strong support of the local community.

#90276b0617 10/03/1990 ~Business Wire
SAN JOSE, CA (OCT. 3) BUSINESS WIRE - SuperMac Technology Wednesday introduced SuperSqueeze still-image compression software, and announced that it will be included at no cost with all of the company's color graphics cards and storage systems.

The development of SuperSqueeze is a result of a mutual technology-sharing agreement between SuperMac and C-Cube Microsystems. Under the pact, SuperSqueeze supports ICI (Image Compression Interface), C-Cube's newly announced standard application interface for image compression.

C-Cube provided SuperMac with its JPEG-standard image-compression software,

which produces exceptional disk-space savings for color graphics professionals. The announcement was made at the 1990 Seybold Computer Publishing Conference & Exposition at the San Jose Convention Center.

SuperSqueeze is the newest member of SuperMac's family of color-graphics solutions for Macintosh computers. It dramatically compresses such large-scale images as 35mm color slides, 8-1/2'' x 11'' photographs, color separations, and complex graphics by as much as 80:1 -- reducing storage requirements by 98 percent in some cases.

It also improves network performance, since compressed files can be transmitted more quickly and occupy less space on network servers.

A beta user of the product, Peter Farago, president of Farago Advertising in New York City, said: ''SuperSqueeze is an ideal solution for anyone involved in producing professional quality graphics on the Mac.

SuperSqueeze will be available in January 1991, at which time SuperMac will include it at no cost with its color graphics cards and storage systems. Customers who purchase these cards and storage systems after Oct. 1, 1990, will be eligible to receive the SuperSqueeze software free from SuperMac. Other existing SuperMac customers will be able to purchase SuperSqueeze separately for $49.

C-Cube Microsystems is the leading developer of image compression technology used in applications such as color desktop publishing, digital photography and digital video systems. Based in San Jose, C-Cube was founded in July 1988 to establish its digital imaging technology as the industry standard for computer communication and consumer electronics applications.

SuperMac Technology, located in Sunnyvale, Calif., is a leading developer, publisher, and manufacturer of color solutions for Macintosh graphics professionals. The company's products include graphics cards; 16'', 19'' and 21'' color monitors; graphics storage systems; color graphics software and color matching utilities.

SuperMac delivers color graphics solutions for end users in such markets as graphic arts, desktop publishing, engineering, and business graphics.

CHARDON, OHIO (OCT. 3) BUSINESS WIRE - Essef Corp. (NASDAQ/NMS:ESSF) Wednesday announced that it intends to sell its FAME Plastics subsidiary, headquartered in Daytona Beach, Fla.

Essef Corp. also announced that FAME Plastics will discontinue the operations of its Statesville, N.C., facility in December 1990. The Statesville operation is located in a leased plant with a net book value of machinery and equipment approximating $3.6 million. FAME Plastics Inc. provides contract manufacturing services specializing in shielded plastic enclosures for the business machine and computer industry.

The merchant banking divisions of Ameritrust Company N.A. in Cleveland, and The Nippon Credit Bank Ltd. in New York, are assisting the company with this sale.

The company's waiver of compliance relating to the interest coverage covenant expired on Sept. 30. The company has met with representatives of its bank group and expects to obtain an extension of its waiver of compliance until Oct. 31. Essef Corp. Common Shares are quoted on the National Association of Security Dealers' NASDAQ National Market System under the symbol ''Essf'' and are reported elsewhere as Essef Corp.

The corporation designs and manufactures products for selected markets through the application of high performance polymeric materials and innovative process technologies.

NEW YORK (OCT. 3) BUSINESS WIRE - Information Management Technologies Corp. (''IMTECH'') (NASDAQ:IMTKA (common), IMTKU (units), IMTKW (warrants)) Wednesday announced that it has entered into a joint venture with Backoffice Services Inc., an affiliate of Colin Service Systems Inc., a leading provider of contract cleaning services, whereby IMTECH will have access to a number of

Colin's 1,000 corporate clients located in the Northeast and Mid-Atlantic States, to provide back office systems management services.

The initial contract under the agreement with Backoffice Services Inc. is with Service America Corp., a Stamford, Connecticut cafeteria management and food vending company with over 2,000 locations nationwide.

Under the terms of the contract, IMTECH will assume Service America Corp.'s forms management and fulfillment services and mailroom management. IMTECH's management expects this new contract to begin to contribute to revenues during the third quarter ending December 31. The joint venture agreement provides for additional projects to be contracted in the future.

Pierce Lowrey, president of IMTECH commented, ''Our business relationship with Backoffice Services Inc. provides IMTECH with an impressive opportunity to expand our business. With a substantial client base located in New York, New Jersey, Connecticut, Maryland, Virginia and the District of Columbia, IMTECH can achieve market penetration in these new geographic areas.''

IMTECH provides on-site and off-site ''outsourcing'' of a wide range of back office services to firms in the services sector. These services include an optical data storage system -- Computer Output INformation System (COINS), electronic publishing, fulfillment, printing, reproduction and general mail room operations.

IMTECH's information facilities management (''IFM'') capabilities provide companies with the ability to contract out ancillary services to reduce operating costs and improve productivity, thereby allowing management to focus on its primary corporate objectives.

BLUE BELL, PA. (OCT. 3) BUSINESS WIRE - CLS Corp., a supplier of consumer loan services to banks, thrifts and other financial institutions Wednesday announced signing of a five year marketing agreement with Electronic Data Systems Corp. (EDS), the $5 billion Plano, Texas data processing and financial services subsidiary of General Motors Corp.

Under the agreement, EDS will subcontract servicing of purchased portfolios to CLS. CLS will provide loan accounting, remittance processing/control,

customer service, collateral control and collection/replevin (repossession) management for the purchased portfolios.

CLS recently established a relationship with EDS to utilize data processing services in the day-to-day servicing of CLS customer loans. CLS senior vice president of sales and marketing, Kevin R. Neal, noted today's marketing agreement was the first of its kind forged with an outside vendor since CLS was founded four years ago.

''CLS, with its customer base currently concentrated in the Mid-Atlantic region, will now have an opportunity to offer its services on a nationwide basis,'' he said.

''Purchased portfolios'' is a term that refers to groups of loans (typically homogeneous, such as automobile loans) acquired by an institution in order to increase its asset position. The market for purchased portfolios has expanded dramatically as a result of the FIRREA legislation passed in August 1989 mandating more stringent capital adequacy standards for the nation's savings and loan industry.

Management of purchased portfolios presently represents approximately 10 percent of CLS' consumer loan services business.

The company's major line of business is focused on management of consumer loans originated through client instituions. ''The signing of the agreement with EDS could potentially expand our revenues dramatically,'' Neal said, ''and will most certainly provide EDS' and our customers with an outstanding opportunity to increase their return on assets.''

CLS Corp., with headquarters in Blue Bell, currently employs 45 people.

#90276b0650 10/03/1990 ~Business Wire

MENLO PARK, CALIF. (OCT. 3) BUSINESS WIRE - A new treatment approach for myasthenia gravis, a disabling muscle disease, is the subject of a Small Business Innovative Research grant recently awarded by the National Institutes of Health to Applied Immune Sciences Inc.

In addition, AIS and Sacramento-based Immuno Concepts Inc. have recently agreed that Immuno Concepts will develop and market diagnostic applications of the AIS myasthenia gravis technology.

AIS believes it is the first company to produce, via recombinant DNA and protein engineering techniques, the portion of the acetylcholine receptor

(AChR) that is the target of a destructive autoimmune process in myasthenia gravis patients.

The muscle disorder occurs when an individual inappropriately manufactures autoantibodies against acetylcholine receptors in the muscle membrane, interfering with normal neuromuscular transmission. The result is fluctuating muscle weakness affecting some or all muscles of the body.

AIS plans to use its AChR protein to develop a bioactive device, the ICelator-MG, that will ameliorate the abnormal autoimmune response in patients with myasthenia gravis. The device will utilize the recombinant AChR protein to remove only the specific disease-causing autoantibodies from the blood plasma of myasthenia gravis patients.

Plasma exchange involves replacing the patient's plasma with donated plasma, a process that is expensive and can cause infections and allergic responses. It is hoped the AIS process may lead to partial or complete immunomodulation, providing a long-term correction of the patient's malfunctioning immune response.

Immuno Concepts, an international leader in autoimmune disease testing, has licensed the AIS-developed AChR protein to develop improved diagnostic tests for myasthenia gravis that will measure the level of disease-causing antibodies in a patient's blood serum. Currently, there is no consistent, continuous source of myasthenia gravis antigen for diagnostic use.

Applied Immune Sciences, based in Menlo Park, is engaged in the development of therapeutic devices designed to treat immune-related diseases by modifying abnormal immune responses.

PORTLAND, ORE. (OCT. 3) BUSINESS WIRE - Directors of Portland General Corp. (NYSE:PGN) Wednesday approved the previously announced agreement that will permit the company to acquire up to 49 percent of the common stock of Bonneville Pacific Corp. (NASDAQ:BPCO).

The agreement between the two companies was reached Sept. 21. Today's decision concludes Portland General's right to terminate the agreement as a result of its due diligence review.

Closing on the agreement remains subject to certain conditions including the expiration of the applicable waiting periods under Federal law.

Portland General and Bonneville Pacific officials said they expect to close the agreement by the end of October.

CONCORD, MA (OCT. 3) BUSINESS WIRE - Technical Communications Corp. (NASDAQ:TCCO) announced the award of two contracts totaling $2.9 million to supply CIPHER X5000 X.25/DDN end-to-end data encryption devices to the U.S. Government.

This represents an important market penetration. The contracts with the United States Coast Guard and the United States Air Force calls for the shipment of $1.1 million worth of equipment in calendar year 1990 and the remainder over the next three years. the CIPHER X5000 series equipment is designed to provide sophisticated and versatile network security for government, financial and coporate users of packet switched networks.

Arnold M. McCalmont, chairman and chief executive officer said, ''These orders represent the United States Government's first significant commitment to the company's CIPHER X5000 product that provides X.25 end-to-end encryption of data communications.'' This product was displayed in April, at a government sponsored demonstration, where it was recommended for use for encryption of sensitive but unclassified information to be transmitted on the U.S. Government's new FTS 2000 Communications Network.

The new contracts are not related to FTS 2000 Communications Network, but the company expects this network to be a significant area of opportunity along with individual orders directly from various agencies.

Technical Communications Corp. designs, manufactures and markets high performance secure communications systems and cryptographic devices used to protect sensitive communications sent over voice, data and facsimile networks.

SAN JOSE, CA (OCT. 3) BUSINESS WIRE - Aldus Corp. Wednesday announced Aldus Persuasion 2.0 for Windows.

The program takes advantage of the functionality of Windows 3.0 and builds on the strengths of Aldus' award-winning desktop presentations program for the Macintosh, which was introduced in November 1988.

Aldus Persuasion is a complete desktop presentations toolkit for producing overhead, 35mm slide, and on-screen presentations. It includes tools for outlining, word-processing, drawing, charting, and formatting, and can produce black-and-white or color presentations, as well as speaker notes and audience handouts.

Persuasion 2.0 for Windows streamlines the entire presentation-making process. Presenters simply choose a design -- either one of the predesigned slide or overhead templates that come with the product, or one of their own creation -- type their ideas into the outliner, and Persuasion automatically formats the entire presentation.

With Persuasion's word processor, users can specify type size, font, shadow, color, automatic text wraps, and line and paragraph spacing. They can also search and replace words and phrases, check their spelling, and mix type styles, faces, colors, and sizes within a text block. Persuasion for Windows also includes automatic kerning, and, at the user's discretion, can automatically number slides and speaker notes, and include time, date, and filename stamps.

Persuasion's built-in charting capabilities allow for a wide range of business charts in line, bar, overlay, column, pie, area, scatter and high-low chart formats. In addition, Persuasion automatically generates organization charts from outline text. To create a chart in Persuasion, users simply type their figures directly into its data sheet or import them from spreadsheet programs such as Lotus 1-2-3 and Microsoft Excel, then choose a chart format. Persuasion charts the data automatically -- and does so each time the user wants to change the data or try another format. Users can also create custom chart formats to apply in any presentation.

Aldus Corp. (NASDAQ:ALDC) creates computer software that helps people throughout the world effectively communicate information and ideas. In addition to Persuasion, the Aldus product line includes Aldus PageMaker, Aldus FreeHand and Aldus PrePrint. Products from Aldus' subsidiary, Silicon Beach Software, include SuperPaint, SuperCard, Super 3D, and Digital Darkroom. Aldus distributes both product lines through an international network of more than 16,000 dealers and distributors.

DALLAS (OCT. 3) BUSINESS WIRE - Harken Energy Corp. (''Harken'') (NYSE: HEC) of Dallas announced, on behalf of its wholly-owned subsidiaries Tejas Power Corp. (''TPC'') and E-Z Serve Holding Company Inc. (''E-Z''), that it has Wednesday filed with the Securities and Exchange Commission a registration statement covering the previously announced proposed rights offering (A).

TPC is Harken's natural gas gathering and marketing subsidiary.

E-Z is the parent company of Harken Marketing Company, Harken's refined products marketing subsidiary.

Through the proposed offering (A), Harken stockholders would receive transferrable rights (''Unit Rights''), affording them the opportunity to subscribe jointly to newly issued shares of the common stock of TPC and newly issued shares of the common stock of Frontier Refining and Marketing Company (''FRMC'').

FRMC is the name which E-Z will assume upon the completion of its proposed merger with the parent company of Frontier Oil Corp. (''FOC'') of Denver, Colo. as announced by Harken on Oct. 2, 1990. With the completion of the proposed offering (A), Harken, FRMC and TPC would become separate operating companies which, it is anticipated, would trade separately in the public markets.

Under the proposed rights offering (A), a total of $48.5 million in TPC and FRMC common stock would be offered to holders of Unit Rights.

In addition, upon completion of the merger of E-Z and the parent company of FOC, the proposed rights offering (A) would include the issuance of rights to FRMC's stockholders other than Harken which, upon exercise, would provide additional proceeds to FRMC of up to $15.5 million.

Harken Energy Corp. (NYSE:HEC) manages and develops energy assets. HEC retails, wholesales and distributes gasoline through its subsidiary, Harken Marketing Co.

Through its subsidiary, Tejas Power Corporation, HEC constructs, owns and operates natural gas gathering, storage and transmission facilities in Texas and Louisiana and markets third party gas to a variety of end-users.

HEC explores for, develops and produces oil and gas reserves domestically through its subsidiary Harken Exploration Company and internationally through its subsidiary Harken Bahrain Oil Co.

HEC provides contract drilling and workover/well services through its subsidiary, Harken Resource Management Corp.

#90276b0672 10/03/1990 ~Business Wire

SAN JOSE, CA (OCT. 3) BUSINESS WIRE - Interleaf Wednesday announced Interleaf 5, a family of publishing products that uses Interleaf's breakthrough active document technology to provide users with highly automated systems precisely tailored to their document and information flow.

Active documents, introduced by Interleaf last March, are electronic documents that can access, evaluate and act on information.

The new products include:

- Six job-specific end-user publishing products of unprecedented power and focus
- Customized solutions for vertical markets
- A highly productive development environment that enables developers and systems integrators to create cross-platform information presentation and distribution systems.

Expected at the press conference are customers, VARs, developers and systems integrators who are using or supporting this new technology -- including: Amoco, Apple, Cadre, Database Publishing Software, Design Automation, Houghton Mifflin, IBM, IDE, Grumman, Lockheed, Lotus, Software Productivity Consortium, Xerox, and others.

Interleaf 5 products go beyond text and graphics to provide active documents and specialized functions for the particular job categories. For example, Professional Writer provides hyperlinks, facilities for tracking and re-using revisions, the ability to link to virtually any file, and an optional set of advanced writer's tools from Houghton Mifflin. At the conference, Interleaf will show an active document that knows how to run any SQL database, extract data specified by the user, and build a text and graphics catalog that shows one set of information to customers and additional information to salespeople.

All Interleaf 5 products come with a set of ease-of-use tools. Included are active documents that let the user easily personalize the interface, an innovative on-line tutorial, and Point & Type templates that let users become productive minutes after installing the software.

Interleaf 5 products can be altered and extended simply by adding layered applications created by Interleaf, other software developers and technically-adept users. ''Layered apps'' can be simple functions (such as alphabetizing the rows of a table) or sophisticated applications (such as a system that automatically draws maps by inputting geographic data).

HARTFORD, CONN. (OCT. 3) BUSINESS WIRE - United Technologies Corp. has sold its 75 percent interest in Diavia S.p.A. and Aura S.r.L. to General Motors Corp. for approximately $68 million.

Current minority shareholders will retain a 25 percent interest in both companies.

As a result of the sale, UTC's third-quarter results will include a $45 million before-tax gain. Proceeds of the sale will be used to reduce debt incurred by UTC's acquisition of Sheller-Globe Corp. late last year.

Headquartered in Bologna, Italy, Diavia designs, manufactures and distributes automotive air conditioning systems to European aftermarket and original equipment manufacturer (OEM) customers. UTC purchased its interest in Diavia in 1986. Diavia had 1989 sales of $79 million.

Aura S.r.L., Turin, Italy, was formed in late 1988 to market automotive air conditioning systems to European aftermarket customers. Aura began its marketing operations this year.

United Technologies Corp. provides a broad range of high-technology products and supports services to the aerospace, building systems and automotive industries.

ATLANTA (OCT. 3) BUSINESS WIRE - Zenox Inc. (NASDAQ:ZENO) announced Wednesday that it has completed the acquisition of Savoy Drugs Inc., an Atlanta-based pharmacy company serving both the retail and healthcare industries.

Zenox also announced that it has contracted to purchase the 20,000 sq. ft. building which houses the company as well.

Terms of the acquisition were not disclosed, but Richard G. English, Zenox's president and chief executive officer did confirm that Savoy Drugs Inc. had been purchased in exchange for Zenox common stock.

The real estate purchase contract requires Zenox to pay $1.4 million in cash and approximately $700,000 in common stock, according to English, for both the building and adjacent land parcels.

The Savoy Drugs acquisition further expands Zenox healthcare interests, and is expected to add approximately $2 million in revenues plus an estimated $350,000 of pre-tax net income to Zenox annually.

As an operator and manager of a number of nursing homes, Zenox will vertically integrate the prescription business through its own pharmacy and thereby enhance both efficiency and profitability.

Zenox is a diversifed USA holding company with existing USA subsidiaries engaged in manufacturing, healthcare, communications, car rental franchise operations, investments and contruction industries. Zenox has undergone significant growth in the past 16 months, primarily through an aggressive program of acquisitions.

Zenox has already stated its intent to acquire more nursing homes, so this latest acqusition is seen as being complementary to the growth in their healthcare operations, which also includes controlling interest in a vitamin-supplement company.

LYNNWOOD, WASH. (OCT. 3) BUSINESS WIRE - ELDEC Corp. (ELDC) has named Allen W. Puckett as vice president, Central Operations.

Puckett comes to ELDEC from Momentum Distribution where he was senior vice president and chief financial officer. Prior to that he held the same position with VWR Corp. from 1986 to 1990. From 1980 to 1986 he was vice president, administration, at both Univar and VWR Scientific (a Univar subsidiary). From 1966 to 1979, Puckett was an associate and than a principal of the international management consulting firm, McKinsey and Co.

Puckett has a bachelor of science in business administration (minor, engineering physics) from the University of California, Berkeley, and a J.D. (law) from Harvard.

Puckett's position at ELDEC is a new one, created when the company reorganized last December. It represents the centralization of several manufacturing and purchasing functions for more efficient operations.

Puckett, who is completing an assignment at Momentum, will join ELDEC prior to the end of the year.

ELDEC custom designs and manufactures electronic and electromechanical products for aerospace and defense applications. Founded in 1957, the company is a subcontractor to a large number of major aerospace and defense electronics contractors.

#90276b0691 10/03/1990 ~Business Wire
CAMBRIDGE, Mass. (OCT. 3) BUSINESS WIRE - ON Technology Inc. Wednesday announced the appointment of Conall Ryan as president.

Ryan succeeds Mitchell Kapor, who remains as ON's chairman.

Ryan joined ON in 1989 as vice president of marketing and was instrumental in coordinating the successful launch of the company's first product, On Location a Macintosh utility program.

His appointment as president was approved yesterday by the board of directors

of the firm, co-founded three years ago by Kapor and Peter Miller.

Miller was ON's president before assuming a key research and development role with Apple Computer Inc. earlier this year. Kapor has served as president since then and will continue to be a company spokesperson and make significant contributions to ON's business strategy and product design.

''Conall has played a major role in making ON and On Location successful, and the board expressed great confidence and enthusiasm in selecting him over a list of other distinguished candidates as the person best able to direct the company's day-to-day operations,'' Kapor said.

Before joining ON, Ryan was marketing manager at NeXT Computer Inc., in Palo Alto, Calif., where he had overall management responsibility for bundled application software. He was also involved in strategic planning and negotiations, competitive hardware analysis, and event marketing.

From 1985 to 1988 Ryan worked at Lotus Development Corp. in Cambridge, Mass., as a product manager for Lotus Agenda and Lotus Metro. He also had managerial responsibilities for Lotus HAL and a port of 1-2-3. Ryan was a project leader at Software Arts until Lotus acquired the company in 1985.

Ryan is an author of short fiction, technical articles and two novels, one a Book-of-the-Month Club Alternate Selection, the other an Edgar Award nominee. His work has been published in the United States and the United Kingdom and translated into German and Japanese.

He received a bachelor's degree in English from Boston University. ON Technology, based in Cabridge, Mass., makes software applications for the Apple Macintosh computer.

     #90276b0704 10/03/1990 ~Business Wire
MARLBORO, MA (OCT. 3) BUSINESS WIRE - Data Translation announces the DT2868 High Speed Frame Processor.

Each occupies only one slot in an IBM PC AT or 100 percent compatible. Both connect directly to DT-Connect compatible frame grabbers to greatly accelerate computations required by image processing operations.

The DT2878 Advanced Processor delivers true FFT capability, allowing data from partial or whole frames to be analyzed in the frequency domain. The 25 Mflops 32-bit floating point DT2878 is built around the powerful AT&T DSP32C digital signal processor chip. Data can be processed in either floating point or

fixed point format. Full software support, including that of AT&T, is available from Data Translation.

The DT2868 High Speed Frame Processor is the faster successor to the industry-standard DT2858 Auxilary Frame Processor. Using a pipelined architecture, the DT2868 is not as flexible as the DSP-based DT2878 Advanced Processor, but performs image processing operations three times faster than the DT2858, and up to 100 times faster than the PC AT host.

The DT2878 is available now in two data memory options: DT2878-2 with 2Mbyte ($4,495) and DT2878-4 with 4Mbyte ($5,495). An 8Mbyte version is planned. The DT2868 ($1,995) will begin shipping Dec. 15, 1990.

DT2878 Combines Programmability, Accuracy, FFTs, Memory

The DT2878 greatly speeds computationally intensive image processing functions, and performs frequency analysis, morphological operations, convolutions, and dozens of other operations much faster than can the host PC AT.

The DT2878 excels at 32-bit floating point data operations, as when frequency analysis and geometric processing are required. Fast Fourier Transform (FFT) support allows image data to be processed and analyzed in the frequency domain. The DT2878 is fast enough to perform a real FFT, in software, on a 512 x 512 frame in 2.5 seconds. By comparison, the fastest PC AT machines require more than one minute for the same operation.

Data Translation is a world leader in the design, manufacture, and marketing, of high performance image processing, data acquisition, array processing, and desktop video computer boards and software.

NEW ORLEANS (OCT. 3) BUSINESS WIRE - The Louisiana Land and Exploration Co. (NYSE:LLX) (''LL&E'') Wednesday reported that it has successfully tested an exploratory well on company-owned fee lands in Lafourche Parish in south Louisiana at the Bayou Raphael Field.

The LL&E Fee No. 1 well has been completed as a dual oil and gas producer. The well flowed from perforations between 12,079 feet and 12,100 feet at a stabilized daily rate of 288 barrels of 32 degree API gravity oil through a 12/64 inch choke with 1,191 pounds flowing tubing pressure.

In addition, from perforations between 11,598 feet and 11,624 feet, the well was tested at a daily rate of 3.5 million cubic feet of natural gas and 96 barrels of 49 degree API gravity condensate through a 12/64 inch choke with 3,746 pounds of flowing tubing pressure.

The LL&E Fee No. 1 well encountered three gas bearing zones and four oil bearing zones with a total of over 150 net feet of pay. Several offset wells are planned to further delineate this discovery.

LL&E is the operator of the well and has 37.5 percent working interest in addition to its royalty interest as land owner. Columbia Gas Development Corp., a wholly owned subsidiary of The Columbia Gas System has a 50.0 percent working interest. The remaining 12.5 percent interest is held by a privately owned company.

HARTFORD, CT (OCT. 3) BUSINESS WIRE - Frank W. McAbee has been elected to the new post of senior vice president, environmental and business practices at United Technologies Corp., it was announced today by Robert F. Daniell, chairman and chief executive officer.

''Frank McAbee will be our chief environmental officer with direct access to me,'' Daniell stated. ''His job is one of the most important and the most challenging in our corporation.

McAbee has been vice president, business practices, responsible for government contracts and compliance, the corporate Ombudsman's office, the DIALOG program and administration of the UTC Code of Ethics. In his new position, he will retain those responsibilities while assuming responsibility for the environment.

''Our environmental track record has been unacceptable. We must demonstrate our environmental commitment to our employees, to the communities in which we do business and to regulators,'' Daniell added. ''The same commitment that has guided our quality and customer service initiatives must guide the way we approach the environment every day at every UTC facility.''

McAbee will direct a significant expansion of the corporation's existing environmental organization including a network of executives in charge of environmental affairs at each of its divisions worldwide. Division environmental officers will report directly to division presidents and to McAbee, according to Daniell. They will be responsible for the development and implementation of comprehensive environmental programs.

''The respect Frank has earned inside and outside the corporation in establishing a model business practices program makes him the right person for this job,'' Daniell said.

McAbee, 59, joined United Technologies in 1954 as an experimental test engineer at its Pratt & Whitney division. He has held a number of senior management positions at several UTC divisions including president of Pratt & Whitney's Government Engine Business in Florida. He is a graduate of the University of Alabama with a bachelor's degree in mechanical engineering.

United Technologies provides a broad range of high-technology products and support services to the aerospace, building systems and automotive industries.

NEW YORK (OCT. 3) BUSINESS WIRE - Goldman, Sachs & Co. announced the formation of the Water Street Corporate Recovery Fund I, L.P.

The Fund, established with $783 million of capital from investors including major U.S. and foreign pension funds, international banks, university endowments, insurance companies and individuals, will make significant investments in financially troubled companies and their securities. Goldman Sachs has contributed $100 million to the fund and serves as General Partner. The fund first began soliciting for investors in April.

The Water Street Corporate Recovery Fund will focus on acquiring the subordinated debt, equity securities, bank loans and other liabilities of financially troubled companies and partnerships. In taking large positions in financially troubled companies, the Water Street Fund will work as an active partner with managements whenever possible to help them restructure financially.

The Water Street Fund will provide managements with Goldman Sachs' financial expertise in investment banking, LBOs, public compnay recapitalization, high-yield securities issuance and trading, recovery securities investments, and mergers and acquisitions.

A committee of five Goldman Sachs partners is responsible for the Water Street Fund. Mikael Salovaara, head of the leveraged finance group at Goldman Sachs and a member of the firm's investment committee, supervises the fund's day-to-day operations.

Goldman Sachs is a leading, full-service international investment banking and securities firm serving corporations, institutions, governments and individuals worldwide.

Founded in 1869, it is one of the oldest, largest and most strongly capitalized firms in the industry and the only private partnership among the major Wall Street organizations. At the conclusion of 1989, the firm's partners' capital exceeded $2 billion.

Goldman Sachs has approximately 6,400 employees and 128 general partners located in offices throughout the United States and in London, Tokyo, Hong Kong, Madrid, Montreal, Singapore, Sydney, Toronto and Zurich.

#90276b0737 10/03/1990 ~Business Wire
RICHARDSON, TX (OCT. 3) BUSINESS WIRE - Ericsson GE Mobile Communications will supply cellular equipment that McCaw Cellular Communications Inc., and LIN Broadcasting Corp. will use to upgrade system capacity and service quality in their key markets.

Part of the plan calls for Ericsson GE to supply a digital switching system that will replace the system currently in use in the New York-New Jersey metropolitan area.

When fully installed by year end 1991, the Ericsson GE system will allow for the benefits of digital cellular service to the customers of Metro One, the LIN-owned non-wireline cellular service provider in New York and New Jersey.

Benefits of the digital system include high voice quality and high service availability as well as data transmission and enhanced privacy/data security.

McCaw also announced that it will upgrade its cellular switches in the Pacific Northwest, installing Ericsson switches similar to those being installed in New York and New Jersey. The switches will enable cellular subscribers in

Washington and Oregon to enjoy the same quality, capacity and functionality benefits as those in the regions served by Metro One.

In a related action, McCaw has reached an agreement with Cantel Inc., of Toronto, under which key regional cellular systems owned and operated by McCaw and LIN will be seamlessly connected on a switch-to-switch level with the digital cellular system operated in Canada by Cantel.

As McCaw and LIN proceed with the installation of Ericsson switches, also used by Cantel, customers of all three companies will be able to receive calls anywhere they may be in regions served by a McCaw, LIN or Cantel digital switch.

McCaw Cellular Communications Inc. (NASDAQ:MCAWA) is the nation's leading cellular telephone company, with ownership positions in over 100 markets across the country, representing 106 million potential customers, or ''pops.'' Approximately 80 percent of the ''pops'' of McCaw and of LIN Broadcasting Corp. (NASDAQ:LINB), which is 52 percent owned by McCaw, are in the nation's 30 most populous markets and their contiguous service areas.

McCaw Cellular operates major regional systems in California, Florida, Texas, the Pacific Northwest, the Midwest, the Rocky Mountain states and the Northeast, currently offering service primarily under the name Cellular One. LIN Broadcasting holds siginficant interests in cellular systems in New York, Los Angeles, Dallas and Houston, and operates seven network-affiliated stations.

Ericsson GE Mobile Communications, headquartered in Paramus, N.J., is owned 60 percent by Ericsson and 40 percent by GE. It currently has 4,750 employees worldwide and produces cellular telephones, land mobile radio products and systems and ''Mobitex'' mobile data communication systems for international markets.

Ericsson GE Mobile Communications also serves the North American market for cellular telephone systems.

STOCKHOLM, SWEDEN (OCT. 3) BUSINESS WIRE - Ericsson has been awarded a contract by Singapore Telecom for a new cellular telephone sytstem for Singapore.

The first phase of the order, which will be implemented in 1991, is valued at $36 million.

The cellular system will follow the analog E-TACS-standard and will have an initial capacity of 30,000 subscribers. It will cover all of Singapore, including islands, the underground and expressway tunnels.

The choice of the Ericsson system also makes it possible to have international roaming with countries like Malaysia, Hong Kong and United Kingdom.

Ericsson is an international leader in telecommunications, recognized for its advanced systems and products for wired and mobile communications. Its wholly owned North American subsidiary is based in Richardson, Texas.

SAN JOSE, CALIF. (OCT. 3) BUSINESS WIRE - C-Cube Microsystems Wednesday introduced the Image Compression Interface (ICI) that provides compatibility between computer applications and hardware compression products.

The interface enables software applications to take advantage of image compression accelerators on Apple Macintosh, IBM, PC AT and compatible computers using a standard method.

ICI (pronounced 'icy') is a standard component of C-Cube's Compression Workshop software. Applications that incorporate the Compression Workshop will work with any hardware compression product that complies with the ICI standard. In computer systems that lack special compression accelerator hardware, ICI compresses images using software that runs on the computer's host processor.

''ICI'' makes it easy for software developers to incorporate the JPEG compression standard into their applications, without having to worry about hardware compatibility,'' said Alain Rossmann, vice president of sales, marketing and operations at C-Cube. ''The response to the ICI standard has been very enthusiastic from both hardware manufacturers and software developers.'' Support From Popular Programs

Leading graphics and desktop publishing application vendors in both the Macintosh and PC arenas have announced their support for ICI. On the Macintosh, ICI support is currently available from Adobe Photoshop, Quark XPress 3.0, Stuffit DeLuxe by Aladdin Systems, Studio-32 from Electronic Arts and the DiskDoubler Plus by Salient.

Autodesk Inc. has announced its intention to support ICI in its PC multimedia applications. Additional third-party vendors are expected to announce their support for ICI over the next several months. Hardware Support

Hardware products that support ICI include C-Cube's new Compression Master boards. Third-party hardware products that support the ICI standard are expected to be introduced this fall, offering users a choice of image compression solutions. Easy Integration

C-Cube's Compression Workshop 1.1 package provides all the software resources and source code needed to integrate ICI into any application. Interfaces and driver specifications for hardware developers are included. The Compression Workshop 1.1 retails for $195 and will be available in November. For more

information, call C-Cube sales at 408/944-6300.

C-Cube Microsystems is the leading developer of digital media technology used in applications such as color desktop publishing, digital photography and digital video systems. Based in San Jose, Calif., C-Cube was founded in July 1988 to establish its digital imaging technology as the industry standard for computer, communications and consumer electronics applications.

BRENTWOOD, TENN. (OCT. 3) BUSINESS WIRE - Comdata Corp. (NASDAQ/NMS:CMDT) Wednesday announced that Kelley D. Overton has been promoted to the position of vice president sales within the company's transportation division.

Overton formerly was regional sales manager for the division's General Sales Group.

Overton's promotion follows a six-year career with Comdata that began in telemarketing. During his employment with the company, he has held various sales positions, which included field responsibilities in two of the division's territories.

In his new position, Overton will oversee a 15-person sales force that serves trucking companies throughout the country and will be responsible for business development among existing and new transportation accounts.

Overton will report directly to Louis A. Molettiere, senior vice president sales for the division.

''It is a pleasure to recognize in this way Kelley Overton's hard work and dedication on behalf of the Transportation Division and our company for so many years,'' said Molettiere. ''He has enthusiastically accepted all previous assignments, serving with great determination and making meaningful contributions to Comdata's development.

''We look forward to his expanded role in the continued growth of our transportation- related businesses.''

Overton is a native of Lafayette, Tennessee. Following studies at Martin College in Pulaski, Tenn., he received a Bachelor of Business Administration from Middle Tennessee State University.

Comdata is a leading supplier of funds transfer, cash advance, permits, point-of- sale systems services, and telecommunications services to the transportation, leisure and retail industries. The company's shares are traded in the NASDAQ National Market System under the symbol CMDT.

NEW YORK (OCT. 3) BUSINESS WIRE - A group of business and financial leaders from the United States and other Western countries will gather in Shanghai commencing on Oct. 14 to meet with the leadership of China's largest metropolitan area on its plans to develop a financial services sector.

The conference, which is being organized for the International Business Leader's Advisory Council for the Mayor of Shanghai, is co-sponsored by three major international financial organizations and three Chinese financial institutions.

Shanghai's Mayor, Zhu Rongji, under whose auspices the conference is being held, will welcome the participants at a dinner on Sunday, Oct. 14 at the conference site, the new Shanghai Centre, a major multiuse commercial and residential complex including the American International Centre office building, a Portman hotel and conference facilities. Also welcoming the delegates will be Maurice R. Greenberg, chairman of American International Group Inc. (AIG) and chairman of the Advisory Council.

AIG, Goldman, Sachs & Co. and Credit Lyonnais Group are the three Western sponsors of the conference, which has been organized by AIG. The Chinese sponsoring organizations are the People's Bank of China, the Bank of China, and the Bank of Communications.

Principal speakers at the conference will include William E. Simon, chairman of William E. Simon & Sons Inc. and former U.S. Treasury Secretary, Casper W. Weinberger, Publisher of Forbes magazine and former U.S. Secretary of Defense, and the Rt. Honorable Lord Prior, PC, Chairman of The General Electric Co. p.l.c. of Great Britain. The moderator will be E. Gerald Corrigan, president of The Federal Reserve Bank of New York.

The International Business Leaders' Advisory Council for the Mayor of Shanghai is composed of chairmen and senior executives of leading world corporations. Its purpose is to provide the Mayor with information and recommendations which can help in the formulation of strategies for the Municipality of Shanghai.

AIG, the conference organizer and a founding member of the International

Business Leaders' Advisory Council for the Mayor of Shanghai, has an historic tie to Shanghai and China.

The company was founded in Shanghai in 1919 and spread throughout China and Southeast Asia during the 1920's and 1930's. Operating today in 130 countries and jurisdictions worldwide, AIG retains strong ties to Asia and today is among the largest foreign-based insurers in many Asian markets.

#90276b0795 10/03/1990 ~Business Wire

SAN JOSE, CA.- (OCT. 3) BUSINESS WIRE - Quark, Inc. has announced a significant product development effort for IBM's line of personal computers and workstations. As its initial entry into this market, the company will adapt QuarkXPress(b)/PC, its electronic publishing software, for the IBM Personal System/2(a). It is expected to be available in 1991.

Quark is working with IBM on future development efforts that will provide Quark electronic publishing products for the PS/2(a) using Operating System/2(a) and RISC System/6000(a), as well as software to enhance integration and connectivity of multiple vendor systems.

''We are quite impressed with IBM's commitment to the publishing market,'' said Tim Gill, Quark's founder and senior vice president of research and development. ''Our customers are very important to us, and we listen carefully. With IBM's expanding role in this marketplace, we want to be there for our customers with a full range of products and services.''

The IBM Media Industry has identified newspaper, magazine and book publishing as top growth markets during the 1990s for its products and services. IBM offers a full-range of computer systems, sophisticated networking capabilities service and training to provide a system-wide solution to publishing firms.

''Quark is clearly a respected industry leader, and this development effort represents a major step for us in providing a system solution for our mutual customers,'' said Frank Hagan, manager of media industries for IBM.

Working with IBM, Quark also will pursue development in areas such as groupware and data exchange software for Atex systems and other third-party vendors. Groupware enables reporters and graphic designers, for example, to be working on the same document simultaneously.

''We've been hearing a lot from the publishing community about the need for groupware to make the entire editorial and production process faster and easier,'' said Gill. ''OS/2(a) Presentation Manager(a) is a natural for this because of its great connectivity and networking potential. Also, its multitasking capability readily facilitates work group publishing which we think is key to the future of electronic publishing.''

IBM's Media Industry addresses the computing needs of nine diverse industry segments, the largest of which are newspapers and magazines. Headquartered in White Plains, N.Y., the Media Industry has a mission to provide integrated hardware and software solutions to customers within these industry segments.

Based in Denver, Colo., Quark, Inc., develops and distributes publishing software products for commercial publishing and graphic arts professionals using microcomputer-based systems. QuarkXPress, a precision-oriented software product, provides even the most demanding publishing arts professional with the tools and features they need to create and implement sophisticated publication designs. Founded in 1981, Quark is privately held.

CHICAGO (OCT. 3) BUSINESS WIRE - In a joint announcement Wednesday, SSA President Roger Covey and IBM Australia Director and Assistant General Manager Operations-Australia/New Zealand, Terry Baker, announced that IBM Australia had acquired 15 percent equity in SSA's Australian susidiary, SSA Services Pty Ltd.

SSA President Roger Covey termed the alliance ''a significant step forward in expanding SSA's relationship with IBM. SSA has very active plans for growth in the Pacific region,'' he continued, ''and with IBM as a shareholder the implementation of these plans will be accelerated.''

As part of the alliance, two senior IBM executives have assumed marketing roles at SSA in Australia. In addition, a number of joint marketing programs will be quickly introduced in the Pacific region. Terry Baker, IBM Australia director and assistant general manager operations Australia/New Zealand, described the alliance as ''a further extension of IBM's alliance strategy.''

SSA (NASDAQ: SSAX) develops, markets and supports an integrated line of business application software and CASE tools for users of the IBM AS/400 (tm) computers through a global network of Affiliate business partners and SSA Regional Headquarters offices. On Aug. 16, 1990, SSA announced record earnings and revenues for the quarter ended July 31, 1990.

HAUPPAUGE, NY (OCT. 3) BUSINESS WIRE - Richard Projain, president and chief executive officer of ElectroSound Group Inc., (AMEX:ESG) Wednesday reported the operating results for the first quarter which ended Aug. 31, 1990.

During the first quarter the company incurred a loss of $91,000 as compared to income of $409,000 for the same period in fiscal 1990. The profit in fiscal 1990 resulted from a $418,000 gain on the sale of assets of the company's commercial duplicating equipment manufacturing operation.

For the quarter, sales declined 31 percent to $4,874,000. These results are attributable to a generally softening economy, the declining market for vinyl phonograph records, and lower sales of cassette albums.

UPPER SADDLE RIVER, NJ (OCT. 3) BUSINESS WIRE - The Boone Company is currently using a Western Union HotLine so that individuals can make their voices heard on Japanese trade and investment policies.

Messages will be sent on behalf of the caller free of charge, courtesy of T. Boone Pickens, the well-known international financier. By calling a toll-free number (1-800-325-6000, HotLine Operator 9765), Americans can send a Western Union Custom Letter (SM) to Japanese Ambassador Ryohei Murata, United States Trade Representative Carla Hills and the president of Toyota Motors USA, Yukiyasu Togo, regarding Japan's closed corporate system and the desire that Japan support the military effort in Saudi Arabia.

Gary Breitbart, Marketing Manager - Document Delivery Products for Western Union Priority Services, explained, ''Mr. Pickens decided to utilize Western Union's ProAction HotLine (SM) service in conjunction with broad newspaper advertising to maximize the impact of his message.''

The ad's headline reads ''America, You Lost the Economic War,'' referring to one of the many taunts hurled at Pickens and 50 other American stockholders at the annual meeting of Koito Manufacturing in Japan. ''The American people are angry, and I want the Japanese government to know it,'' Pickens said. ''Corporate Japan invests freely in the United States, but restricts free-market competition in Japan,'' Pickens continued. ''Toyota and other big corporate cartels of Japan are expanding their reach, and making a mockery of America's anti-trust laws. And now, when the military is protecting Middle East oil that fuels Japan's economic power, what do we get in return? What we

have always gotten from Japan: very little.''

Advertisements with the Western Union HotLine number will continue to run in major markets across the country during the next few weeks.

Western Union Corporation provides a broad range of messaging, financial and other services, to meet the specific needs of business customers and individual consumers. Its Priority Services unit is the leading provider of paper-based messaging products and services where speed, impact and service are critical to the success or failure of business communications.

LITTLETON, MA (OCT. 3) BUSINESS WIRE - Coinciding with the reunification of Germany, Alliant Computer Systems (NASDAQ:ALNT) Wednesday announced it has sold the first American-made supercomputer to an East German customer.

Humbolt University, an historic East German institution and the oldest university in Berlin, will use Alliant's FX/Series supercomputer for scientific applications in chemistry, electronics design, mechanical engineering, mathematics and physics. Humbolt's Institute of Physics was headed by Albert Einstein from 1914 to 1933, during which time he developed his theory of relativity (1914-1916).

According to Dr. Jens-Joerg Gerber, assistant director of Humbolt's computer center, the university selected the Alliant supercomputer because it wanted to be at the forefront of computer technology as it prepared to compete with Western institutions. ''We want to catch up quickly, and the parallel processing capabilities of the Alliant supercomputer will help us do that,'' Gerber said.

Alliant Computer Systems manufactures standards-based parallel supercomputers with visualization tools that enable scientists and engineers to quickly interpret and solve complex problems.

DUNCAN, SC (OCT. 3) BUSINESS WIRE - One Price Clothing Stores Inc. (NASDAQ: ONPR) Wednesday announced that sales for the third quarter ended Sept. 29, 1990 were materially less than expected.

Same store sales decreased 7 percent in the third quarter compared with the like quarter last year. This shortfall is sales, management feels, was due to a general slowdown in consumer spending, particularly during the month of September.

As a consequence of this softness in sales, the company expects its earnings for the third quarter ended Sept. 29, 1990 to be significantly below some analysts' estimates of 5 cents to 11 cents per share. The company reported earnings of 7 cents per share for the third quarter of last year, ended Sept. 30, 1989. The company expects to announce its third quarter earnings during the week of Oct. 22, 1990.

#90276b0836 10/03/1990 ~Business Wire

BURLINGTON, VT (OCT. 3) BUSINESS WIRE - John A. Cobb, president and chief executive officer of Eastern Bancorp (NASDAQ:VFBK), parent company of Vermont Federal Bank, Burlington, and Rockingham Bancorp, Exeter, N.H., announced Wednesday that the company expects to add approximately $1.7 million of loan loss reserves during the company's fourth quarter ended Sept. 30, 1990.

Cobb also announced that Eastern would recognize a pre-tax gain of approximately $1.3 million on the sale of certain mortgage loans which were securitized and sold by Vermont Federal Bank during the fourth quarter.

Of the additional loan loss reserves expected to be established during the fourth quarter, approximately $800,000 related to fair value adjustments on certain commercial real estate loans held in Vermont Federal Bank's loan portfolio which will be reclassified as in-substance foreclosures at Sept. 30, 1990, and approximately $200,000 is attributable to loan loss reserves which Vermont Federal expects to establish on certain other commercial real estate loans which are classified substandard.

The remaining portion of the additional loan loss reserves reflects an increase in general loss reserves at Vermont Federal Bank and First Savings and Loan Association of New Hampshire, Rockingham's savings association subsidiary.

Cobb stated, ''During the fourth quarter, Vermont Federal Bank continued to review all of its commercial real estate loans which are classified substandard. Based on such review and the continued deterioration in the Vermont and New Hampshire economies, we concluded that it was appropriate to establish additional general and specific loan loss reserves.''

Cobb added, ''At this time, we do not anticipate that we will need to establish additional reserves for the fourth quarter beyond the amounts currently set aside, or that we will need to increase the amount we expect to charge off for loans which are to be recorded as in-substance foreclosures.

''However, the audit of the company's year end financial statements has not yet been completed. Therefore, there can be no assurance additional loss reserves or charge-offs will not be required.''

During the fourth quarter, Vermont Federal Bank securitized a total of $80.4 million of fixed and adjustable rate mortgage loans held in its loan portfolio into FNMA mortgage backed securities, and sold $60.8 million of such securities at a pre-tax gain of $1.3 million. The bank used the proceeds from such sale to purchase an equivalent amount of FNMA and FHLMC adjustable rate mortgage backed securities with underlying mortgages on properties located in different areas of the country.

In addition to the $1.3 million pre-tax gain, Cobb noted that the bank benefited in a number of other ways from the balance sheet restructuring. Among other benefits, a lower risk weight is applied to FNMA and FHLMC mortgage backed securities compared to mortgage loans in computing the bank's risk-based capital requirement.

Principal and interest payments on the securities are guaranteed by FNMA and FHLMC. Additionally, the mortgage backed securities provide the bank with an additional source of collateral for borrowings and increase the liquidity of the bank's balance sheet. Moreover, through the purchase of the FNMA and FHLMC adjustable rate mortgage backed securities, the bank was able to increase its interest rate sensitivity and to diversify its prepayment risk.

Eastern Bancorp's fiscal year ended on Sept. 30, 1990, and it anticipates fourth quarter and year end results to be announced as soon as audited financial statements are available. Eastern Bancorp is a $618 million multiple holding company for Vermont Federal Bank of Vermont and Rockingham Bancorp of New Hampshire.

ROCHESTER, N.H. (OCT. 3) BUSINESS WIRE - Only three weeks after introducing the local area networking (LAN) industry's broadest Token Ring product line, Cabletron Systems Inc. (NYSE:CS), an established and recognized leader in providing Ethernet connectivity and internetworking solutions, Wednesday announced plans to unveil its initial entry into the Fiber Distributed Data Interface (FDDI) market at the upcoming Interop show in San Jose, Calif. (Oct. 10-12, Booth 1500).

Cabletron plans to unveil its Ethernet to FDDI (EFDMIM) bridging module for the Multi Media Access Center (MMAC) intelligent wiring hub by connecting two Cabletron Ethernet networks via the main FDDI ring formed by 37 major networking vendors of the FDDI Solutions Showcase Demonstration Group.

''FDDI, long viewed as the technology of tomorrow, is becoming readily available today,'' said Michael Welts, marketing manager at Cabletron. ''Cabletron's Integrated Network Architecture strategy calls for the successful integration of Ethernet, Token Ring and FDDI technologies to work simultaneously within the workplace. Our recent Token Ring announcement coupled with new FDDI capabilities and our leadership position in Ethernet technology products certainly makes Cabeltron the most complete networking solution available on the market today.''

In a January 1990 report from Forrester Research Inc., a research firm based in Cambridge, Mass., the average per port cost for FDDI (including fiber optic adapters, hubs, cables and connectors) was reported as $11,650. Forrester estimates this figure will drop to $2,000 by 1994, but Welts said Cabletron expects it will drop even further if a twisted pair standard is approved in the interim.

The EFDMIM will support dual attached connection for the MMAC intelligent wiring hub using a media scheme developed for the MMAC platform through

Cabletron's Integrated Network Architecture. The Integrated Network Architecture is a product strategy which provides a standards-based framework for seamless network evolution and expansion as customer needs grow, or as new networking technologies enter the market.

The MMAC platform, through an innovative, three-tiered backplane known as the Flexible Network Bus (FNB), allows Ethernet, Token Ring and FDDI technologies to coexist within a single modular hub.

The EFDMIM receives Ethernet packets from one network and transfers them along an FDDI ring to another Ethernet network on the ring. The bridge contains extensive filtering databases and source learning to control data flow and unnecessary bandwidth consumption in an Ethernet environment.

The EFDMIM supports Cabletron's Remote LANVIEW network management and has the capability to monitor network statistics and traffic rates. The EFDMIM is compliant with FDDI standards, American National Standards Institute (ANSI) X3T9.5 standards and SMT 6.2 (station management) standards. The bridge is also protocol independent.

General availability of the EFDMIM bridge is expected to begin in 60 days. The bridge is priced at $19,995.

WEST PALM BEACH, FL (OCT. 4) BUSINESS WIRE - VHC Ltd. (NASDAQ:VHCL) Wednesday announced that a settlement had been reached in principle among the parties involved in the class action litigation commenced on behalf of certain minority stockholders of the company in connection with the proposed buy-out of the company by its president, Joseph F. Bradway Jr.

Pursuant to the terms of the settlement, VHC will pay an additional ten cents per share in respect of the shares held by the public minority stockholders, which excludes those shares held by directors of VHC and their affiliates which were part of a Lock-up Agreement entered into at the time the buy-out transaction was announced.

VHC stockholders approved the buy-out transaction at a Special Meeting of Stockholders held on Oct. 2, 1990. Upon closing of the buy-out transaction, all stockholders of VHC other than Bradway will receive cash in the amount of $5.75 per share.

The settlement of the litigation is subject to court approval and, if approved is not anticipated to be final until mid-November at the earliest. In

addition to amounts payable to the minority public stockholders upon finalization of the settlement, the company has agreed to pay certain other expenses of the litigation.

VHC Ltd. is a holding company with interests in the glass container forming machinery and food processing machinery industries. VHC's common stock is traded in the over-the-counter market under the NASDAQ symbol VHCL.

LOS ANGELES (OCT. 3) UPI - Stockholders sued Financial News Network on Tuesday, claiming the cable business news company wrongfully withheld details about its investment in a new financial information service and other ventures.

The suit was filed in U.S. District Court one day after FNN announced it may face ''a very substantial non-cash loss'' for the fourth quarter and the year if auditors decide its $28 million investment in a new product, FNN:PRO, must be charged against current earnings.

If FNN reports such a loss, the company said Monday it could be placed in default on approximately $48.5 million in bank loans.

In addition to FNN, the lawsuit names as defendants Infotechnology Inc. - which owns 47 percent of FNN - its chairman, Dr. Earl Brian and other company officials who stockholders accuse of attempting to ''inflate the market price of FNN common stock'' between December 1989 and October 1990.

In fiscal 1989 FNN reported operating earnings of $6.5 million, or 36 cents a share, on revenues of $44.5 million.

Following FNN's announcement about a possible default on the loans, FNN stock dropped to $2.50, losing almost 50 percent of its market value in over-the-counter trading, the suit said.

The suit asserted that FNN overstated its net income by ''improper deferral of the development costs associated with the start-up of ... FNN:PRO.''

The product, introduced in July, features financial information, news and a video service.

In the lawsuit, shareholders say FNN ''was taking a significant financial risk by expanding into the financial information business which, if not successful, would result in a substantial reduction in the profitablity of its business.''

The suit, which seeks unspecified compensatory damages, also asserts that FNN overstated its assets in statements about the value of ''leased equipment'' and boosted its revenues and net income ''by improperly accounting for sale and leaseback transactions'' related to other FNN services.

Infotechnology officials could not immediately be reached for comment on the lawsuit.

On Monday, the cable business news company defended its handling of the new product's start-up costs as an investment and said it was beginning discussions with its principal bank to seek appropriate waivers to prevent default.

Auditors for FNN also were reviewing the valuation of data receivers provided to customers of FNN:Data Broadcasting, which is FNN's stock quote and market information service; accounting for the sale and leaseback of the receivers; and FNN's property accounts, the company said.

Saying auditors had not completed their independent examination, FNN sought a two-week extension to file its annual 10-K report with the Securities and Exchange Commission. The deadline for filing was Sept. 28.

The key accounting issue is how the approximately $28 million FNN invested in the new FNN:PRO product should be treated - as a charge against current earnings or amortized over a longer period of time.

FNN stock held by Infotech serves as collateral for Infotech's primary bank credit agreements under which about $20.7 million is outstanding.

If the auditors determine that FNN must take a one-time charge against fourth-quarter results for its investment in the real-time financial news service, FNN said it would be forced to report a ''very substantial non-cash loss for at least the fourth quarter of 1990 and the year.''

Brian said Monday that the company ''followed what we thought were appropriate procedures to treat the start-up cost as an investment and in recent days auditors have taken the position this should be written off as opposed to capitalized.

''If you do that, you end up with a big loss for FNN's fourth quarter and the potential of that is to change a lot of balance sheet ratios, which in turn causes your bank agreements to be in default, so you try to get waivers,'' he said.

Infotechnology also owns United Press International.

In Washington on Monday, UPI spokesman Milt Capps said FNN's financial operations will not directly affect UPI.

''These matters will not have a direct impact on UPI inasmuch as UPI is itself operating profitably,'' Capps said.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (OCT. 3) COMTEX - Congress was told today that reorganizations of limited partnerships known as "roll-ups" are unfair to individual investors while industry officials countered investors can best be served through more accurate, complete and meaningful disclosure.

In a typical limited partnership, one or more limited partners contribute capital to the partnership. The total is used by a general partner to purchase assets, frequently real estate or oil and gas properties which are then managed by the general partner. The investment is illiquid with the expectation that in five to seven years the partnership's properties will grow

in value and be sold.

Roll-ups occur when two or more non-traded limited partnerships are consolidated into one new investment vehicle which is then traded on an exchange. Investors complain the result is the exchange value of their interests ends up far below the price of the new security once it begins publicly trading.

"The basic problem of roll-ups is these are legitimized theft," economist Benjamin Stein told the House telecommunications and finance subcommittee. "The problem in the stock drop is not liquidity but the market realizing it is no longer a viable security. General partners and lawyers aren't suffering. It is the limited partners who suffer."

However, Christopher Davis, president of Investment Partnership Association (IPA), the national trade group of limited partnership program sponsors, said partnership reorganizations are necessary because assets may not have performed as well as expected.

"The roll-up satisfies the legitimate expectations of a group of investors seeking liquidation without forcing partnerships to liquidate in a depressed marketplace to the disadvantage of other investors," Davis said.

A majority of limited partners must vote to approve roll-ups and critics say they often cannot make an informed decision because they receive a proxy containing hundreds of pages of legal and technical jargon explaining the new investment which only a professional investment analyst could understand.

The IPA, which opposes any new legislation which would prevent or hamper the reorganization of partnerships, says the answer lies in improved disclosure requirements.

"The IPA believes investors should have easy access to comprehensible information so that investors and their advisors can make appropriate financial decisions," Davis said.

Richard Wollack, chairman of Liquidity Fund Management Inc., said disclosure is insufficient.

"My recommendation is to create a dissenters package," Wollack said. "This would provide a level playing field."

Such a package, Wollack explained, would allow those who vote against roll-ups to have their units redeemed at current value. He also suggested creating two classes of securities, one of which allows dissenters to retain their original transaction rights and benefits, while the other contains the restructuring proposal.

The congressional panel said the Securities and Exchange Commission is expected to provide it with a report on issues related to roll-ups shortly, including whether current SEC disclosure rules are sufficient to protect investors.

WASHINGTON (OCT. 4) COMTEX - The 10-K report filed at the NASD shows Gentner Electronics Corp.(TICKER: GTNR) lost $402,439, or $0.14 per share, on revenues of $5.53 million for the fiscal year ended June 30, 1990.

This compares with net income of $445,930, or $0.15 per share, on revenues of $5.06 million in fiscal 1989.

-30- 469

#90276c0062 10/03/1990 ~Comtex

WASHINGTON (OCT. 4) COMTEX - The 10-K report filed at the NASD shows Deer Park Financial Corp. earned $179,000, or $1.72 per share, for the fiscal year ended June 30, 1990.

This compares with net income of $241,000, or $2.32 per share, in fiscal 1989.

-30- 411

#90276c0063 10/03/1990 ~Comtex

WASHINGTON (OCT. 4) COMTEX - The 8-K report filed at the SEC shows on Sept. 17, 1990, M/A/R/C Inc. changed its fiscal year end from March 31 to Dec. 31.

A report presenting audited financial statements as of and for the nine-month transition period ended Dec. 31, 1990 will be filed on Form 10-K within 90 days subsequent to Dec. 31, 1990.

-30- 475

#90276c0064 10/03/1990 ~Comtex

WASHINGTON (OCT. 4) COMTEX - The 8-K report filed at the SEC shows on Sept. 25, 1990, Mercom Inc.(TICKER: MERO) appointed Deloitte & Touche as its independent accountants, replacing Arthur Andersen & Co.

Arthur Andersen's report on Mercom's financial statements for 1989 and 1988 was modified as to uncertainty regarding the outcome of pending litigation with the former president of Communications and Cablevision Inc., a wholly-owned subsidiary of Mercom.

No provision for any liability that may result upon adjudication was made in the related financial statements.

SCHEDULE 14D1

SEC - AMENDMENT NUMBER: 2

ANNOUNCEMENT:

An agreement dated July 23, 1990 was entered into by MHP Machines Inc. and (TICKER: MHPI) Eastern Shore Consolidated Ind. Inc. regarding the tender offer by Eastern Shore Consolidated Ind. Inc. of $.50 per share for 586,000 shares of MHP Machines Inc. representing a 51 percent interest. Under the agreement, if the number of shares tendered is less than 586,000, MHP Machines Inc. shall issue Eastern Shore Consolidated Ind. Inc. such additional shares as would enable Eastern Shore Consolidated Ind. Inc. to hold 51 percent of the outstanding MHP Machines Inc. shares.

STAMFORD, CT (OCT. 4) COMTEX - NUI Corp.(TICKER: NUI), a Bedminister, N.J., natural-gas utility-holding company, has agreed to acquire the natural-gas business of Wilkes-Barre, Pa.-based Pennsylvania Enterprises Inc. in a deal valued at $148.5 million.

Before the acquisition occurs, Pennsylvania Enterprises will sell its water-services business to Harrington Park, N.J.-based United Water Resources Inc. for $220 million cash, according to a Securities and Exchange Commission filing.

The deal calls for NUI to pay Pennsylvania Enterprises shareholders either $52.05 or one NUI common share for each Pennsylvania Enterprises common share in exchange for the company's gas business.

NUI shareholders will vote on the acquisition at an Oct. 30 meeting.

NUI distributes natural gas in New Jersey and Florida through its Elizabethtown Gas Co. subsidiary to 220,000 customers in Union and Middlesex (N.J.) counties, and 78,000 customers in Dade, Broward and Brevard (Florida) counties.

Pennsylvania Enterprises distributes natural gas and water to 129,000 water customers and 127 gas customers in northeastern Pennsylvania, including the cities of Wilkes-Barre and Scranton, through its PG&W subsidiary.

This 8-k Filing was submitted to the Securities and Exchange Commission on Oct. 3, 1990.

#90276c0203 10/03/1990 ~Comtex
STAMFORD, CT (OCT. 4) COMTEX - Atlanta-based Georgia Power Inc. (TICKER: GPE), a Southern Co. unit, has agreed to sell equipment and property related to 101 power-generating substations, mostly in the Atlanta area, to Oglethorpe Power Corp., a Tucker, Ga.-based electric utility, for $17.59 million.

In addition, Georgia Power will swap its Beaver Ruin substation in Gwinnett County, Ga. for Oglethorpe's Dillard substation, according to a Securities and Exchange Commission filing.

This 8-k Filing was submitted to the Securities and Exchange Commission on Oct. 3, 1990.

TOKYO (OCT. 3) - Japanese carmakers are confident that German reunification will boost sales of their cars, auto industry sources said Wednesday.

Number one carmaker Toyota, which plans to sell 1,500 units cars in the former East German market in 1990, hopes to expand its sales target to over 10,000 units in 1991.

Nissan Motor has recently revised upward its initial sales goal there from 2,000 to 3,000 units, said the sources while Mitsubishi and Mazda are planning to strengthen their sales networks in the unified Germany. They anticipate sales of 5,000 and 3,000 units respectively this year.

A toyota spokesman said overall annual demand for new cars in former East Germany was estimated to be around 500,000 units a year, almost as many as are sold yearly in Holland and Belgium.

#90276d0690 10/03/1990 ~French/German News Agency

BANGKOK (OCT. 3) - Cuts by the Soviet Union in oil exports to Vietnam have forced to government to double domestic petrol prices and search for new sources of the vital import, the Vietnam News Agency (VNA) said Wednesday.

"During the past two weeks and more, oil prices in the capital of Hanoi, in Ho Chi Minh City, and in many other localities throughout the country have increased unexpectedly, thus fermenting a competitive temperament among

consumers," said the VNA in a newscast monitored here.

The Far Eastern Economic Review (Feer) magazine recently reported that oil prices in Vietnam had doubled to 31 U.S. cents per litre.

Previously Vietnam imported oil from the Soviet Union, its main trading partner, but "perestroika" and the changing global picture in the oil trade has ushered in new trade arrangements based on hard currency transactions rather than communist solidarity and barter.

"This year, the supply of oil under contracts signed with the Soviet Union has faced numerous difficulties," the VNA said.

The government news agency added in the first nine months of 1990 the Soviet Union had cut oil exports to Vietnam by 30 percent.

Moscow had pledged to export 367,000 barrels of oil to Vietnam this year, the Feer reported this week.

Vietnam in 1990 is set to export about 2.5 million tonnes (or 340,000 barrels) of oil from its offshore reserves to Japan, but it has no refineries to convert the crude into commercial fuel for domestic use.

#90276d0820 10/03/1990 ~French/German News Agency

TEHERAN (OCT. 3) - A leading Iranian newspaper Wednesday hailed the release of 40 prisoners by an Israeli-backed militia and said if the West makes further goodwill gestures its hostages in Lebanan could be freed by the end of the year.

"It is hoped that Western countries who have undeniable influence upon Israel and its mercenaries will exert more pressure on them to release greater numbers of Moslem hostages," said the English-language Teheran Times, which is close to the government of President Ali Akbar Hashemi Rafsanjani.

"If the West goes ahead and responds with a true gesture of good will it can be hopeful that the problem of hostages in Lebanon will be solved by the end of the current year."

The South Lebanon Army (SLA), armed and financed by Israel, on Monday freed 40 detainees from the Kyiyam prison in the Israeli-imposed "security zone" in southern Lebanon.

Nearly 300 people are being held in Kyiyam on charges of supporting the anti-Israeli resistance movement in the region. The International Committee of the Red Cross is barred from the prison.

Iran and pro-Iranian Shiite Moslem groups holding Western hostages in Lebanon have repeatedly demanded the release of Khiyam prisoners as part of an exchange.

The Teheran Times said the release of the 40 prisoners by the SLA, "obviously a mercenary of the Israeli regime," apparently took place "under Western pressure."

The United States welcomed the SLA move. "It is consistent with our position that for humanitarian reasons all persons being detained without legal basis in the Middle East should be released immediately," said U.S. Presidential spokesman Marlin Fitzwater.

Iran and Syria, a major power broker in Lebanon, joined forces to arrange the release in April of two Americans and an Irish hostage in July.

Following the liberation of the two Americans, Iranian authorities complained that Washington did not reciprocate with an appropriate gesture of good will.

Twelve Westerners are being held in Lebanon, most of whom are believed to be in the hands of pro-Iranian Shiite groups.

#90276d1090 10/03/1990 ~French/German News Agency

TOKYO (OCT. 3) - Marubeni Corp. said Wednesday the Soviet Petrochemical Products Corporation had asked it for loans of between 100 million and 200 million dollars.

Marubeni officials, however, said the major Japanese trading company was unable to provide such loans without official payment guarantees by the Soviet Bank of Foreign Economic Affairs.

Industry sources meanwhile said Soviet foreign trade organizations, saddled with overdue debts to foreign firms, have made similar requests to other major Japanese trading companies.

The Soviet loan requests came at a time when the Soviet trading concerns are slowly repaying their overdue debts to Japanese companies, in a turnaround from a surge in arrears built up early this year in the wake of a drop in Soviet oil exports, they said.

At the end of July, Soviet overdue debts to Japan totaled 518 million dollars, they said.

But the Soviets last month gave 200 million dollars as part of payments for imports of Japanese steel products, theiy said.

#90276d1190 10/03/1990 ~French/German News Agency
CANBERRA (OCT. 3) - The government increased the tax on wool sales from 18 to 25 percent Wednesday to help combat the crisis in Australia's second largest export industry.

The levy is paid by farmers to the Australian Wool Corporation (AWC) which uses the revenue to support the floor price for wool by buying stocks.

Federal Primary Industries Minister John Kerin told parliament that he had accepted a recommendation from the AWC to lift the levy to 25 percent with effect from Thursday.

He added that new legislation would "include a provision to increase the maximum wool tax rate to 30 percent in order to permit further increases up to that level if necessary."

On May 31, Mr. Kerin ordered a cut in the floor price from 8.70 Australian dollars (7.20 U.S.) a kilo to 7.00 dollars (5.80 U.S.) despite wool farmers' opposition.

Wool and sheepskin sales earned 3.8 billion dollars (3.2 billion U.S.) in the year ending June 30, out of total Australian exports of 47.4 billion dollars (39.3 billion U.S.).

A sharp drop in purchases by China and Japan helped push the value of wool exports down from 5.9 billion dollars a year earlier.

#90276d1210 10/03/1990 ~French/German News Agency
KUALA LUMPUR (OCT. 3) - Malaysia can well sustain an economic growth rate of 7.5 percent in the next couple of years notwithstanding the uncertainties surrounding the Gulf crisis, a senior official said Wednesday.

"In fact in the immediate term, the Gulf crisis is likely to have a positive impact on the Malaysian economy as we are a net exporter of oil," Zain Azraai Zainal Abidin, the finance ministry's secretary-general, told a business convention.

He said growth in the first and second quarters had surpassed the performance last year, which by all measures was already a good year.

The economy grew at a rate of 8.5 percent last year and 11 percent in the first quarter of this year. Estimates show that the second quarter growth rate should be around nine or 10 percent.

"What is even more encouraging is that all major sectors of the economy continued to register bouyant growth, particularly the manufacturing, construction and agriculture sectors," Mr. Zain said.

He said indicators on private investments were particularly encouraging with projects worth 19 billion dollars (7.03 billion U.S.) approved up to July compared with only 12 billion dollars (4.44 billion U.S.) for the whole of last year.

He said that at the same time, consumer confidence remained strong with growth in private consumer spending soaring to double digits in the first half.

-30- 1582

#90276d1260 10/03/1990 ~French/German News Agency

SYDNEY, Oct 3 (AFP) - Bond Corp. Holdings Ltd. announced Wednesday that it had finally sold its Australian brewing assets to a joint venture between its subsidiary Bell Resources and New Zealand's Lion Nathan.

The sale, which came after Alan Bond's shrinking empire reported losses of more than four billion dollars (3.3 billion U.S.) in the year to June 30, virtually completed the gutting of Bond Corp.

A spokeswoman for Bond Corp. said the company had already informed the Australian Stock Exchange of the deal but was yet to make a full statement.

Bell Resources said in a statement on Tuesday night that it would change the name of the brewing assets to National Brewing Holdings as soon as possible.

The deal was estimated to be worth about 1.8 billion Australian dollars (1.5 billion U.S.).

Last week the 52-year-old, English-born Mr. Bond quit the company he created from a sign-writing business 34 years ago and which at its height operated breweries in Australia and overseas, media telcommunications, property and mining interests.

Bond Corp. on Friday posted the nation's biggest ever loss of 2.25 billion dollars (1.9 billion U.S.) due to losses on all major operations and writedowns on major investments.

Bell Resources on Monday posted a 1.1 billion dollar (910 million U.S.) shortfall while Bell's 96 per cent owned Weeks Petroleum announced a 616.6 million dollar (509 million U.S.) loss.

Bond Media's Channel Nine Network - now owned by Australian tycoon Kerry Packer - notched losses of 619 million dollars (512 million U.S.) during the period.

The losses incurred by Bell Resources reflected a writedown on a deposit for Bond Corp's brewing assets which had been negotiated since May 1989.

Bond Corp. is reported to have prepared another profit statement to include the sale, which should see a reduction of the group's recent massive loss.

-30- 2090

#90276d1420 10/03/1990 ~French/German News Agency

MELBOURNE, AUSTRALIA (OCT. 3) - Media tycoon Rupert Murdoch announced Wednesday that he was merging four of Australia's most important papers to form two new daily newspapers.

Mr. Murdoch, who heads one of the world's biggest media groups, News Corp Ltd, told a press conference the papers would be created from mergers of the Melbourne Herald and Sun and the Sydney-based Daily Telegraph and Daily Mirror.

They will be published six days a week as The Herald-Sun (Melbourne) and The Daily Telegraph Mirror.

The announcement followed a run on News Corp share prices in the previous week which led to a "please explain" letter to the company from the Australian stock exchange.

From a high of 11.50 Australian dollars (9.50 U.S.) in early September, its stock price plunged to a four-year low of 6.50 dollars, although this had climbed to 6.92 by Wednesday's close.

Analysts blamed concern over excessive debt levels, focusing on the sharp growth in short-term borrowings.

Mr. Murdoch in a television interview Wednesday made light of the drubbing News Corp. has suffered on the stock exchange.

"We're having a shareholders' meeting in three weeks and I really shouldn't say anything now," he said, "but if the share price goes to 30 dollars I don't get excited about it, and if it goes to seven dollars I don't get excited about it either."

He also said that recent corporate collapses in Australia were deterring foreign investment.

The mergers of News Corp newspapers were the latest in a major shakeout of the Australian media, which has so far seen all of the big television stations either change hands or plunge into liquidation.

The shakeout is likely to continue at John Fairfax Ltd., Mr. Murdoch's great

rival.

Fairfax is still straining under what most analysts believe to be impossible debts resulting from proprietor Warwick Fairfax's privatisation of the group three years ago.

-30- 2127

#90276d1720 10/03/1990 ~French/German News Agency

HONG KONG (OCT. 3) - Jardine Pacific Ltd. said Wednesday it had formed a life insurance joint venture with the Colonial Mutual Group of Australia that would eventually operate throughout the Asia-Pacific region.

Under the agreement, the Australian insurance and financial concern would pay 23 million U.S. dollars for a stake in two Jardine subsidiaries, Jardine Life Assurance here and Lincoln Philippine Life in the Philippines, Jardine said in a statement.

Jardine CMG Life Ltd., the joint-venture's management company, would be based in the British colony with an additional regional office in Singapore, the statement said.

The parent companies would each hold a 50 per cent stake in the new venture.

The new firm's chief executive will be David May from Colonial Mutual, who said that while life insurance was in its infancy in countries in the region, "demand is growing even faster than the regional economy."

Colonial Mutual operates in its home base and in New Zealand, Fiji and Britain.

Jardine Pacific is the trading and services arm of Hong Kong's Jardine group.

CAIRO (OCT. 3) - Japanese Prime Minister Toshiki Kaifu was Wednesday to meet his Egyptian counterpart Atef Sedki on the second day of a visit here that has been dominated by the question of Japan's economic aid to Egypt.

Egypt is to receive 300 million dollars from Japan to help offset losses triggered by the international trade embargo on Iraq, Japanese diplomatic sources said.

The loan is to be repaid over 30 years, following a 10-year grace period, at an interest rate of one per cent. Another 100 million dollars will be invested in joint Japanese-Egyptian projects.

Mr. Kaifu met Tuesday with President Hosni Mubarak for private talks that were later expanded to include delegations from both governments.

The meetings focused on the Gulf crisis, particularly its repercussions on the Egyptian economy.

Official sources here said Egypt would be deprived of 10 billion dollars through lost trade, Suez Canal transit fees and a fall in tourism revenue caused by Iraq's August 2 invasion of Kuwait.

Mr. Kaifu, at the start of a Middle East tour, was to leave for Amman later in the day.

ROME (OCT. 3) - Italian petrol pumps have shut up shop for three days in a protest against what they see as the excessively high tax on their industry and in support of demands for a reorganisation of the whole petrol retail network.

The only chance of finding a pump open since Tuesday night is the motorway service stations, and even these are to join the protest on Friday evening.

All the pumps are due to open again on Saturday morning.

The industry says that some 60 percent of the average 35 million lire (30,500 dollars) gross revenue of a gas station ends up in the state coffers.

The gas stations have warned that if they do not reach agreement with the government they will shut up shop again between November 13 and 17 and during the Christmas break, from December 24 to 31.

#90276d2020 10/03/1990 ~French/German News Agency

PHILADELPHIA, PENNSYLVANIA (OCT. 3) - An accountant looking for historical records in an old safe at a Baptist seminary has found a lost manuscript of two famous Mozart works.

Inside two manila envelopes labeled "sacred music," Judy DiBona discovered the 14-page original brown-ink manuscript of Wolfgang Amadeus Mozart's "Fantasia in C Minor" and the "Sonata in C Minor."

"I thought, gee, this couldn't be real, these are in an archive in the Louvre or somewhere in a museum," Ms. DiBona said Tuesday.

The whereabouts of the manuscript had been unknown since 1915, when its U.S. owner, William Doane of Cincinnati, died.

The manuscript, valued by Sotheby's auction house to be worth between 940,000 dollars and 1.4 million dollars, will be auctioned November 21 in London.

Lesser compositions by Franz Joseph Haydn, Johann Strauss the Elder and others were also found in the vault at Eastern Baptist Theological Seminary in Philadephia. Sotheby's estimated those manuscripts would fetch a total of about 110,000 dollars at the same sale.

Manfred Brauch, president of the seminary, said the manuscripts had been listed in insurance records since 1984 but that the insurance company had been unaware of their potential value.

Ms. DiBona, an accounting manager at the affiliated Eastern College in nearby St. Davids, said when she found the manuscript in July, "I hummed it and played it with my fingers -- I'm a pianist. I can't express the feeling of joy to be the first one to touch these manuscripts in years."

Mr. Brauch said the manuscripts were donated by the daughter of Mr. Doane, who had been a composer of hymns and a philanthropist.

"Scholars have not seen this Mozart manuscript since the early 19th century," said Stephen Roe, a Sotheby's expert. "It went through several hands and crossed the Atlantic to Doane's collection in 1889.

"The two works have been played regularly by great pianists since Mozart's time and he himself performed the 'Fantasia' in 1789. They contain some of his most moving music in the minor key."

The works were written in 1784 and 1785 when Mozart was in his late 20's.

DHAKA (OCT. 3) - Chittagong tea was briskly traded in this week's auction, mainly because of strong participation by the Soviet Union, China and Iran, the official BSS news agency said here Wednesday.

East European countries and Pakistan also competed strongly in the auction, the agency said.

It said Pakistan absorbed all leaf grade priced between 79 and 79.50 taka

(2.25 and 2.27 U.S. dollars) per kilo offered for sale.

The agency said few popular brokens were sold between 62 and 63.20 taka (1.77 and 1.80 dollars) per kilo.

Traders put up 26,430 chests and 500 paper bags of tea for sale in the auction with few withdrawals, BSS said.

JAKARTA (OCT. 3) - Indonesia could become a major diamond producer in Asia if it moved to tap its vast diamond resources, the Belgium-based Diamond High Council (HRD) said Wednesday.

Given its large diamond reserves, Indonesia could become the region's second-largest diamond producer after Australia, surpassing China, which has already started tapping its reserves, HRD President Abraham Fischler said.

Mr. Fischler heads a mission of the HRD and Antwerp diamond companies, here to discuss the potential for cooperation with Indonesia.

Indonesia also has the labor resources and capability as well as the market needed to develop diamond-based jewelry, Mr. Fischler said.

Some 30 companies with the mission had already started discussions about forming joint ventures with local firms in diamond mining, he said.

The Belgian city of Antwerp is Europe's diamond centre and one of the world's largest with total turnover of 14.6 billion dollars last year.

Indonesia currently has a small diamond-mining industry, tapping alluvial deposits in southern Kalimantan and catering for the local jewelry industry.

"What they do now is merely skimming the top of the milk," said HRD chief gemologist Mark van Bockstael, adding that experts believed reserves might also be found in southern Sumatra or Irian Jaya.

KUALA LUMPUR (Oct 3 (AFP) - Malaysia's cocoa production is expected to increase by 12.3 percent to 273,000 tons during the current season, the Federal Agricultural Marketing Authority (FAMA) said Wednesday.

FAMA chairman Annuar Musa said the increase would come from higher yields and a larger area under cultivation. Most of Malaysia's cocoa is grown by smallholders with government support.

Output during the season from October 1989 to the end of last month totalled 243,000 tons, he said.

Mr. Annuar said cocoa exports were expected to rise to 178,000 tons next year compared to 169,000 tons this year.

BRUSSELS (OCT. 3) - Effective with German unification, the European Community's rules of competition also apply to enterprises in what is formerly East Germany, the E.C. Commission said Wednesday.

The Commission said that a three-month period would be granted, however, to rescind or end previous business transactions or commitments which countervailed E.C. competition rules.

But after that, all transactions involving business enterprises in the five states of the eastern part of Germany would be prohibited if found to violate E.C. monopoly and unfair practices rules, the Commission said.

It added that the new E.C. regulations concerning monopolies which took effect on September 21 also take immediate effect for the former East Germany.

KAMPALA (OCT. 3) - The presidents of Rwanda and Uganda have met in Washington to review the situation in Rwanda following attacks on border villages by Rwandan refugees, Radio Uganda said Wednesday.

The broadcast said Rwanda President Juvenal Habyarimana asked the Ugandan leader, Yoweri Museveni, for close cooeration to contain the situation.

''The two leaders agreed to work closely and to keep in constant touch to solve the problem. They further agreed that the problem should be resolved politically,'' Radio Uganda said.

Museveni briefed Habyarimana on the steps taken by the Uganda government to prevent its territory from being used as a staging point for attacks on Rwanda the broadcast added.

It was the second meeting between the two leaders, who first discussed Sunday's attacks on the fringe of the World Summit for Children in New York.

Reports from Rwanda said the attackers had crossed over the Ugandan border in the hilly tract around Mirama, 450 kilometres south-west of Kampala, near

where the Rwandan, Ugandan and Tanzanian borders converge.

Some 87,000 Rwandan refugees have been living for the past three decades in camps in south-west Uganda. They had fled from tribal conflict between the Hutus and the Tutsis.

#90276d2490 10/03/1990 ~French/German News Agency

BEIJING (OCT. 3) - The hijackers of the plane which crashed Tuesday in Guangzhou, leaving some 130 people dead, dealt a severe blow to a government desperate to prove that China is stable after last year's bloody suppression of pro-democracy protests.

The trickle of official information about the incident cannot hide the authorities' efforts at a cover-up nor "the sheer incompetence shown by the security services," diplomats said here.

The government's concern is especially great given its hopes of seeing an end to sanctions imposed on China after the army crushed pro-democracy demonstrations here in June, 1989.

China's support for United Nations resolutions on the Gulf crisis and its apparently positive role in efforts to bring peace to Cambodia have in recent months improved its standing in the world community, analysts said.

More immediately, the government is anxious to see the two-week Asian Games, which close here Monday, take place without incident and so prove beyond question that the country is stable once more.

According to the official version carried by the New China News Agency (NCNA) and repeated in all the press without comment or addition, a Boeing 737 en route to the southern city of Guangzhou from Xiamen was hijacked early Tuesday.

The civil aviation authorities told the pilot to land "in China or elsewhere, so as to ensure the safety of the passengers."

As the plane came in to land at Guangzhou's Baiyun airport, NCNA said

something "abnormal" happened and it crashed, colliding with two other planes, one empty and one full waiting for take-off clearance.

(In Guangzhou, an airport official said Wednesday 132 people had died in the disaster.)

A later NCNA report, datelined Guangzhou, maintained the death toll at 127.

DHAHRAN (SAUDI ARABIA) OCT. 3 - The Gulf crisis and surge in oil prices could lead Saudi Arabia to increase its orders for British military equipment under the Al Yamamah project, Britain's largest ever export contract, British MP's and British Aerospace (BAE) officials said here Wednesday.

The members of the British parliament and BAE officials also dismissed during a press conference reports that Saudi Arabia was considering cancelling orders for Tornado aircraft as part of the multi-billion dollar deal.

"There is no question of cancellation," said Michael Colvin, the head of the delegation of six members of the Conservative parliamentary aviation committee. "An increase must be on the cards."

The first phase of the Al Yamamah project, signed in 1986, involves the sale of Tornado, Hawk and PC-9 aircraft to Saudi Arabia and the design and construction of a four billion pound (7.5 billion dollars) military air base in the kingdom.

Fifty of the 72 Tornado aircraft to be sold to Saudi Arabia under the first phase of the deal have already been delivered as have 30 Hawk advanced training planes.

#90276d2650 10/03/1990 ~French/German News Agency

JAKARTA (OCT. 3) - Indonesia had a trade surplus of 94 million dollars in July, Information Minister Harmoko said Wednesday.

Mr. Harmoko said exports totalled 1.792 billion dollars in July against imports of 1.698 billion dollars.

Indonesia had a trade surplus of 32.3 million dollars in June and 826 million dollars in July 1989, according to official figures.

Trade officials said the monthly trade surplus had tended to be lower this year because of rising imports while exports had not grown as impressively as last year.

Mr. Harmoko also said the monthly inflation figure for September was 0.51 percent, bringing the cumulative increase in the consumer price index to 8.8 percent since January.

Inflation ran at 5.97 percent in the whole of 1989.

The government has taken a series of steps, including tightening the money supply, in a bid to control the inflation rate.

PHNOM PENH (OCT. 3) - The East German Embassy here has closed for business but the new German government will keep its options open for at least three months on whether to set up a mission in Cambodia, the former charge said Wednesday.

"Yesterday (Tuesday), I officially finished my mission here as charge d'affaires," with a farewell banquet, Gernot Taufmann said.

He added, however, that the reunited Germany that came into being Wednesday would make a firm decision on whether to permanently close the mission within the next three months.

This would give both sides time to consider the matter from "every angle."

Mr. Taufmann, who said he would remain in an unofficial capacity here to deal with technical issues, added that the same applied to the Cambodian mission in East Berlin.

The premises, furniture, documents and staff of both missions in the two cities would be protected by diplomatic immunity.

West Germany did not recognise the government here, but a visiting West German MP said in August that some sort of a mission, though not at ambassadorial level, would be maintained in Phnom Penh under a United Germany.

MONROVIA (OCT. 3) - Fighting let up in the Liberian capital early Wednesday

after a night of heavy shelling by West African peacekeeping troops against rebel positions.

Agence France-Presse correspondents on the scene reported sporadic artillery fire, apparently against Charles Taylor's National Patriotic Front of Liberia (NPFL) positions in the nearly-deserted city center Wednesday.

The 6,000-strong peacekeeping force (ECOMOG) launched a major offensive overnight Monday and early Tuesday, driving the rebels back on two fronts north and east of the city center.

Since late Tuesday, ECOMOG troops from Nigeria, Ghana, Guinea, Sierra Leone and the Gambia advanced one kilometer (half a mile) closer to Gardnersville, a district north of capital near the port where the peacekeeping force is based.

An unidentifed airplane flew high over the Liberian capital Wednesday firing its cannon out of range of NPFL positions, the AFP correspondents reported.

Monrovia's eastern sector appears to be ECOMOG's primary objective, since control of the area would enable the peacekeeping force to cut the supply lines of the NPFL forces in the capital, forcing them to withdraw.

Correspondents reported late Tuesday that the NPFL has attempted to fight back with its own artillery, but its 105 mm recoilless cannons have been outclassed by the higher caliber ECOMOG artillery pieces, which are manned by trained personnel.

Colombo (OCT. 3) - Rebels of the Liberation Tigers of Tamil Eelam are strengthening their positions around two big military camps in northern Sri Lanka, defence sources said Wednesday.

The sources said the rebels were deploying reinforcements and digging trenches near Palaly and Kankesanthurai army camps , indicating they wer preparing an attack.

The move comes a week after the army withdrew from the Jaffna Fort camp, which had been under siege for three months by the rebels, who aare fighting for an independent homeland for the minority Tamils.

In a related development, the defence ministry said the rebels were forcibly conscripting tamils and taking them to operational areas. It claimed more than 7,000 youths had been conscripted. dpa ms 031453 okt 90

#90276d3200 10/03/1990 ~French/German News Agency

LISBON (OCT. 3) - Portuguese President Mario Soares said Wednesday he would seek a second five-year term in elections set for January 13.

Mr. Soares, 66, justified his decision by what he called "a certain political vacuum" in Portugal and a "delicate" international situation which he predicted would have negative repercussions at home.

The president said he remained a "man of the left" although he felt he had fulfilled his mandate "as president of all Portuguese".

Mr. Soares will be able to count on the support of the Socialist Party of which he was leader as well as of the centre-right ruling Social Democratic Party.

Two other candidates have so far officially announced their decision to stand for election: Carlos Carvalho, deputy leader of the communist party and Carlos Marques, a former extreme-left militant who is running on an independent ticket.

Mr. Soares, a long-time opponent of the Salazar dictatorship, spent many years in exile in France where he founded the Socialist Action party, the forerunner of the Socialist Party.

He returned triumphantly to Portugal after the rightwing regime was overthrown and served as prime minister from 1976 to 178 and from 1983 until 1985.

The defeat of the Socialist Party in 1985 legislative polls was a setback for Mr. Soares who nevertheless decided to run for president.

He came second in the first round behind Diego Freitas do Amaral of the right but in the run-off he rallied enough scattered support from other parties to win election.

His relations with Prime Minister Anibal Cavaco Silva of the PSD have been a model of positive coexistence exempt of the rancour that marked a similar French experiment under the conservative prime minister Jacques Chirac.

ROME (OCT. 3) - Italy had a trade surplus of 237 billion lire (200 million dollars) in August against a 491 billion (423 million dollar) deficit in the same month last year despite the effects of the Gulf crisis, it was announced here Wednesday.

The third monthly surplus in a row was achieved despite a 37 percent rise in oil product prices in August as a result of the Gulf crisis, the national

statistics institute said.

The August figures brought the trade deficit for the first eight months of the year to 9,100 billion lire (7.9 billion dollars), down from 13,053 billion (11.35 billion dollars) in the same period of 1989.

August imports totalled 11,272 billion lire (9.8 billion dollars), down 1.7 percent from August 1989, while exports totalled 11,509 billion (10 billion dollars), up 4.8 percent.

The good August showing was la textilue to a good showing in exports of mechanical products, textiles and clothing, the statistics institute said.

#90276d3790 10/03/1990 ~French/German News Agency

BEIJING (OCT. 3) - Trade between Singapore and China should soar when the two countries establish diplomatic relations, the China Daily Wednesday quoted an official from the ministry of foreign economic relations and trade as saying.

The comments in the official English-language newspaper came amid newspaper speculation that the two could Wednesday officially announce the establishment of diplomatic links in New York where their foreign ministers are attending the United Nations General Assembly.

The Chinese authorities have not said when the agreement will be signed and have only said diplomatic relations would be established "before the end of the year."

Singapore had said China first had to re-establish diplomatic links with Indonesia.

This condition was fulfilled when Chinese Prime Minister Li Peng visited both Indonesia and Singapore on a tour of Asia in August.

Trade between Singapore and China last year surged by 27 per cent to 3.2 billion dollars compared to the previous year and Singapore is now China's sixth biggest trading partner.

China and Singapore now have commercial representative offices in each other's country and have signed trade agreements, China Daily said.

It said crude oil was China's fifth biggest export to Singapore, reaching four million tonnes in 1989, and Beijing expected to export more oil to Singapore this year.

Oil price rises caused by the Gulf crisis would also push up the bilateral trade volume, the newspaper said.

Singapore is China's major overseas supplier of electrical products, chemicals vegetable oil, rubber and refined petrol products.

BRUSSELS (OCT. 3) - The European Economic Community (EEC) on Wednesday granted five million ECUs (6.5 million dollars) to victims of the Liberian civil war, a European Commission spokesman said.

The assistance, to be delivered through humanitarian organizations such as Medecins sans Frontieres of Belgium, is intended for some 500,000 displaced people within Liberia and another half a million who have become refugees abroad.

The five-million European Currency Unit package is to be shared out as follows: 1.1 million for displaced people in Liberia, 2.25 million for some 250,000 refugees in Guinea, 800,000 for some 150,000 in Ivory Coast, 550,000 for 60,000 in Sierra Leone, and 300,000 ECUs to Ghana to help it repatriate some 34,000 Ghanaians.

#90276d4030 10/03/1990 ~French/German News Agency

JOHANNESBURG (OCT. 3) - Church women have said that they want polygamy outlawed in South Africa and that this should be written into the constitution according to a statement issued Wednesday.

About 150 black women representing churches and Christian organisations decided at a weekend conference to involve themselves in moves to draw up a new constitution in order to safeguard the interests of women and children, the statement issued by the South African Council of Churches (SACC) said.

They specifically called for the eradication of all tribal traditions which "dehumanise women". They also demanded eradication of the churches' "oppressive attitudes and tendencies" towards women.

They further said that all church land should be desegregated and handed back to the people, saying the church should not own land.

Marriage vows for men and women, they said, should be the same and aimed at promoting equality in marriage.

The state, they said, should support women's co-operatives, subsidise single-parent families, control education, support land development, be solely responsible for health services, and provide for the disabled and mentally ill and child-care facilities.

#90276d4040 10/03/1990 ~French/German News Agency

DRESDEN, GERMANY (OCT. 3) - Pentacon GmbH, the East German maker of Praktica cameras, is to be liquidated by the end of the year, with the loss of 5,600 jobs, the company's chief executive, Gunter Schulzki, told ADN news agency.

The Treuhandanstalt, the trust that is overseeing the privatisation of state firms in former East Germany, decided to wind up Pentacon rather than try to keep the company afloat by reducing the payroll by between 60 and 80 percent, he said.

The trust said Pentacon, without the subsidies that had made it a centrepiece of East Germany's planned economy, had no hope of surviving in the tough market of world camera-making, which is dominated by the Japanese.

"The Cologne Photographic Fair showed that we cannot get the contracts we hoped for," Schulzki was quoted by ADN as saying. ADN is the former official news agency of East Germany.

The liquidation of many other East German industrial giants is expected in the coming weeks as the Treuhandanstalt decides which can adapt to a market economy and which are beyond redemption.

Unemployment in the five Laender states of East Germany that joined the Federal Republic of Germany at midnight Tuesday is estimated to be around 16 percent, and analysts say it could rise to 25 percent before there is an improvement.

In the western part of the country, 5.9 percent of the workforce have no job, Chancellor Helmut Kohl said Tuesday.

#90276d4270 10/03/1990 ~French/German News Agency
ALGIERS (OCT 3) (AFP) - Algeria will pay off its 600-million-dollar trade arrears by the end of the year with windfall profits from the increase in the price of oil since the Gulf crisis began, Algerian Economy Minister Ghazi Hidouci said here on Wednesday.

The price of Algerian oil has risen from 15 dollas per barrel in June to 43 dollars paid for the last cargo loaded in Arzew last week.

The debts involved are trade debts owed by public or private Algerian companies that had come to term and had not been honoured.

"These are the debts we recognise as being due," the minister said. "This is a strategic objective and the first axis of improvement of Algeria's finances."

Mr. Hidouci said that he was expecting a surplus of between 700 million and 800 million dollars based on an average price of 26 dollars per barrel.

Energy and Industry Minister Sadek Boussena said that if the price of oil was at or above 30 dollars per barrel, the surplus would be about two billion dollars.

Mr. Hidouci said that whatever the surplus, it would be used primarily to improve the state of Algerian finances and to strengthen the reserves of the central bank. This would accelerate economic reforms which were under way and would facilitate moves towards making the dinar convertible.

He said that from June 1991 Algeria should regain its AAA credit rating, and said that negotiations to raise two billion dollars to finance economic reforms were being held with several banks, notably French banks, and with other institutions.

Algeria is negotiating refinancing of trade debt payments of two billion dollars per year during the next two years.

EDINBURGH (OCT 3) - The Bank of Scotland said Wednesday that its taxable profit rose nine percent in the six months to August to 105.5 million pounds (199 million dollars) from 96.9 million (182 million dollars).

The increase came despite a slowdown in the British economy and was in line with market forecasts of profit of between 90 million and 114 million pounds.

Before exceptional charges on non-paid Third World loans, the profit was down four percent from the same period in 1989 when the bank showed a profit of 109.5 million pounds before provisions of 12.6 million.

Since the beginning of the year the Scottish bank, like its English counterparts, has sharply increased its provisions for non-Third World loans to 68 million pounds (128 million dollars) from 32.7 million (61.6 million dollars).

But it managed to keep its profits looking good thanks to a recovery of the North Sea oil industry and the healthy state of the Scottish electronics and whisky industries.

Interim dividend was set at two pence, up from 1.45, while earnings per share rose 12 percent to 8.3 pence from 7.4.

Bank of Scotland shares, which have recently entered the Footsie index of 100 leading stocks on the London market, were up two pence at 109 in mid-session trading following he news.

#90276d4470 10/03/1990 ~French/German News Agency

Khartoum (OCT. 3) - Colonel Martin Malual Arop, one of three southern Sudanese in the 15-man revolution command council now ruling Sudan, called on Pope John Paul Ii to support a peace initiative presented last week to the government and the Sudan People's Liberation Army (Spla) by southern Sudanese politicians.

Arop made the call in a meeting here Wednesday with the Vatican's ambassador to Sudan. The Sudan News Agency (Suna) reported that the pontiff's representative promised to convey the appeal to the Vatican.

Southern Sudanese politicians held a one-month conference in Khartoum under the auspices of the government to formulate a southern viewpoint about the best way to end the civil war.

At the end of the conference last week, they came up with a peace proposal calling for a ceasefire to create a conducive atmosphere for the resumption of peace talks between the government and the Spla.

In an address to last weekend's world summit conference on children in New York, the chairman of the revolution command council, General Omar Beshir,

declared a ceasefire to allow the vaccination of children in the war-affected areas. The Spla has rejected the unilateral ceasefire.

#90276d4520 10/03/1990 ~French/German News Agency

LONDON (OCT 3) - International press baron Robert Maxwell has said he will

sell television assets held by his Mirror Group Newspapers (MGN), as part of a plan to reduce the debt burden facing his publishing empire's flagship Maxwell Communications Corporation (MCC).

City commentators saw the programme, previewed by Mr. Maxwell in MCC's annual general meeting in mid-September, as evidence that the company's 1.9 billion pound (3.6 billion dollar) debt was becoming difficult to handle.

Some 415 million dollars of MCC debt is due for repayment at the end of this month.

Shares in MCC were down 5 pence at 145 pence Wednesday afternoon following details of the sale plans released late Tuesday night.

The reshuffling plans, part of a programme which Mr. Maxwell has said will raise 800 million dollars, were announced as another of the world's media moguls Rupert Murdoch announced the merger of four of his Australian newspapers into two in an attempt to cut costs.

Mr. Murdoch's perceived liquidity crisis has caused a dramatic slide in the share price of his Australian flagship News Corporation, and his problems are seen as a manifestation of the difficulties facing the media world in the current tough economic climate.

Mr. Maxwell's planned sales will provide MGN with funds to buy assets held by MCC, in a restructuring which MGN's flamboyant Czech-born proprietor said would return the newspaper-based concern to "100 percent pure publishing".

The television assets for sale include 20 percent of Britain's Central Independent Television, 12.5 percent of the French TF1 chain, 51 percent of the pan-European Music TV Europe (MTV), and other interests in British cable television.

MANAGUA (OCT. 3) - Eight former contra rebels and two policemen died and an army major was kidnapped in fighting in the northern Nicaraguan town of Waslala, according to local press reports Wednesday.

The daily Barricada, the official newspaper of the formerly ruling Sandinista Front, said the clash erupted Tuesday when about 100 well-armed men identified as former contras tried to take over Waslala, 280 kilometers (180 miles) north of here.

The Interior Ministry confirmed that there had been fighting in Waslala and said a detailed report on the incident would be issued later in the day.

According to Barricada, the guerrillas abducted army Major Mauro Ortega and two police officers during the fighting.

Two Roman Catholic priests in Waslala told the daily the former contras gave them half an hour to leave town and then vandalized the town church and stole 5,000 dollars.

The former U.S-backed contras - some 13,000 combatants - officially surrendered their weapons after President Violeta Chamorro was sworn in last April 28.

She took over from the leftist Sandinista National Liberation Front which had ruled the country since 1979.

LONDON (OCT 3) - British ferry company Sealink, recently acquired by Stena of Sweden, said Wednesday it planned to axe 850 jobs and invest 178 million pounds (335 million dollars) in a sweeping rationalisation plan.

Sealink's main aim was to invest in new ships, new port facilities, new routes and new systems, the company said.

Ferry operators have been carrying out major investments recently to face up to competition from the cross-Channel tunnel when it opens in 1993.

The restructuring will mean the loss of 850 jobs, but in the long-term the investment programme should create some 800 jobs, leaving a net loss of only 50.

The company currently employs 6,000 people.

Sealink will invest 75 million pounds in new ferries for its Dover to Calais and Folkestone to Boulogne services, but axe 320 of the 1,400 jobs in this sector.

STOCKHOLM (OCT. 3) - Swedish financier Sven-Olof Johansson said Wednesday he controlled 19 percent of Catena, a Swedish auto retail network in which Volvo holds a 49 percent stake, at a time when he is also buying up Volvo shares on the market.

Mr. Johansson had earlier this year built up a 19 percent capital stake in Sweden's second largest auto maker, Saab-Scania, giving him 22 percent of voting rights.

Saab's main shareholder, the Wallenberg group, then bought the shares back for more than four billion kroner (700 million dollars) to avoid having to give Mr. Johansson a seat on the board.

Mr. Johansson controlled 13 percent of Catena capital as of the beginning of September, and has further increased his stake in recent weeks as prices fall on the Stockholm market.

He said Wednesday that through his property company Barkman ha now controlled 19 percent of Catena capital.

Mr. Johansson also indicated that he had been buying Volvo shares on the market and now held about a one per cent stake, but stressed that this could not be compared with his operation in relation to Saab.

"My purchases of Volvo shares are not comparable with my operation on Saab and I am only buying shares without voting rights," he said.

He said Volvo shares were currently under-valued and he was expecting the price to rise.

NEW YORK (OCT 3) - German unification was also consummated at the United Nations on Wednesday.

Seventeen years after the Germanys joined the world organisation, the nameplate in the General Assembly hall read ''Germany'', replacing the nameplates ''Germany, Federal Republic Of'' and ''German Democratic Republic''.

The president of the General Assembly, Maltese Foreign Minister Guido de Marco welcomed Germany ''as a sovereign and equal nation to our organisation'' and said unification was a ''harbinger of hope for the future''.

Germany's ambassador to the U.N., Hans Otto Braeutigam, who was greeted with long applause by the other delegates, said Germany would ''actively and energetically'' continue its policies in the U.N.

With the unification of the Germanys, the U.N.'s membership, which had risen to 160 when Liechtenstein joined recently, dropped back to 159.

#90276d4830 10/03/1990 ~French/German News Agency

STRASBOURG, France (OCT 3) - The Gulf crisis could cost the Organisation of Economic Cooperation and Development (OECD) countries 30 billion dollars over a year, OECD secretary general Jean-Claude Paye said here Wednesday.

The figure was based on an average oil price of 25 dollars a barrel, Mr. Paye said.

"While the outlook in the summer was sunny, the autumn is beginning in doubt," he told the Council of Europe.

"The shadow of war, which seemed to have been buried under the rubble of the Berlin Wall, is reappearing on the horizon."

Describing the Gulf crisis as a "political, economic and financial shock," Mr. Paye said it had led him to revise forecasts for OECD economic prospects.

Annual growth over the next three months, previously forecast at around three percent, should now be revised downwards by between a half and one per cent, and inflation could hit 5.5 percent instead of initial estimates of 4.5.

Mr. Paye stressed that there was currently no imbalance on the oil market and that price rises in the wake of Iraq's invasion of Kuwait on August 2 were "almost wholly due to speculative activities."

The International Energy Agency (IEA) has estimated that oil consumption in industrialised countries will fall by half a million barrels a day during the fourth quarter of this year.

Mr. Paye forecast a new boost for energy policy, particularly in seeking new energy sources, and urged OECD members to pass on oil price rises to consumers, and to adopt strong budget and monetary policies.

He also urged them to look at the impact which oil price rises, a slowdown in economic activity and a likely rise in central European interest rates, would have on Eastern European countries and developing nations.

#90276d4870 10/03/1990 ~French/German News Agency
Accra (OCT. 3) - A nigerian merchant ship, River Oli, docked at the Tema port some 25 kilometres east of here Wednesday with about 10,000 refugees from war-torn Liberia, the Ghana News Agency reported.

It said most of the refugees were Ghanaians but there were also Nigerians on board.

Gna quoted the captain of the ship, S.O. Olarewaji, as saying four babies aged between two and 15 months and an elderly man died during the two-day sea voyage which started at dawn on Monday.

Four babies were also born during the voyage but one died, Olarewaji said.

He said there were about 200 people still left at the port because he was ordered to sail at 0400 Gmt on Monday instead of the original time of 1800 Gmt on Wednesday.

Refugees have been fleeing Liberia because of the continued fighting and lack of food and medical facilities.

#90276d5710 10/03/1990 ~French/German News Agency
BERLIN (OCT 3) - A demonstration against German unification by about 10,000 leftists ended in rioting Wednesday.

Eyewitnesses reported that masked protesters pelted police with stones and bottles at the city's central Alexanderplatz. Police used truncheons, water cannons and tear gas in an attempt to restore order.

The protest march began peacefully. But after it ended at about 1715 Gmt,

demonstrators began throwing stones at the Hotel Stadt Berlin, breaking several windows and injuring one of the hotel's guests.

Windscreens of nearby autos were smashed and at least one auto was set on fire. Several hundred protesters continued through the streets, breaking store windows as they went.

During police checks in the Kreuzberg district prior to the demonstration - held under the motto ''Shut your mouth, Germany, enough is enough'' - 50 people were taken into temporary custody. Police reported confiscating Molotov cocktails, automobile jacks and spanners.

Seventy Turkish youths armed with slats, who separated from the crowd shortly after the demonstration began, were arrested at Kottbusser Gate.

LONDON (OCT 3) - British Prime Minister Margaret Thatcher Wednesday hailed the birth of a new Germany in talks with German ambassador Hermann von Richthofen at her official residence here.

She heard the "the sounds of 'jubilation and joy' from Berlin" when Germans were celebrating the reunification of their country Mrs. Thatcher said, adding, "It clearly was a great dawn for Germany."

"We do welcome the new Germany as we welcomed the old Germany, which has been a true ally in NATO, a true partner in Europe and a friend", she said.

Mrs. Thatcher met with the German envoy for 35 minutes of talks after an official unification reception at Banquet Hall in Whitehall.

Foreign Secretary Douglas Hurd earlier welcomed the unification of the two Germanies but also pointed to the many difficulties ahead.

The government confirmed Sir Christopher Mallaby, the British envoy to West Germany, as its ambassador to the united Germany.

Sir Christopher is to reside in Bonn pending a German parliamentary decision on whether to move the seat of government from Bonn to Berlin.

Britain's ambassador to East Germany, Patrick Eyres, has been recalled after the closure of the embassy.

#90276d6540 10/03/1990 ~French/German News Agency
MANAMA (OCT 3) - An Iraqi campaign to oust Western military forces from Saudi Arabia could be thwarted by a tentative Saudi-Iranian rapprochement and an agreement on the Moslem pilgrimage.

The foreign ministers of Iran and Saudi Arabia, Ali Akbar Velayati and Prince Saud al-Faisal, have both expressed the willingness of their governments to consider normalizing diplomatic relations, which were severed in 1988.

Iran's mission to the United Nations said this week that the ministers had agreed at a meeting in New York that obstacles to Iran's participation in the annual pilgrimage to holy sites in Saudi Arabia would be lifted.

But no further details were provided.

Saudi Arabia broke off relations with Iran in April 1988 in a lingering row over incidents at the Mecca pilgrimage the previous year in which 402 people died, most of them Iranian pilgrims.

After the deaths, Riyadh imposed a quota on the number of pilgrims each country would be allowed to send. But Iran rejected its quota, which would have reduced the number of Iranian pilgrims from the normal 150,000 to 45,000.

Iranian authorities also objected to a Saudi ban on political demonstrations during the pilgrimage.

Faced with mounting international isolation following its August 2 invasion of Kuwait, Iraq had hoped to win the support of its erstwhile Gulf war foe Iran in a drive against U.S. and Western forces stationed in Saudi Arabia.

Saudi authorities after the Iraqi seizure of Kuwait sought international assistance against a feared attack by Iraq.

WASHINGTON, (OCT 3) - President George Bush Wednesday presided over a ceremony in the White House rose garden celebrating German reunification, and signed a proclamation making October 3 "German-American Day."

Before a group of personalities involved in German-American relations, Mr. Bush said he had telephoned German Chancellor Helmut Kohl to convey his "congratulations for this wonderful moment."

Mr. Bush said he had videotaped a television message for the German people, conveying America's best wishes for their reunification.

"We Americans, and above all those of German descent, are proud of the role we have played in support of German unity," Mr. Bush said in a brief statement.

"The goal Americans and Germans have long shared: a united, democratic et sovereign Germany," had finally materialized, he said.

"Today Germany is at peace with its neighbors and, on this day of german unity at peace with itself," Mr. Bush added.

MANILA (OCT 4) - The Philippine military went on full alert Thursday, hours after a small group of rebel soldiers seized a military camp in Mindanao island and captured the camp commander, the armed forces chief said.

An undetermined number of infantrymen from the army's 4th division broke into the 402nd Brigade headquarters (eds: correct) in the southern city of Butuan at about midnight Wednesday, General Renato de Villa said.

The rebels, led by an army major, took hostage the brigade commander, identified only as a Colonel Galon, and cut off communication to higher level command, he said over radio station DZRH here.

He said he did not know if there were casualties in the lightning operation, which occurred hours after the military high command denied local news reports that they had uncovered a new coup attempt against President Corazon Aquino.

He said the high command checked the situation in other parts of the Philippines shortly after the takeover, and "so far no other untoward incidents have taken place," he added.

"We declared a red alert last night and warned our field commanders and men to maintain order and prevent a repetition of the Butuan incident to their units " Gen. de Villa said.

The armed forces of the Philippines is united except the group in Butuan, and responding correctly to all our orders," he said, urging the civilian population to remain calm.

He said he has ordered commercial flights and shipping to certain parts of Mindanao temporarily stopped.

"This rebellion is a big mistake and could endanger those they are sworn to protect," he said.

"This will never be tolerated by the majority of the armed forces," he added.

About five hours after the Butuan camp seizure, a bomb exploded at the water pumping station of the Fort Bonifacio army headquarters in suburban Manila, causing slight damage but no casualties, Gen. de Villa said.

Berlin (OCT. 3) EFE - Police arrested 50 troublemakers during Wednesday's unification celebrations in Berlin, in which thousands of Germans marked the birth of a united Germany with an overnight frenzy of merrymaking, officials said.

They said police dispersed several hundred protesters who attempted to surround the Schauspielhaus theater in Berlin's former eastern zone, where Chancellor Helmut Kohl was among dignitaries attending a concert of Beethoven's Ninth Symphony.

In the western Kreuzberg district, a policeman was slighly wounded when he was attacked by a mob of mainly Turkish youths, and an arson attack against a car showroom was reported in the same neighborhood.

Police also fired shots in the air to prevent people from being trampled by crowds pressing at barricades set up around the Reichstag building, where an enormous German flag was hoisted at midnight to mark the end of 41 years of partition.

#90276e0017 10/03/1990 ~Latin America New Agency

Madrid (OCT. 3) EFE - The Spanish Foreign Ministry continued efforts Wednesday to track down an official who had volunteered to stay on at Madrid's embassy in war-torn Liberia and who has not been heard of for several weeks.

Embassy official Francisco Javier Molins said he would continue to man the embassy in Monrovia after the ambassador and a group of Spaniards who had taken refuge in the mission decided to return to Madrid August 15.

After the Spanish Foreign Ministry failed to receive news from Molins for several weeks, Madrid's embassy in Senegal asked a group of journalists who were to travel to Liberia to try to contact the official.

On their return, the reporters said the Spanish embassy in Monrovia had been

sacked and the radio with which Molins contacted the outside world had been destroyed.

There was no sign of the official.

The Foreign Ministry has asked staff at the British and U.S. embassies in Monrovia, the only diplomatic missions believed to remain open, to help search for Molins.

Spanish press reports said Wednesday that the embassy may have been raided by Liberian National Patriotic Front (NPF) rebels searching for either food supplies or for members of the rival Krahn tribe which supported assassinated president Samuel Doe.

Molins had volunteered to stay on at the mission to offer protection to some 30 members of this tribe who had taken refuge there.

NPF rebels, a rival rebel group and a West African peace-keeping force are all fighting for control of Liberia.

Direct communications with the African country are almost impossible, according to Spanish Foreign Ministry officials.

-30- 1832

#90276e0023 10/03/1990 ~Latin America New Agency

MADRID (OCT. 3) EFE - Four Iraqi diplomats, expelled by the Spanish government, headed for home Wednesday, Iraqi embassy officials said.

The four left Madrid on a plane belonging to the Royal Jordanian Airline, accompanied by Iraqi Religious Affairs Minister Abdullah Fadhel, who was in transit through Spain, the sources said.

Two of the four, Abdul Kabhim Mushin and Sadoun Abdul Aziz Ali, held the rank of third secretary. Mushin was in charge of consular affairs.

The other two, Ahmad Mishaw and Shems Aldin Ali, had not received diplomatic accreditation from Spain when the decision was taken to expel them.

On September 17, the 12-nation European Community agreed to expel Iraq's military attaches after Iraqi troops raided several EC embassies in Kuwait.

Baghdad had no military attache in Spain but Spanish Prime Minister Felipe Gonzalez's government said it decided to expel the four on the basis of information about their activities.

Iraq responded to the EC move by expelling several EC diplomats, including the Spanish military attache in Baghdad, Col. Arturo Vinuesa, and his aide,

Francisco Pariente.

#90276e0043 10/03/1990 ~Latin America New Agency

NICOSIA (OCT. 3) EFE - French President Francois Mitterrand arrived Wednesday in the United Arab Emirates (UAE) on the first leg of a surprise visit to the crisis-torn Gulf, Arab radio stations, monitored in the Cypriot capital, reported.

Mitterand is to meet UAE head of state Sheikh Zayed bin Sultan al-Nahayan for talks on the Gulf conflict, which was sparked by Iraq's August 2 invasion of Kuwait.

The French president is to visit Saudi Arabia Thursday where he is due to hold talks on the crisis with King Fahd and to inspect French troops deployed in the Red Sea port of Yanbu and other parts of the kingdom.

A presidential spokesman said Wednesday that Mitterrand, commander-in-chief of the Armed Forces, is also to hold a meeting on the situation in the Gulf with French military commanders on board a frigate and visit several units of soldiers.

Mitterrand, who is being accompanied by Defense Minister Jean-Pierre Chevenement and Foreign Minister Roland Dumas, is also to visit Oman and Egypt.

The French president's visit to Saudi Arabia will come after the arrival Wednesday of an additional 1,200 French troops trained in chemical warfare to join the some 4,000 already deployed in the kingdom.

Eight Mirage fighter planes also arrived there Wednesday.

France, one of the first countries to send troops to the Gulf following Iraq's invasion of its neighbor, has also deployed nine warships in the area including the aircraft carrier Clemenceau, which Mitterrand is expected to visit.

Mitterrand last week surprised fellow Western leaders by proposing talks on the Israeli occupation of the West Bank and Gaza Strip, and the presence of Syrian troops in Lebanon, if Iraq agreed to back down.

#90276e0063 10/03/1990 ~Latin America New Agency

NEW YORK (OCT. 4) EFE - Uruguay is to offer to buy back most of its own foreign debt to private banks in negotiations on debt reduction and new loans with international creditor banks Thursday, Uruguayan President Luis Alberto Lacalle said.

Lacalle, speaking in New York to U.S. businessmen and bankers, said he hoped talks on the 1.8 billion Uruguay owes to commercial banks would yield results before the end of the year.

Uruguay's debt is currently being traded on the secondary market at 48.5 percent of its face value, so the country would be able to redeem its debts at bargain rates.

Lacalle met Monday with William Rhodes, who heads a committee of Uruguay's creditor banks, to discuss the buy-back scheme.

The Uruguayan government has in the past criticized private foreign banks for refusing to grant debt relief to the South American country because of its good reputation for repayment.

Uruguay, which has been a model creditor in a region where debt default is common, allots one third of its dlrs 1.5 billion foreign export earnings to debt servicing each year.

The money owed to private banks forms part of Uruguay's total dlrs 6.7 billion in foreign debt.

During his speech, Lacalle said his country was looking for foreign investment and welcomed moves toward the development of free trade zones in Latin America.

#90276k0089 10/03/1990 ~Japanese News Agency

TOKYO (OCT. 3) KYODO - THE BANK OF JAPAN (BOJ) WILL NORMALIZE RELATIONS WITH THE PEOPLE'S BANK OF CHINA BY SENDING ITS HIGH-LEVEL OFFICIALS TO THE COUNTRY FOR THE FIRST TIME SINCE JUNE 1989, A CENTRAL BANK SOURCE SAID WEDNESDAY.

PERSONNEL EXCHANGES HAVE BEEN SUSPENDED UNDER INTERNATIONAL SANCTIONS SINCE THE MILITARY CRACKDOWN IN BEIJING'S TIANANMEN SQUARE IN JUNE LAST YEAR, WHICH INVOLVED A BAN ON HIGH-LEVEL OFFICIALS' VISITS AND NEW GOVERNMENT AND COMMERCIAL CREDITS.

BEFORE THE SANCTIONS, THE TWO CENTRAL BANKS HAD BEEN EXCHANGING PERSONNEL ANNUALLY.

AKIRA KANNO, EXECUTIVE DIRECTOR OF THE BOJ, AND OTHER SENIOR OFFICIALS WILL VISIT CHINA FROM OCTOBER 15 FOR TALKS WITH THE CHINESE CENTRAL BANK GOVERNOR, LI GUIXIAN, AND OTHER FINANCIAL LEADERS IN THE NATION.

ACCORDING TO THE SOURCE, LI'S PLANNED VISIT TO JAPAN THIS MONTH HAD BEEN CANCELLED APPARENTLY DUE TO THE DELAY IN WORKING OUT CHINA'S EIGHTH FIVE-YEAR ECONOMIC PLAN FOR 1991-1995. THE PLAN IS EXPECTED TO BE SUBMITTED AT THE PLENARY SESSION OF THE COMMUNIST PARTY'S CENTRAL COMMITTEE SLATED FOR LATE THIS MONTH.

MEANWHILE, THE JAPANESE GOVERNMENT HAS ALSO DECIDED TO CARRY OUT ITS THIRD

LOAN TO CHINA, VALUED AT 810 BILLION YEN FOR THE 1990-1995 FISCAL YEAR. THE LOAN HAD BEEN ALSO SUSPENDED AFTER THE TIANANMEN INCIDENT.

#90276k0101 10/03/1990 ~Japanese News Agency

TOKYO (OCT. 3) KYODO - APPLE COMPUTER INC. OF THE UNITED STATES IS TRYING TO TEAM UP WITH TOSHIBA CORP. IN A BID TO DIVERSIFY INTO LOW-PRICED COMMUNICATIONS PRODUCTS, INDUSTRY SOURCES SAID WEDNESDAY.

THE SOURCES SAID APPLE SOUGHT LINKAGE WITH TOSHIBA TO DEVELOP PERSONAL COMPUTER TERMINAL COMPONENTS SUCH AS OPTICAL DISKS TO WIN A BIGGER SHARE OF THE PERSONAL COMPUTER BUSINESS BY OFFERING LOW PRICES ON NEW MODELS.

IN LATE SEPTEMBER WHEN JOHN SCULLEY, APPLE'S CHIEF EXECUTIVE OFFICER, WAS STAYING IN JAPAN, HE EXPRESSED HIS WILLINGNESS TO DEEPEN RELATIONS WITH JAPANESE ELECTRONICS MANUFACTURERS.

TOSHIBA OFFICIALS SAID APPLE HAS COME INTO CONTACT WITH THEM TO SOUND OUT THE POSSIBILITY OF THE DEAL, BUT SAID THEY ARE NOT SURE IF AN AGREEMENT WAS ACTUALLY MADE BETWEEN THE TWO.

IN A SIMILAR MOVE, APPLE IS NOW NEGOTIATING A CONTRACT WITH SONY CORP. TO BUILD ONE OR MORE OF ITS FUTURE PORTABLES, ACCORDING TO THE INDUSTRY SOURCES.

APPLE AND SONY HAVE A WIDE-RANGING BUSINESS RELATIONSHIP, ESPECIALLY ON AN ORIGINAL EQUIPMENT MANUFACTURER (OEM) BASIS.

APPLE IS ONE OF SONY'S BIGGEST CUSTOMERS, AND IS CURRENTLY DEVELOPING A PRODUCT THAT BLENDS A MACINTOSH COMPUTER WITH SONY'S AUDIO AND VIDEO EQUIPMENT.

#90276m0001 10/03/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT 3) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

The EXMI measuring U.S. stocks trading overseas is off 68 cents suggesting a lower opening on Wall Street. ... The Nikkei is flat after yesterday's big gains. ... In London, the FTSE is up 15 points. mixed. ... After opening lower North Sea crude is up 77 cents to $35.10. ... The COMMERCE DEPARTMENT reports single-family home sales fell 1.4% from July to August to a seasonally adjusted annual rate of 550,000. ... GENERAL ELECTRIC says it will eliminate up to 500 jobs from its manufacturing complex in Louisville. ... FREDDIE MAC announces that it will stop buying mortgages on apartment buildings to stem

its heavy losses on such loans. ... CHRYSLER CORP. announced that it expects continued declines in sales levels and operating results in the third quarter.

WHAT'S AHEAD:

The COMMERCE DEPARTMENT is scheduled to release August factory orders at 10 a.m. EDT. Economists are anticipating factory orders to fall 2.9%. ... The FEDERAL OPEN MARKET COMMITTEE begins its two day meeting today. ... FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN testifies before a House subcommittee on deposit insurance reform. ... PRESIDENT BUSH hosts a ceremony in the White House rose garden today to celebrate German reunification. ... ... UNITED AUTO WORKERS president OWEN BIEBER says he thinks a settlement can be reach with FORD by the end of this week.

FROM THE BULLS:

"It's actually very easy to be bullish at this time," says KENNETH HACKEL, president of SYSTEMATIC FINANCIAL MANAGEMENT. "Stocks have discounted everything ... stocks are very, very cheap right now." Hackel says the free cash multiple on the S&P industrials now stands at 18, lower than in August 1982. Hackel says market has discounted a mild recession comparable to that seen in 1980, but has not discounted a severe recession. (CNN "Business Day", 10/3)

PHILIP BENIZZI, head of OTC trading for DILLON READ & CO., believes that the Tuesday afternoon decline was a temporary consolidation in a continuing correction. "This move [upward] has potential for more firepower." (WSJ, 10/3)

RALPH BLOCH of RAYMOND JAMES & ASSOCIATES thinks the Dow was hurt yesterday by individual stocks, but says, "The good news was the outstanding breadth." He says the market should rally off its lows, partly because he predicts the decline in oil prices will allow the Fed to ease. "But I don't expect to see the market taking off in a straight line up," says Bloch, explaining that an accumulation of several months may be needed. "I expect the Dow to move laterally ... in a 250 point range," concludes Bloch. ("Investor's Daily", 10/3)

FROM THE BEARS:

"The bear market is not over yet" because the Federal Reserve is holding money growth to a slow pace and corporate profits are still sliding, says STEFAN ABRAMS, chief investment strategist at KIDDER, PEABODY. He says the bear market will not end "until the Federal Reserve Board makes a major commitment to stimulate the economy again" by easing monetary policy. He adds that the institutional "predisposition is to raise more cash on rallies." (WSJ and NYT, 10/3)

"It would be very difficult for the market to sustain upward momentum here in the face of" the uncertainty about both the Middle East and the overall economy, says MARY FARRELL of PAINEWEBBER. (CNN "Moneyline", 10/2)

STOCK MARKET:

"When you've had nine years of drinking too much being on the wagon for three weeks doesn't cure you," says DONALD COXE, a portfolio strategist with GORDON CAPITAL in New York. He does not believe that we are in even the early stages of a bull market at this point. Though the small bear rally that was interrupted yesterday may resume, it is a rally in a bear market primarily because there is a major problem in the liquidity of money. He adds, "We are in the early stages of expiating our sins, and we will come out the other side." (FNN "Marketwrap", 10/2)

Attempts to rally now could place stocks in a more vulnerable position, says technical analyst BOB NUROCK of "Bob Nurock's Advisory." A strong rally followed by renewed downward reaction is needed to establish a good market bottom, according to Nurock. "Investors still seem relatively optimistic," says Nurock, "The market is likely to react downward further." He believes the impact of any Fed easing will not be as long lasting as hoped: "[Its] difficult to become enthusiastic for more than a reflex rally." (CNBC "World Business", 10/3)

"You had a big day on Friday and very strong momentum carry through Monday so some profit taking was natural," says GLENN CUTLER, editor of "Market Mania." "Anyway, three days don't change a bear market." ("USA Today", 10/3)

"We have had a substantial move [in the market], and people are taking profits at this stage," says RICHARD MEYER, head of equity trading at LADENBURG, THALMANN & CO. He says investors are still bearish on stocks because of the dim economic outlook. (WSJ, 10/3)

"If interest rates can continue to move downward, our projections of future price-earnings ratios in stocks will begin to look a lot better than they have since early August," says strategist CHARLES CASAZZA at COWEN AND CO. ("The Washington Post", 10/3)

The action on Monday and Tuesday "was actually a correction, disguised as a rally," says TIM SCALA of SEQUOR GROUP. He thinks the budget agreement "stinks," and says it is really just a tax hike at a time when the economy can ill afford any further damage. He says the market is afraid the tax portions of the package will be adhered to, but the spending cuts will not be maintained. "The market would really like to see some credibility on the part of Congress, and they have yet to see it," says Scala. (FNN "Marketwrap", 10/2)

"Toward the end of the day, people sort of realized they had some short-term

profits and they started to get worried," says JOHN MANLEY of SMITH BARNEY. (CNN "Moneyline", 10/2)

STOCK TIPS:

"I think right now what you want to do is look for the market to head to 2600 [on the Dow] and then you can rethink what you want to do with your portfolios " says DENNIS JARRETT of KIDDER, PEABODY. "If you're a trader, you're buying the leadership that we've seen in the last few years like a WALT DISNEY or McDONALD'S that can bounce very nicely. If you're investment oriented out over the next six to 12 months, you're probably going to be selling some of those same issues ... and you would be looking to be buyers on weakness of some of the energy and the electronic defense [stocks] because they look like they're going to be the sustained one- or two-year leaders of the market." (CNBC "Market Wrap-Up", 10/3)

Viewing the stock as "overpriced," SALOMON BROTHERS is going against the pact by pulling its buy recommendation for WAL-MART STORES. ROBERT SALOMON JR., the firm's well-know head of research writes: "You could sell Wal-Mart and buy all of its S&P competitors -- SEARS ROEBUCK, WOOLWORTH, J.C. PENNY and KMART -- with enough left over to buy another good-size company, EMERSON ELECTRIC." OPPENHEIMER's EDWARD COMEAU disagrees with this logic. He says, "There is an enormous competitive gap between Wal-Mart and the rest of the retail industry." After ticking off a series of positives, such as Wal- Mart's healthy balance sheet and its capital-spending plans, Mr. Comeau concludes: "You have to almost cut through the fundamental analysis. Wal-mart is a buy." ELIZABETH ARMSTRONG, an analyst with PRESCOTT BALL & TURBEN, says Wal-Mart is "one of the few retailers I can think of that people can buy and put away for a long time without having to think about it." (WSJ, 10/3)

DQE, the Pittsburgh area electric utility, has shown earnings increases since 1986 and should see another 10%-15% gain this year, according to ANDREW ADDISON of "The Addison Report." There have been seven insider purchases since December and Addison says previous insider transactions by company executives have been well timed. "It's a very good stock for conservative investors and a way to play the improving bond market," says Addison who believes there's a likelihood of dividend increases. He projects the stock to the high 20s, "once it can get past 23." (FNN "World Business Update", 10/3)

INTERSTATE/JOHNSON LANE recommends stock in HOME DEPOT INC., the Atlanta-based retailer of home improvement products that has 122 stores in 12 states. The brokerage says earnings are expected to grow 35% to 40% in the next few years as the chain completes plans to have 360 stores open by the end of 1994. ("USA Today", 10/3)

"It pays for investors to buy companies with low debt, consistent free cash flow and to be patient," says KENNETH HACKEL, president of SYSTEMATIC FINANCIAL MANAGEMENT. These companies, says Hackel, will gain market share

during tough economic times. He likes BROWN- FOREMAN, LONG DRUG STORES, VF CORPORATION, MEASUREX, MOBIL and ROYAL DUTCH. He says the greatest value will be with middle capitalization stocks between $400 million and $2 billion. (CNN "Business Day", 10/3)

AUTODESK continues to be plagued by rumors that a long-awaited product will be delayed, but some analysts cite more fundamental reasons for the stocks decline of 4 3/4 yesterday. Mostly as a result of a slowdown in the economy, earnings over "the next few quarters could be slowing," says TIMOTHY McCOLLUM of DEAN WITTER REYNOLDS. ("Investor's Daily", 10/3)

Country funds have declined 30%-60% since the buying frenzy early this year. Now may be the time to get in, says MICHAEL PORTER at SMITH BARNEY. "Most money in country funds has been made by taking a contrarian view ... selling them when people want them, and buying them when people are exiting them." After selling at an average premium of 31% at the end of January, country funds now sell at an average discount of 17%. Porter says these discounts are comparable to those seen after the 1987 crash. He advises the purchase of any fund selling at a 25% or greater discount. (CNBC "World Business", 10/3)

#90276m0002 10/03/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 3) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"The dollar could be in for a hit against the yen once this market wakes up," says SHELDON MATLOW, a New York dealer with STANDARD CHARTERED BANK. He says that all signs are still bullish for Japan and that they are being incorporated into stock prices before finding their way into the currency market. (WSJ, 10/3)

"The focus [among currency traders] is one day on the dollar, the next day on the crosses, and if you have the wrong focus, you can get pretty beat up," says AL SHEALY, New York foreign-exchange manager for UNION BANK OF SWITZERLAND. (WSJ, 10/3)

"Mr. Greenspan actually has set up a condition under which he could ease," says CAROLINE BAUM of TELERATE. "He did say that if the budget negotiators produced a credible and enforceable long-term budget pact and, as I call it, if it received the long-term seal of approval, which means that long rates come down, then at that point he would comply with an easing in the funds rate. And I think that as a man of his word we can expect him to go ahead and do that. Whether they [the Fed] will ease immediately or wait for the budget pact to be voted on or implemented remains to be seen." (FNN "Marketwrap",

10/2)

"What you've got to look for is out over the next three or four weeks if the bond rates continue to head down then I think the Fed can do some easing," says DENNIS JARRETT of KIDDER, PEABODY. "They will follow, they will not lead the rates down. ... Watch what happens with the long-bond yield over the next three or four weeks: That will be the tip-off to what the Fed eventually can do." (CNBC "Market Wrap-Up", 10/3)

"Yields on long-term bonds have fallen by 30 basis points over the last four days, so by all rights I figured the market would give some of that back or be unchanged," says JAMES CAPRA, a senior vice president at SHEARSON LEHMAN GOVERNMENT SECURITIES. (NYT, 10/3)

"I think we had a classic bear-market rally" in junk bonds, says DAVID FEINMAN a junk bond trader at JEFFRIES & CO. He says the market isn't likely to recover substantially "until we get customers coming in to buy." (WSJ, 10/3)

THE ECONOMY:

"The over-riding fact is: We're still heading into a recession," says GEORGE JENNISON, co-manager of OTC trading for WHEAT FIRST BUTCHER & SINGER. He adds that the financial markets are not forgetting that. (WSJ, 10/3)

"The so-called war premium is being eaten away" from oil prices, says ANN-LOUISE HITTLE, a senior oil analyst with SHEARSON LEHMAN BROTHERS. "As long as the two main leaders in this crisis remain moderate and don't say anything that's bellicose, no saber-rattling, we see the market weakness," says PETER BEUTEL, an oil analyst with PEGASUS ECONOMETRIC GROUP. ("The Washington Post", 10/3)

"SADDAM HUSSEIN looks to be reaching out for some diplomatic discussion, and this could take some more out of the [oil] market," says TOM BENTZ of UNITED ENERGY INC. ("Investor's Daily", 10/3)

"Last week there was a war premium in the [oil] market," says ANN LOUISE HITTLE of SHEARSON LEHMAN HUTTON. There was a lot of fear that war could break out" or that there would be an escalation of tensions. But she says that calming events over the weekend, "the psychology has changed," and the price of oil has fallen. (CNN "Moneyline", 10/2)

"The fear of war has somewhat dissipated," says ED KEVELSON, oil trader at DEAN WITTER REYNOLDS. "The fact we ran up against $40 [a barrel] and hit it like a brick wall hasturned things around." ("USA Today", 10/3)

#90276p0840 10/03/1990 ~PR Newswire

BROOMFIELD, COLO. (OCT. 3) PR NEWSWIRE - HealthWatch, Inc. (NASDAQ: HEAL) today announced net income of $255,093 or $.11 per share on revenues of $2,669,047 for the year ended June 30, 1990. Some of the major components of the net income were a $1,994,739 consolidation gain, operational losses of $2,252,205 and other income of approximately $500,000. The consolidation gain resulted from a step up in the carrying value of HealthWatch's investment in its Discovery Technologies, Inc. subsidiary due to the sale by Discovery of previously unissued shares of its common stock. The $2,252,205 of operating losses included a $1,468,652 of losses from the Discovery Technologies subsidiary.

This compares to net income of $1,749,692 ($.86 per share) on revenues of $2,503,732 for the year ended June 30, 1989. The income for the year ended June 30, 1989, included a gain from the sale of seven of HealthWatch's eight medical centers to Romed Corp. in December of 1988.

HealthWatch, founded in 1983, is a diversified health care company actively pursuing multiple opportunities in the dynamic $460 billion healthcare industry. In 1988, HealthWatch sold seven of eight medical centers in order to diversify into other areas of the healthcare marketplace. Besides Discovery Technologies Inc., a teleradiology (FilmFax) imaging systems company which was acquired in 1989, HealthWatch continues to operate its original medical center in Boulder Colo., and a medical billing service known as Healthcare Professional Billing. In June, 1990, HealthWatch created a subsidiary, HealthWatch Technologies, Inc., which acquired the assets of the Telemed division of LDG Capital, a 20-year old company which develops electrocardiographic diagnostic equipment for hospitals, clinics and physicians. The company plans to acquire, help manage and develop additional high growth healthcare companies in the next few years.

	1990	1989
Total Revenues	$2,669,047	$2,503,732
Operating Income (Loss)	(2,252,205)	(1,049,764)

OYSTER BAY, NY (OCT. 3) PR NEWSWIRE - Acclaim Entertainment, Inc. (NASDAQ: AKLM) today announced an exclusive marketing agreement with Sears to promote its home entertainment products through Sears' "Wish Book" catalog, which reaches more than 12 million consumers nationwide. The effort marks Acclaim's largest direct mail venture ever, and a first for Sears with a Nintendo licensee.

"With approximately one out of four families now owning a Nintendo Entertainment System, we anticipate video game software and peripherals to be a high priority holiday purchase," says Robert Holmes, president of Acclaim. "We think the combination of Acclaim's high profile product lineup and Sears' famous 'Wish Book' catalog will make for a very successful promotion."

The specially designed "Video Game Magic" catalogs exclusively highlight more than 30 different products under the Acclaim and LJN labels, in more than 12 million Sears holiday books recently sent to consumers nationwide. Inspired by Acclaim's successful Masters of the Game newsletter, the "Video Game Magic" insert features information plus playing hints and tips on various Acclaim and LJN video game products, as well as Acclaim's line of SuperPlay(TM) hand-held games, including the just-released title based on "The Simpsons".

Acclaim Entertainment, Inc. is a leading publisher, marketer and distributor of home entertainment products under the Acclaim and LJN labels. These include Nintendo Entertainment System software, Nintendo Game Boy compact video system software, wireless remote controllers and hand-held electronic games.

#90276p0852 10/03/1990 ~PR Newswire

NEW YORK (OCT. 3) PR NEWSWIRE - Mitsubishi International Corporation (MIC) has announced that effective Oct. 1, of this year Minoru Makihara, president of the corporation since June 1987, will become MIC's first chairman of the board and that he will be succeeded as president by Tetsuo Kamimura.

Kamimura, 58, comes to his new assignment in MIC's New York headquarters after four postings outside Japan since joining MIC's parent, Mitsubishi Corporation (MC), in 1956, when he graduated from Tokyo University's Department of Law, except for a key two-year stretch heading MC's Corporation Planning Office, Kamimura's career at Mitsubishi has focused mainly on the company's foods business. During the past 30-odd years he has spent six years in Hamburg, one year in Valencia, Spain, and four years in MIC's Chicago branch; these experiences have contributed to his conviction that the so-called Japanese "general trading company," of which MIC is one, must function from this point on as truly global enterprise.

While Kamimura, as MIC's president, will direct the day-to-day functioning of the corporation, Makihara, as its first chairman, will focus on MIC's position in the U.S. corporate community.

Makihara will concurrently serve as Mitsubishi Corporation's first senior managing director for the Americas, an assignment which will allow him to support MC's branch offices and subsidiaries on the American continent.

Makihara, 60, was born in London, at a time when his father was working in Mitsubishi Corporation's office there. He completed his preparation for undergraduate education at St. Paul's School in Concord, N.H., and graduated Phi Beta Kappa from Harvard University in 1954, after which he joined MC. Since that time his career has included an eight-year assignment to London and postings to Seattle, Wash., as well as two separate assignments to Washington, D.C., where he opened MIC's office in 1971. Although his new twin assignment for MC and for MIC will call for extensive travel throughout North, Central, and South America, he intends to retain most of his current affiliations: he is, for instance, the president of the Nippon Club and a director of the Japan Society, both in New York, and a member of the Trilateral Commission, the Council on foreign relations, and the Museum of Modern Art's Business Committee.

Mitsubishi International Corporation, with 20 offices located throughout the United States, ranks among the ten largest exporters of American goods to the world marketplace. Handling more than 25,000 items from raw materials to highly sophisticated advanced electronics, the company registers some $14 billion in trade transactions annually.

#90276p0857 10/03/1990 ~PR Newswire

SAN JOSE, CA (OCT. 3) PR NEWSWIRE - Caere(R) Corp. (NASDAQ: CAER) today announced a version of its hand-held scanner, the Typist(TM), for MS-DOS(TM) and other IBM PC and compatible computers, including 80286, 80386, 80486 and Windows 3.0(TM) environments. Previously, the product was available only for Apple Macintosh(R) computers.

Since its introduction in August, the Macintosh version of the product has been widely embraced by users, according to Bruce Fredrickson, vice president of marketing for Ingram Micro D, the computer industry's largest distributor of hardware and software. In fact, Ingram Micro D, which has more than 40,000 customers worldwide, expects an even greater demand for the DOS version. To back that up, Ingram Micro D has given Caere one of its largest ever initial orders for a product.

The Macintosh(R) version, shown first at the MacWorld show in Boston last

August, is shipping and available from personal computer dealers. The MS-DOS version will ship in November. The Macintosh version works with any member of the Macintosh II or SE/30 family. The MS-DOS version accommodates all IBM(R) PC AT and compatibles, including 80286, 80386, 80486, Windows(TM) and Windows 3.0 environments. The Macintosh version has a suggested retail price of $695. The MS-DOS version, which requires either an AT or MCA bus, has a suggested retail price of $595.

After a cooperative effort with Microsoft(TM) Corp., Caere is demonstrating the first 32-bit program to run on Windows 3.0(TM). 32-bit OmniPage(R) is the fastest software optical character recognition product in the market. Running in the enhanced mode of Windows 3.0, the program is three to five times faster than other programs. All other Windows 3.0 programs run in the 16-bit mode.

The 32-bit version of OmniPage will be available later this year at personal computer dealers worldwide. Caere will offer free OmniPage 3.0 upgrades to customers who purchase OmniPage 2.1 between Oct. 3, 1990 and the date OmniPage 3.0 ships.

Caere Corp., based in Los Gatos, Calif., is the industry's leader in the design, manufacture and sale of information recognition software and systems products that provide an economical, accurate means of converting text, numeric and bar code data into computer-usable form.

#90276p0858 10/03/1990 ~PR Newswire

SAN JOSE, CA (OCT. 3) PR NEWSWIRE - Caere(R) Corp. (NASDAQ: CAER) today announced a version of its hand-held scanner, the Typist(TM), for MS-DOS(TM) and other IBM PC and compatible computers, including 80286, 80386, 80486 and Windows 3.0(TM) environments. Previously, the product was available only for Apple Macintosh(R) computers.

Since its introduction in August, the Macintosh version of the product has been widely embraced by users, according to Bruce Fredrickson, vice president of marketing for Ingram Micro D, the computer industry's largest distributor of hardware and software. In fact, Ingram Micro D, which has more than 40,000 customers worldwide, expects an even greater demand for the DOS version. To back that up, Ingram Micro D has given Caere one of its largest ever initial orders for a product.

"There are only one or two super-winner products per year and we are convinced the Typist will be one of them," Fredrickson said. "Caere offers users a sophisticated scanner and software for the price of software alone. Given the larger size of the DOS market, we expect demand for the DOS version to be

phenomenal."

The Macintosh(R) version, shown first at the MacWorld show in Boston last August, is shipping and available from personal computer dealers. The MS-DOS version will ship in November. The Macintosh version works with any member of the Macintosh II or SE/30 family. The MS-DOS version accommodates all IBM(R) PC AT and compatibles, including 80286, 80386, 80486, Windows(TM) and Windows 3.0 environments. The Macintosh version has a suggested retail price of $695. The MS-DOS version, which requires either an AT or MCA bus, has a suggested retail price of $595. 32-bit OmniPage

After a cooperative effort with Microsoft(TM) Corp., Caere is demonstrating the first 32-bit program to run on Windows 3.0(TM). 32-bit OmniPage(R) is the fastest software optical character recognition product in the market. Running in the enhanced mode of Windows 3.0, the program is three to five times faster than other programs. All other Windows 3.0 programs run in the 16-bit mode.

"Caere was unwilling to accept performance degradation with our product by running a 32-bit program in 16-bit mode," said Larry Miller, Caere's vice president of marketing, "so we worked closely with Microsoft to come up with the best solution for our customers."

The 32-bit version of OmniPage will be available later this year at personal computer dealers worldwide. Caere will offer free OmniPage 3.0 upgrades to customers who purchase OmniPage 2.1 between Oct. 3, 1990 and the date OmniPage 3.0 ships.

SHELTON, CT (OCT. 3) PR NEWSWIRE - The Forschner Group, Inc. (NASDAQ-NMS: FSNR), originators and marketers of Swiss Army Brand products, announced today a vigorous campaign to protect the public from blatant imitations of its highly successful Swiss Army Brand Watch.

Forschner, which is the long-time exclusive U.S. distributor of the Original Swiss Army Knife, introduced the Swiss Army Brand Watch in August 1989 through its Swiss Army Brands, Ltd., subsidiary. The watch, which is made in Switzerland, is distinguished by a unique combination of color, texture and design features and is protected by the trade dress laws. (NOTE: The trade

dress laws, in part, prohibit the sale of products that deliberately mimic the overall look of established products.)

"The immediate retailer and consumer acceptance of the Swiss Army Brand Watch has attracted imitators attempting to mislead consumers with inferior products and Forschner is taking vigorous action against all imitators," James W. Kennedy, president and chief executive officer of Forschner, said.

Kennedy added, "Our campaign to protect the public and the Swiss Army Brand trade dress from attempts to knock off our readily identifiable merchandise has begun successfully. Our attorneys have strongly challenged marketers of these knockoffs and have reached agreements in these instances for them to cease marketing the knockoffs. We are hot on the trail of the manufacturers and importers. So far we have not sought damages against retailers but this policy may be expected to change as the trade becomes aware of our enforcement program. We plan to devote whatever resources are necessary to assure that consumers relying on our trade dress and reputation are not deceived."

#90276p0864 10/03/1990 ~PR Newswire

CLEVELAND (OCT. 3) PR NEWSWIRE - National City Bank, Cleveland and The Solon City School District today announced that the $21,000,000 bond issue for Solon's "Dual School" is complete. National City's Public Finance Group was the underwriter on the bond issue.

Both Moody's and Fitch Investor Services have given a double-A credit rating to Solon's school improvement bonds, the highest rating of any district in Ohio. "This is Ohio's largest school bond issue this year with this credit quality," said Solon City School District Superintendent Joseph Regano. "Only 12 of Ohio's 619 school districts have earned a double-A rating. We were pleased that the rating services saw Solon as an excellent place to live with exceptional schools.

"With no internal expertise on bond issues, we relied heavily on our relationship with National City's Public Finance Group," Regano said. "National City kept our interests in mind throughout the process, providing quality service every step of the way."

Solon voters approved a bond issue last May to pay for the $21 million school to house the growing numbers of students in Solon. Student enrollment in grades K-6 has escalated 42 percent in the last six years. Administrators expect the school population to continue to grow to between 4,200 and 4,500 students in the year 2000.

Construction for Solon's 180,000 square foot "Dual School" is expected to be

completed in August, 1992. The new facility will house 1,250 students in two separate schools under one roof. The lower school will be one of three elementary facilities in Solon serving students in grades 1-4. The middle school will house all Solon seventh and eighth graders in six team teaching areas. The two schools will be separated by a circular courtyard and each school will have a private entrance. Architects for the project are Burgess & Niple Ltd. and Perkins & Will.

National City Corporation's (NYSE: NCC) Public Finance Group represents the corporations member banks and affiliates in investment banking for tax-exempt debt.

CONCORD, NH (OCT. 3) PR NEWSWIRE - Healthsource, Inc. (NASDAQ: HLTH), a health care management company with operating activities in New Hampshire, Maine, New York, South Carolina and North Carolina, today announced that it had entered into a definitive management agreement with Blue Cross/Blue Shield of Vermont. Under the terms of the agreement, Healthsource would provide managed care services for Blue Cross and its subscribers for a five-year period. Blue Cross/Blue Shield of Vermont is the state's largest health care payor with 160,000 members and approximately $150 million in annual premiums.

Specifically, Healthsource will ultimately provide managed care oversight and supervision and utilization review services for applicable Vermont Blue Cross subscribers. Furthermore, at Blue Cross's discretion, Healthsource will consult on aand assist in the design of a Preferred Provider Organization (PPO) and other managed care programs. Healthsource will also provide assistance in negotiations with health care providers, information systems support and marketing assistance.

In addition to being reimbursed for its costs in providing the aforementioned services, Vermont Blue Cross will pay Healthsource $450,000 per year and additional incentive compensation based on health care cost savings.

Commenting on the agreement, Vermont Blue Cross/Blue Shield President and Chief Executive Officer John H. Anderson, said, "We are very excited about joining forces with Healthsource to create an efficient delivery system of health care services in Vermont. Healthsource is one of New England's recognized leaders in the managed care industry and we are very encouraged

about the prospects of our joint endeavor."

Norman C. Payson, M.D., President and Chief Executive Officer of Healthsource, noted, "We are looking forward to working closely with Vermont Blue Cross and the state's health care providers to assist in achieving medical cost containment for the people of Vermont."

Healthsource, Inc. directly manages its wholly-owned Health Maintenance Organization (HMO), Healthsource New Hampshire, which has 40,000 members. In addition, the company has ownership interest in and manages two other HMOs in South Carolina and Maine with more than 22,000 members. Healthsource also has pending investments in or contracts with HMOs in North Carolina and New York which are subject to shareholder and regulatory approval; these plans have 38,000 and 26,000 members, respectively. Other principal operations include a 20,000-member Preferred Provider Organization (PPO) network in New Hampshire and the largest Third Party Administrator (TPA) in New England with approximately 200,000 members.

CONTACT: Thomas M. Congoran, chief financial officer of Healthsource, 603-225-5077.

CLEVELAND (OCT. 3) PR NEWSWIRE - First National Supermarkets, Inc. today announced an educational environmental program built around the three Rs -- Reduce, Reuse and Recycle. Effective in all Finast stores, the program provides information on how to reduce packaging, how to reuse or recycle products and how to identify products made from recycled material.

Key components of the environmental program are as follows: -- Hundreds of shelf signs throughout the store providing consumers with environmental insights on how to reduce packaging and how to reuse and recycle products.

-- In store collection bins for recycling paper and plastic grocery bags.

-- A new Finast edition of the Sierra Club Recycling Location pamphlet, available at customer service.

-- Reusable canvas and mesh grocery bags, priced at $2 and $4.49 respectively with an introductory $.50 off coupon offer.

"1001 Things You Can Do To Save The Planet," a paperback book. Noted William Holsworth, executive vice president and president of the Ohio Division, "The more we learn about our environmental problems, the more we want to take action and help our customers do the same. This program is one of many steps we hope to take toward a cleaner, healthier environment, both for us and our customers."

An advisory committee composed of municipal recycling coordinators, recycling businesses and representatives of environmental and cooperative extension organizations helped the supermarket chain develop messages that translated the 3 Rs into practical buying suggestions. Holsworth expressed appreciation for the advisory committee's expertise and help in formulating the messages.

In additional remarks, Holsworth noted the success of First National Supermarkets' Recycling Hotline, a program in which thousands of callers requested the nearest recycling location since the program's inception in March of this year.

Holsworth felt that publishing an updated version of the Sierra Club Recycling Guide was a logical extension of that program, since it lists dozens of municipal recycling programs in the Greater Cleveland area, and how citizens can support them. The guides are available at Finast customer service desks. Recycling guides are available for Lake and Lorain counties also.

Plastic grocery sacks deposited at in-store recycling bins will be recycled for use in non-food packaging material such as detergent and motor oil bottles flower pots and irrigation pipe. Paper bags will be recycled for use in corrugated cardboard products.

RANCHO CUCAMONGA, CA (OCT. 3) PR NEWSWIRE - Kaiser Steel Resources Inc. today announced the unanimous approval of a 1:3 reverse stock split during a special meeting of the stockholders held yesterday. The decision was made in concert with its plans to re-enter the public stock market on Oct. 16, 1990. Also unanimously approved was an amended stock plan intended to provide eligible directors and employees the opportunity for earning a proprietary interest in the company.

Now focused on environmental businesses, Kaiser Steel Resources is the restructured successor to Kaiser Steel Corp., which emerged from Chapter 11 bankruptcy in 1988. The company's trading will commence with the mid-October distribution of common stock to creditors as part of Kaiser's bankruptcy reorganization. The company will be listed on NASDAQ under the symbol "KSRI."

Richard E. Stoddard, chairman and chief executive officer, said the reverse split will reduce the number of shares to be issued under the Plan of Reorganization from 30 million to 10 million. "This will boost the stock price, which we feel will put us in a more favorable position when public trading is available beginning October 16," he said.

Kaiser Steel Resources is developing businesses that address vital environmental issues in Southern California, including one of the country's largest rail-haul municipal waste landfills, land remediation and development, and water resources.

CONTACT: Daniel N. Larson of Kaiser Steel Resources Inc., 714-944-4166; or Scott Brooks of Carl Thompson Associates Inc. for Kaiser Steel Resources Inc., 303-494-5472.

ANAHEIM, CA (OCT. 3) PR NEWSWIRE - Odetics (AMEX: OA, OB) announced completion of negotiations with NASA-GSFC for space recorders to be used by the European Space Agency (ESA) on their part of the International Solar Terrestrial Physics (ISTP) program.

NASA-GSFC has an agreement with ESA to provide the space recorders for the Solar and Heliospheric Observatory (SOHO) and the CLUSTER mission, which consists of four separate spacecraft. Odetics will deliver 12 flight model DDS-3100 recorders to NASA-GSFC for SOHO/CLUSTER similar in design to more than 116 recorders successfully flown by NASA, DoD, Japan, Germany, and Italy since 1971. Two Odetics DDS-3100 recorders will be delivered soon to Nippon Electric Corp. (NEC) for their customer, Institute of Space and Astronautical Science (ISAS). ISAS has responsibility for GEOTAIL, the Japanese portion of ISTP.

Odetics, headquartered in Anaheim, is a leading manufacturer of intelligent machines, including information systems for collecting digital and analog data as well as robotic and artificial intelligence systems.

ATLANTA (OCT. 3) PR NEWSWIRE - Contel Customer Support announced today that it has been awarded contracts worth a total of $1.67 million to service the telecommunications systems of Stanford University, Caesars Palace and Foote, Cone & Belding, an advertising agency.

CCS will design and install a telecommunications system for Stanford

University in Palo Alto, Calif. Under the contract, Contel Customer Support will upgrade a Northern Telecom SL100 to a Supernode configuration, increasing the switching capacity and memory. Installation is scheduled for the first quarter 1991.

CCS won a three-year maintenance contract awarded by Caesars Palace in Las Vegas. Three CCS technicians will be stationed on site to maintain Caesars Northern Telecom SL1XT switch and upgrade software. CCS will provide all adds/moves/changes.

Under a four-year contract, CCS will maintain the telecommunications system of Foote, Cone & Belding in Los Angeles. Included in the contract is the installation of Northern Telecom's Meridian Option 21 PBX and Universal Wiring. The PBX configuration will initially consist of approximately 250 telephones and 86 trunks, and will later include a Meridian Mail Voice Processing System and Local Area Networks.

Caesars Palace is a world-class hotel and frequent host of major sports championships. Caesars Palace properties include hotels in Atlantic City, N.J., and Lake Tahoe, Nev.

Foote, Cone & Belding is one of the world's leading advertising agencies, representing clients such as Mazda, Mattel, Universal Studio Tours, Orion Pictures, Farmers Insurance and Sunkist.

Contel Customer Support, a subsidiary of Contel Corp. (NYSE: CTC), provides total systems support for complex telecommunications networks including moves/adds/changes, upgrades and enhancements in addition to sales and service of local area network products.

Contel, a company with more than $3 billion in revenues and sales, provides a broad range of telecommunications products and services.

NAPERVILLE, IL (OCT. 3) PR NEWSWIRE - First Midwest Bancorp, Inc. (NASDAQ: FMBI) today announced that its subsidiary First Midwest Insurance Co. has completed its previously announced program of purchasing common stock of First Midwest Bancorp on the open market.

Pursuant to the program, First Midwest Insurance purchased during the past approximate 15 days some 10,000 shares of the common stock of its parent, this being the maximum number of shares allowable under regulations defining investments of this type by the Arizona insurance company subsidiary.

The purchase program was initiated because of management's belief that First Midwest Bancorp's common stock represents a very attractive investment at current levels. The purchased shares will be held for investment by First Midwest Insurance and not used by its parent to fund stock-related programs.

With total assets of $2.3 billion, First Midwest Bancorp Inc. is one of Illinois' largest bank holding companies operating 36 banking and five trust offices in northern Illinois.

CHERRY HILL, NJ (OCT. 3) PR NEWSWIRE - Science Dynamics Corp. (NASDAQ-NMS: SIDY), manufacturer of Voice Systems and Intelligent Peripherals for the telecommunications industry, has announced the receipt of a purchase order from Hong Kong Telephone Co. for their new Centralized Digital Change Number Announcement system.

This is the initial application of Science Dynamics' Intelligent Application Node Digital Platform, which can also be applied to other telecommunication services such as Expanded Announcement Systems, Directory Assistance/Call Completion, Integrated Voice Messaging, etc.

The Hong Kong Telephone system purchase order is in excess of $400,000. This new digital system will be centrally located within two central offices to serve their entire customer base for calls that are being intercepted. Subscribers will receive the called number status, such as the old number has been changed and the new number referral, through a multilanguage (English and Cantonese) announcement. The system has the capability of future expansion to more than 1,200 channels. Delivery is scheduled for the second quarter of 1991.

Science Dynamics Corp. designs and manufactures telecommunications products that are focused on providing Voice Announcements, Intelligent Network Control and Administration, Enhanced Network Security, Interactive Communications, and Call Processing and response capabilities. Science Dynamics has more than 14,000 units in operation at all RBOCS and major independent telephone companies, including GTE, United Telephone, Centel and Contel. Science Dynamics' stock is traded on the NASDAQ National Market System.

Additional information may be obtained from Lyndon A. Keele, president, Science Dynamics Corp., 1919 Springdale Road, Cherry Hill, N.J., 08003, 609-424-0068.

STOCKHOLM, SWEDEN (OCT. 3) PR NEWSWIRE - Svenska Handelsbanken today released the following:

Svenska Handelsbanken's operations outside Sweden have expanded sharply during the 1980s. Continued growth is expected in the 1990s, especially in the Nordic countries. Thus it becomes necessary to strengthen the management of the bank's activities outside Sweden.

The operations outside Sweden are consequently being removed from the central international division's responsibility and will in future form a separate regional bank -- Svenska Handelsbanken International. This ninth regional bank will include all the bank's 25 units outside Sweden, with the exception of Svenska Handelsbanken, London Branch and Svenska International plc.

The new regional bank will have assets totaling SEK 50 billion and a staff of 400.

Magnus Uggla, currently executive vice president and head of foreign exchange, money markets and bonds at the central international division, has been appointed head of Svenska Handelsbanken International. Uggla was previously head of Svenska Handelsbanken, New York branch.

Bo Forsberg, currently senior vice president and head of the international department, Gothenburg, has been appointed head of the international department in Stockholm, which will continue to be responsible for foreign payments, foreign exchange and money markets, etc. Forsberg has previously also been head of the international department in Malmo.

Andres Ljungh, executive vice president and currently head of central international division, has been appointed executive vice president of the new European Bank for Reconstruction and Development (EBRD). He will thus leave Svenska Handelsbanken.

CONTACT: Tom Hedelius, president, or Arne Mariensson, president- elect of Svenska Handelsbanken, in Stockholm, +46 8 22 92 20.

#90276p0884 10/03/1990 ~PR Newswire

OAKLAND, CA (OCT. 3) PR NEWSWIRE - Safeway Inc. (NYSE: SWY) today reported net income for the third quarter (12 weeks) ended Sept. 8, 1990, of $20.8 million (21 cents per share) compared with $7.1 million (9 cents per share) in the third quarter of 1989. For the first 36 weeks of 1990, net income rose to $59.4 million (63 cents per share) from $23.5 million (31 cents per share) in 1989.

Sales for the quarter were $3.5 billion, 4.6 percent greater than the third quarter of 1989. Sales for the first 36 weeks of 1990 were $10.2 billion, 4.4 percent greater than in 1989. Same-store sales (sales of stores operating the entire measurement period in both years) increased 3.9 percent in the third quarter of 1990 and 3.4 percent in the first 36 weeks of 1990.

Gross profit was 26.6 percent of sales for the first 36 weeks of 1990 compared to 25.7 percent a year ago. This continues the positive trend of improved gross profit over the last several quarters resulting from better buying practices, effective merchandising, improved inventory control and increased sales in high-margin specialty departments.

Sales gains and improved gross margins helped lift operating profit for the third quarter to $127.6 million, up 14.4 percent from the same period last year. Operating profit was 3.7 percent of sales in the third quarater and 3.6 percent for the first 36 weeks of 1990. By comparison, operating profit for the same periods of 1989 were 3.4 percent and 3.3 percent of sales, respectively.

Operating cash flow (FIFO earnings before income taxes, interest, depreciation and amortization) improved to 6.2 percent of sales in the third quarter of 1990 compared to 5.4 percent in 1989. Operating cash flow was 6 percent of sales in the first 36 weeks of 1990 compared to 5.3 percent for the same period of 1989.

Interest expense for the first 36 weeks declined slightly to $261.4 million in 1990 from $267.8 million in 1989. This was primarily the result of lower average borrowings following the initial public offering of 11.5 million shares of common stock in April 1990. Net proceeds from the offering were approximately $120 million. This reduction in interest expense was partially

offset by higher interest rates on borrowings moved into Canada.

Other income increased to $28.1 million for the first 36 weeks of 1990 from $3.3 million in 1989 due primarily to the increased income from Safeway's 35 percent equity investment in Vons, a supermarket chain located principally in southern California. Safeway records income from its investment in Vons on a one-quarter delay basis.

Safeway Inc. is one of the world's largest food retailers, operating 1,114 stores in the United States and Canada. The company's common stock is traded on the New York Stock Exchange under the symbol SWY.

CONTACT: Melissa Plaisance, 415-891-3136 (investor relations); or Brian Dowling, 415-891-3267; both of Safeway Inc.

PITTSBURGH (OCT. 3) PR NEWSWIRE - SMS Engineering Inc. has received a $30 million contract from Logan Aluminum Inc. for a high-production, 3-stand Tandem Cold Mill, as announced today by Jeremy C.T. Thomas, president and CEO.

Designed to produce high-grade aluminum strip for can stock, the mill and related mechanical equipment will be manufactured in conjunction with SMS Engineering's parent organization, SMS Schloemann-Siemag Aktiengesellschaft of Germany. Installation at Logan's existing plant in Russellville, Ky., is scheduled for mid-1993.

SMS AG of Germany will be responsible for basic engineering, and engineering and manufacture of the mill stands. Pittsburgh-based SMS Engineering will serve as project manager and be responsible for overall coordination, detailed engineering and manufacture of all equipment other than the mill stands.

The new 4-high cold mill will include substantial automation, including coil and spool handling, short between coil times, high rolling speeds of 6,000 feet/minute maximum and the use of large coils.

The mill, which will have a maximum width capability of 82 inches, will utilize customized SMS high-technology rolling concepts to ensure production of highest quality cold rolled strip, with close gauge tolerances and flatness.

#90276p0887 10/03/1990 ~PR Newswire

DALLAS (OCT. 3) PR NEWSWIRE - Harken Energy Corporation (NYSE: HEC) of Dallas

announced, on behalf of its wholly owned subsidiaries Tejas Power Corporation (TPC) and E-Z Serve Holding Company, Inc. (E-Z), that it has today filed with the Securities and Exchange Commission a registration statement covering the previously announced proposed rights offering (A). TPC is Harken's natural gas gathering and marketing subsidiary. E-Z is the parent company of Harken Marketing Company, Harken's refined products marketing subsidiary.

Through the proposed offering, Harken stockholders would receive transferable rights (Unit Rights), affording them the opportunity to subscribe jointly to newly issued shares of the common stock of TPC and newly issued shares of the common stock of Frontier Refining and Marketing Company (FRMC). FRMC is the name which E-Z will assume upon the completion of its proposed merger with the parent company of Frontier Oil Corporation (FOC) of Denver, as announced by Harken on Oct. 2, 1990. With the completion of the proposed offering, Harken, FRMC and TPC would become separate operating companies which, it is anticipated, would trade separately in the public markets.

Under the proposed rights offering, a total of $48.5 million in TPC and FRMC common stock would be offered to holders of Unit Rights. In addition, upon completion of the merger of E-Z and the parent company of FOC, the proposed rights offering would include the issuance of rights to FRMC's stockholders other than Harken which, upon exercise, would provide additional proceeds to FRMC of up to $15.5 million.

Proposed Rights Offering Terms Securities to be offered -- Unit Rights providing the opportunity to subscribe jointly to newly issued shares of common stock of FRMC and newly issued shares of TPC.

Proposed subscription ratio -- Harken stockholders would receive one unit right for every eight shares of Harken stock held as of the proposed record date. (see "Proposed record date" discussion below).;

-- Each Unit Right would entitle the holder to subscribe to one share of TPC common stock and one share of FRMC common stock.

Proposed subscription price -- The exercise price for each Unit Right would be $8.00. Oversubscription privileges -- Stockholders would have the opportunity to subscribe to a proportionate share of Unit Rights not exercised by other stockholders.

Proposed record date/subscription date/certificates mailing date -- Before the effectiveness of the registration statement covering the offering, Harken's board of directors will establish the record date for Harken stockholders entitled to receive Unit Rights. The proposed subscription period would begin on the record date and continue for a period to be determined by the Harken board of directors. Unit Right certificates would be mailed to Harken

stockholders as soon as practicable after the record date.

The proposed rights offering is subject to the effectiveness of a preliminary registration statement today filed with the Securities and Exchange Commission. The terms noted above are subject to change. Any material changes to the terms outlined above will be publicized through the public press. Media representatives are advised to be alert for possible future news releases.

Harken Energy Corporation manages and develops energy assets. HEC retails, wholesales and distributes gasoline through its subsidiary, Harken Marketing Company. Through its subsidiary, Tejas Power Corporation, HEC constructs, owns and operates natural gas gathering, storage and transmission facilities in Texas and Louisiana and markets third party gas to a variety of end-users. HEC explores for, develops and produces oil and gas reserves domestically through its subsidiary Harken Exploration Company and internationally through its subsidiary Harken Bahrain Oil Company. HEC provides contract drilling and workover/well services through its subsidiary, Harken Resource Management Corporation.

(A) -- A preliminary registration statement relating to these securities has been filed with the Securities and Exchange Commission. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. The offering and sale of any of these securities will be made only be means of a prospectus. This discussion shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any State in which such offer, solicitation, or sale would be unlawful prior to the registration or qualification under the securities laws of any such State.

Copies of the written prospectus, when available, can be obtained by contacting Dale Brooks, c/o Harken Energy Corporation, 2505 North Highway 360, Suite 800, Grand Prairie, Texas 75050.

CONTACT: Dale Brooks of Harken Energy, 1-800-4-HARKEN or 817-652-4429

RICHMOND, VA (OCT. 3) PR NEWSWIRE - Ethyl Corporation (NYSE: EY) announced today that it had signed a conditional agreement to sell all the stock of its Hardwicke Chemical Company subsidiary to MTM Plc of Cleveland, England, for approximately $112 million. The transaction is expected to be completed by the end of October. The sale, if completed, will result in a gain for Ethyl to be determined at time of closing.

Hardwicke Chemical, based in Elgin, S.C., produces synthetic pyrethroid intermediates and fine chemicals and its 1989 revenues were approximately $50

million. Hardwicke Chemical has 177 employees, all of whom are located at the Elgin site. Ethyl has owned 100 percent of the stock of Hardwicke Chemical since 1978.

Ethyl said it decided to sell Hardwicke Chemical in order to focus on other specialty chemicals and concentrate its manufacturing activities on fewer, larger sites.

Ethyl Corporation is a Fortune-500 company based in Richmond, Va. The company makes and markets performance chemicals for the petroleum and plastics industries as well as high-technology chemicals and pharmaceuticals. Ethyl also owns First Colony Life Insurance Company of Lynchburg, Va.

NEW YORK (OCT. 3) PR NEWSWIRE - Robert E. Allen, AT&T chairman and chief executive officer, expressed strong support today for the budget agreement reached by the Administration and the Congressional leadership.

"President Bush's explanation last night of why the current budget proposal deserves the support of the American public was clear, convincing and persuasive," Allen said.

"The proposal planned for submission to Congress later this week represents real deficit reduction, which is absolutely critical for the long-term health of the economy.

"Those who took part in the arduous discussions that led to this proposal are to be congratulated, not criticized.

"In the interest of getting a workable package approved, some disappointments will have to be swallowed.

"The important thing is that it is a solid move toward a reduced deficit. And that move is overdue."

ALBUQUERQUE, NM (OCT. 3) PR NEWSWIRE - Horizon Healthcare Corp. (NYSE: HHC) today announced the results of its first quarter for fiscal 1991 ended Aug. 31 1990. Continuing on its trend of profitability which began with the fourth quarter of fiscal 1989, Horizon reported a profit of $348,000 or 5 cents per share. Horizon's net revenues from continuing operations for the first quarter were $25.4 million. This compares to a net profit of $169,000 and net revenues from continuing operations of $26.2 million for the first quarter of fiscal 1990.

Horizon, which was incorporated in July 1986 and began trading on the New York Stock Exchange on May 7, 1987, as of Aug. 31, 1990 operated in eight states a total of 45 long term care facilities with 4,720 beds, three retirement housing facilities with 139 apartments and one assisted living facility with 167 units.

HACKENSACK, NJ (OCT. 3) PR NEWSWIRE - Script Systems, Inc. (NASDAQ: SCPT), today reported record sales and earnings for the year and the fourth quarter ended June 30, 1990. For the year, revenues rose to $5,364,771, an increase of 13 percent over the period last year. Net earnings of $323,376 were also a record. For the fourth quarter, sales rose 17 percent to a record $1,686,143 while earnings increased 346 percent to a record $312,904.

Barry Mindes, Script System's president, stated that the quality of sales improved markedly last year. The company concentrated its efforts in the high-growth, high-margin medical market as opposed to on pharmacy systems and intends to do so in the future. Medical systems sales rose approximately 40 percent to $5.1 million from $3.5 million last year.

Script Systems provides automated systems to the health care industry, principally medical offices, clinics and hospitals, which perform clinical record keeping, billing and insurance claims processing, scheduling and administrative functions. Script's products and services are sold throughout the country from directs sales offices and a distributor network.

NEW YORK (OCT. 3) PR NEWSWIRE - Real estate developer Stanley Stahl today completed his $38 per share cash tender offer for Apple Bancorp, Inc. In the tender offer, Stahl increased his stake in Apple from 31 percent to 97 percent. The offer price valued Apple at almost $175 million.

Apple Bancorp is the parent company of Apple Bank for Savings, one of New

York's healthiest savings banks. "At a time when we have read so much negative publicity about the banking industry, Stahl's acquisition highlights the fact that some institutions are weathering the storm," said Robert J. Hasday, a partner in the New York law firm of Shea & Gould who represented Stahl in the transaction.

According to Hasday, in addition to being one of the few recent acquisitions of a healthy depositary institution in the country, the transaction was unusual in that it conditioned a tender offer on a successful proxy solicitation. "In essence, we used the tender offer to obtain votes in the proxy context," added Hasday.

Apple is one of the largest savings institutions in New York with assets of approximately $3.9 billion at June 30, 1990. The 127-year-old Apple Bank for Savings employs approximately 1,500 people at its 33 branches in New York.

Shea & Gould is one of New York City's leading law firms, with 220 attorneys practicing at its Manhattan headquarters.

TROY, MI (OCT. 3) PR NEWSWIRE - Arbor Drugs, Inc. (NASDAQ: ARBR), which currently operates 102 drugstores in Michigan, today announced a 20.0-percent increase in net income and a 13.7-percent increase in net sales for the year ended July 31, 1990.

Eugene Applebaum, chairman, president and chief executive officer, attributed the record performance to consistent sales growth and continued expense discipline in store operations.

Arbor's fiscal 1990 net income was $11,004,000 or $1.15 per share, up from $9,168,000 or $.96 per share in fiscal 1989. Net sales for the year were $341,286,000 vs. $300,198,000 last year. Comparable store sales increased 9.2 percent for the year.

Net income in the fourth quarter of fiscal 1990 was $2,678,000, up 8.2 percent over last year's $2,474,000. Earnings per share for the three months increased to $.28 from $.26 in fiscal 1989. Sales for the quarter ended July 31, 1990, were $88,818,000, up 13.8 percent from $78,015,000 in the prior year. Comparable store sales were up 9.0 percent for the three-month period.

As previously announced, on Aug. 28, 1990, the board of directors of the Troy-based retailer declared a quarterly cash dividend of $.04 a share, payable on Oct. 2, 1990, to holders of record as of Sept. 18, 1990.

Commenting on the results, Applebaum said: "Fiscal 1990 was another outstanding year for our company. This performance again demonstrates our ability to achieve strong sales increases and excellent profits. We remain committed to focusing on what is important to our customers, specifically, the pharmacy department, overall convenience, everyday values and attention to detail in our stores."

Applebaum also noted: "From a strategic standpoint, this past year was significant for two reasons. First, during fiscal 1990, we opened 12 new stores, including six in the fourth quarter. For the year ending July 31, 1991, we plan to open at least 15 new stores, reflecting our goal of operating 150 drugstores in Michigan by 1993. Second, substantial progress was made in developing and implementing technology, designed to improve operating efficiencies and customer service."

Arbor Drugs, named the "1989-1990 Michigan Company of The Year" by the Detroit Free Press, is the nation's 23rd-largest drugstore chain.

WEST CHESTER, PA (OCT. 3) PR NEWSWIRE - Roy F. Weston Inc. (NASDAQ: WSTNA) (WESTON) has been awarded its first assignment under a new $50 million contract with the U.S. Army Corps of Engineers, Omaha district, to provide clean up at both Superfund and military installations throughout the country.

The objective of the Pre-placed Remedial Action (PRAC) will be to greatly reduce the amount of time it takes the government to respond to cleanup situations. The one-year contract comes with four one-year renewable options, with a potential total of $50 million over five years.

The first assignment has a potential of $20 million over three phases. The first phase involves a special incinerator to burn waste at the Rocky Mountain Arsenal in Denver. The second and third phases, which WESTON has not yet been assigned, cover the building and operation of the incinerator.

WESTON, and Weston Services Inc., the wholly owned remediation arm of WESTON, also based at WESTON corporate headquarters in West Chester, provide comprehensive remediation and environmental construction services including facility decontamination and demolition; transportable thermal treatment; landfill and TSD facility construction; storage tank management and renovation programs; municipal and industrial water/wastewater treatment facility

construction and facility contract operations.

WESTON, the parent company, is a recognized leader in the environmental engineering, design and consulting industry. Its clients include many Fortune 500 companies and government, from the municipal to federal level. The company operates a network of 40 offices and four analytical laboratories.

PROVIDENCE, RI (OCT. 3) PR NEWSWIRE - Fleet/Norstar Financial Group (NYSE:FNG) popped the cork on a year-long celebration for its 200th anniversary today when Terrence Murray, chairman and president, unveiled a newly restored

downtown landmark as a gift to the people of Rhode Island.

"The events and activities planned for the bicentennial year are designed to make lasting contributions to our employees and the communities we serve," Murray said.

At the launch ceremony in Providence, Fleet/Norstar executives were joined by dignitaries and guests for the unveiling of a bicentennial logo and a commemorative plaque at the restored Soldiers' and Sailors' monument in Kennedy Plaza.

A $50,000 check from the Fleet Charitable Trust, to be used for the monument's restoration, was presented to Providence Mayor Joseph R. Paolino, Jr. The $50,000 contribution from the Fleet Charitable Trust matches funding from the R.I. Historical Preservation Commission. Fleet/Norstar's contribution is being used for the monument's restoration as a lasting gift to the citizens of Providence and Rhode Island to highlight the importance of Providence as the location of Fleet/Norstar's founding 200 years ago.

Fleet/Norstar traces its roots to the Providence Bank, a company founded by John Brown in Providence on Oct. 3, 1791. It is one of only three financial services companies in the United States to celebrate 200 years in business.

Yesterday, in Albany, N.Y., John B. Robinson, Jr., executive vice president, Fleet/Norstar, presented a $25,000 gift from the Fleet Charitable Trust to the Executive Mansion Preservation Society for restoration of the New York State executive mansion.

The theme of the bicentannial, "The Third Century", was created to acknowledge the corporation's longevity while providing a platform for anticipating the future. "Our 200 years in business represents a milestone in which all our companies -- from Maine to California -- take enormous pride," Murray said.

In addition to today's public ceremonies, Fleet/Norstar presented its 18,500 employees throughout the corporation with commemorative gifts.

Fleet/Norstar Financial Group is a diversified national financial services company listed on the New York Stock Exchange . Fleet/Nosrstar has approximately 1,000 offices in 40 states. Its lines of business include commercial and consumer banking, mortgage banking, consumer finance, asset-based lending, trust banking, student loan processing, and investment banking.

DAYTON, OH (OCT. 3) PR NEWSWIRE - Robbins & Myers, Inc. (NASDAQ: ROBN) announced today a significant increase in profits for the fiscal year ended Aug. 31, 1990.

Net income for the year was $5.4 million, an increase of 29 percent over the $4.2 million reported at the end of fiscal 1989. However, net income for the fourth quarter was $1.3 million, down from $1.4 million in last year's fourth quarter due to lower profitability in the Motion Control business segment.

Annual sales were $108.6 million, a 2.5 percent increase over the same period last year. Fourth quarter sales were $27.5 million, up from the $26.8 million for the fourth quarter 1989.

Earnings per share rose to $2.15, up from $1.73 for the previous year. Earnings for the quarter were $.50, down from the $.55 reported for the fourth quarter of 1989.

"We continue to be pleased with our overall corporate performance thanks to the excellent results of the Fluids Handling Group," said Daniel W. Duval, president and chief executive officer.

The Fluids Handling Group continued its strong performance. Sales for the year rose 15.9 percent and profits were up 40 percent. Strong shipments in the oil recovery and municipal waste water treatment markets contributed to the substantial profit improvement.

Duval further stated, "We are disappointed with our Motion Control Group results. The group's sales for the year were down 15 percent from the year before. This dramatically impacted their profitability. We are encouraged, however, that the group's order rate and backlog was up significantly in the second half of the fiscal year as a result of a strong marketing effort."

Robbins & Myers, Inc. designs, manufacturers and markets an array of fluids handling and motion control products for markets around the world. The Fluids Handling Group manufactures progressing cavity pumps for a variety of industrial and municipal applications. The Motion Control Group manufactures AC motors, DC servo systems and optical encoders for office and industrial automation applications.

The company is traded on the NASDAQ/NMS under the symbol ROBN.

#90276p0913 10/03/1990 ~PR Newswire

ATLANTA (OCT. 3) PR NEWSWIRE - The following announcements were made today by

Electromagnetic Sciences Inc. (NASDAQ: ELMG):

(a) The company has undertaken a program to strategically restructure resources in its microwave operations, which will result in a special charge of approximately $3.4 million to operating income in the third quarter ended Sept. 30. The company expects its restructuring program to contribute to improved productivity and profitability in 1991 and future periods.

(b) The company has adopted a long-term objective of increasing the visibility and independent stature of its LXE subsidiary, and thus expects to effect a public offering of stock in its LXE subsidiary when market conditions are appropriate.

(c) The company will seek to repurchase up to 1 million shares of its currently outstanding 7,077,000 shares of common stock.

RESTRUCTURING PROGRAM The company said that operations in the third quarter before the restructuring charge produced approximately the same result as for its second quarter. Thus the company expects to report an after-tax loss of approximately $1.95 million for the third quarter, or $.28 per share. Announcement of the final third quarter results is expected near the middle of October. While the company does expect normal operations to show improvement in the fourth quarter compared to the earlier quarters, the year as a whole will show a loss as a result of the restructuring charge.

Dr. John E. Pippin, chairman and CEO, made the following statement: "We believe that our restructuring program will allow our microwave operation to achieve significant improvements in efficiency and productivity and position us to return to a more rewarding level of profitability in our marketplace.

"Recognizing the increasing pressures in the defense market, we have for some time pursued a strategy based on diversification of our markets towards commercial and international sales, intensification of research and development effort, and careful management of resources. I believe that this strategy is producing positive results. Revenues for products directed toward U.S. government end-use in 1987 were 75 percent of the total, while commercial and international revenues accounted for 25 percent of the total. In 1988, the commercial and international share rose to 32 percent, in 1989 it was 41 percent. In the first six months of 1990, commercial and international revenues were 46 percent of the total. And 52 percent of the orders received in the first six months of 1990 were in the commercial and international arena.

"Our R&D efforts have allowed us to introduce innovative proprietary concepts for the design and manufacture of ferrite phase shifters and switch networks having attractive size, weight, performance, and cost advantages. These have significant potential in both commercial and military satellites, and the phase shifters are being produced in very large quantities on a current defense

program for airborne phased array radars, a program that is expected to continue for many years.

"These and other technologies provide us the opportunity to participate in the emerging commercial satellite markets. Our hybrid and monolithic technologies are being applied to complex switching networks for a major commercial satellite program. In addition, we recently received a small study contract from Satellite Communications, a Strategic Business Unit of Motorola, to develop a 'proof-of-concept' planar phased array antenna for the Iridium Satellite system, using similar technologies.

"Our commitment to quality in our manufacturing processes has helped us win multi-million dollar programs for manufacture of hardware for spacecraft, missiles, and anti-submarine warfare systems. And we have recently learned that the company expects to receive contracts in the fourth quarter for initial development of hardware for two electronic warfare systems which appear to have significant potential for production orders in future years.

"So, as reflected by orders and revenues, our strategy is producing positive results in diversification of markets while strengthening our position in the defense area. And, as previously stated, profitability is expected to improve in the fourth quarter.

"But as we enter the 1990s, it is becoming clear that, to be truly successful in our microwave business, we must improve our productivity, provide more efficient systems for manufacturing and testing our products, and streamline our management organization to provide effective and immediate attention to opportunities provided by our customers as well as more efficient direction of internal operations. In large part these needs are brought on by declining defense budgets and a U.S. government appetite for increasingly complex hardware at a lower price. They are also a result of opportunities to apply our new technologies in small commercial satellites, if our production of satellite hardware can move from 'hand-crafting' to more efficient production lines.

"Therefore, I have directed that our microwave operation undertake an aggressive program to consolidate its facilities, eliminate excess capacity, and streamline its management and organizational structure, in a manner consistent with the nature and quantity of business opportunities that we now foresee. I have also directed that our microwave oepration improve its manufacturing and test processes and tooling to provide cost-effective, high-performance solutions for future requirements of the military and commercial satellite markets. These actions will result in a charge of approximately $3.4 million to operating income in the third quarter. They will contribute to the furtherance of our program of diversification into commercial and international markets, while strengthening our position in the defense market. And they will result in improved productivity in the microwave operations which will, I believe, be reflected in improved financial

performance."

LXE VISIBILITY The company's LXE subsidiary, which currently accounts for a majority of the company's commercial and international business, provides a variety of wireless digital data communications products for use in the area of materials handling and inventory control. Pippin said: "During the past two years, LXE's R&D effort has added new capability to its systems, providing terminals with integrated radios meeting international standards, intelligent network controls with non-stop, fault-tolerant processing, and the capability for RF coverage of large areas. This has allowed us to enter additional markets in factory automation and intermodal transport industries. In the third quarter of 1990, a new record of LXE orders was achieved.

"We believe that our long-term objective should be to increase LXE's visibility and to change its status from that of a wholly owned subsidiary. Therefore, when conditions in the market appear to be appropriate, we expect to make a public offering of LXE stock as a subsidiary of our company."

REPURCHASE OF COMMON SHARES In connection with the repurchase of common stock, Pippin stated: "We remain confident of our company's fundamental strengths and of its ability to succeed in our marketplace. Our current expectations are that in 1991 our profitability will be significantly improved over that reported in 1989. Yet it does not appear to us that the company's fundamental strengths are reflected in the market price of its stock, which has become deeply depressed over the last two years. We believe that a share-repurchase program, while providing greater liquidity to those shareholders who wish to sell their shares, will benefit remaining shareholders with higher earnings per share, if, as we expect, the company returns to higher levels of profitability in the future.

"The company thus will seek to repurchase up to 1 million shares of common stock. Purchases within the 1-million share limit may be made from time to time as deemed advisable by management, based on the availability and market price of the shares. The board's authorization, under which the company is acting, does not specify maximum prices that may be paid or any time limit for completing the purchases."

BLUE BELL, PA (OCT. 3) PR NEWSWIRE - U.S. Healthcare (NASDAQ: USHC) today announced it will receive $2 million in settlement of its defamation lawsuit against Independence Blue Cross (formerly Blue Cross of Greater Philadelphia), Pennsylvania Blue Shield and Blue Cross former President David Markson.

Blue Cross and the other defendants agreed to pay the $2 million less than 72

hours before the U.S. Supreme Court rejected their petition for review of an appellate court decision that rejected their claim that healthcare advertisers may legally publish false or misleading statements in certain circumstances under the cloak of Constitutional protection.

The lawsuit was originally brought by U.S. healthcare in 1986 to combat what it claimed was false advertising and scare tactics by Blue Cross and Blue Shield aimed at U.S. Healthcare's health maintenance organizations which had won over many Blue Cross subscribers.

U.S. Healthcare president Leonard Abramson said, "The settlement vindicates our position with respect to the advertising. We hope that it benefits all purchasers of health care by establishing that health care advertisers will be held to standards established by state and federal law for all advertising," he added.

U.S. Healthcare Inc. is one of the nation's leading operators of health maintenance organizations (HMOs), with 1 million members in the mid-Atlantic, Greater New York and New England marketplaces. U.S. Healthcare is dedicated to providing quality health services to its members while aggressively seeking solutions to the spiraling costs facing the healthcare system.

OAK BROOK, IL (OCT. 3) PR NEWSWIRE - Spiegel, Inc. (NASDAQ-NMS: SPGLA), the nation's largest in-home catalog company, and Binney & Smith, a subsidiary of Hallmark Cards, Inc. and makers of Crayola products, today announced the signing of a letter of intent giving the upscale retailer exclusive license to design, manufacture and market a new line of children's apparel and accessories called "Crayola Kids." The venture, under which Spiegel would develop specialty catalogs and retail outlets for the line, brings together two of the country's most recognized brand names in the women's and children's markets.

"This agreement unites the know-how of two leaders in their industries and the result will provide additional new growth opportunities for Spiegel," said John J. Shea, president and chief executive officer of the company. "The power of the Spiegel and Crayola brand names gives us five generations of brand equity, brands consumers grew up with and respect."

"We're pleased that our Crayola brand will be associated with Spiegel in the children's apparel category," said Rich Gurin, president and chief executive officer, Binney & Smith. "This is a positive and natural extension for the Crayola brand name."

Spiegel plans to introduce the line of boys' and girls' apparel in infants', toddlers' and children's sizes through a section of the Fall 1991 Spiegel general catalog, and develop a Crayola Kids clothing and accessories specialty catalog for Spring 1992. In addition, the company plans to expand the concept into an innovative specialty retail chain of Crayola Kids stores. The Crayola brand's well-known palette of colors will be key to the product line.

Spiegel recently has been searching for an appropriate opportunity to broaden its business in the children's apparel category.

The children's market has been growing at a rapid pace in recent years and spending jumped approximately 25 percent in 1989, according to industry sources. An estimated $75 billion will be spent on the nation's 43.9 million children ages 12 and under this year.

Binney & Smith Inc., an Easton, Pa.-based company, manufactures a complete line of creative art materials for children and adults under the Crayola and Liquitex brand names. Hallmark Properties, Kansas City, Mo., is the licensing and concept development arm of Hallmark Cards.

Spiegel Inc. is the nation's largest in-home cataloger and a leading specialty retailer. Wholly owned specialty retail subsidiaries are Eddie Bauer Inc. and Honeybee Inc. Spiegel's Class A non-voting common stock trades on the NASDAQ National Market System under the ticker symbol SPGLA.

#90276p0918 10/03/1990 ~PR Newswire

DETROIT (OCT. 3) PR NEWSWIRE - Detroit Edison (NYSE: DTE) today announced plans to add natural gas burning capability at its Greenwood Power Plant near Avoca, Mich., providing the option to burn either gas or oil. Avoca is located about 15 miles west of Port Huron.

Under plans approved by the Michigan Air Pollution Control Commission, the adaptation of Greenwood to a dual fuel burner is scheduled for completion by the summer of 1991 at a cost of about $6 million. The plant currently is the only one in the Detroit Edison system that burns only fuel oil. However, the oil that it burns is residual oil, a material that is left after the refining process that produces gasoline and other light oils.

"The addition of natural gas offers an environmentally acceptable fuel that we believe provides better flexibility and stable pricing for the utility's customers," said Frank E. Agosti, senior vice president for Detroit Edison. "Currently, with the Middle East situation, the cost of oil is twice that of

natural gas on a Btu or heat value basis.

"The change will allow us to economically operate Greenwood," Agosti said.

"Dual fuel will provide our customers with a valuable option at Greenwood. Based on availability and pricing at any particular time, we will be able to choose which fuel or combination of fuels to use at the plant," he said.

The 785-megawatt Greenwood Power Plant began commercial operation in July 1979 and is primarily operated only at times of high customer demand for electricity or when other company facilities are undergoing maintenance outages.

Ninety-eight percent of the electricity produced by Detroit Edison is fueled by domestically available coal and nuclear power, whose price and supply are less captive to world events and artificial pricing.

CONTACT: Lorie N. Kessler, 313-237-8807, or Martin L. Bufalini II, 313-237-8808, both of Detroit Edison

JERSEY CITY (OCT. 3) PR NEWSWIRE - In the next week or two, National Westminster Bank NJ will be moving commercial loan officers and bank specialists in cash management, trade finance, personal trust, private banking and other areas into new offices in Teaneck at Glenpointe Plaza.

According to the bank, 45 employees will be relocating to Teaneck. While some bank specialists will be moving to Teaneck from Jersey City, the bulk of NatWest's Glenpointe office staff will be commercial loan officers, who have been working in Hasbrouck Heights. The bank's Glenpointe office will focus on serving small to mid-size businesses, core markets of NatWest NJ.

"Strategically, we feel that we can better respond to the needs of our commercial customers by housing bank specialists and loan officers together in one location," says L. Douglas O'Brien, the Bank's chief executive officer. "This approach works well for us in New York, and our commercial customers in Northern New Jersey will be served even better by this realignment."

National Westminster Bank USA, NatWest NJ's New York-based affiliate, opened commercial loan offices, housing both loan officers and bank specialists, in Jericho, Long Island in 1984 and White Plains in Westchester in 1985. In addition to opening offices, it also created specially designed products for mid-sized customers in such areas as cash management, trade finance, and treasury.

"We already have a wide array of products designed for our commercial

customers and are looking for the most advantageous way to deliver them," says O'Brien. "Our focus is on bringing the resources of the bank near the customer."

Senior Vice President Greg Lageman, New Jersey Markets Group, will be the senior NatWest NJ officer in Teaneck. He oversees lending to mid sized firms, defined by the bank as those from $5 million to $250 million in annual sales, in Hudson and Bergen Counties. Handling firms under $5 million in annual sales will be Carmen Trimarchi, vice president, who had been based in Fort Lee.

NatWest NJ will have 9,000 feet of office space at Glenpointe Plaza, 1,500 more than it had in Hasbrouck Heights. The bank also serves commercial customers from offices in Cherry Hill, Bridgewater, and also Atlantic City, Wall Township and Jersey City.

National Westminster Bank NJ, headquartered in Jersey City, is a subsidiary of National Westminster Bancorp, which has $22 billion in assets and 260 offices in New York and New Jersey.

SOUTHINGTON, CT (OCT. 3) PR NEWSWIRE - The board of directors have announced the planned retirement of Ralph G. Mann, president and CEO, for Dec. 31, 1991. Robert D. Morton will be joining Southington Savings Bank (NASDAQ: SSBB) on Nov. 5, 1990 as executive vice president, and chief operating officer, and upon Mann's retirement will succeed him. Morton has also been elected to the board of directors of Southington Savings Bank.

Morton comes to Southington Savings Bank with a wealth of experience and a strong banking background. Since 1971 he has been with Fleet of Connecticut and for the past three years, has served in the capacity of executive vice president, where he has managed the Money Management Division and Investment Banking Group.

Morton graduated with honors from the University of Connecticut with a B.A. in economics. He has also received a Masters in economics from Trinity College in Hartford, Conn.

The board of directors feel fortunate in being able to turn the management of Southington Savings Bank over to an individual so well qualified. Morton has stated, he looks forward to working with Mann during the coming year to insure a smooth transition.

Mann will have served the bank for 37 years at his retirement, and since 1982 as president and chief executive officer. Mann will remain a director of the

bank, and maintain an active interest in the bank.

#90276p0930 10/03/1990 ~PR Newswire

NEW YORK (OCT. 3) PR NEWSWIRE - Bayer Plus, aspirin plus Stomach Guard, the newest member of the Bayer product family, has been nationally introduced by Glenbrook Laboratories, the domestic over-the- counter medicines division of Sterling Drug Inc., it was announced today by Glenbrook. Shipments to the trade began on Aug. 13.

Bayer Plus, packaged in tablet counts of 24, 50 and 100, offers the benefits of 325 mg. Bayer aspirin with the addition of Stomach Guard. Stomach Guard is a mixture of active ingredients that help protect against stomach upset for users sensitive to plain aspirin.

Studies indicate that only 8 percent of consumers actually experience stomach upset with aspirin usage. Many others, however, believe that aspirin can cause stomach irritation. Bayer Plus, aspirin plus Stomach Guard, responds to the needs of these consumers who might otherwise deprive themselves of the pain relief and other advantages of Bayer aspirin.

Bayer Plus will be supported by a comprehensive consumer advertising, coupon and product sampling campaign. Direct mail will be used to explain the benefits of Bayer Plus to the medical community.

"Glenbrook recognized that consumers were concerned about stomach upset and aspirin usage. We have responded to these concerns with a genuine Bayer

product. Consumers can now realize the benefits of Bayer aspirin plus Stomach Guard for relief of body aches and pains, headaches, minor arthritis pain and, where directed by their physicians, for the prevention of second heart attacks or strokes," said Richard F. Gaccione, Glenbrook's president.

This is the second new Bayer product announced within the past year. Therapy Bayer, a 325 mg. enteric-coated aspirin caplet for use by consumers on a regular aspirin regimen, was introduced last fall.

Glenbrook Laboratories is noted for leading brand names such as Bayer aspirin, Midol pain reliever, Campho-Phenique antiseptic, Neo- Synephrine decongestant, Stri-Dex acne medication and Phillips' Milk of Magnesia. Sterling Drug Inc. is a worldwide producer and marketer of pharmaceutical and consumer health products. Guided by its Strategic Framework process and Values in Action, Sterling and its companies are a worldwide team committed to creating distinctive solutions for the needs of mankind in pharmaceutical and consumer health products.

CAMBRIDGE, MA (OCT. 3) PR NEWSWIRE - Vertex Pharmaceuticals Incorporated and Chugai Pharmaceutical Co., Ltd., of Tokyo, Japan, announced today that they have signed an agreement to design and develop novel, orally active immunosuppressive drugs for the treatment of organ transplant rejection and autoimmune disorders such as insulin-dependent diabetes, rheumatoid arthritis, and psoriasis.

Chugai's investment in Vertex's program will total over $30 million by the time certain development goals necessary for product commercialization are achieved. The agreement with Chugai is Vertex's first strategic collaboration with a major pharmaceutical partner.

Under the terms of the agreement, Chugai will provide funding to support a five-year research effort at Vertex, called the Immunophilins Program, and will purchase a small equity interest in the company. As drug candidates are identified, Chugai will undertake the clinical development and commercialization of the immunosuppressive drugs in the Far East, their exclusive territory.

Chugai is a leading, research-based pharmaceutical company which develops and manufactures oncology, cardiovascular, metabolic and gastrointestinal drugs. The company has a growing commitment to the products of biotechnology. Chugai scientists have developed a recombinant Granulocyte-Colony Stimulating Factor, which is now in clinical development internationally for the treatment of bone marrow transplants, leukemia and various other cancers. The company launched

its recombinent erythropoietin product (Epogin)(tm) in Japan last April for the treatment of anemia associated with renal failure. The erythropoietin product, which will be marketed under the brand name Marogen(tm) in the United States, was in-licensed from Genetics Institute and developed in collaboration with Chugai-Upjohn, Inc., a joint venture in which Chugai is the majority shareholder. Marogen is currently begin reviewed by the FDA for approval in the United States. In addition, more than $170 million worth of Chugai's pioneering anti-ulcer product Carafate(R) was sold last year by its U.S. licensee.

Vertex is a privately held company founded in January of 1989 to develop human therapeutics through the integrated application of structure-based rational drug design. Vertex is using the latest advances in chemistry, biology and physics to design unique molecules based on the structural features of proteins involved in the control of disease processes. The company is focusing on three major therapeutic areas: immunology, antiviral chemotherapy and cardiovascular therapy. Vertex's goal is to become a fully integrated pharmaceutical firm by exploiting the advantages of rational drug design in the discovery and development of novel drugs.

MAYNARD, MA (OCT. 3) PR NEWSWIRE - Digital Equipment Corporation (NYSE: DEC) today announced a multi-million dollar agreement with the law firm of Mintz, Levin, Cohn, Ferris, Glovsky and Popeo, P.C., of Boston and Washington. The firm selected Digital to design and service the computer systems and networks it needs for the 1990s.

Francis X. Meaney, Mintz, Levin president, said, "For years we have been committed to the integration of technology into the delivery of client services. Every attorney and staff member involved in the delivery of legal services already utilizes technology to provide our clients with cost-effective, responsive service. As our clients expand both here and elsewhere throughout the world and a law firm does more things to service its clients better, we require more sophisticated tools to do the job for our clients.

"We believe at this time that a distributed network using Digital's Personal Computing Systems Architecture and VAX 4000 file servers to link our workstations, PCs and other devices will best meet our needs. We believe this

design will give us more usable firepower at less cost, but with greater reliability.

"Ease of communication, the ease on integration of equipment regardless of supplier and sharing of information resources throughout the world is a key advantage of the system we are designing." Richard D. Dionne, vice president of Operations at Mintz, Levin, added, "We conducted a grueling selection process. We were looking for a financially-strong and innovative firm, flexible in approach and with a proven record of reliability. We were looking for a commitment to respond to our needs over the long term.

Mintz, Levin's Information Technology staff under the direction of Steve Bilotta, director of Information Technology, will evaluate software solutions and design, with Digital, the initial configuration of the network. Mintz, Levin's 190 lawyers make it the fifth-largest law firm headquartered in Boston.

Digital Equipment Corporation, headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

#90276p0937 10/03/1990 ~PR Newswire

MIDLAND, MI (OCT. 3) PR NEWSWIRE - Althin Medical AB, of Lund, Sweden, and The Dow Chemical Company (NYSE: DOW) of Midland, Mich., USA, have signed a definitive purchase agreement in which Althin Medical will acquire 100 percent of the shares of CD Medical, a wholly owned subsidiary of The Dow Chemical Company. The agreement is subject to approval from the appropriate government agencies. The terms of the agreement were not disclosed.

CD Medical, located in Miami Lakes, Fla., is one of the leaders and pioneers in the field of renal care. The company manufactures membranes, membranes devices, and equipment used in the medical industry and introduced the hollow fiber artificial kidney. CD Medical's annual sales are approximately $60 million.

According to Anders Althin, founder and president of Althin Medical AB and former president and CEO of Gambro AB, Lund, Sweden, "The acquisition of CD Medical fits very well with the knowledge and background of our management, and there are positive synergies with Althin Medical's European sales organization. The structure of this transaction will considerably strengthen the capitalization of Althin Medical AB."

Mr. Althin added, "CD Medical is one of the few fully integrated companies in

the dialysis industry, which will make it possible for us to manufacture at low cost and develop several new products in-house. With this acquisition, Althin Medical becomes a worldwide organization with strong presence both in Europe and in the United States and it positions us for future growth."

Frank Whitley, general manager of Dow's Separation Systems Department and chairman of CD Medical's board of directors, said, "It's been known in the industry for some time that CD Medical no longer fits the long-term strategy of Dow's Separation Systems business. We're pleased to have found a buyer like Althin where the strategic fit is very strong. This will allow CD Medical to realize its full potential."

CD Medical has manufacturing sites in Miami Lakes and Portland, Ore., and sales offices throughout the world.

CONTACT: Anders Althin of Althin Medical AB in Lund, Sweden, 46-46-150155; or Cathy Gish of Dow Chemical U.S.A. in Midland, Mich., 517-636-8833.

#90276p0939 10/03/1990 ~PR Newswire

AKRON, OH (OCT. 3) PR NEWSWIRE - The three creditors' committees in the Revco D.S., Inc. chapter 11 cases, having reached agreement among themselves and with Revco's management on the terms of a reorganization plan, today filed a motion with the U.S. Bankruptcy Court for the Northern District of Ohio, eastern division, asking the court to terminate the debtors' exclusive right to file a reorganization plan, so as to allow the committees to file their own plan.

The three committees are: the official committee of unsecured noteholders, the official committee of trade creditors, and the unofficial committee of bank lenders. The committees said that their plan has been negotiated with and is supported by Revco's management. Under terms of the plan, secured creditors, comprising both bank debt and secured public debt issued before the company's 1986 leveraged buyout, would receive new secured notes. Holders of unsecured bonds issued before the leveraged buyout would receive new unsecured notes. Unsecured creditors, comprising holders of unsecured public debt and trade and other unsecured non-public debt, would receive new equity in the reorganized company. Under the further terms of the plan all potential fraudulent conveyance and other claims arising from Revco's 1986 leveraged buyout would be compromised and settled without litigation. In consideration for the compromises and settlements to be provided for under the plan, the recovery for the trade and other unsecured non-public debt would include a substantial premium, as set forth below. Existing equity would be cancelled; current equity holders would receive no recovery. Current management would remain in place.

During the exclusivity period in a bankruptcy case, a debtor-in- possession,

on behalf of the debtor's estate has the exclusive right to submit a reorganization plan to the court. In the Revco creditors' committees' motion, the court is asked to terminate the debtor's exclusive right to file a reorganization plan, so as to allow the committees' plan to be filed with the court without further delay.

Revco is an operator of retail drug stores, and filed for relief under chapter 11 of the Bankruptcy Code on July 28, 1988.

RICHMOND, VA (OCT. 3) PR NEWSWIRE - John W. Snow, president and chief executive officer of CSX Corp. (NYSE: CSX), today issued the following statement in support of the Bipartisan Budget Summit Agreement:

"The bipartisan budget package agreed to by the president and Democratic and Republican Congressional leaders is a tough but necessary dose of economic medicine for our nation. Despite reservations about various aspects of the package, I support the agreement and urge Congress to promptly enact it into law because of the overriding need to address the budget deficit crisis.

"The package imposes burdens on each one of us as individual citizens and on every sector of the economy. The railroads are called upon to pay increased retirement taxes and safety user fees. The new retirement taxes will only increase the costs of our already high payroll taxes, which are among the highest paid by any industry in the country.

"In normal times, I would be objecting vigorously to these new taxes and fees. But, these are not normal times. We will not put this difficult compromise at risk by fighting against these provisions.

"I intend to ask every member of Congress in the states we serve to support this bipartisan compromise. Prompt enactment of the agreement into law is in the best interest of the country and, therefore, in the best interest of CSX and its 53,000 employees."

CONTACT: Thomas E. Hoppin or Suzanne S. Walston of CSX, 804-782-1406.

#90276p0945 10/03/1990 ~PR Newswire

RYE BROOK, NY (OCT. 3) PR NEWSWIRE - MCI Communications Corporation (NASDAQ: MCIC) has opened the first international fiber-optic cable interconnection with Mexico. The new gateway connects MCI's domestic fiber-optic network

with Mexico's telecommunications network.

This new border crossing offers MCI's customers expanded high quality data, voice, and facsimile communications with business centers in Mexico.

"MCI's gateway into Mexico's telecommunications network via a state-of-the-art digital facility will make it easier for companies to do business effectively with Mexico," said Seth Blumenfeld, president of MCI International, MCI's international subsidiary.

"The interconnection of MCI's digital network with Telmex's network will provide higher quality communications, and relieve congestion now experienced when calling Mexico from the United States," Blumenfeld said. "This new border crossing will improve our ability to offer a variety of essential business services, from voice services to dedicated private lines, high-speed data, and facsimile services."

The first of four 140 megabit per second fiber-optic connections between MCI's digital backbone network and the network of Telefonos de Mexico (Telmex), was activated in September between El Paso, Texas and Ciudad Juarez, Mexico. Three additional fiber optic border crossings will be completed by year-end. These crossings will be at Nogales, Arizona/Nogales, Mexico; McAllen, Texas/Reynosa, Mexico; and San Diego, California/Tijuana, Mexico. Before the end of the year, the MCI/Telmex connection will have a capacity equal to more than 7,600 circuits, each capable of carrying several telephone calls or digital private line services.

The activation of the newly constructed fiber-optic facilities between MCI and Telmex took place less than eight months after the agreement between the two companies was signed.

Mexico is one of the three largest telecommunications partners with the United States. The interconnections between MCI and Telmex will pave the way for more advanced offerings including MCI CALL USA, MCI International 800 Service, digital data, dedicated private lines, and other services.

MILWAUKEE (OCT. 3) PR NEWSWIRE - The board of directors of Universal Foods Corporation (NYSE/PSE: UFC) today declared a 12 percent increase in the company's regular quarterly dividend on common stock. The new dividend is $.19 per share, up from $.17 per share. The increased dividend will be paid on Nov. 8, 1990 to shareholders of record Oct. 25, 1990.

Guy A. Osborn, chairman and chief executive officer of the company, said, "We

are pleased to announce this dividend increase. The directors felt such action is appropriate in view of the excellent fiscal year just completed and the company's prospects for continued strong earnings. It is the sixth dividend increase in four years and almost a 120 percent increase in the dividend rate over that time.

Universal Foods is an international manufacturer and marketer of value-added food products. These include food flavors, food colors, the world's most diversified lines of frozen potato and yeast products, and dehydrated vegetables.

JACKSONVILLE, FL (OCT. 3) PR NEWSWIRE - Winn-Dixie Stores, Inc. (NYSE: WIN), the Sunbelt's largest retailer, at its annual shareholders' meeting today announced sales of $2,284,662,000 for the first 12 weeks vs. $2,169,619,000 last year, a 5.3 percent increase. Net earnings were $24,393,000 or $0.62 per share for the 12 weeks ended Sept. 19, 1990, compared to $25,052,000 or $0.63 per share for the 12 weeks ended Sept. 20, 1989.

James Kufeldt, president, stated: "The first quarter results were impacted by the implementation of the Every-Day-Low-Price program in our largest division. Operating expenses were affected by the start-up costs of the new distribution center in Hammond, La. We also invested in additional training during the first quarter having all 31,246 cashiers go through a newly developed program with improved emphasis on our customer service commitment."

Shareholders re-elected J. Shepard Bryan Jr., Armando M. Codina, A.D. Davis and Radford D. Lovett as directors for three-year terms expiring in 1993. The shareholders also took action to increase the number of authorized shares from 50 million shares to 100 million shares to implement the 2-for-1 stock split to be effective Oct. 31, 1990. Approximately 39,670,000 shares are currently outstanding.

The board of directors today declared dividends in the amount of $0.09 cents per share per month on a post-split basis for the months of November and December 1990, payable on Dec. 3, 1990 and Jan. 2, 1990, to shareholders of record on Nov. 15 and Dec. 17, 1990, respectively. The dividend rate reflects a 9.1 percent increase effective since July 1990.

The board of directors elected Dan G. Lafever, 42, a vice president. Lafever is the division manager of the Orlando Division and has 24 years of service.

Winn-Dixie opened 11 new stores, averaging 38,000 square feet, closed six older stores averaging 24,400 square feet and remodeled or enlarged nine store

locations, having 1,222 locations in operation on Sept. 19, 1990 compared to 1,227 last year. Twenty-seven new stores are under construction.

#90276p0953 10/03/1990 ~PR Newswire

DETROIT (OCT. 3) PR NEWSWIRE - Philip Caldwell, who successfully led Ford Motor Company (NYSE: F) through some of its most trying and challenging times, will be inducted into the Automotive Hall of Fame tonight in ceremonies at the Detroit Westin Hotel.

The Automotive Hall of Fame annually inducts men and women who have made significant contributions to the automotive industry. It was founded in 1939 and is located in Midland, Mich.

Succeeding Henry Ford II, Caldwell became chief executive officer of Ford Motor Company in October 1979, and chairman of the board in March 1980. He retired from the company on Feb. 1, 1985, and is now senior managing director of Shearson Lehman Brothers Inc. in New York City.

Caldwell was the first non-member of the Ford family to head Ford Motor Company in modern times, but he is remembered for far more than that.

It was he who led the dramatic turnaround of Ford during his tenure from 1980 to 1985 as chairman and chief executive officer. With an emphasis on the fundamentals -- innovative products for consumers, best quality, lowest cost, and genuine cooperation and teamwork throughout the work force -- Ford's turnaround was a major contribution to the U.S. automobile industry, and became a model widely copied throughout American industry.

Caldwell made quality Ford's No. 1 objective, achieving a 50-percent improvement. During his tenure, 47 new-model cars and trucks were introduced worldwide, including the pioneering aerodynamic designs which won broad acceptance for Ford products and influenced automotive design throughout the world. Under his leadership, the company reduced operating costs by $5 billion annually while authorizing record expenditures of $21 billion for new products, plants, machinery and tooling.

The results of Caldwell's leadership were impressive. The company increased its U.S. market share from 16.6 percent in 1981 to 19.2 percent in 1984. Following record losses of $3.3 billion in the automotive depression years of 1980-82, Ford achieved record profits in 1983 and 1984. Stockholders saw the per-share value of their holdings skyrocket fivefold from 1980 to 1985.

Much of Caldwell's success at Ford can be attributed to his skills as business

strategist, motivator and manager. He was the first automotive chairman to go to the bargaining table and to sign a national labor agreement, including the first and most successful major profit-sharing agreement in the industry.

CONTACT: Tom Foote of Ford, 313-322-9600.

#90276p0956 10/03/1990 ~PR Newswire

WEST ORANGE, NJ (OCT. 3) PR NEWSWIRE - Micro Healthsystems, Inc. (NASDAQ: MCHS) announced today that it has reached agreement with Baxter Healthcare Corporation, a subsidiary of Baxter International (NYSE: BAX) to distribute its MedTake(R) Patient Care System. The marketing agreement "is designed to enable our MedTake System to capitalize upon its already dominant position in the North American marketplace by providing increased marketing and sales focus," according to S. M. Caravetta, Micro Healthsystems' chairman. "MedTake will also concentrate on the expansion of its Bedside Nursing Patient Care System in usage in ICU/CCU, emergency rooms and other hospital departments, sharply accelerating our potential growth in sales and profits," he stated.

In describing the market opportunity, Caravetta noted that "Bedside Charting and Patient Care Systems was judged to be the new growth areas for the 1990's in hospital automation by 87 percent of the managers of information systems at a recent HIMSS convention in New Orleans. This, coupled with an Arthur D. Little study which predicted that by 1996 most U.S. hospital beds will be serviced by these units, creates a highly focused market opportunity for Micro Healthsystems and Baxter."

Under the agreement, Baxter will establish a business unit including a dedicated sales force, for the exclusive distribution of the MedTake Bedside Nursing Patient Care Systems in the United States and Canada.

Although Baxter will be the exclusive distributor, the contracts for installation of the system and ongoing hardware and software service agreements will be signed by the hospitals and MedTake. Caravetta added that these five-year service licensing agreements call for MedTake to directly receive maintenance, up-grade and renewal fees.

Said Lester B. Knight, president of the Parenterals Division of Baxter Healthcare Corporation: "This new technology has the potential for explosive growth. It clearly is the leader in nursing productivity systems, one of the primary growth areas in the next decade. The benefits derived from the system will help hospitals make major strides in their efforts to deal with the widespread nursing shortage. The integration of MedTake with our devices will certainly add incremental value for our customers."

While the MedTake system and its integration with Baxter devices will be serving an important need in the marketplace, Knight added that "the marketing

alliance will also accelerate the interests of both of our companies. We are particularly excited to have it join our expanding portfolio of products and services designed to assist the nursing community and to explore the opportunities to complement the efforts of Spectrum Healthcare Solutions, a partnership formed of subsidiaries of IBM and Baxter."

Caravetta added that "this new relationship re-enforces the already excellent growth trend demonstrated by Micro Healthsystems." For the first quarter ended June 30, 1990, Micro Healthsystems reported a 66 percent increase in sales to $2,705,000 from $1,627,000 and a 106 percent increase in earnings to $452,000, or $.22 per share, from $219,000, or $.12 per share. For the year ended Mar. 31, 1990 sales were a record $7,449,000 up 40 percent from $5,321,000, and net earnings rose 147 percent to $911,000 or $.49 per share.

In addition to its Bedside Nursing Patient Care Systems, Micro Healthsystems offers hospital clients a series of Healthcare Financial Management products, including an Inpatient Management System; an Integrated Hospital Financial System; a Home Care Management System; a Physician's Billing and Management System for hospital-based and private physician group practices; and a facilities management program for out- patient billing and accounts receivable to hospitals, utilizing Micro Healthsystems' own staff.

Baxter Healthcare Corporation is the primary U.S. operating subsidiary of Baxter International, headquartered in Deerfield, Ill. Baxter is the leader worldwide in manufacturing and marketing of healthcare products and services.

CONTACT: S. M. Caravetta, chairman, or Walter Cruickshank, treasurer, both of Micro Healthsystems, 201-731-9252; or Greg Young of Baxter Healthcare, 708-270-4802

#90276p0960 10/03/1990 ~PR Newswire

SMITHTOWN, NY (OCT. 3) PR NEWSWIRE - United-Guardian, Inc. (AMEX: UG) today announced that it is beginning commercial distribution of Renacidin(R) Irrigation, its patented new drug for dissolving certain types of kidney stones.

The company expects to make the first shipments of Renacidin Irrigation in eight to 12 weeks, and sales are expected to reach $4-6 million during the first full year of marketing, which should contribute pretax earnings of approximately $.20 to $.30 per share, according to Dr. Alfred R. Globus, United-Guardian's chairman and chief executive officer.

Renacidin Irrigation may be used to completely dissolve certain types of kidney stones, offering an alternative to surgery, which involves a high degree of risk. It can also be used in conjunction with lithotripsy or laser treatments, which break up stones but can leave fragments which, if not

completely removed or dissolved, can provide a base around which other stones may form.

"We are very pleased to be able to make Renacidin Irrigation available to thousands of kidney stone sufferers in the United States We anticipate that this product will be a tremendous success for the indicated types of treatment " Globus said. He noted that the recently approved patent protection substantially increases the period of exclusively over the orphan drug status already accorded the product.

Renacidin Irrigation will be marketed through full-line wholesalers to major hospitals throughout the United States, as well as to clinics and nursing homes. This product is non-pyrogenic and ready to use in sterile form. In addition to dissolving certain types of kidney stones, it can be used to prevent build-up of calcium deposits in indwelling urinary catheters or in the bladder.

Full product information is available on request. United-Guardian, Inc. develops and manufactures pharmaceuticals, specialty and fine chemicals, and cosmetic bases for a wide range of industries.

MANHASSET, NY (OCT. 3) PR NEWSWIRE - Oncogene Science, Inc. (NASDAQ: ONC), announced today that John R. Stephenson, Ph.D. has been appointed executive vice president and chief scientific officer for Oncogene Science.

In this capacity, Stephenson will have overall responsibility for the scientific management of the company, including outside scientific collaborations with institutions and corporate partners, such as the current Pfizer cancer therapeutics collaboration in which Pfizer recently announced its desire to extend for a multi-year period.

Stephenson was a founder of Oncogene Science, Inc., which was started in 1983, and also serves as a member of the company's board of directors. He previously served as chief of the Carcinogenesis Section at the National Cancer Institute.

Oncogene Science, Inc., using proprietary oncogene-related and growth factor technologies, is in the business of developing biopharmaceutical products for the research, diagnosis and treatment of cancer and other cell control-linked diseases.

Bio-Technology General Corp. is engaged in the research, development and

manufacture of genetically engineered products for human and animal health care.

CONTACT: Robert L. Van Nostrand of Oncogene Science, 516-365-9300, or Claudia Mueller or Anthony J. Russo of Noonan/Russo Communications, 212-979-9180, for Oncogene.

ALLENTOWN, PA (OCT. 3) PR NEWSWIRE - Penn Treaty American Corp. (NASDAQ: PTAC) today announced that it has authorized the purchase from time to time of up to an additional 50,000 shares of its common stock, in open market transactions or otherwise at available prices.

The company has been informed that Irving Levit, chairman of the board, and members of his family may also purchase shares of the common stock.

The company previously announced in August 1990 that it had authorized the purchase of up to 50,000 shares of its common stock. Since that date, the company has purchased 43,000 shares of its common stock in open market transactions pursuant thereto.

The company said that the prior purchases were made and the additional purchases were authorized because it believes the market price of its common stock is less than the underlying value thereof. The company also said the timing and the number of shares which may be purchased each day, will be in line with SEC rules and market conditions.

General funds of the company will be used to purchase the shares for the company. Personal funds of Levit and his family will be used for their purchases. At the present time, there are approximately 3,175,448 shares of common stock outstanding.

Penn Treaty American Corp., through its direct and indirect wholly owned subsidiaries, is primarily engaged in the underwriting, marketing and sale of individual, fixed, defined benefit accident and health insurance policies covering principally long-term skilled, intermediate and custodial nursing home care and home health care.

WAYNE, PA (OCT. 3) PR NEWSWIRE - Orthopedic Services, Inc. (NASDAQ: OSII) today announced the promotion of Thomas R. Bart, C.O. Midwest regional president to the newly created position of corporate vice president of development, and Brian G. Murphy from the position of vice president to president of the Midwest region, and the appointment of Thomas M. Nojunas to eastern regional president.

Tom Bart, past president of the American Orthotic and Prosthetic Association (AOPA), the industry trade organization, has 25 years of experience in the fields of orthotics and prosthetics. His responsibilities will include periodic visits to OSI regions and branches to discuss industry issues, solutions and new ideas with company practitioners. In addition, Tom will attend to O&P industry relations and the further development of the company's government relations program.

Brian G. Murphy has been with OSI since June of 1989. Previously, he held several positions at Heritage Health Systems, Inc., an HMO management company. Most recently at Heritage, he was president and C.O. of AmeriPlan, an 80,000 member HMO in Atlanta.

Tom M. Nojunas has an extensive background in rehabilitation services as the former CEO of Bryn Mawr Rehabilitation Hospital located outside Philadelphia.

"The promotion and appointment of these three individuals maximizes the value of their individual experience to OSI," said OSI president, Jeffrey S. Levitt. He added, "Tom Bart's 25 years of O&P experience will enhance the perspective of the OSI corporate team. Brian Murphy's management experience will be key in the further development of OSI's midwest region, the company's largest region, and Tom Nojunas's familiarity with physicians, therapists and others who are instrumental to the rehabilitation team will play an important role in

the development of the company's newer eastern region."

Orthopedic rehabilitation is the fitting, design and fabrication of custom-made braces and support devices for the treatment of musculoskeletal conditions resulting from illness, injury or congenital abnormalities. Prosthetic rehabilitation is the fitting and fabrication of custom-made artificial limbs required by people who have suffered the loss of a limb from vascular disease, diabetes, cancer or traumatic injuries.

OSI is the largest provider of patient care services in the orthotic and prosthetic rehabilitation segment of the healthcare industry. OSI currently provides services through 56 patient care centers in 13 states.

SAN JOSE, CALIF. (OCT. 3) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) today announced a licensing agreement with Adobe(R) (NASDAQ: ADBE) for Display PostScript(R) to run on the entire line of IRIS 4D(TM) workstations. This will be the first 32-bit color implementation to run under industry standard X(TM) and will be integrated into the Silicon Graphics operating system.

Silicon Graphics will combine the standards X and OST/Motif(TM) with the publishing standard Display PostScript to enhance support for color publishing software development. Integrating Display PostScript, X and Silicon Graphics's Graphics Library(TM) imaging models into one system will provide tremendous flexibility for developers and users. Developers will be able to choose the imaging model most appropriate for their applications. This support will make Silicon Graphics the first open platform for full color publishing.

Support for Display PostScript will provide Silicon Graphics' users with true WYSIWYG (what you see is what you get) between their display and their printer, support for Adobe Type 1 fonts and access to the entire Adobe Type Library.

"The computer power required by color publishing has made this market a prime growth area for UNIX workstations. Our leading graphics and CPU power combined with Display PostScript support will enhance the IRIS 4D workstation platform for color publishing software developers," commented Ed McCracken, president and chief executive officer of Silicon Graphics. "We are excited to be working with Adobe and to be offering solutions based on the PostScript standards."

Silicon Graphics Inc. is the leading manufacturer of high performance workstations and computing systems for visual processing applications. These workstations are used by engineers, scientists and creative professionals in the design, analysis, manufacture and simulation of three dimensional products.

IRIS is a registered trademark and IRIS 4D and Graphics Library are trademarks of Silicon Graphics Inc. X Window System is a trademark of Massachusetts Institute of Technology. Motif is a trademark of the Open Software Foundation Inc. Adobe and Display PostScript are registered trademarks of Adobe Systems Inc. UNIX is a registered trademark of UNIX System Laboratories Inc.

CINCINNATI (OCT. 3) PR NEWSWIRE - Chiquita Brands International, Inc.'s (NYSE: CQB) John Morrell & Co. unit, one of the largest U.S. full-line meat packers and processors, announced today the purchase of the Dinner Bell(TM) brand of processed meat products and a closed processing facility in Wilson, N.C., from Dinner Bell Foods, Inc. in Defiance, Ohio.

The purchase price was not disclosed.

"The Dinner Bell(TM) brand is an attractive addition because its quality image is in keeping with John Morrell's philosophy of producing the best-quality products," said Milton J. Schloss, John Morrell chairman. "We will continue to use the same high standards and formulas which have built strong consumer confidece in this brand." The acquisition of the long-established Dinner Bell(TM) brand includes the trademarks, formulas and package designs that have made it a leading regional brand.

The product line includes hot dogs, sliced luncheon meat, smoked sausage, sliced bacon and smoked ham. The brand's revenues totaled approximately $100 million in the last year.

The pre-existing sales organization will continue to service the Dinner Bell(TM) brand customers.

Chiquita Brands, headquartered in Cincinnati, is a leading international marketer, processor and producer of quality fresh and prepared food products. Revenues in 1989 were $3.8 billion.

COLUMBUS, IN (OCT. 3) PR NEWSWIRE - In a joint statement today, Arvin Sango, Inc. (ASI), the city of Madison, and the Madison Industrial Development Corporation (MIDCOR) announced an $18 million expansion of Arvin Sango's current production facility in Madison, Ind. Arvin Sango, Inc., is a 50-50 joint venture between Arvin Industries, Inc. (NYSE: ARV), and Sango Company, Ltd., to manufacture automotive parts in North America. The expansion project will include investment in both new plant and manufacturing equipment to support additional automotive parts contracts, significantly broadening the company's manufacturing capabilities.

The Arvin Sango expansion will increase the company's manufacturing facility by approximately 104,000 square feet to a total of 223,000 square feet, bringing with it approximately 150 new jobs, equal to ASI's current Madison employment. Approximately two-thirds of the company's investment will be used to purchase additional muffler manufacturing equipment and 10 heavy duty stamping presses capable of delivering up to 500 tons of force.

Stamping operations will be housed in a specially designed press gallery in the new addition. New automotive products produced in the press gallery will include gas tanks and structural body parts.

Speaking for the city of Madison, Mayor Morris Wooden stated, "I appreciate Arvin Sango's commitment to Madison and consider ASI to be a real asset to the community. The city is also appreciative of the quality work force in the area which attracts companies such as ASI to invest and expand in Madison." The mayor added that the city hopes to further strengthen the number of qualified workers in Madison by making a training grant available to ASI for the new employees it will be hiring. He closed by saying, "The city is looking forward to a great future with Arvin Sango."

Thomas Hambrick, president of MIDCOR, speaking for all the MIDCOR board members, congratulated ASI on its success and its continued growth in Madison.

Gregg Notestine, secretary and treasurer of Arvin Sango, stated, "Arvin Sango's growth and success is based upon the support ASI receives from the community and the diligent efforts of the ASI members who are drawn from the surrounding region."

Arvin Industries, Inc., an Indiana corporation, is a global company whose products are sold in more than 100 countries in North and South America, the European Common Market, the Pacific Rim and the Third World.

#90276p1007 10/03/1990 ~PR Newswire

SAN JOSE, CA (OCT. 3) PR NEWSIWRE - Radius Inc.(TM) (NASDAQ: RDUS), today announced a Macintosh technology for the compression, storage, and decompression of still images. The technology, shown for the first time at Seybold, can achieve compression ratios of megabyte images of up to 50-to-1 in only a few seconds. This allows large still images to be reduced for easier storage, manipulation and transmission. A Radius product based on the technology will ship in the fourth quarter of 1990 and will list for approximately $300.

The large storage capacity required for full color images is a major inhibiting factor in desktop publishing. When a typical digitized four by seven inch, 300 dpi color photograph represents as much as 7.6 megabytes, image size becomes an issue. Radius' compression technology rapidly compresses 24, 16, or 8-bit color images and 8-bit gray scale images. At compression ratios of up to 50-to-1, disk capacity can be greatly enhanced.

A software compression solution provides optimum price/performance for publishing applications that deal with still images. Software is flexible and cost effective. A software solution can cost as little as $200 to $400, while a hardware solution can cost from $1,000 to $2,000.

Compressed data requires less time to transmit over networks and modems. The Radius compression technology will increase network bandwidth and reduce transmission costs. The Radius compression technology is fast as well as efficient. For example, a three-quarter megabyte, full color 24-bit image can be compressed to 25K in less than six seconds on a Macintosh IIcx and under three seconds on a Macintosh IIfx.

The Radius technology conforms to the international Joint Photographic Experts Group (JPEG) standard, enabling cross platform transfer and worldwide exchange of data. JPEG will establish a common compression format, allowing easy transfer and exchange of picture data among many software and hardware environments. Because the Radius compression technology is software based, it readily provides the flexibility to accomodate any revisions in the JPEG proposal as it is currently evolving.

Radius Inc. is the leading supplier of high performance visual computing systems for personal computers. Radius products are available through a worldwide network of Radius Authorized Resellers and System Integrators. Public since August 1990, Radius trades under the NASDAQ symbol RDUS.

MINNEAPOLIS (OCT. 3) PR NEWSWIRE - United HealthCare Corporation (UHC) (NASDAQ: UNIH) said today that it has signed a letter of intent with Aetna Life Insurance Company, whereby UHC's wholly owned health plan in Milwaukee, PrimeCare Health Plan, Inc., will assume the group contracts covering the Milwaukee-area members of "Choice," Aetna Health Care Assurance Programs of Wisconsin. The transfer of Choice member contracts to 99,000-member PrimeCare will be subject to the signing of a definitive agreement and receipt of regulatory approval. Terms of the agreement were not announced.

UHC President and Chief Operating Officer William W. McGuire said that the step is a continuation of UHC's strategy of concentrating health plan membership volume in promising markets where the company already has successful operations. "PrimeCare immediately gains the economies of scale associated with this increase in membership. Longer term, PrimeCare will have a marketing advantage in retaining the member groups involved," Dr. McGuire said. Choice currently has approximately 9,500 members.

United HealthCare Corporation is a national leader in health care cost management, serving both the providers and purchasers of health care since 1974. The company's services include HMOs, PPOs, multiple option and point of service plans, pharmaceutical cost management, managed mental health and substance abuse services, utilization management, workers compensation/casualty services, specialized provider networks, employee assistance services, Medicare and managed care programs for the aged, health care evaluation services, and administrative services.

Combined, the company's health plans and specialty businesses serve more than six million lives nationwide. More than 8,000 employers use United HealthCare services or offer them to their employees.

BROOMFIELD, CO (OCT. 3) PR NEWSWIRE - HealthWatch Inc. (NASDAQ: HEAL) today announced that it has signed an agreement with Life Sciences Inc. pursuant to which Life Sciences will be merged into HealthWatch's recently formed HealthWatch Technologies subsidiary. Life Sciences is a privately owned company engaged in the manufacture and marketing of non-invasive diagnostic equipment for vascular disease assessment.

The agreement, which is contingent on, among other things, approval by the Life Sciences stockholders, provides for the issuance to the Life Sciences stockholders of 600,000 shares of HealthWatch's common stock. HealthWatch has 2.4 million outstanding shares of common stock.

"The acquisition of Life Sciences is a major step in the development of HealthWatch Technologies into a premier medical products company through the acquisition of mature companies with complementary products, services and markets," said Sanford L. Schwartz, president and CEO of HealthWatch. Life Sciences will be HealthWatch Technologies' second acquisition. In June 1990, HealthWatch Technologies acquired the assets of Telemed, a 20-year- old company which develops electrocardiographic diagnostic equipment, software and services for hospitals, clinics and physicians.

HealthWatch was founded in 1983. In December 1988, HealthWatch completed the sale of seven of its eight Denver-area medical centers to Rose Hospital. In May 1989, HealthWatch completed the acquisition of Discovery Technologies Inc. a teleradiology (FilmFax) imaging systems company.

#90276p1028 10/03/1990 ~PR Newswire

NEW YORK, (OCT. 3) PR NEWSWIRE - Castle Harlan Inc., a New York merchant bank and an affiliate of Quantum, a $2 billion investment fund, said today a federal bankruptcy court approved their disclosure statement relating to a plan of reorganization to bring Sharon Steel out of Chapter 11 bankruptcy proceedings.

Castle Harlan and Quantum said that Federal Bankruptcy Court Judge Warren H. Bentz of the Western District of Pennsylvania directed that the disclosure statement be mailed to Sharon's creditors for a vote on or before Oct. 8 and set Nov. 8 as the deadline for voting.

Bentz scheduled the confirmation hearing for Nov. 15 in Pittsburgh, at which time he could, assuming a favorable vote, approve and confirm the plan.

Castle Harlan and Quantum said their plan has the support of the United Steel Workers representing Sharon employees and retirees, of the official creditors committee, of F.E. Agnew III, the bankruptcy court trustee overseeing the Sharon Steel reorganization, and of most other interested parties.

Sharon Steel filed for protection from its creditors under the federal bankruptcy laws in April 1987.

The company's headquarters is in Farrell, Pa. Sharon operates an integrated

steel mill producing 1.2 million tons per year and concentrating on the specialty steel business. It also has other subsidiaries, including Mueller Brass Co. and a Natural Resources segment with coal, copper and gold properties.

Under the plan filed by Castle Harlan and Quantum, an affiliate of Castle Harlan will acquire Sharon's steel assets and assume certain steel-related liabilities in a transaction totaling more than $300 million.

The plan also calls for Quantum, the largest unsecured Sharon creditor, and for certain other unsecured creditors to provide $50 million of new equity to the reorganized company. The unsecured creditors will convert their claims to equity in the reorganized company, whose operations include Mueller Brass and Natural Resources.

These unsecured creditors shall have rights to receive within one year from consummation of the plan $25 million in cash. Current shareholders of Sharon will receive no distribution of cash or stock under the plan.

Raymond H. Wechsler, financial adviser to Quantum Fund, will be chairman, president and chief executive officer of the reorganized company.

The Castle Harlan group includes Walter Sieckman, former chief operating officer of Sharon Steel, and Wolfgang Jansen, former executive vice president. They will be co-chairman of the reorganized steel company, and Sieckman will be the chief executive officer.

Castle Harlan has received all necessary financing commitments (which are subject to various conditions) for the transaction, in part through a syndicate of five banks led by Citibank N.A. Arrangements for approximately $60 million of preferred and common equity have also been completed.

Castle Harlan has said it plans to offer current Sharon employees positions in the reorganized company, and the health and pension benefits of Sharon retirees will be preserved.

The firm has also reached agreement with the Pension Benefit Guarantee Corporation on minimum funding obligations for the Sharon Steel pension funds and with Cleveland-Cliffs Inc. on a bankruptcy settlement agreement and a long-term iron ore supply contract.

Castle Harlan was founded in 1987 by John Castle, former president and chief executive officer of the brokerage firm Donaldson, Lufkin & Jenrette, and Leonard Harlan, chief executive of The Harlan Company, a leading real estate advisor, investment and development company.

Other companies in the Castle Harlan portfolio include Delaware Management Company, a Philadelphia money manager with more than $22 billion in pension

and mutual fund assets, Ethan Allen, the well-known furniture company, and Jerrico Inc., operator of some 1,500 Long John Silver's quick-service seafood shops.

It also owns Quantum Restaurant Group, parent of Peasant Restaurants, an Atlanta-based chain, and Morton's of Chicago, a steakhouse chain with restaurants in major cities around the country. Quantum Restaurant Group has no connection with Quantum.

Quantum is an internationally diversified investment fund of more then $2 billion that is managed by Soros Fund Management of New York. It was established in 1973 in the Netherlands Antilles.

The steel company has approximately 2,500 employees and revenues of about $500 million. The non-steel companies employ approximately 2,500 employees and have revenues in excess of $500 million.

Castle Harlan has said that a major capital investment program is planned for Sharon Steel after the reorganization, including the installation of a continuous caster.

#90276p1029 10/03/1990 ~PR Newswire

ROME, GA (OCT. 3) PR NEWSWIRE - Oglethorpe Power Corp. today announced the awarding of a $158 million contract to Power Plant Constructors for major work at its Rocky Mountain Project, a pumped storage facility near Rome, Ga.

Power Plant Constructors is a joint venture of National Projects Inc., of Boise, Idaho, and Clement Brothers Co. of Hickory, N.C.

The contract includes construction of a ring dike for the facility's upper reservoir, seven dams, the powerhouse, installation of three pump-turbines and generator-motors, as well as other miscellaneous work.

Senior Project Manager Dale R. Murphy said initial work will include clearing land and construction of access roads and one of the eight dams that will impound the 1,200-acre lower reservoir.

"We expect Power Plant Constructors to begin mobilizing at the site within the next month," said Murphy, "with major work starting in the spring of 1991."

According to Murphy, the project will employ between 700 and 800 workers during peak construction activity -- from 1991 to 1993. Many of those hired are expected to be northwest Georgia residents.

"In addition to a multi-million-dollar payroll, the project also is expected to generate several million dollars in property taxes during the construction period," Murphy said.

Work on the project is expected to be completed by May 31, 1995. Oglethorpe Power assumed control of the incomplete Rocky Mountain Project from Georgia Power Co. in December 1988. With a licensed generating capacity of 760,000 kilowatts, Rocky Mountain will be the corporation's largest construction and operation project ever.

The Rocky Mountain Project will produce power by releasing water from the upper reservoir through a series of tunnels to power three turbine generators. Later in the cycle when excess power is available from other plants, the turbines will be reversed, pumping the water back to the upper reservoir to be used again.

Oglethorpe Power Corp. is a generation and transmission cooperative providing electric power to 39 of Georgia's 42 consumer-owned Electric Membership Corporations (EMCs). These EMCs serve more than 2 million Georgians in about 71 percent of the state's land area.

#90276p1037 10/03/1990 ~PR Newswire

MILWAUKEE, (OCT. 3) PR NEWSWIRE - PrimeCare Health Plan, Inc. said today that

it will assume the contracts covering the group members of "Choice," Aetna Health Care Assurance Programs of Wisconsin. According to a letter of intent signed by PrimeCare's parent company, United HealthCare Corporation (NASDAQ: UNIH), and Aetna Life Insurance Company, and subject to the signing of a definitive agreement and receipt of regulatory approval, PrimeCare will assume the Choice members retroactive to Oct. 1, 1990. The contracts involved currently cover approximately 9,500 Milwaukee Choice members.

PrimeCare Chief Executive Officer Larry Rambo said that Choice members and their employers soon will receive detailed information explaining the transfer of the administration of their health care coverage to PrimeCare. "Letters and detailed information will be sent to Choice members and their employers as soon as regulatory approval is received," Mr. Rambo said. "We want to answer every question anyone might have and make this transition as smooth as possible for everyone."

Mr. Rambo said that Choice members' current benefits and premium rates will remain in effect for the duration of their present contracts, and that PrimeCare also intends to maintain existing relationships with Choice IPA physician groups during that period. "We think everyone will be pleased with our services during this transitional period and, later, with the range of benefits available to renewing PrimeCare members.

"Our objective is to make this administrative transfer nearly invisible to the members and physicians involved," Mr. Rambo said.

After reviewing materials that will be sent to them, Choice members or employers who have additional questions about the transition may contact PrimeCare's Member Services Department at 414-259-4802.

PrimeCare, a 99,000-member health plan, has served the Milwaukee area since 1983. PrimeCare is a member of the United HealthCare Corporation family of services. Minnesota-based United HealthCare serves more than six million persons nationwide through its health plans and managed health care specialty businesses.

TORRANCE, CA. (OCT. 3) PR NEWSWIRE - Sales of 5,268 Lexus LS 400 and ES 250 models were up 15.7 percent in September compared to September 1989, the introductory month for the luxury division of Toyota Motor Sales U.S.A. Inc., according to sales figures released today.

The boost was primarily the result of strong ES 250 sales, up 51 percent to 1,682. Sales of the LS 400 were up 4.3 percent to 3,586. The strong September

1989 introduction sales of the LS 400 were the car's best during its first six months.

"This is an excellent indication of how well the ES 250 has caught on," noted Dave Illingworth, Lexus vice president and general manager. "The LS 400 received all the advance publicity and has been strong from day one. The ES 250 took a little longer to get started, but dealers have been selling more than 1,500 a month since March. The ES 250 now accounts for about one-third of all Lexus sales and this balance is one of the keys to the division's success."

Year-to-date Lexus sales moved to 45,414 -- 30,103 LS 400s and 15,311 ES 250s. Both vehicles remain in short supply with Lexus dealers having about a 15-day total supply.

NEW YORK (OCT. 3) PR NEWSWIRE - Chartwell Associates L.P. reported today that

its representatives have resigned from Avon's special committee because events circumstances and attitudes at Avon have demonstrated repeatedly and clearly over the past five months that neither the special committee selected by the board of directors, nor Avon senior management, has any desire or determination to fulfill the committee's original charge to investigate ways to "enhance shareholder value."

The special committee, consisting of six Avon board members, including two Chartwell representatives, was created prior to this year's annual meeting to explore alternatives for enhancing shareholder value. Avon's agreement to create the committee, and the appointment of two Chartwell nominees to Avon's board, ended Chartwell's May 1990 proxy contest against Avon. The Chartwell representatives stated: "We are not satisfied with the status quo. We believe all Avon stockholders deserve better value for their investment. Therefore, we were forced to submit our resignation as members of the special committee.

"We will continue to work toward finding a means to fulfill our obligation to all Avon shareholders -- a means that will be satisfactory to Avon's board and management. Avon has the potential to be a great company -- to build and deliver real value to its shareholders. We believe that should be our common goal -- a goal we should work toward together, objectively and responsibly. In the meantime, we cannot sit idly by and condone inaction."

BERKELEY, CA. (OCT. 3) PR NEWSWIRE - XOMA Corp. (NASDAQ: XOMA) Chairman and Chief Executive Officer Steven C. Mendell today announced that A. Richard Juelis has been appointed vice president, finance and chief financial officer of the company.

Juelis brings to XOMA 14 years' experience in financial and general management in the pharmaceutical and biotechnology industries. Since 1984, he served in senior management positions for Schering- Plough Corp. (Madison, N.J.). He was general manager of Schering's major biotechnology manufacturing subsidiary and also served as finance director at Schering's largest drug and chemical manufacturing site. Previously, Juelis had been with Hoffmann-LaRoche Inc. (Nutley, N.J.).

Juelis, 42, received his bachelor of science in chemistry from Fordham University and his master's in business administration in finance from Columbia University. "Richard Juelis brings to XOMA broad, practical experience in pharmaceutical industry finance and management, and we are pleased that he is now part of our management team," said Mendell.

XOMA Corp. is developing products to treat life-threatening human diseases using monoclonal antibody and other biotechnologies. XOMA has pending before the U.S. Food and Drug Administration product license applications to market its first two products: E5(R), for the treatment of gram-negative sepsis, and XomaZyme(R) CD5 Plus, for the treatment of graft-versus-host disease in recipients of bone marrow transplants. XOMA also is developing products for the treatment of autoimmune diseases and other immune-related disorders.

Model Year	1,383,170	1,433,840	- 3.2

Note: Percentage changes are based on daily selling rates.
Comments: The following may be attributed to Robert L. Rewey, vice president - Sales Operations, Ford North American Automotive Operations:

"Sales in the last two months of the 1990 model year were stronger than might have been expected under the circumstances. We have not yet seen any dramatic shift in either volume or mix as a result of events in the Persian Gulf. Nonetheless, consumer confidence has experienced its steepest decline since 1981. Accordingly, now that the deficit reduction agreement has been reached, we hope that interest rates will be reduced. This would bolster consumer confidence and enable the national economy either to avoid a recession altogether or to minimize its length and severity, should one occur."

"During the 1990 model year, Lincoln-Mercury dealers established all-time sales records for total Lincolns (223,596), for Lincoln Town Car (141,157) and for Lincoln Continental (60,971) despite growing competition in the luxury segment. Ford Division's dealers captured sales leadership in both trucks and total vehicles for the fifth and fourth consecutive model years, respectively. For the ninth straight model year, the Ford F-Series pickup was America's best-selling vehicle, car or truck."

"The Ford Escort and Mercury Tracer are gaining sales momentum, in spite of continuing softness in the subcompact segment overall. In October, we expect both cars to register sales increases over their year-ago levels for the first such full-month gain since February 1989. As availability of the all-new 1991 Escort and Tracer models improves, growing numbers of consumers are

recognizing their exceptional value. They are fully competitive with the best-selling import subcompacts in every respect, including gas mileage. Accordingly, we are confident that Ford's car market share will improve over the balance of the year, following the upturn in our truck market share already in evidence."

WASHINGTON (OCT. 3) PR NEWSWIRE - Nycal Corporation (NASDAQ: NYCL) today announced the completion of the sale of certain producing and non- producing oil and gas properties to Woodbine Petroleum, Inc. (NASDAQ: WDBN), a Dallas-based oil and gas development company, for $4 million.

The sale was completed simultaneously with the acquisition of the properties and other assets by Nycal from Claremont Petroleum (USA) Pty. Ltd. and Moage, Inc. The other assets acquired by Nycal included three convertible notes issued by Woodbine in the total principal amount of $632,557 and 9.4 million shares (75.9 percent) of the common stock of Woodbine. At the time of the sale, Nycal converted the convertible notes to 4.2 million shares of Woodbine common stock giving Nycal a total of more than 9.6 million shares of Woodbine (82 percent).

The sales price of the properties was paid by $1.75 million in cash, a convertible note of $750,000, convertible at $.15 per share and assumption of an existing bank loan of $1.5 million secured by the properties. In addition, three representatives of Nycal were appointed to the board of directors of Woodbine.

Following the sale, Woodbine's estimated combined reserves total approximately 700,000 barrels of oil and 6.8 BCF of natural gas. Revenues from the combined properties for the 12 months ended June 30, 1990, totalled approximately $4 million.

#90276p1059 10/03/1990 ~PR Newswire

CHICAGO (OCT. 3) PR NEWSWIRE - Although legislation to regulate the cable industry has been dropped for 1990, the issue will be revisited next year and will likely be constructed along the same lines, says an analyst with Duff & Phelps Inc., the investment research and financial consulting firm headquartered here.

"Sen. Tim Wirth has blocked an effort to pass legislation in the U.S. Senate that would have paved the way to re-regulate the cable industry in this year's legislative session," said Ned P. Zachar, who follows the industry for Duff & Phelps.

"This legislation would have created additional, but not life-threatening, burdens for the cable industry. Legislation may have been moot because the Bush Administration threatened to veto House or Senate legislation in current form."

The proposed legislation included regulations for "basic" tier broadcasting, "must carry" for public and commercial stations, development of customer service guidelines for the FCC, and prohibition of foreign ownership, among others.

Zachar feels that the cable industry, after a slow start, did a much better job recently of "educating" those parties in the legislative process that cable is not the "bad guy" that many cable-bashers had led them to believe.

Cable re-regulation proponents are also predicting that legislation in 1991 will allow telcos to become full-fledged cable operators.

"Our impression is that many in Congress are uneasy about allowing telcos to compete in unregulated business such as cable due to cross- subsidization issues," Zachar said. "If telcos were allowed to provide cable service in the name of competition, it is highly unlikely that the telcos would immediately

begin rewiring homes with the necessary equipment for cable service."

Although some form of telco entry into cable is possibly the appropriate public policy approach to video/voice/information services, Zachar notes it will not create competition for cable in the foreseeable future.

For cable investors, the discussion will hopefully be limited to legitimate consumer concerns that initiated the legislative process in the first place -- rising cable rates and poor service -- rather than evolve into a legislative package with a host of special interest provisions.

SAN JOSE, CA (OCT. 3) PR NEWSWIRE - Spectra Diode Laboratories, Inc., which develops and manufactures high power opto-electronic semiconductor laser devices and related systems, today announced that it has engaged Salomon Brothers Inc., New York City, to evaluate future business strategies, including the possible sale of the business.

Spectra Diode Labs was formed in 1983 to exploit gallium arsenide- based, solid-state laser technology developed at Xerox Corporation's (NYSE: XRX) Palo Alto Research Center. Spectra Diode Labs is now a joint venture between Xerox which has headquarters in Stamford, Conn., and CIBA-GEIGY Corporation and its affiliates. CIBA-GEIGY is headquartered in Ardsley, N.Y.

Donald Scifres, chief executive officer of Spectra Diode Labs, said that the company has been highly successful, both technically and financially, and expansion of its markets is expected to continue at a rapid pace.

The possible sale of the company, added Scifres, follows CIBA-GEIGY's announced direction to disengage from the electronics business and is consistent with the initial plan of Xerox to sell its interest in Spectra Diode Labs after the company became firmly established.

Spectra Diode Labs is recognized as the premier supplier of advanced high power semiconductor laser devices and related systems. Applications for these devices include communications, optical data storage, scientific instruments, medical, high resolution displays, computer systems, business and industrial equipment, consumer products and aerospace and military systems.

Three major trade publications in the laser field have given Spectra Diode Labs six "new product of the year" awards since 1984.

CIBA-GEIGY Corporation is a wholly owned subsidiary of CIBA-GEIGY Limited, a publicly traded company based in Basel, Switzerland. CIBA-GEIGY Limited is engaged primarily in the discovery, development, manufacture and marketing of a wide variety of pharmaceuticals, agricultural and specialty chemicals, and vision care products.

CONTACT: Donald Scifres of Spectra Diode Labs, 408-943-9411, or Thomas C. Abbott of Xerox, 203-968-3378, or Tom Chizmadia of CIBA-GEIGY, 914-478-3131.

#90276p1070 10/03/1990 ~PR Newswire

AUSTIN, (OCT. 3) PR NEWSWIRE - Dr. William J. Spencer, group vice president and senior technical officer of Xerox Corp., today was named president and chief executive officer of SEMATECH. Dr. Spencer replaces the late Dr. Robert N. Noyce, who headed the consortium from July 1988 until his sudden death in June 1990. SEMATECH is a nonprofit industry-government research consortium aimed at restoring U.S. leadership in semiconductor manufacturing.

"I am honored to join the elite team at SEMATECH," Dr. Spencer told SEMATECH personnel at the employee announcement this morning. "The national mission we must accomplish is key to America's competitiveness and key to preserving our standard of living for our children and grandchildren. I am confident that by working together, SEMATECH will succeed in its mission."

Dr. Spencer, 60, joined Xerox in 1981 as manager of the Integrated Circuit Laboratory at the firm's Palo Alto Research Center. As group vice president of the corporate research group in Stamford, CT, Dr. Spencer managed Xerox's research and development activities on a world-wide basis. Before joining Xerox, Dr. Spencer was director of Systems Development and Microelectronics at Sandia Laboratories and was a research professor at the University of New Mexico School of Medicine. He began his career at Bell Telephone Laboratories in 1959 after receiving his Ph.D. in physics from Kansas State University.

"SEMATECH and the semiconductor industry are extremely fortunate to have Bill Spencer as a champion and leader," said Charles Sporck, chairman of SEMATECH's board of directors and head of the CEO selection team. "With his experience in key research positions at Bell Laboratories, Sandia National Laboratories and Xerox Corp., Dr. Spencer has the technical expertise to implement programs which will enable this country to remain globally competitive.

"This was a very gratifying selection process," Sporck said. "There were many excellent candidates who came forward and expressed interest in joining SEMATECH."

"I congratulate the SEMATECH board of directors on an outstanding choice for CEO," said Dr. Turner E. Hasty, SEMATECH's chief operating officer. "Bill's qualifications for this job are superb. His proven leadership qualities will be very important to the continued success of SEMATECH. On behalf of the men and women of SEMATECH. We are both pleased and excited to have Dr. Spencer on our team."

Spencer joins the Office of the Chief Executive, which also includes Hasty and Peter H. Mills, chief administrative officer. As CEO, Dr. Spencer will direct SEMATECH's advanced semiconductor manufacturing staff, which is based in Austin, Texas. He also will be SEMATECH's primary liaison to its 14 member companies and the federal government.

SEMATECH is developing advanced semiconductor manufacturing methods, equipment and materials in a world-class demonstration facility in Austin, Texas. Research results are transferred to member firms and the federal government for commercial and military applications. The federal government actively participates in SEMATECH through the Defense Advanced Research Projects Agency (DARPA) in the Department of Defense.

SEMATECH member firms include Advanced Micro Devices, AT&T, DEC, Harris Corp., Hewlett-Packard, IBM, Intel, LSI Logic, Micron Technology, Motorola, NCR, National Semiconductor, Rockwell International and Texas Instruments.
Biography: Dr. William J. Spencer

#90276p1073 10/03/1990 ~PR Newswire
CHICAGO (OCT. 3) PR NEWSWIRE - United Airlines announced today it has implemented the world's first operational satellite-based data communication (SATCOM) system on a commercial jetliner.

On Thursday, Sept. 27, United Flight 805 from San Francisco to Hong Kong transmitted messages via satellite for the first time, becoming the first commercial flight in history to use the technology.

The new satellite service, GLOBALink(SM), provided by ARINC Incorporated, permits the industry's first two-way electronic data communications via satellite between the aircraft and the carrier's operations departments, such as flight dispatch and maintenance, as well as with ground-based air traffic controllers.

United operates an extensive network of scheduled air service throughout the North and South Pacific and flies more passengers on trans-Pacific flights than any other airline in the world. The 747-400 is currently flown by United

on the Los Angeles-Sydney, San Francisco-Hong Kong and San Francisco-Seoul-Manila routes.

The new GLOBALink service supplements the high-frequency radio voice communications technology which has been a means of contact for trans- oceanic air travel since the early 1940s.

Oceanic voice communications has been recognized as being adequate, but less than perfect, requiring pilots and ground radio operators to talk back and forth frequently to relay vital information, such as the position of the flight, weather conditions and fuel readings, while being susceptible to frequency congestion and changes of atmospheric conditions which can produce static and other interference.

The total reliance upon relayed voice communications for trans-oceanic flights has also placed a burden on pilots, ground-based airline operations employees, ARINC radio operators and trans-oceanic air traffic controllers.

Within United, the new system will permit two-way data communications without intermediaries between an aircraft flying over the Pacific Ocean and United's ground operations functions for relatively routine communications transmissions, similar to those done commonly today on flights over land.

UAL has ordered a total of 15 747-400 aircraft. ARINC, an Annapolis, Md.-based communications company owned by the airline industry, provides the GLOBALink service through the use of INMARSAT satellites and ground earth stations operated by COMSAT and other INMARSAT signatories.

CONTACT: Joe Hopkins, 708-952-5770, or Sara Dornacker, 708-952-6561, both of United Airlines, or Daniel E. Sassi of ARINC, 301-266-4071.

#90276p1080 10/03/1990 ~PR Newswire

OSLO, THE NETHERLANDS (OCT. 3) PR NEWSWIRE - The Christiania Bank Group recorded a loss of NOK 123 million after actual and estimated losses and taxes in the first eight months of 1990, against a profit of NOK 438 million in the corresponding period last year. This corresponds to earnings per share of (NOK 4.87) annualized, compared with NOK 22.37 in the same period last year. The eight month results give a return on total assets of (0.12) percent and a return on equity of (4.61) percent, both figures on an annualized basis.

The operating profit before actual and estimated loan losses amounted to NOK 1,259 million, giving a return on average total assets of 1.27 for the period annualized. The corresponding figures in 1989 were NOK 1,581 million and 1.95 percent. The decrease in operating profit before actual and estimated loan losses is due to a depressed net interest income as a consequence of an increase of non-performing loans and the fact that interest rates throughout the period were higher than during the first eight months on 1989. The interest rate level has also resulted in reduced capital gains on the sale of bonds.

At Aug. 31 1990, net interest income amounted NOK 2,257 million giving an

interest rate margin of 2.28 percent compared to 2.44 percent in the corresponding period last year.

During the eight month period the group released gains of NOK 243 million, of which losses on sale of bonds amount to NOK 4 million. At Aug. 31 unrealized gains on the group's portfolio of trading shares and bonds amounted to NOK 204 million and NOK 13 million, respectively. At April 30 1990, the group has unrealized gains on trading shares of NOK 221 million, while unrealized bond losses totalled NOK 38 million.

Operating expenses during the period amounted to NOK 2,240 million, corresponding to 2.26 percent of average total assets, against 2.28 percent for the same period last year. The increase of NOK 134 million from the first interim period included NOK 63 million attributable to the Sorlandsbanken Group.

In assessing its loan portfolio at Aug. 31, the bank has followed the guidelines for loss assessment drawn up by the banking, Insurance and Securities Commission. This means that actual and estimated loan losses are charged in the period in which they arise. There may therefore be great variations in loan write-offs in the respective accounting periods. At Aug. 31 1990, actual and estimated loan losses totalling NOK 1,320 million were charged to the profit and loss account, with NOK 356 million attributable to the first four months of the year and NOK 964 arising in the four months to Aug. 31 1990. In 1989, NOK 911 million was charged for the first eight months of the year.

The majority of the loan write-offs as per Aug. 31 1990 is estimated losses. The increase in loan write-offs from the first to the second interim period is partly due to a few larger commercial commitment and partly to revised evaluation of the collateral, as a consequence of the continued drop in real estate prices. Additionally, the general provisions for non-performing loans to private client engagement have been increased from 10 percent to 15 percent.

By the end of August, the accumulated special provisions charged to the profit and loss account over several years amount to NOK 2,295 million, corresponding to 2.14 percent of total lendings. In addition, the bank's general provisions amount to NOK 1,629 million (1.52 percent of total lendings).

The group's operating profit (after loan losses and before taxes) is divided as follows: (NOK 290 million) for Christiania Bank Retail and Commercial, (NOK 71 million) for Christiania Bank Capital Market, and NOK 300 million for Christiania Bank International.

Group taxation amounts to NOK 33 million in payable taxes and NOK 29 million in change in deferred taxes. The total taxation related mainly to Christiania Bank's foreign branches and subsidiaries and to taxation of the group's net assets.

At Aug. 31 1990, the Christiania Bank Group had total assets of NOK 147.3 billion, against NOK 146.4 billion at April 30 1990. Average total assets for the first eight months of the year amounted to NOK 148.6 billion, compared with NOK 122 billion for the same period last year.

According to current Norwegian rules, Christiania Bank Group had a capital adequacy of 7.65 percent as per Aug. 31 1990. Based on the new Norwegian rules the group's primary capital ratio was 2.4 percent. If the calculation is made according to the EC-definition of primary capital, the group's ratio was 3.8 percent.

#90276p1088 10/03/1990 ~PR Newswire

CHICAGO (OCT. 3) PR NEWSWIRE - Hartmarx Corp. (NYSE: HMX) today reported lower sales and a loss for the third quarter ended August 31.

Sales for the quarter were $313,370,000 with a loss of $4,815,000 or $.24 per share compared to sales of $317,250,000 and earnings of $420,000 or $.02 per share in 1989. For the nine months ended Aug. 31, sales were $959,441,000 with a loss of $57,590,000 or $2.92 per share including the $51,000,000 or $2.59 per share restructuring charge provided in the second quarter. Last year's results for the nine months were sales of $949,086,000 with earnings of $13,305,000 or $.68 per share.

Harvey A. Weinberg, chairman and chief executive officer of Hartmarx, stated, "Third quarter results reflect a continuation of the sluggish sales environment experienced in the first half and do not reflect the significant restructuring actions announced on July 11 that are expected to favorably impact the future. Only six of the 65 scheduled store closings took place in the third quarter as most of the store closing sales will commence in October and November to take advantage of the high volume Fall retail selling season, including December, which will maximize sales and cash proceeds.

"Other restructuring actions being implemented include the addition of three senior marketing, sales and merchandising executives in the Specialty Store Group and the realignment of centralized staffs. Total inventories at Aug. 31 are $45 million lower than a year ago and will be further reduced as the store closings are completed. Inventory reductions in the Specialty Stores facilitate re-merchandising with fresh goods.

The company announced that its tailored clothing manufacturing subsidiaries recently agreed to a new three-year industry-wide collective bargaining agreement. Also, a $45 million term loan agreement with a group of insurance companies was completed in September. Proceeds of the loan were used to repay

bank loans.

Hartmarx, headquartered in Chicago, is the nation's leading manufacturer and retailer of men's and women's quality apparel.

CHICAGO (OCT. 3) PR NEWSWIRE - Illinois Central Corporation (NASDAQ: ICRR) announced today that it has agreed to permit merchant banking partnerships affiliated with Shearson Lehman Brothers to acquire up to 1 million additional shares of Illinois Central Corporation common stock in the open market. This accord amends an existing standstill agreement between the company and Shearson. Purchases, if any, by Shearson will be for investment purposes, will be made from time to time over the next year, and will be subject to applicable requirements of the Hart-Scott-Rodino Anti-Trust Improvements Act of 1976.

Affiliates of Shearson own in the aggregate approximately 6.6 million shares of 28 percent of Illinois Central's outstanding common stock. Shearson acts as a market-maker for securities of Illinois Central and its railroad operating subsidiary.

MAHWAH, NJ (OCT. 3) PR NEWSWIRE - Jaguar Cars Inc. (ADR - NASDAQ-NMS: JAGRY) today reported that total unit sales for September 1990 were 1,722 compared with 1,482 during September 1989, a 16.2 percent increase.

Sedan retail sales for the month of October 1990 were 1,368 units vs. 1,168 in the prior year's period. XJ-S sports coupe and convertible retail sales for the month were 354 compared with 314 units in the same period last year.

Total year-to-date sales stand at 14,091, an increase of 1.5 percent over the 13,882 units sold in the same period in 1989.

Michael H. Dale, president of Jaguar Cars Inc. said: "The September sales figures, coming at a time when the luxury car market is beset by negative influences and increased competition, are a sign that Jaguar automobiles continue to hold a strong appeal for American buyers. We are confident that our 1991 models, which will be introduced in October, will maintain and enhance that appeal."

Jaguar Cars Inc. is the U.S. subsidiary of Jaguar Ltd.

OAKBROOK TERRACE, IL (OCT. 3) PR NEWSWIRE - Telesphere Communications Inc. (AMEX: TSP), a full-service long-distance telephone company and a leading provider of interactive 900 network services, today announced it is providing network services for a communication line designed and developed by 900 Broadcasting Ltd., a Philadelphia- based company, that will be used to send messages of support to U.S. troops stationed in the Middle East. According to Elissa P.C. Laurence, president of 900 Broadcasting Ltd., 50 cents from each call handled by the service will be donated to the American Red Cross for their ongoing support of service members and their families.

The service, which can be accessed by dialing 1-900-321-4-USA, is scheduled to begin operation on Oct. 8, 1990. 900 Broadcasting, Ltd., a creator of 900 service based promotional programs, will promote the line with a national television campaign of one-minute spots. The service will allow Americans to leave messages of support and encouragement for military personnel on audio-cassette tapes. These tapes will then be shipped directly to Operation Desert Shield forces.

The significance of the service is underscored by the fact that U.S. troops currently are receiving almost no news from outside the Middle East, since Iraq has been jamming Voice of America broadcasts heard in Saudi Arabia on a regular basis.

Telesphere Communications Inc. operates a nationwide, state-of-the- art, digital fiber optic network over which it provides long distance, operator, interactive 900 and other enhanced telecommunications services.

MINNEAPOLIS (OCT. 3) PR NEWSWIRE - Cray Research, Inc. (NYSE: CYR) today unveiled its initial entry into the minisupercomputer market, the CRAY XMS system, and discussed some performance objectives for a follow- on system to be available in the second half of 1991. The company demonstrated the CRAY XMS system at the semiannual conference of the Cray User Group (CUG) in Austin Texas, and said it would be available for customer delivery next month.

The CRAY XMS system, which is a 64-bit minisupercomputer based on Cray Research's vector architecture, is compatible with the CRAY X-MP computer

system. Minisupercomputers are general-purpose scientific computers that are highly capable, but less powerful than supercomputers.

The CRAY XMS system runs the company's powerful UNICOS operating system, which is based on the AT&T UNIX System V operating system and is used throughout the Cray Research supercomputer product line. The CRAY XMS system also runs the same compiler software as the larger Cray Research systems, including the CF77 Fortran compiling system and Standard C, along with a variety of library routines and utilities.

The CRAY XMS system has a peak vector performance of 36 million floating-point operations per second (MFLOPS) and a peak scalar performance of 18 MFLOPS. It has one central processing unit and is available with 32, 64, or 128 million bytes of memory. It is easy to install and requires no special environment because of its small size and the fact that it is air-cooled.

The CRAY XMS system will run a broad range of third-party application programs with little or no modification. The company is working with third-party application vendors in areas such as fluid dynamics, mechanical engineering, and computational chemistry to make their programs available on the CRAY XMS system.

The introduction of the CRAY XMS system was facilitated by Cray Research's recent acquisition of Supertek Computers, Inc., a California- based manufacturer of Cray-compatible computer systems. The minisupercomputer is being manufactured by Cray Research in Chippewa Falls, Wis.

Development of a CRAY Y-MP-compatible minisupercomputer is well underway, with availability scheduled for the second half of 1991. The system will be available with one to four central processing units, and will have a considerable larger memory than the CRAY XMS system.

Cray Research, Inc. designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

TROY, MI. (OCT. 3) PR NEWSWIRE - Audi of America, Inc. announced today that it will raise the Manufacturers Suggested Retail Prices of its 1991 models an average of 3.5 percent, equipment adjusted. Option prices are being raised an average of 4.1 percent, and $20 is being added to the delivery charge, which has not been adjusted for four years.

Two models, the entry level Audi 80 and the just-introduced 200 Quattro series

of sedan and wagons, include entirely new power trains for 1991 and are being introduced as replacement models.

The Audi 80 for 1991 gets the five-cylinder, 2.3-liter, 130- horsepower engine replacing the four-cylinder, 2.0-liter, 108-horsepower engine. The 200 Quattro series gets the turbo-charged, 2.22-liter, 217- horsepower engine, replacing the turbo-charged, 2.2-liter, 162- horsepower engine.

The new Audi 80 is being introduced at $20,200, while the 200 Quattro sedans and wagons have been introduced at $42,400. The previous models, no longer comparable because of the power train upgrades, carried Manufacturers Suggested Retail Prices of $18,900 for the Audi 80, $35,805 for the 200 Quattro sedan, and $36,930 for the 200 Quattro wagon.

Final 1990 equipment adjusted prices and introductory 1991 prices for the balance of the Audi line are:

	1990	1991
80 Quattro	$24,000	$24,810
90	$24,835	$25,690
90 Quattro	$27,610	$28,580
Coupe Quattro	$29,935	$30,990
100	$27,195	$28,150
100 Quattro	$29,470	$30,510
200	$33,405	$34,580
V8 Quattro	$48,535	$50,200

STAMFORD, Conn. (OCT. 3) PR NEWSWIRE - Mark B. Myers, a corporate vice president and manager of Xerox Corporation's (NYSE: XRX) research center in the Rochester, N.Y., suburb of Webster, has been appointed vice president in charge of the company's worldwide research programs, Paul A. Allaire, Xerox president and chief executive officer, announced today.

Myers succeeds William J. Spencer, who will retire from Xerox, effective Nov. 1, to become president of Sematech Corporation in Austin, Texas. Spencer, 60, has overseen the company's worldwide research efforts since being named group vice president of the Corporate Research Group in 1986.

"Bill has been a guiding force in the redirection of the corporation's research efforts for the 1980s and beyond and has been a major influence in accelerating the incorporation of research technologies into new products," Allaire said. "We will miss him but wish him well in this new position of major national significance."

Sematech is a joint venture between the federal government and an industry consortium. It is engaged in the development and manufacture of advanced microchip devices.

Myers, 51, has been with Xerox his entire working career. Since joining the company in 1964 as a member of the scientific staff at the Webster Research Center, he has held a variety of research and engineering positions. Most recently, he has been vice president and manager of the Webster center. He was named a corporate vice president in 1989.

In his new position, Myers will guide and manage the company's research efforts in Webster, the Palo Alto Research Center in Palo Alto, Calif., the Xerox Research Centre of Canada in Mississauga, Ontario, and Rank Xerox EuroPARC in Cambridge, England.

Myers, a Penfield, N.Y., resident, will remain based in Webster.

SAN JOSE, CA (OCT. 3) PR NEWSWIRE - Quark, Inc., today announced a significant product development effort for IBM's line of personal computers and workstations. As its initial entry into this market, the company will adapt QuarkXPress(Note B)/PC, its electronic publishing software, for the IBM Personal System/2(Note A). It is expected to be available in 1991.

Quark is working with IBM on future development efforts that will provide Quark electronic publishing products for the PS/2(Note A) using Operating System/2(Note A) and RISC System/6000(Note A), as well as software to enhance integration and connectivity of multiple vendor systems.

The IBM Media Industry has identified newspaper, magazine and book publishing as top growth markets during the 1990s for its products and services. IBM offers a full-range of computer systems, sophisticated networking capabilities service and training to provide a system-wide solution to publishing firms.

Working with IBM, Quark also will pursue development in areas such as groupware and data exchange software for Atex systems and other third-party vendors. Groupware enables reporters and graphic designers, for example, to be working on the same document simultaneously.

IBM's Media Industry addresses the computing needs of nine diverse industry segments, the largest of which are newspapers and magazines. Headquartered in White Plains, N.Y., the Media Industry has a mission to provide integrated hardware and software solutions to customers within these industry segments.

Based in Denver, Quark, Inc., develops and distributes publishing software products for commercial publishing and graphic arts professionals using microcomputer-based systems. QuarkXPress, a precision-oriented software product, provides even the most demanding publishing arts professional with the tools and features they need to create and implement sophisticated publication designs. Founded in 1981, Quark is privately held.

#90276p1125 10/03/1990 ~PR Newswire

LOS ANGELES (Oct. 3) PR Newswire - Unocal Exploration Corporation (UXC), which until Aug. 2 was operated as a limited partnership known as Union Exploration Partners Ltd. (UXP), today announced the payment of a cash distribution of $3 on each of UXP's former depositary units.

This distribution, which was described as a "contingent cash distribution" in the Prospectus filed with the Securities Exchange Commission, is payable on Oct. 15, 1990, to holders of record of depositary units on June 21, 1990.

The provision for this cash distribution was announced in June at the same time that Union Oil Company of California, the managing general partner of UXP indicated its intent to convert UXP from a Texas limited partnership to a Delaware corporation.

It was intended to furnish reasonable protection to unitholders in the event of a short-term decline in the price of UXC stock.

The distribution was to be paid, up to a maximum of $3 per unit, if, during pre-defined time periods, the average closing price of UXC common stock was lower then $18.20.

The specified measurement period was the five trading days preceding the 60th day following the change from a Texas limited partnership to a Delaware corporation.

As of June 21, 1990, there were 11,939,726 UXP units held by the public, with Union Oil Company of California controlling the other 95.3 percent of UXP units.

The cash distribution will total $35.8 million.

LOWELL, MASS. (OCT. 3) PR NEWSWIRE - COMFED BANCORP's (AMEX: CFK) Chairman and Chief Executive Officer, Jack Zoeller, said he strongly supported the actions of the U.S. Attorney and the Federal Bureau of Investigation which have resulted in the indictments today of 12 people, including two former COMFED officers, for their roles in defrauding COMFED Savings Bank of more than $2 million.

"The real victim of this fraud," said Zoeller, "has been COMFED Savings Bank, together with its shareholders, employees, and ultimately the taxpayers. We are proud to have uncovered the activities which we reported to the federal authorities in early 1989, and which led to the indictments announced today.

"Over the past two years," Zoeller continued, "It has been our unpleasant duty to report 85 separate instances of suspected criminal fraud. During that time, we terminated or accepted the resignations of approximately 50 former loan officers. Although, as evidenced by these indictments, many of the people who have wrongfully harmed COMFED are developers, brokers, attorneys, and borrowers, our highest priority has been ensuring that these kinds of problems and the people who are alleged to have caused them have been weeded out of the bank. COMFED has returned to its conservative roots, producing high quality loans, and stressing integrity and sound business practice."

COMFED BANCORP, INC. is a $1.4 billion asset holding company headquartered in Lowell, Mass. Through its principal operating divisions: COMFED Savings Bank and COMFED Mortgage Company, it engages in residential mortgage lending, loan servicing, and retail banking. COMFED Mortgage Company maintains a network of 13 offices in five Northeastern states. COMFED Savings Bank operates 28 retail banking offices in Massachusetts and Connecticut. The bank's loan servicing portfolio ranks in the top 20 among thrifts nationwide. COMFED BANCORP, INC. is listed on the American Stock Exchange, symbol CFK.

NOTE: Eight selling days (S/D) in the Sept. 21-30 period this year and nine selling days last year; 24 selling days for the September period this year and 25 selling days last year.

(a) -- Year-to-year percent change is not adjusted for selling days. Comment by George C. Eads, vice president of the General Motors Product Planning and Economics Staff:

For General Motors, 1990 model year sales performance represents more than 50 consecutive years as industry sales leader. During the model year, GM dealers delivered a total of 4.9 million vehicles -- 1.6 million vehicles more than our nearest competitor. Also for the 1990 model year, General Motors was once again the industry sales leader for both passenger cars and trucks.

During the 1990 calendar year through September, GM remains the only domestic manufacturer to outperform the industry and to increase its U.S. market share for cars, trucks and total vehicles. In September, GM car and truck sales were down 10.8 percent from a strong year-ago period when consumer and dealer incentives boosted 1989 sales. Despite the present uncertainties in the marketplace, we believe that General Motors will continue to increase its share of the U.S. markets for cars, trucks and total vehicles throughout the remainder of the 1990 calendar year.

In reviewing 1990 model year sales performance on a market segment basis, General Motors was the leader in the subcompact, compact, mid- size, regular

and luxury car segments. Of special note, Chevrolet captured the industry's leadership position for passenger car sales and Cadillac recorded its 42nd consecutive model year as luxury car sales leader. In the truck market, GM remained the industry sales leader in the light-duty segment -- which accounts for approximately 95 percent of total industry truck sales.

For the 1990 model year, total vehicle sales are estimated to finish around 14.2 million units, making it the first model year since 1984 in which industry vehicle sales will not exceed 15 million units. Most of this sales slowdown was due to an estimated 9-percent decline in car sales. Truck sales will also be down in the model year, but the slowdown in truck purchases is estimated to be 5 percent.

#90276p1137 10/03/1990 ~PR Newswire

ATLANTA (OCT. 3) PR NEWSWIRE - As part of its comprehensive coal technology program, the Department of Energy has signed a $46 million, five-year contract with Southern Company Services Inc., to develop more effective methods of producing a clean gasified fuel from coal.

Southern Company Services provides technical and specialized services to The Southern Company (NYSE: SO) and its subsidiaries -- Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Savannah Electric, Southern Electric International, and The Southern Investment Group.

Commenting on the contract award, the Energy Department's Assistant Secretary for Fossil Energy Robert Gentile said: "We're hopeful that advanced coal technologies emerging from this joint effort can one day be used by the nation's utilities as a cost-effective alternative to oil. This project could provide us with one more weapon in our battle to reduce dependence on foreign oil by using our abundant coal supplies."

At a test facility that will be built near Wilsonville, Ala., coat will be burned in a pressurized environment -- a technique that will reduce the size of the equipment needed for this process and make the resulting gas suitable for powering high-efficiency gas and steam turbines. The procedure calls for the removal of ash and other impurities at high temperatures to make the gas as clean as possible without losing energy content.

The project -- which is called the Hot Gas Cleanup Test Facility for Gasification and Pressurized Combustion -- will bring to three the number of DOE-funded projects at SCS facilities in Wilsonville, where the company is pioneering various clean coal technologies.

In discussing today's announcement, SCS President Allen Franklin said, "The DOE continues to recognize the leadership of companies such as ours in the development of the technologies we need to become more energy independent, and we think this particular technology shows real promise."

Franklin also noted that Southern Company utilities expect to add a number of combustion turbines to meet peak energy needs in the region during the 1990s. Fuel produced using the hot gas cleanup process could become an economic alternative to the oil and gas that have traditionally powered this type of equipment.

Under the terms of the contract, SCS will serve as prime contractor, working with M.W. Kellogg Co. of Houston, and the Electric Power Research Institute of Palo Alto, Calif., to design the hot gas cleanup test facility. Two other Southern Company subsidiaries will be involved in the project -- Alabama Power as construction manager and SEI as plant operator. Southern Research Institute of Birmingham, Ala., will be responsible for special testing and measurements.

The design phase will take approximately two years to complete and will involve some 30 SCS employees. It's expected that construction of the test facility will be finished by late 1993, when the plant will add approximately 60 new employees.

SCOTTSDALE, AZ. (OCT. 3) PR NEWSWIRE - Photocomm Inc. (NASDAQ: PCOM) today announced that Westinghouse Electric Corp. (NYSE: WX) has purchased $750,000 of new convertible debentures from the company, and anticipates acquisition of an additional one million common shares for $1,250,000. This new investment in Photocomm is in accord with previously disclosed terms of a March 28, 1990, agreement, at which time Westinghouse acquired 12.2 percent of Photocomm and options to purchase additional equity and debentures. Completion of the anticipated stock purchase will increase Westinghouse's ownership in the company to approximately 22 percent.

William T. Taylor, a retired Westinghouse executive, has been elected to Photocomm's board of directors. Prior to his retirement earlier this year, Taylor was president of Westinghouse Electric Supply Co. (WESCO), a wholly owned subsidiary, and an elected vice president of Westinghouse Electric Corp.

Robert R. Kauffman, president and chief executive officer of Photocomm, said, "Westinghouse's increased investment in the company is indicative of our progress in the solar electric systems market. We have a strong business plan and growth strategy, and our relationship with Westinghouse provides a unique opportunity to develop Photocomm to its full potential."

Photocomm Inc. is a publicly owned, solar electric systems manufacturing and marketing company with corporate headquarters in Scottsdale. The company's common stock is listed on the NASDAQ stock quotation system under the symbol PCOM.

HIGHLAND PARK, MI (OCT. 3) PR NEWSWIRE - Chrysler Corporation (NYSE: C) reported an increase in car sales for the final 10-day period of September, helping the company finish the 1990 model year with total vehicle sales of 1,739,579.

It was the fifth best year in recent history for the nation's third- largest automaker.

Domestic car sales for the final 10-day period were up 5.5 percent and total

car sales were up 1 percent.

The top-selling nameplates for the 1990 model year were the Dodge Caravan and Plymouth Voyager minivans at 200,450 and 175,518, respectively. Sales of all minivans totaled 379,019 units, only 13,000 short of the 1988 model year record and only 10,000 shy of 1989 model sales despite production loss this summer for changeover to redesigned 1991 models.

Other high-volume nameplates were Jeep Cherokee, 129,224; Plymouth Acclaim, 103,370; Dodge Dynasty, 99,447; Dodge Ram pickup, 96,741; LeBaron, 90,030; and Dodge Spirit, 87,386.

Acclaim, Spirit, Plymouth Laser and Eagle Talon all set model year records.

SPRINGFIELD, VA (OCT. 3) PR NEWSWIRE - Versar, Inc. (AMEX: VSR) announced today that it has been selected by the U.S. Environmental Protection Agency (EPA) to provide monitoring, modeling, and environmental processes and effects support.

The contract, valued at approximately $16 million over the next five years, will be under the direction of Gayaneh Contos, senior vice president in charge of environmental services.

Through this contract, EPA is seeking scientific and engineering expertise to support the mission of its Office of Modeling, Monitoring Systems and Quality Assurance (OMMSQA) and its Office of Environmental Processes and Effects Research (OEPER). OMMSQA is responsible for providing the scientific knowledge to quantify exposure and responses of humans and ecological resources to pollutants; OEPER is responsible for providing the scientific and engineering knowledge to quantify and predict the release and transport of pollutants and their effects on the environment.

Under this contract, Versar will provide support to EPA in four major areas: (1) scientific and engineering support, (2) managerial support (3) quality assurance program support, and (4) technical support. Major technical and research support activities that will be immediately pursued under this contract include the following:

-- Ecological and human health monitoring, including methodology development.
-- Development and evaluation of models for environmental processes and effects research. -- Modeling and statistical analysis.
-- Indicator and biomarker research.

-- Human health exposure and risk assessment.
-- Ecological exposure and risk assessment.
-- Integration and synthesis of the findings of interdisciplinary research programs. -- Global climate change research.
-- Data base management and computer support, including geographical information system development and evaluation. -- Quality assurance.

Versar provides a wide range of scientific and technical services to solve environmental and health and safety problems caused by pollutants, hazardous materials, and toxic substances.

NEW YORK (OCT. 3) PR NEWSWIRE - Pan American World Airways today reported that scheduled traffic last month increased 6.7 percent, from 2.551 billion revenue passenger miles to 2.723 billion, representing the highest RPM level ever recorded for the month of September in the company's history.

Available seat miles were up 3.4 percent, from 3.960 billion to 4.093 billion, and load factor was up 2.1 points, from 64.4 percent to 66.5 percent.

Traffic statistics include Pan American World Airways' operations only, and do not include the Pan Am Shuttle or Pan Am Express flights.

Atlantic RPMs were up 6.2 percent, ASMs were up 2.4 percent, and load factor increased 2.5 points, from 68.4 percent to 70.9 percent.

In Latin America, RPMs were up 16.0 percent, ASMs were up 13.7 percent, and load factor increased 1.2 points, from 61.6 percent to 62.8 percent.

In U.S. domestic markets, RPMs were up 1.0 percent, ASMs were down 1.9 percent and load factor, at 57.8 percent, was up 1.6 points from last year's level of 56.2 percent.

Scheduled freight ton miles were up 1.2 percent, from 55.6 million to 56.8 million.

Year to Date For the first nine months of the year, scheduled traffic was up 9.6 percent, from 22.012 billion to 24.131 billion. Capacity was up 6.2 percent, from 34.042 billion to 36.169 billion and load factor, at 66.7 percent, showed an increase of 2.0 points.

Scheduled freight ton miles were up 0.8 percent, from 544.6 million to 549.0 million.

TORONTO (OCT. 3) PR NEWSWIRE - Abitibi-Price Inc. (NYSE: ABY) and the Canadian Paperworkers Union have reached agreement on the terms of renewal of a labor contract affecting seven of the company's mills in Ontario, Quebec, and Newfoundland. Details of the three-year agreement will not be released pending ratification by the membership.

Ron Oberlander, president of Abitibi-Price said that the agreement "will permit Abitibi-Price to remain competitive with Stone-Consolidated and other Canadian competitors."

In addition, he added, "The company hopes to work with the union during the life of the contract to devise a new process of bargaining which will build more positive working relationships and help to resolve issues of mutual concern. Our ability to work together effectively will be a determining factor in our success in the challenging years ahead."

The settlement, if ratified, will end the strike which began at the mills on September 10th.

Abitibi-Price is traded on the New York, Toronto, Montreal and Vancouver Stock Exchanges.

HOUSTON (OCT. 3) PR NEWSWIRE - National Asset Bank (a bank in liquidation) (NASDAQ: NABK) today announced that its board of directors had authorized management of the bank to review and explore various alternatives available to the bank other than operating as a bank in liquidation and to determine whether any such alternatives might provide a mechanism by which stockholder value could be enhanced. In connection with such review, the bank announced that it has retained Kenneth Leventhal & Co. to assist in the assessment of various alternatives. A spokesman for the bank stated that the bank currently anticipates that its review of alternatives would be completed by the end of 1990. The spokesman added that although the bank is currently exploring the alternatives that may be available to it to enhance stockholder value, no decision to amend, modify or otherwise change the bank's current plan of liquidation has been made. The spokesman further stated that any change to the bank's plan of liquidation, if pursued, would be subject to numerous conditions, including approval by the office of the comptroller of the

currency and the bank's stockholders.

As previously reported, the outstanding shares of common stock of the bank were issued to the stockholders of Allied Bancshares, Inc. (Allied) as a distribution in connection with the merger of Allied with and into First Interstate Bancorp of Texas Inc. (FI). The initial assets of the bank consisted primarily of participation interest in non-performing loans and various real estate and other non-performing assets transferred to it by Allied upon the bank's inception. As a result of the recent termination of the management agreement with a subsidiary of FI, the bank holds all of its loans and other assets directly and is responsible for the management and servicing of those assets.

LAUREL, MD. (OCT. 3) PR NEWSWIRE - F&E Resource Systems Technology, Inc. (FERST), publicly traded over-the-counter (pink sheets), announced that its subsidiary, FERST for Baltimore, Inc., today received its Solid Waste Management permit from the state of Maryland for a 700-ton-per-day recycling and composting facility to be built in Baltimore.

The company previously announced agreements with Chrysler Capital Corporation and John Hancock Resource Development, Inc. for the equity debt placement totaling $39 million. Likewise, previously announced was a letter of intent with Browning-Ferris Industries for a long-term contract to supply waste to the facility.

FERST has already received the required local "use permit." "This is the big one we have all been waiting for," said Ron Pickett, president of FERST. "We can now get on a definitive construction schedule and proceed to financial closing." The Maryland Energy Finance Administration has induced $32 million in tax-exempt bond financing for the project.

The project is expected to break ground in the fall of 1990 and be fully operational by January 1992, recycling 120,000 tons per year of materials which are currently landfilled. The plant will be the first of its kind in the United States, combining recycling and composting under one roof in a fully enclosed facility.

#90276p1171 10/03/1990 ~PR Newswire

SANTA ANA, CA (OCT. 3) PR NEWSWIRE - Pickblue has announced its decision to include a power protection package as an integral part of its new RISC System/6000 offering.

Recognizing the importance of power quality to data integrity, Pickblue will distribute Power Witness by Atkin/Jones Computer Service Inc. as an option for each RISC System/6000 sold through its U.S. and Canadian Dealer network. The Power Witness protection package is also available for use with PICK/RT Systems.

Power Witness combines an on-line UPS (uninterruptible power source) with an intelligent, fault-tolerant UPS monitor. The device initiates a user defined system shutdown whenever a power failure occurs.

Power Witness includes and on-line UPS to provide constant power conditioning and an emergency power supply. Power Witness software constantly monitors UPS operation and ambient temperature. Other environmental conditions can be detected with optional sensors.

If a power interruption occurs, or if environmental conditions exceed user defined parameters, Power Witness will alert the operator and direct an orderly shutdown according to user specified procedures. When the system is safely shut down and if external power has not been restored, Power Witness will turn off the UPS to conserve battery energy.

Power Witness is the first in a series of products released by Atkins/Jones to help reduce or eliminate power-related service problems.

Atkins/Jones is an independent computer service organization based in Santa Ana, Calif. The firm specializes in the installation, maintenance and support of Pick Based Computer systems, plus a select group of peripherals.

Pickblue is an affiliate company of Pick Systems, Irvine, Calif., which markets the Pick System, representing a 2.5 billion turnkey market. The system is licensed by more than 20 mid-range and mainframe computer manufacturers that resell the Pick System bundled with nearly 3000 vertical business applications worldwide. The multiuser relational database management environment is sold and supported by an estimated 2,500 VAR's throughout the world.

Pick Systems is a privately held company recognized internationally as the developer and supplier of the Pick System, a data management operating system fully portable to standard hardware platforms. Founded in 1972, Pick Systems has offices in Irvine, London, Paris and Tokyo.

SIOUX CITY, IA (OCT. 3) PR NEWSWIRE - The Securities and Exchange Commission has approved the application of Midwest Energy Co. (NYSE: MWE) (MWE) of Sioux City and Iowa Resources Inc. (NYSE: IOR) (IOR) of Des Moines to merge into Midwest Resources Inc., a new public utility holding company.

The merger was approved by shareholders of both companies in May 1990 and by the Iowa Utilities Board in July 1990. The merger is awaiting the termination or the expiration of the waiting period by the Federal Trade Commission.

Midwest Resources, will issue its own stock to MWE and IOR shareholders. MWE shareholders will receive 1.08 shares of stock in the new corporation for each share of stock they currently hold. IOR shareholders will receive 1.235 shares of new stock for each share they currently hold.

MWE is a holding company with major interests in electric and natural gas utilities and additional investments in diversified businesses. MWE's principal subsidiary, Iowa Public Service Co., provides electric service through its IPS Electric division to 156,000 customers in Iowa and southwestern South Dakota. The IPS natural gas division, Midwest Gas, serves 347,000 customers in Iowa, Minnesota, South Dakota and Nebraska.

IOR is a holding company with interests in electricity, telecommunications, computers and real estate investments. IOR owns Iowa Power, an electric utility serving 250,000 customers, all in Iowa. Iowa Power serves central and southwest Iowa including Des Moines and Council Bluffs.

#90276p1180 10/03/1990 ~PR Newswire
CLEVELAND (OCT. 3) PR NEWSWIRE - LTV Steel today responded to the Indiana Department of Environmental Management's news release made earlier today by stating that, contrary to IDEM's statement, company records indicate that LTV Steel did not ignore IDEM's 1986 order and, in fact, complied with the order's requirement to install water treatment equipment. Similarly, the company has complied with the 1988 order which was not related to the 1986 order. Company records also indicate that the company's Indiana Harbor Works has met the IDEM permit standards over 99 percent of the time in 1990.

LTV Steel has a demonstrated record of environmental responsibility and will oppose IDEM in its legal action. Just at the Indiana Harbor Works, the company has expended nearly $140 million on modern environmental control equipment in order to comply with federal, state and local environmental regulations. Additionally, the company spends approximately $22 million each

year for the operation and maintenance of these facilities and has 61 on-site and support personnel dedicated solely to environmental control activities.

With respect to the oil spill last summer into the Indiana Harbor, while it has been speculated that this spill came from an outfall on LTV Steel's property, the particular outfall identified collects discharges from both LTV and other sources. To LTV Steel's knowledge the source of the oil spill is yet to be determined. LTV Steel cooperated fully with clean up efforts and has been active in seeking to determine the source of the spill.

LTV Steel is the nation's leader in the manufacture and sale of engineered steels for demanding applications and is a wholly owned subsidiary of The LTV Corporation (NYSE: QLTV), a diversified operating company also involved in aerospace/defense and energy products.

CONTACT: Jolice Pojeta of LTV Steel Company, Indiana Harbor Works, 219-391-3632, or David L. Carroll of LTV Steel Company, Cleveland, 216-622-4600.

#90276p1181 10/03/1990 ~PR Newswire

PONTIAC, MI. (OCT. 3) PR NEWSWIRE - Pontiac Division closed the final month of the 1990 model year with sales of 59,036 vehicles, a 4.4 percent increase over September 1989 sales.

The General Motors division also showed a strong end-of-year push in the final four months of the 1990 model year, to a 4.0 percent increase over the same period last model year, with June-September 1990 sales totaling 243,770 vehicles.

"Our sales in September and in the last four-month summer period show a positive momentum that is significant in the current economic climate," said Pontiac General Manager John G. Middlebrook.

Pontiac projects a 7.2 percent share of industry passenger car sales in the June-September period, compared with a 6.7 percent share in the comparable four-month period of the 1989 model year.

For the entire 1990 model year, Pontiac dealers delivered 660,990 new cars and Trans Sport minivans, compared with 734,658 units in the 1989 model year.

"Pontiac's model year sales trended closely with the total vehicle market, but we're encouraged that in the final four months of the model year we were able to snare a bigger share of total industry sales," said Middlebrook. "For the 1990 calendar year through Sept. 30, our new car sales are taking a 7.0 percent share of industry sales and we expect to end the calendar year with a larger share than the 6.9 percent level recorded for 1989."

Middlebrook credited a number of 1990 Pontiac products for helping the division in the model year:

-- Sunbird sales in the 1990 model year jumped 15.5 percent over the previous year with deliveries of 112,600 units, the best model year performance since 1985. Convertible sales totaled 12,800 units, better than four times the number sold in 1989 and a record for the popular subcompact.

-- Grand Am, Pontiac's volume leader, topped the 200,000-mark for the fourth consecutive model year with sales of 208,813 units -- expected to place it among the top 10 nameplates in the industry when final 1990 sales figures are tallied.

-- For the model year, Trans Sport sales totaled 27,187 units. -- With the introduction of the four-door model, Grand Prix sales in the model year reached a total of 114,620 units.

#90276p1185 10/03/1990 ~PR Newswire

DETROIT (OCT. 3) PR NEWSWIRE - United States District Judge Alan McDonald last week released his ruling that General Electric hid serious doubts about its design of a giant nuclear containment vessel for the Washington Public Power Supply System plant in Richland, Wash.

Judge McDonald's ruling removes a limitation of damages clause in the 1971 contract between WPPSS and GE. Enforcement of that clause would have limited damages to $110 million rather than the $1 billion WPPSS had sought through its lawsuit.

Judge McDonald sealed his ruling when he originally made it last June to avoid causing bias in the jury that was considering the billion dollar damage claim by WPPSS. The jury was unable to reach a unanimous verdict and a mistrial was declared in July after the trial in Phoenix, Ariz.

WPPSS was represented in the case by the firm of Miller, Canfield, Paddock and Stone with Tom Heiden and Wolf Hoppe serving as lead trial counsel.

"Judge McDonald presided over every minute of a five-month trial and ruled after he had heard all of the evidence," said Heiden.

The trial involved more than 100 witnesses, more than 150 motions and some 15,000 pages of trial transcript. Pre-trial activities generated approximately 18 million pieces of paper which were organized on specially designed computer software using state-of-the-art technology.

Heiden previously represented Consumers Power Company in a case involving one of the first nuclear power plants, Palisades, located in Michigan. In 1985 the Miller Canfield firm obtained a $750 million out-of-court settlement for the City of Austin and other owners of the South Texas Nuclear Project against Brown & Root and the Halliburton Company. Last December, Miller Canfield filed an amended suit on behalf of certain owners of the Seabrook Nuclear Station against the Commonwealth of Massachusetts. The suit seeks several hundred million dollars in damages and challenges actions taken by the Commonwealth to prevent operation of the Seabrook station.

Anthony C. Eitreim, senior counsel for Washington Public Power Supply System, described Miller Canfield as one of a small number of law firms in the nation with experience in complex litigation. "The law firm's experience in working with nuclear industry experts and its practical application of computerized litigation support were essential in presenting very difficult material to the jury," Eitreim said.

Miller, Canfield, Paddock and Stone is a major law firm with offices in Michigan, Washington, D.C. and Florida.

#90276p1186 10/03/1990 ~PR Newswire

ATLANTA (OCT. 3) PR NEWSWIRE - Ronald W. Allen, chairman, president, and chief executive officer of Delta Air Lines, has signed purchase agreements for two McDonnell Douglas (NYSE: MD) MD-11 trijets and 26 MD-90-30 medium-range twin jets. Delta also took options on 22 additional MD-88s.

The signing confirms Delta's intention to purchase up to 160 MD-90-30s -- the original launch order for the next generation twin jet -- which was announced in November 1989. Delta's intention to buy two additional MD-11s was announced in May 1990. Its trijet commitments now total 42.

The MD-90-30 contract covers 100 aircraft and includes a provision for the airline to convert up to 60 MD-88 orders to MD-90-30 orders at a later date. Delta now holds 167 commitments for the MD-88.

Delta's MD-90-30s are scheduled for delivery beginning in late 1994. Delta's two new MD-11 aircraft are scheduled for delivery in the first and third quarters of 1994.

Delta will operate its MD-90-30s in a 152 passenger mixed-class configuration and has opted for a three-class, 264 passenger seating arrangement for its MD-11 long-range wide-cabin jets.

The MD-90-30 has a maximum takeoff gross weight of 156,000 pounds (70,761 kg) and a range of 2,400 nautical miles (3,870 km). The MD-90 series aircraft will be powered by the International Aero Engines V2500 engine, built by an international consortium of engine manufacturers. The V2500, already certified for commercial use, is the quietest engine in its class.

As of Sept. 1, 1990, McDonnell Douglas had received 1,715 orders and other commitments for the MD-80 and MD-90 programs, and 379 commitments for the MD-11.

#90276p1187 10/03/1990 ~PR Newswire

RANDOLPH, NJ (OCT. 3) PR NEWSWIRE - The board of directors of United Jersey Bank/Northwest has voted to merge with United Jersey Bank. The board of United Jersey Bank will meet later this month to consider and vote on the proposed merger. The completion of the merger would be early in 1991 following the approvals of the board of United Jersey Bank and regulatory agencies.

Doris M. Tarrant, chairman, president and chief executive officer of United Jersey Bank/Northwest will continue with the combined institution working closely with Fred M. Moses, president and chief executive officer of United Jersey Bank. Tarrant will concentrate on various aspects of the transition.

Both banks are subsidiaries of the Princeton, N.J.-based UJB Financial Corp. (NYSE: UJB). United Jersey Bank is headquartered in Hackensack, N.J., and, with $6.3 billion in assets and 76 offices, is UJB Financial's largest member bank. United Jersey Bank/Northwest has $533.7 million in assets and operates 15 offices in Morris County, N.J.

Commenting on the proposed merger, T. Joseph Semrod, chairman, president and chief executive officer of UJB Financial said, "United Jersey Bank/Northwest under the leadership of Doris Tarrant has been one of our top performing banks. This proposed merger is the latest in a series of consolidations designed to improve customer convenience and increase operating efficiencies. In 1990, we have completed one internal merger and are in the final stages of two others. With the proposed consolidation of United Jersey Bank/Northwest, we will have only three banks in New Jersey rather than the seven we had at the beginning of this year."

UJB Financial has $13.3 billion in assets and more than 270 offices in New Jersey and eastern Pennsylvania. The company has nine member banks and 11 active non-bank subsidiaries providing financial services to individuals, businesses, not-for-profit organizations, government entities and other financial institutions.

NEW YORK (OCT. 3) PR NEWSWIRE - Woolworth Corporation (NYSE: Z) said its wholly owned Canadian subsidiary, F.W. Woolworth Co. Limited, today delivered a letter to The Oshawa Group Limited (TORONTO STOCK EXCHANGE: OSH.A) of Toronto expressing surprise that Woolworth has not been given the opportunity to bid on the acquisition of Oshawa's 51-store Towers Department Stores Inc. subsidiary and asking for information that would enable it to do so.

The letter was sent by Woolworth following recent reports in the Canadian press that Oshawa is considering selling its Towers chain to Zellers Inc., a subsidiary of Hudson's Bay Company.

Toronto-based F.W. Woolworth Co. Limited operates some 462 general merchandise and specialty stores in Canada, including 146 Woolco full- line promotional department stores.

Following is the complete text of the letter sent today by F.W. Woolworth Co. Limited to The Oshawa Group Limited:

"We are disappointed to learn from today's paper that you are contemplating selling the Towers operation to Zellers, and we're surprised that we haven't been given an opportunity to make an offer.

"In fairness to your company and its shareholders, we would like to have the same information regarding the Towers operation made available to us as has been made available to Zellers, in order to assess whether we would be prepared to make an offer.

"We'd appreciate hearing from you as soon as possible."

LOS ANGELES (OCT. 3) PR NEWSWIRE - Shamitoff Industries has signed separate agreements with United Media and Marvel Entertainment Group to create and develop concepts and new products in the toy, clothing, comic book and animated cartoon fields. Joel B. Shamitoff, chairman and chief executive officer, reported that Toy Fair in February, 1991 is targeted for introduction of the first of the new products.

United Media, which owns the United Feature Syndicate, is the licensor of the

Peanuts and Garfield characters. Shamitoff called the agreement with United Media "a milestone. We understand it is the first time United Media has agreed to represent and market an inventor and his future products."

The United Media-Shamitoff agreement is a multi-million dollar, several year arrangement, Shamitoff said. United Media will act as Shamitoff's exclusive worldwide representative for consumer products, fictional characters, premium products and incentive products. For the toy market, Shamitoff will focus on developing, action toys, stuffed animal characters, creative board games, and video games.

Shamitoff also has signed an agreement with Marvel Entertainment Group to publish properties utilizing the comic book medium for promotional use by major Fortune 500 companies.

James Galton, president of Marvel, commented, "Shamitoff Industries has a fine reputation in the area of product development and we are delighted to be associated with them. Together, I believe our creative talents will meld perfectly."

Shamitoff and Marvel are currently working on a significant project involving one of the world's largest soft-drink companies.

NEW YORK (OCT. 3) PR NEWSWIRE - Scholastic Corporation announced today that it has postponed indefinitely its proposed initial public offering of 4.2 million shares of common stock due to the volatility of current market conditions.

The company had filed a registration statement with the Securities and

Exchange Commission on Aug. 10 for the proposed offering which included 3,270,000 shares to be sold by the company and 930,000 shares to be sold by certain selling stockholders.

The offering was to have been made concurrently in the United States and internationally -- 3.4 million shares in the United States and 800,000 shares internationally. The U.S. offering was to be co-managed by Goldman, Sachs & Co. and Alex. Brown & Sons Incorporated, and the international offering was to be co-managed by Goldman Sachs International Limited and Alex. Brown & Sons Incorporated.

Said Richard Robinson, chairman, chief executive officer and president of the company, "Despite the difficult market conditions which evolved since we announced this offering seven weeks ago, the response we received from prospective investors was very positive. Given the volatility of the current market environment, however, we feel it is not in the best interest of the company or its shareholders to proceed with this offering at this time. Fortunately, the company is able to postpone this offering indefinitely because of the company's strong financial position."

Headquartered in New York City, Scholastic Inc. is a leading publisher and distributor of children's books, classroom and professional magazines and other educational materials, with operations in the United States, Canada, Australia, the United Kingdom and New Zealand.

SAN FRANCISCO (OCT. 3) PR NEWSWIRE - ACA JOE Inc. announced today that it lost money on its operations during the second fiscal quarter which ended July 28, 1990. The company estimated that it lost approximately $2,518,000 on revenues of approximately $3,072,000. That compares with losses of $2,310,000 on sales of $2,404,000 in the same quarter last year.

ACA JOE's primary source of funds is a credit line with its major shareholder United Trend Holdings, B.V., which at the quarter ending date had an outstanding balance of $15,093,000, including a reserve of $2,140,000 related to bankruptcy claims. This amount exceeds the credit line limit.

The company said that, for the remainder of this fiscal year, it plans to expand its wholesale and franchising divisions' sales in the United States and abroad and that it plans to open approximately five outlet stores and to establish various new franchise store locations.

ACA JOE Inc. is a specialty retailer headquartered in San Francisco with stores around the country.

#90276p1224 10/03/1990 ~PR Newswire

EATONTOWN, N.J. (OCT. 3) PR NEWSWIRE - PVC Container Corporation (NASDAQ: PVCC) announced today that its net income for the fiscal year ended June 30, 1990, increased 5 percent to $427,628 as compared to $407,245 for the fiscal

year ended June 30, 1989. Earnings per common share were $.06 compared with $.07 for the same period a year ago.

Total net sales for fiscal 1990 of $27,508,215 decreased approximately 5 percent when compared to net sales of $28,935,361 for fiscal 1989. Income from operations for fiscal 1990 increased approximately 50 percent to a level of $1,267,644, or 4.6 percent of sales as compared to $842,800, or 2.9 percent of sales for fiscal 1989.

Phillip L. Friedman, president and chief executive officer, said, "PVC Container's fiscal year results reflect a sluggish demand for plastic bottles experienced during the first six months of the fiscal year in addition to absorbing some non-recurring start-up expenses associated with the completion and relocation of the company's plastic bottle business to its new manufacturing facility. The financing costs of the new manufacturing facility resulted in an increase of interest expense of approximately 114 percent to $604,839 for fiscal 1990 as compared to $282,333 for fiscal 1989."

"Increased operating income was primarily the result of improved performance in the company's plastic compounding business. The PVC compound margins benefited during the fiscal year due to lower PVC resin prices as compared with fiscal 1989. An improvement in the demand for plastic bottles in the second half of the fiscal year also helped boost operating income," he said.

"The new bottle manufacturing facility is operating at improved levels of efficiency, and should put us in a better position to compete in our markets in the coming years. The company has also replaced several of its older blow molding machines with newer state-of-the-art extrusion blow molding equipment and has also introduced some bottle decorating capabilities which will result in more added value for our plastic bottles," he stated.

Friedman added, "Our Novatec Plastics division continues to make progress on diversifying our compound business into specialty niche markets which will be less sensitive to price competition experienced in some of the commodity compound markets. Selling and R&D expenses have increased during the fiscal year to support a more accelerated effort to commercialize new plastic compounds and alloys. Additionally, the company has increased its pelletizing capabilities which is expected to improve the compound plant's flexibility while modestly increasing its overall plant capacity."

PVC Container Corporation, located in Eatontown, is a major producer of plastic containers for the packaging industry. Its wholly owned subsidiary, Novatec Plastics & Chemicals Company Inc., is a leading supplier of PVC compounds and plastic alloys in the United States.

CHICAGO, (OCT. 3) PR NEWSWIRE - Continental Bank Corporation (NYSE: CBK) announced today that the Securities and Exchange Commission has declared its recent shelf registration statement for common stock effective. The statement filed was requested by the Federal Deposit Insurance Corporation (FDIC) to facilitate the sale of its remaining 26 percent equity interest in Continental.

Sale of the FDIC's interest would terminate the restructuring agreement reached between Continental and the regulatory agency in 1984. All proceeds from a sale would go to the FDIC. At the end of the second quarter, Continental reported 53,767,085 common shares and equivalents outstanding.

Since the FDIC acquired its Continental stock ownership as part of the 1984 restructuring, the agency has sold nearly 36 million shares of Continental common stock for about $788 million in three public offerings and in a sale to the Continental Employee Stock Ownership Plan. In addition, the FDIC sold its 12.8 million shares of Class A preferred stock to Continental for $273 million.

DRYDEN, MI (OCT. 3) PR NEWSWIRE - For its second quarter ended Aug. 31, 1990, Champion Enterprises, Inc. (AMEX: CHB), headquartered in Dryden, reported net income of $861,000, $0.13 per share, compared to a net loss of $2,396,000 ($0.33 per share) a year ago. Sales and revenues of $76.7 million declined 6 percent from the year-ago quarter.

Fiscal six-month net income of $1,572,000, $0.23 per share, compares to a net loss of $3,390,000 ($0.47 per share) a year earlier.

Continuing housing operations (81 percent of revenues) produced income of $3.8 million for the quarter, which was $2.1 million higher than the prior year. Transportation operations (17 percent of revenues) reported a quarterly loss of $700,000 that was attributed to poor sales (down 17 percent) and the model-year changeover.

Net losses generated from closed and other operations totalled $519,000 for the quarter, attributed primarily to the provisions relating to the decision to close two facilities. During the quarter, a gain of $610,000 was recorded from the sale of real estate holdings.

Walter R. Young Jr., president and CEO, said: "The results of the second quarter are reassuring with the continued success of our restructuring. In our ongoing housing operations, we are looking for a relatively strong third quarter and to minimize losses during our traditionally weak winter fourth quarter. In our ongoing transportation operations, we are aggressively expanding our medium-duty bus operations and consolidating our recreational vehicle operations under new management."

Champion Enterprises, Inc. is a holding company whose principal subsidiaries are leading producers and national marketers of manufactured homes, motor homes and medium-duty buses. Its common stock is listed on the American, Midwest and Pacific stock exchanges (ticker symbol: CHB).

#90276p1239 10/03/1990 ~PR Newswire

PITTSBURGH, (OCT. 3) PR NEWSWIRE - Papercraft Corp., a wholly owned subsidiary of Amalgamated Investment Corp., announced today that it will not make a cash interest payment in the amount of $2.9 million that was due Oct. 1 to the holders of the company's outstanding first priority notes and second priority notes.

The company announced that it did pay the portion of interest due Oct. 1 on such notes that was payable through the issuance of additional first priority notes and second priority notes. The first and second priority notes were originally issued in connection with Papercraft's May 1989 restructuring of its then outstanding subordinated debt.

Papercraft has commenced discussions with a bondholder committee representing a substantial majority of the first priority notes and the second priority notes in an attempt to reach a long-term solution to adjust or reduce Papercraft's debt service requirements. In connection with the discussions, the members of the bondholder committee have indicated that until Nov. 2, 1990 they will not exercise any rights of acceleration arising from the nonpayment of cash interest (and will not seek to influence the trustee to exercise any

such rights) under the indentures relating to the first and second priority notes.

Papercraft Corp., through its subsidiaries, is a manufacturer and distributor of household products.

DETROIT, (OCT. 3) PR NEWSWIRE - Toyota Motor Sales U.S.A., Inc. today established a record for car sales in the Midwest for the month of September.

Toyota car sales in 14 midwestern states totaled 11,698 for September 1990, a 9-percent increase over the previous record of 10,753 set in September 1989.

Toyota car sales for the Midwest during the first nine months of 1990 increased 17 percent to 121,704 from 103,955 reported for the Jan. 1-Sept. 30 period of 1989.

In Toyota's Chicago Region, which includes the states of Illinois, Indiana, Wisconsin, Minnesota and Michigan (Upper Peninsula), car sales in the first nine months of 1990 increased 18.2 percent. Sales for the period were 47,986 compared to 40,581 for January through September 1989.

In Toyota's Cincinnati Region, which includes the states of Ohio, Michigan (Lower Peninsula), Kentucky and Tennessee, car sales increased 17 percent in the first nine months of 1990. Sales for the period were 54,456 vs. 46,554 in 1989.

In Toyota's Kansas City Region, which includes the states of Missouri, Kansas, Iowa, Nebraska, North Dakota and South Dakota, car sales in the Jan. 1-Sept. 30 period this year totaled 19,262, an increase of 14.5 percent over the 16,820 cars sold in the same period of 1989.

#90276p1252 10/03/1990 ~PR Newswire

CHICAGO, (OCT. 3) PR NEWSWIRE - Goldblatt's Department Stores Inc. announced today that Joe Osowski has been elected to the position of president and chief operating officer. He was formerly the executive vice president.

William Hellman, the current president, will now devote all of his time to Goldblatt's parent company, JG Industries Inc. (NASDAQ: JGIN), where he continues as president and CEO. According to Hellman, "Joe Osowski's youth, retail background and energies will help us move Goldblatt's aggressively ahead into the '90s. The management team of Osowski and Lionel Goldblatt and the organization developed by them assures a continuation of Goldblatt's expanding horizons."

Osowski comes to Goldblatt's with 30 years' experience in retailing, including senior executive positions with several nationally known chains. Most recently he was a vice president and general merchandise manager for Montgomery Ward. He received his B.A. degree from the University of Minnesota and a master's in management degree from Northwestern University.

"I am very happy to be associated with Goldblatt's. I see its potential for the 1990s and beyond and look forward to being a part of it," said Osowski.

He added that, "Goldblatt's will continue its philosophy of providing its urban customers with bargain oriented stores."

Goldblatt's is one of the oldest Chicago-based department store chains, having been founded in 914 by Nathan and Maurice Goldblatt. From one store on Chicago Avenue, it eventually grew to 47 stores in four states. Following a Chapter 11 reorganization in the early 1980s, Goldblatt's now operates 10 stores in Chicago and one in Gary, Ind.

JG Industries Inc. is a Chicago-based retailing concern that operates, through its various subsidiaries, 11 Goldblatt's Department Stores in Illinois and Indiana; 10 Huffman Koos furniture stores in New Jersey and New York; and 137 specialty retail shoe stores nationwide.

MESA, AZ (OCT. 4) PR NEWSWIRE - Recent press reports that AH-64 Apache attack helicopters in the Persian Gulf are operating below U.S. Army readiness standards are blatantly untrue, McDonnell Douglas Helicopter Co. President Tom Gunn said today.

"Apaches in the Middle East are operating at rates significantly better than the 75 percent mission capable rate required by the Army," Gunn said. "McDonnell Douglas is concerned that totally erroneous and unsubstantiated reports about low availability are being circulated.

"Reports from the Army, our own personnel and industry sources close to the Apache tell us the helicopter is performing superbly in a very hostile and unforgiving environment," he said. "These reports uniformly indicate that the Apache is meeting every demand the Army places on it."

Gunn added that the recent release of the General Accounting Office report about Apache readiness is another area of concern to McDonnell Douglas since "the GAO's report is based on information that is 18 to 24 months old."

"The Army and McDonnell Douglas have been working together for more than a year to resolve field-reported concerns," Gunn said. "We've significantly improved the Apache's reliability rates -- and we believe this is clearly reflected in the way the Apache is performing in the Middle East."

The Army is planning to buy 66 more Apaches, bringing the total Army orders to 807, the full quantity needed for the Army to meet its force structure requirements.

Additionally, the Army plans to order 60 Apaches for foreign military sales to

three international customers.

"Continued support, in the form of orders, tells us that our customers appreciate the Apache's capabilities as the best combat helicopter in the world," Gunn said.

HOUSTON (OCT. 3) PR NEWSWIRE - Baroid Corporation (NYSE: BRC) today announced that New Baroid Corporation has entered into and closed upon a new bank credit agreement to replace the existing Baroid credit agreement as contemplated by the company's plan of restructuring announced in August. New Baroid is the subsidiary formed to hold the petroleum services business which the company intends to spin off. The arranger and agent for this seven-year unsecured agreement is the Chase Manhattan Bank, N.A. Other members of the bank syndicate are Banque Paribas; First City, Texas-Houston, N.A.; the Nippon Credit Bank, Ltd.,; and Continental Bank N.A. Borrowings under the agreement will bear interest at the prime rate of the Chase Manhattan Bank, N.A., or one percentage point over LIBOR at the option of New Baroid.

The company also announced that it understands that due to a backlog of pending matters at the Securities and Exchange Commission, the company has not yet received comments on its regulatory filing. As a result, the company said that the record date for determining stockholders entitled to receive the dividend of shares in New Baroid is now anticipated to be in the second half of October and that the exact date will be set by the company's board of directors upon completion of SEC regulatory compliance.

DAMASCUS (OCTOBER 3) TASS - THE ELITE UNITS OF THE IRAQI ARMED FORCES -- THE NATIONAL GUARD -- HAVE BEEN FULLY WITHDRAWN FROM KUWAIT ON SADDAM HUSSEIN'S ORDER AND DEPLOYED IN IRAQ'S HINTERLAND, THE SANA NEWS AGENCY REPORTED TODAY WITH REFERENCE TO RADIO EL RIYADH.

SANA POINTS OUT THAT THE REDEPLYMENT WAS MAINLY CAUSED BY MANIFESTATIONS OF WIDESPREAD DISCONTENT AMONG THESE UNITS OVER THE PLIGHT THEY HAVE FOUND THEMSELVES IN.

THE RADIO SAID A GROUP OF SENIOR NATIONAL GUARD OFFICERS DEMANDED THAT THE COMMAND ENSURE AIR SUPPORT FOR THE TROOPS STATIONED IN KUWAIT. HOWEVER, HUSSEIN REFUSED THE DEMAND AND ORDERED A WITHDRAWAL OF THE NATIONAL GUARD,

WHICH HAS BEEN REGARDED THE MAINSTAY OF THE REGIME, TO IRAQ.

THE REPORT DRAWS ATTENTION TO A MISINFORMATION CAMPAIGN LAUNCHED BY BAGHDAD IN AN ATTEMPT TO CONCEAL FACTS CONCERNING THE ACTUAL DEVELOPMENT OF EVENTS FROM IT OWN PEOPLE.

UNITED NATIONS (OCTOBER 4) TASS - THE JOINT SOVIET-AMERICAN STATEMENT IN SUPPORT OF UNITED NATIONS ACTIVITIES IS THE INDICATOR OF THE TWO COUNTRIES' NEW APPROACH TO AN ASSESSMENT OF THE ROLE AND IMPORTANCE OF INTERNATIONAL ORGANIZATIONS IN SHAPING A POST-CONFRONTATION WORLD ORDER, SOVIET FOREIGN MINISTER EDUARD SHEVARDNADZE SAID HERE IN COMMENT ON THE STATEMENT ADOPTED ON THURSDAY.

"WHILE DEEPENING THE SOVIET-AMERICAN DIALOGUE, WE DO NOT IMAGINE INTERNATIONAL RELATIONS WITHOUT THE ACTIVATION OF MULTILATERAL MECHANISMS," HE EMPHASISED.

SHEVARDNADZE UNDERLINED THE NEED FOR THE WORLD COMMUNITY TO COMBINE EFFORTS AND ACHIEVE CONSENSUS IN THE MOVEMENT TOWARDS A NEW WORLD ORDER THROUGH A BALANCE OF COMMON INTERESTS.

"IN ORDER TO RAISE THE EFFECTIVENESS OF THE U.N., IT IS IMPORTANT THAT ALL U.N. AGENCIES SERVE AS A CENTRE FOR THE COORDINATION OF THE POLICIES AND SPECIFIC ACTIONS OF STATES. WE SUGGEST ADJUSTING THE U.N. FINANCING SYSTEM AND MAKING THE INTERNATIONAL CIVIL SERVICE A MODEL OF HIGH COMPETENCE AND PROFESSIONALISM," SHEVARDNADZE STRESSED. HE WELCOMED THE U.N. ATTITUDE TOWARDS THE GULF CRISIS.

THE SOVIET MINISTER INVITED THE INTERNATIONAL COMMUNITY TO SUPPORT THE GOALS CONTAINED IN THE STATEMENT. "WE BELIEVE THAT THE SOVIET-AMERICAN INITIATIVE IN THIS FIELD WILL SERVE THE CAUSE OF FOSTERING RELATIONS OF PEACE AND COOPERATION THROUGHOUT THE COORDINATE SYSTEM OF A NEW AND STILL RATHER FRAGILE WORLD ORDER", HE SAID.

BOSTON (OCT. 3) UPI - An aspirin tablet taken every other day can significantly reduce the incidence of migraine headaches among men and may do the same for women, researchers said.

A study involving 22,071 male doctors found those who took aspirin regularly experienced 20 percent fewer migraines than those given a dummy pill.

Although the research involved only men, ''there is no reason to think aspirin could not also help reduce migraines in women,'' said Julie Buring of the Brigham and Women's Hospital in Boston.

Up to 7 percent of adult men in the United States and as many as 20 percent of adult women are believed to suffer from frequent or occasional migraine headaches, which can be accompanied by debilitating pain, she said.

Migraines, one of several classifications of headaches, are not well understood but are thought to be caused by enlargement of blood vessels in the brain. Buring said other types of headaches have different causes, such as muscle tightness and low blood sugar. Headaches are most commonly treated with pain relievers called analgesics.

In a new report published Tuesday in the Journal of the American Medical Association, 11,037 male doctors participating in a long-term study known as the Physicians' Health Study took a standard 325 milligram buffered aspirin tablet every two days while 11,034 doctors took a worthless substitute.

Among the doctors who took the aspirin, only 661 - 6 percent - had at least one migraine headache during the five-year study while 818 - or 7.4 percent - of the doctors who took the dummy pills had at least one migraine.

The difference represented a ''statistically significant 20 percent reduction in recurrence rate,'' Buring and her colleagues reported.

The study participants had an average age of 53 and the two groups were equally matched according to characteristics such as blood pressure, cholesterol levels, amount of regular exercise, smoking and alcohol consumption.

In 1988, researchers studying the same group concluded that those taking aspirin cut the risk of suffering a heart attack nearly in half.

At the time, researchers said it appeared aspirin reduced heart attacks by making it harder for platelets - substances in the blood which aid in blood clotting - to clump together, forming clots that can help block arteries.

Aspirin's ability to reduce platelet clumping also may be important in migraine reduction, although the mechanism is different, Buring said. ''We don't understand what causes migraines,'' Buring said, though she added a blood chemical named serotonin is believed to play a role.

Researchers know that shortly before a migraine attack, significant amounts of serotonin are released from platelets, where the chemical is encapsulated. The serotonin then is believed to trigger enlargement of blood vessels in the brain, resulting in the painful symptoms of migraines.

By helping prevent the clumping of platelets, aspirin appears to inhibit the ability of serotonin to break out of platelets, thus preventing migraines, Buring said.

Because the study found aspirin had no apparent ability to reduce the incidence of the far more common, and generally less painful, type of headache many people suffer, she said the researchers concluded that aspirin's effect on migraines was not due to its pain-relieving ability. Plus, ''the dose is too low to affect a migraine,'' she said.

As a next step in the research, Buring said she and colleagues hope to conduct an even larger nationwide study measuring aspirin's ability to reduce migraines and heart attacks in female nurses.

In the meantime, she said it appears migraine sufferers could benefit from taking aspirin as a preventive measure, given that its side effects, such as gastrointestinal discomfort, are comparatively infrequent and well understood. But people ''should remember this is a drug and consult first with a doctor,'' she added.

ROCHESTER, MI (OCT. 3) UPI - A Detroit sportscaster filed an assault and battery complaint Tuesday against Detroit Piston Isiah Thomas, alleging the guard choked and threw him against a car.

Virg Jacques, of WJBK-TV, filed the charges with the Oakland University Department of Public Safety following a Pistons practice.

Thomas could not be reached for comment, and Pistons General Manager Jack McCloskey said he would not comment on the complaint until he talked with all parties involved.

''When I was done with my interviews it just so happened that he was leaving at the same time my cameraman and I were leaving,'' Jacques said. ''Isiah walked out the door, followed by my cameraman and then followed by me. When we got outside, he turned around and saw me there and said, 'Hey man, I want to say something to you.'

''After which I went over and said 'Sure what do you want?' He paused and then said, 'Ah, forget it.' I said, 'No, if you want to say something, go ahead.' He paused again and said, 'Naw, forget it.'''

Jacques said he went to his vehicle and was waiting for his cameraman to let him in.

''He (Thomas) got over to his car and it appeared that he was having a conversation with James Edwards, whose vehicle was parked next to Isiah's,'' Jacques said. ''Isiah appeared to be talking with James but was looking at me.

''Finally, I told my cameraman, 'Let me go see what's going on.' So I walked over to his car and he was near the driver's side door. I said, 'You want to say something? You said earlier you wanted to talk, now you don't want to talk. Now you're staring. What's going on? Is there a problem? You gonna be like this all season?

''Essentially, he started shouting some obscenities, telling me to get out of his face. After a little bit of verbal exchange on his part, he lunged toward me and pushed me against his car and started choking me.''

The sportscaster said Edwards witnessed the scuffle and added that he would be willing to take a lie detector test to prove the allegations.

The Oakland University Department of Public Safety is investigating the incident.

(OCT. 3) UPI - Student protesters in the seventh day of a sit-in at the

University of the District of Columbia won some concessions Tuesday. An artist withdrew her gift of a controversial piece of artwork to the Washington school and three Board of Trustee members announced they would quit. However, only two of the trustees are among the 12 whose resignations the students are seeking.

Wheelchair-bound protesters expanded their demonstration Tuesday from the office of the president of Moorehouse College in Atlanta to a state health-care office. The group... American Disabled for Attendant Programs Today, or ADAPT... is pressing for Medicaid funding for home care for the disabled. The protest targeted Moorehouse because Health Secretary Louis Sullivan is a former president of the insitution's medical school.

Authorities in Winthrop, Massachusetts, suspect that a natural gas leak caused the ''massive'' explosion and fire that leveled two homes and heavily damaged three more in the Boston suburb Tuesday. Six firefighters were treated for smoke inhalation and minor burns. NO residents were reported hurt.

#90276u0190 10/03/1990 ~United Press International

(OCT. 3) UPI - In his nationally broadcast speech Tuesday night, President Bush warned that enactment of the 500-BILLION-dollar package of tax hikes and spending cuts is necessary to prevent a recession. He urged Americans to embrace the package and make the vote in Congress less difficult for lawmakers. In the face of the upcoming elections, negotiators who hammered out the deal decided that any agreement must win the support of a majority of both Democrats and Republicans in both the House and Senate. That's to prevent one party from blaming the other for the painful effects of the accord.

East and West Germany have officially became one... and President Bush sent a taped message from the Oval Office congratulating the German people for the re-unification of their long-divided nation. Bush declined an invitation to go to Germany's for the re-unification ceremony. But he plans to host a ceremony of his own in the Rose Garden Wednesday to celebrate the historic event.

Officials at the World Health Organization say more than five- thousand new AIDS cases were reported last month- mostly from the United States, Germany, Switzerland and The Netherlands. Since the Geneva-based U-N agency began keeping track a decade ago, the number of documented AIDS cases worldwide has risen to more than 288-thousand.

Researchers at Brigham and Women's Hospital in Boston report that an aspirin tablet taken every other day can significantly reduce the incidence of migraine headaches among men. They say it may do the same for women. Migraines... which can cause debilitating pain... are thought to stem from enlargement of blood vessels in the brain.

#90276u0198 10/03/1990 ~United Press International
(OCT. 3) UPI - San Francisco police say at least four people were killed Tuesday when a car driven by a 91-year-old man who had apparently suffered a heart attack roared down a steep hill and crashed into several other cars. The dead include the elderly driver of the out-of-control car... two children trapped in a car that burst into flames... and the driver of another vehicle. The woman driver of the burning car was hospitalized in very critical condition. Three other people- possibly pedestrians- were less seriously hurt.

Health officials in Chicago continue their efforts to pin down the source of apparent food poisoning that sent at least 282 hardware conventioneers to the hospital. 47 of them have been admitted. Officials are testing food served Monday morning at the company headquarters and Sunday evening at the Hyatt Regency Hotel. But they say it could be several days or weeks before a determination is made.

The Los Angeles City Council Tuesday voted to ban animal sacrifice... becoming the first city in the nation to outlaw ritualistic slaughter under any circumstances. The new ordinance makes such killings punishable by up to six months in jail and a fine of up to one-thousand dollars. As many as 300 animal sacrifices have occurred in Los Angeles during the past year involving all

sorts of animals... but particularly dogs and cats.

#90276u0285 10/03/1990 ~United Press International
BANGKOK, Thailand (OCT. 3) UPI - The Soviet Union has slashed deliveries of oil products to Vietnam by 70 percent this year, causing sharp price increases despite increased production from Vietnam's own oil fields, official Hanoi radio reported.

''During the past two weeks and more, oil prices ... throughout the country have increased unexpectedly, thus fomenting a competitive temperament among consumers,'' the radio said in broadcast Sunday. A translation of the report was made available Wednesday.

''This was due mainly to a reduction in the quantity of imported oil this year '' the broadcast said.

The radio gave no price figures, but other sources said gasoline prices had doubled to $1.25 per gallon in the past month.

The radio said oil contracts with the Soviet Union faced ''numerous difficulties,'' which it did not explain.

Diplomatic sources, however, have said the Soviet Union, Vietnam's main supplier, has cut back its normal supplies of refined oil products and fertilizer because Vietnam has been unwilling to pay its back debts.

The radio said the Soviet Union has supplied only about 562,000 barrels of oil products so far this year to the Home Ministry Oil Corporation - 70 percent less than the 1.8 million barrels planned. It was not clear whether the supply figure was in error or whether it excluded Soviet supplies to other economic units. Diplomatic sources said the Soviet Union pledged about 18 million barrels for the first nine months of the year.

The radio said Vietnam has been forced to pay hard cash to import oil from other countries, but with world prices higher due to the Middle East crisis, domestic prices were rising fast.

More oil and gas would have to be purchased on the world market by a government already severely short of foreign exchange, it said.

It said the government was trying to distribute oil products equally to all areas of the country.

The broadcast called on state distribution agencies to ensure fuel was sold fairly to consumers and to prevent profiteering by private merchants.

The only bright spot was a new oil field discovered off the southern Vietnamese coast.

The the first commercial well in the field, announced Sept. 16, is now producing 3,370 barrels per day, the Vietnam News Agency said Tuesday.

''Evaluation of the reserve and quality of oil is continuing,'' the agency said. ''It is believed that this is one of the biggest oil deposits on the Vietnamese continental shelf.''

Vietnam expects to produce about 14.6 million barrels of oil this year from another field nearby that has been operated by a joint venture with the Soviet Union. It has also signed oil exploration agreements with nine oil companies from non-socialist countries.

Vietnam, however, has only one small refinery which cannot supply national needs and a large refinery is still in the planning stages.

#90276u0288 10/03/1990 ~United Press International
(OCT. 3) UPI - TODAY'S PEOPLE:

DUVALIERS TO GET REDIVORCED: The Duvaliers are divorcing again. Deposed Haitian dictator Jean-Claude ''Baby Doc'' Duvalier has filed for divorce from his wife, Michele, in France. They were divorced last November by a court in the Dominican Republic but the judgment was not recognized by the courts in France, where the couple have been living since fleeing Haiti in 1986. Duvalier lives in a sumptuous villa in southern France while his wife, who was given custody of the couple's two children by the Santo Domingo court, moved to Cannes on the Cote d'Azur several months ago.

THOMPSON BLASTS SCUM: Hunter Thompson hasn't gotten over his brush with the law earlier this year. ''Songs of the Doomed,'' a collection of his works that will be published in November by Summit Books, is dedicated to ''all the friends, strangers and even enemies who answered the Great Roll Call when I was seized by rabid scum who tried to put me in prison.'' Thompson had faced drug charges after a wild party at his home outside Aspen, Colo., but the case was dropped because potential witnesses refused to cooperate with prosecutors.

WILLIE AND JOE IN THE DESERT: How would Willie and Joe - the two World War II dogfaces created by cartoonist Bill Mauldin - make out if they were in Saudi Arabia? Quite well, Mauldin says. ''I would imagine they would try to think of ways of having devoted relatives send beer to them - sealed in tin cans, maybe '' Mauldin said in Reno, Nev., where he picked up a distinguished service medal at the National Guard Association's annual convention Tuesday. Nonetheless, Mauldin says today's infantrymen are smarter and better trained than those in Willie and Joe's time.

HACKMAN TO TAKE A PLANE BREAK: Gene Hackman keeps busy. He has a role in ''Post Cards From the Edge,'' stars with Anne Archer in ''Narrow Margin'' and has two more movies, ''Class Action'' with Mary Elizabeth Mastrantonio and

''Patriots'' with Mikhail Baryshnikov, in the works. ''I like the challenge,'' Hackman told the Los Angeles Times in a discussion of his work ethic. ''When I'm actually there working, I love the pressure of trying to make a scene work trying to create a character. The rest of it's not a lot of fun, the business aspects of it. And the waiting (on the set) gets to you.'' But Hackman is not planning on making another movie until February or March. In the meantime, he and his son are building an airplane from a kit.

GLIMPSES: Vice President Dan Quayle, Class of '69, goes back to his old school DePauw University in Greencastle, Ind., Oct. 26 to pick up a public service award. Quayle, who also will deliver a convocation address during his appearance, was given an honorary degree by the school in 1982 ... Organizers expect 1 million people to attend the 10- day Rock in Rio II music festival in January. The attractions include George Michael, INXS, Guns n' Roses, Robert Plant, Billy Idol, David Lee Roth, Donna Summer, Lisa Stanfield, Ziggy Marley, Run-DMC, and A-ha. The proceeds from one night of the show will be donated to help Brazil's homeless children.

#90276u0299 10/03/1990 ~United Press International

(OCT. 3) UPI - Around the world... around the clock... news from United Press International: .

Germans laughed and cried as the division between East and West ended at midnight after 45 years. In Berlin, there was a carnival-like atmosphere as Germany was re-united. Hundreds of thousands of people celebrated at the Brandenburg Gate... fireworks lit up the sky... and church bells clanged.

President Bush made an address to the nation last night to urge congressional passage of the 500-BILLION-dollar deficit reduction plan. Bush called the deficit- ''A cancer gnawing away at our nation's health.'' He said if the package is NOT passed, ''markets may tumble and recession will follow.''

Iraq is offering to destroy mass-destruction weapons if other nations in the Mideast, including Israel, destroy theirs. The gesture follows President Bush's U-N speech Monday calling for the destruction of weapons in the Persian Gulf, particularly Iraq's chemical weapons arsenal.

New York Mayor David Dinkins wants to hire eight-thousand more police officers to eliminate street violence which resulted in a record homicide rate this summer. The mayor UNveiled a nearly two-BILLION- dollar plan called ''Safe Streets, Safe City.'' It will double the number of police officers on patrol.

Four people were killed in San Francisco yesterday when a car driven by a 91-year-old man careened down a steep hill. The driver apparently suffered a

heart attack. He was killed along with two children trapped in a car that caught fire and a woman driving another car. Four people were injured.

#90276u0311 10/03/1990 ~United Press International

BANGKOK, Thailand (OCT. 3) UPI - Concrete deeds, especially an end to the U.S. economic embargo against Vietnam, must replace words if Vietnam and the United States are to normalize relations, official Hanoi radio said.

The radio said, in a commentary Tuesday night, that the meeting this week between U.S. Secretary of State James Baker and Vietnamese Foreign Minister Nguyen Co Thach, were ''important for the normalization of relations between Vietnam and the United States.''

''However, we should not have illusion that after several rounds of talks the relations between the two countries can be normalized,'' the radio said.

''To achieve this target there must be concrete deeds and policies in conformity with interests of the two peoples,'' it said.

The radio said Vietnam has been willing to forgive the U.S. intervention in the Vietnam War and has cooperated in solving the problems of the Americans still missing from the war and the half- Vietnamese children of American servicemen.

It said Vietnam has also embarked on a program of transforming its socialist economy to a market-oriented system.

''It is regrettable that the United States still maintains the embargo against Vietnam and prolongs it for another year,'' it said.

The embargo, extended to cover all of Vietnam after the communist victory in 1975, bars all Americans and American companies from commercial dealings with Vietnam. U.S. businessmen have complained that the embargo has left them at a disadvantage in competing with businessmen from other nations rushing into the newly opening 65-million person market.

The embargo has hurt Vietnam by cutting off multilateral aid from international sources such as the World Bank as well as sharply limiting foreign investment in Vietnam.

The United States has insisted that Vietnam help work out a satisfactory political settlement in Cambodia before relations can be resumed. Vietnam has supported a U.N. peace plan for Cambodia, but the Vietnamese-installed Cambodian government has been unable to agree with the U.S.-backed resistance on implementation of the plan.

''The evolution of normalization of relations between the two countries is still facing difficulties,'' it said. ''It is like a ship which is launched but cannot operate without fuel.''

-30- 2525

#90276u0312 10/03/1990 ~United Press International

(OCT. 3) UPI - Divers in the Pacific Ocean have brought up both halves of a cargo door that ripped off a United Airlines Boeing 747 last year. Nine people died in the accident. The sections, both in good condition, will be turned over to federal investigators. The 14-thousand-foot dive was the second-deepest manned recovery ever attempted.

The Senate yesterday confirmed David Souter's Supreme Court nomination by a 90-9 vote. Souter will be sworn in next Tuesday to replace Justice William Brennan, the court's leading liberal who retired after 34 years. The court now has a 4-4 division between liberals and conservatives.

Teachers at Temple University in Philadelphia return to the classrooms today after a 29-day strike, although their contract dispute has NOT been settled. They voted 200-199 to obey a judge's back to work order. The basic issue is pay. On Sunday, the professors rejected an offer of a five percent pay increase in each of the next four years.

Three trustees of the University of District Columbia resigned yesterday in an attempt to appease student protesters. In addition, an artist who donated an artwork the students object to withdrew her offer. Classes were held yesterday for the first time since demonstations began last week.

The Los Angeles City Council has adopted an ordinance making ritualistic slaughter of animals a crime. The crime is punishable by six months in jail and a one-thousand-dollar fine. In the past year up to 300 animal sacrifices have occurred in Los Angeles, some linked to satanic cults or voodoo.

Environmentalists yesterday erected barricades of rocks and logs that delayed crews starting to build a huge telescope project atop Mount Graham in Arizona. It took construction workers two extra hours to get to the site. Seven protesters were arrested. Protesters say the project will threaten the endangered red squirrel.

-30- 2063

#90276u0322 10/03/1990 ~United Press International

(OCT. 3) UPI - Sid Bream cracked a two-run home run Tuesday night to lead the Pittsburgh Pirates to a 9-4 triumph over the New York Mets and deny Dwight Gooden his second 20th victory season.

''A lot of guys came here wanting to play tonight,'' said Pirates Manager Jim

Leyland. ''They were zeroed in pretty good.''

Bill Landrum, the third of six pitchers used by the National League East champions, threw 1 2-3 innings of scoreless, one-hit relief to improve to 7-3.

Gooden finished the season 19-7, allowing eight runs and nine hits over 4 1-3 innings. In the fourth, he allowed two runs to score on a wild pitch and a bases-loaded walk, and his throwing error scored another run in the third.

''My location started off good,'' said Gooden, ''but a couple mistakes here and there turned into big innings.''

The Mets took a 2-0 lead in the first off Randy Tomlin on Dave Magadan's RBI groundout and Tim Teufel's ninth home run of the season. Pittsburgh tied the score in the second on Mike LaValliere's RBI single and Jose Lind's RBI groundout.

New York scored two unearned runs off John Smiley in the third for a 4-2 lead when Chris Jelic's ball hit off shortstop Jay Bell for an error.

The Pirates tied the score again in the bottom of the inning on Gooden's error and Bobby Bonilla's RBI groundout.

It was not vintage Gooden, who had considered bagging his final start.

''The reason why I pitched after I said I probably wasn't going to was I thought to myself that I might think during the winter or two or three years down the road, maybe I should have pitched,'' said Gooden on going for win No. 20. ''I figured even if I didn't get the win or pitch good, at least I could say I took the ball and went to the mound and have a clear head.''

The Pirates scored twice in the fourth on Gooden's bases-loaded walk to Bell and the wild pitch. Bream's two-run homer in the fifth made it 8-4 and Bonilla's RBI single in the sixth off Jeff Innis accounted for the final run.

''Yesterday was sort of a celebration for us and the fans,'' said R.J. Reynolds. ''We had fun Sunday night. But tonight it was back to work. We're just trying to stay sharp, more or less polish things.''

Pirates players came out of the dugout before batting in the bottom of the eighth to tip their caps to the fans when it was announced that the crowd of 50,028 had put the attendance over the 2 million mark - 2, 022,267 - for the first time in the club's 104-year history.

''It was beautiful thing,'' said Reynolds who played in front of 1, 500 on rainy September nights in 1985. ''You have to understand for a long time this has been Steeler Country. But I think we've finally won our fans over. This is the first time we really fell we are appreciated.''

In other National League action, Montreal edged St. Louis 2-1, Chicago downed Philadelphia 3-1, Cincinnati shaded Houston 3-2, Atlanta pummeled San Francisco 16-7, and Los Angeles clipped San Diego 8-7 in 10 innings.

In the American League it was: New York 4, Detroit 1; Chicago 3, Boston 2 in 11 innings; Toronto 2, Baltimore 1; Cleveland 13, Kansas City 3; Seattle 3, Minnesota 0; Milwaukee 1, Texas 0; and Oakland 6, California 4.

-- AROUND THE NL --

Expos 2, Cardinals 1

At Montreal, Kevin Gross snapped a personal eight-game losing streak with Andres Galarraga collecting an RBI double to hand the Cardinals their sixth straight loss. Gross won for the first time since June 11 and improved to 9-12. Steve Frey registered his ninth save. Omar Olivares, 1-1, was the loser.

Cubs 3, Phillies 1

At Philadelphia, Andre Dawson got his 100th RBI to lead the Cubs. Dawson is tied with Ryne Sandberg for the team RBI lead. The Phillies managed their only run off Mike Bielecki, 8-11, in the fifth. Mitch Williams got the last out for his 16th save.

Reds 3, Astros 2

At Cincinnati, six Reds pitchers combined on a four-hitter to stifle the Astros. Jack Armstrong, Scott Scudder and Norm Charlton retired the first 15 Houston batters. Randy Myers pitched the ninth for his 31st save. Scudder, 5-5 got the win, while Xavier Hernandez, 2-1, suffered the loss.

Braves 16, Giants 7

At San Francisco, Tommy Gregg highlighted a seven-run sixth inning with a three-run homer and Mike Bell drove in four runs to pace Atlanta's 18-hit attack. Marvin Freeman, 1-2, pitched two innings for the victory and Mark Grant worked the final four innings for his third save. Mark Dewey, 1-1, took the loss.

Dodgers 8, Padres 7, 10 innings

At Los Angeles, Juan Samuel delivered a bases-loaded single with none out in the 10th inning to carry Los Angeles. Rookie Dave Walsh, 1-0, earned his first major league win by pitching the Dodgers out of a jam in the 10th. Jerald Clark hit a pair of two-run homers for the Padres.

(OCT. 3) The remnants of tropical storm Rachel soaked the Southwest, closing roads and sending streams over their banks Wednesday while another front that moved in from the Northwest left a dusting of snow on the Rockies.

The eastern half of the nation was mostly clear Wednesday with fog and isolated storms in the Middle Atlantic states.

Southwest Texas, which has been regularly drenched by storms in the last several weeks, saw no relief as moisture from the dying storm prompted flood watches throughout the region.

The flash flood watch remained in effect for most of the Concho Valley, the hill country and adjacent areas of the Edwards Plateau as more than half an inch of rain fell in two hours in San Angelo and Sonora.

Creeks were at or over their banks in Big Bend National Park along the Texas-Mexico border and some roads were impassable because of the high water.

To the north, a strong cold front moved through Colorado, dropping the snow level in the mountains to 8,000 feet and leaving snow accumulations of up to 3 inches in passes above 10,000 feet.

The front moved through Denver during the night with rain and winds gusting to 30 mph as temperatures dropped to near 40 degrees.

A band of showers stretched across the nation's midsection from Minnesota to Kansas, carrying southerly winds and scattered thunderstorms. Some of the heaviest storms occurred east of Wichita, Kan.

High pressure covered the South pushing temperatures into the 90s in some areas and keeping skies clear.

The Northeast also enjoyed mostly clear skies with lows in the 40s and 50s while Bradford, in northwestern Pennsylvania, dipped down to 34 degrees.

#90276u0383 10/03/1990 ~United Press International
(OCT. 3) UPI - Here is a roundup of the latest major events in the Persian Gulf crisis stemming from the Aug. 2 Iraqi invasion of the oil-rich emirate of Kuwait:

PARIS - President Francois Mitterrand was expected to make a surprise visit to the Gulf Wednesday to review French troops in Saudi Arabia and the United Arab Emirates, official sources said. The Socialist leader is expected to visit Jeddah in Saudi Arabia and make a brief stop at the Saudi port of Yanbu in the

Red Sea, said the sources.

MOSCOW - A senior aide to President Mikhail Gorbachev flew to Baghdad on Wednesday at the Soviet president's request on a ''special mission'' that was also to take him to Jordan. The official Tass news agency did not provide any details of the surprise journey by Yevgeny Primakov, a member of Gorbachev's Presidential Council.

CAIRO, Egypt - Iraq offered to liquidate its mass-destruction weapons if Israel and other countries do the same. ''Iraq is ready to destroy weapons of mass destruction provided this measure included all the states of the region, including Israel,'' an Iraqi Foreign Ministry spokesman was quoted Tuesday by the official Iraqi news agency. The gesture came a day after Iraq released nine French hostages who had been held along with other Westerners at key sites as a human shield against possible attack by the U.S.-led multinational force in the gulf region.

LONDON - Amnesty International, in a report released Wednesday, condemned Iraq for executing and torturing civilians opposed to its invasion of Kuwait and for human-rights abuses against Western detainees. The human-rights watchdog organization said Iraqi troops were ''summarily executing'' Kuwaitis for possession of the Kuwaiti flag or pictures of the deposed emir of Kuwait, or even for failing to follow orders to post photographs of Iraqi President Saddam Hussein.

BANGKOK, Thailand - Vietnam was awaiting United Nations approval to send ships carrying rice to some 17,000 of its workers still in Iraq, official Hanoi radio said. ''Our government has prepared ships to transport rice to our workers in Iraq, repatriate them home, and attend to solving their problems related to pensions and employment,'' the radio said in a broadcast late Tuesday. The radio said the Vietnamese ships would not set sail until the embargo committee of the U.N. Security Council gave its permission.

WASHINGTON - A U.S. aircraft carrier steamed into the dangerous waters of the Persian Gulf for the first time in 16 years and 15,000 Marines staged a mock amphibious assault in a show of military muscle. The Pentagon said the USS Independence aircraft carrier battle group moved from the Gulf of Oman, through the Strait of Hormuz and into the Persian Gulf Monday night, making it the first carrier to enter the gulf since 1974.

WASHINGTON - The Senate adopted a resolution supporting President Bush's handling of the Persian Gulf crisis amid assurances from Democratic leaders that the measure would not hand the president a ''blank check'' for future military action. The resolution approved 96-3 Tuesday says Congress ''strongly approves the leadership of the president'' and supports ''continued action'' by Bush in accordance with U.N. Security Council decisions and U.S. constitutional and legal processes.

#90276u0541 10/03/1990 ~United Press International
(OCT. 3) UPI - Stock prices closed mixed Wednesday in moderate trading on the Tokyo Stock Exchange, a day after the Nikkei Average posted its largest one-day advance in history.

The Nikkei Average of 225 selected issues slipped 49.02 points to 22, 849.39 following an record 2,676.55-point jump Tuesday.

The broader-based Tokyo Stock Exchange Price Index, which soared 145.40 points Tuesday, squeezed out a 1.22-point gain, closing at 1, 607.05.

Volume edged up to an estimated 600 million shares from 550 million shares traded Tuesday.

Advances outpaced declines 629 to 292, while 100 issues remained unchanged.

Analysts said the day started on a sour note when the exchange's automated trading computer system shut down for 45 minutes.

During that time, trading largely came to a halt. When it resumed, the Nikkei promptly fell 78 points.

However, prices turned higher as investors continued to hunt bargain- priced stocks.

In the afternoon, some profit taking set in and the market turned mixed.

''Buying interest continued to be strong in international blue chips, '' said broker Katsu Takeuchi of Kokusai Securities Co.

''But interest-rate sensitive large-capital issues such as steels and real estates were shelled.''

A slight rise in Japanese short-term interest rates Wednesday made prospects for the market shaky, analysts noted.

Elsewhere in Asia, stock prices fell in moderate trading on the Hong Kong Stock Exchange as the market experienced a striking contrast to Tuesday's sharp gains.

The benchmark Hang Seng Index, which surged 114.22 points Tuesday, fell 42.93 points to 2,862.55.

Among the narrower indexes, financials lost 13.92 points, industrials fell 21.15, properties shed 88.50 and utilities dropped 90.56 points.

Volume was moderate as an estimated 864 million shares changed hands, compared with 1.1 billion shares Tuesday.

''Most people were expecting a technical rebound,'' said David Harman of Morgan Grenfell.

''Buyers are still cautious. They are unconvinced there has been a turnaround. We also have a holiday Thursday, so people are reluctant to invest - not knowing when the next piece of bad news is going to come. Investors are cashing in their profits while they've got them.''

The Hong Kong Stock Exchange will be closed Thursday for the Chinese Mid-Autumn Festival holiday. Trading will resume Friday.

In Singapore, a mild round of profit taking sent stocks lower in moderate trading on the Singapore Stock Exchange.

The Straits Times Industrial Index, which climbed 33.77 points Tuesday, fell 17.94 points to 1,119.27. The broader-based All Singapore Index, which gained 10.64 points Tuesday, slipped 5.21 points to 313.83.

Turnover amounted to an estimated 32.5 million shares, well below the 77.3 million shares traded Tuesday.

Analysts said stocks eased on local profit-taking by following Tuesday's strong performance.

''Investors were not taking any chances,'' on local market watcher said.

On the trading floor, C.I. Holdings led the declining issues followed by Development Bank of Singapore foreign shares and Keppel Corp.

Rashid Hussain led the advancing issues followed by Singapore Land warrants and Great Eastern Life.

In Bangkok, stocks closed slightly higher on the Thailand Stock Exchange.

The Stock Exchange of Thailand Index, which jumped 50.12 points Tuesday, added 9.34 points to 713.85.

Volume was a high 3.2 billion shares, compared with 1.2 billion shares on Tuesday.

The market was vigorous with many sellers when the session opened, causing prices to ease but recovered steadily.

''The market was in danger of falling because of the high closing price on

Tuesday, causing many speculators to sell shares,'' said Pitsanu Wichitchonlachai, a broker from Phatra Thanakit Co.

But, analysts noted that some late bargin hunting boosted stocks.

In Australia, stocks closed sharply lower on the Sydney Sharemarket, erasing Tuesday's gains.

The All Ordinaries Index, which gained 20.4 points Tuesday, fell 20.7 points to 1,385.4. The All Industrial Index fell 29.7 points to 2,056.4 and the All Resources index lost 11.6 points to 863.6.

Turnover amounted to an estimated 61.7 million shares, compared with 81.9 million shares Tuesday.

Analysts said prices eased amid some profit taking following Tuesday's gains.

On the trading floor, blue-chips led the decline.

Adsteam lost 11 cents to $2.46, Coles Myer fell 16 cents to $7.64, Elders IXL lost 10 cents to $1.28 and News Corp. lost 18 cents to $6.92.

Banks also came under pressure ahead of end-of-year results. NAB Bank fell 4 cents to $5.96, Westpac Bank lost 11 cents to $4.07 and ANZ Bank lost 13 cents to $4.03.

#90276u0561 10/03/1990 ~United Press International

(OCT. 3) UPI - President Bush made a broadcast address last night to try to get members of Congress, especially from his own party, to back the deficit reduction plan. Bush warned that economic hardship, even recession, may follow if the plan is NOT enacted. Five Republicans, led by Georgia Representative Newt Gingrich, a conservative leader, announced yesterday they oppose the budget plan.

NASA began the countdown for the shuttle Discovery's next flight this morning. Discovery is to be launched Saturday to put the European Ulysses spaceprobe into a track around the poles of the sun. If all goes well, it will be the first shuttle launch in five months. An 80 percent chance of good weather is forecast for launch time. The shuttle will have a five-person crew and spend four days in space.

Germans cheered in a new unified nation today as the two Germanys divided since World War Two began life as one. East German Prime Minister Lothar de Maiziere, who lost his job in the merger, had NO regrets. He said- ''We are leaving behind a state which called itself democratic without being democratic.'' Helmut Kohl, chancellor of the old West and new combined Germany

called it a ''day of joy, gratitude and hope.''

Energy experts say Americans should find adequate supplies of most fuels this winter- but at higher prices. The government's Energy Information Administration says NO shortages of gasoline, jet fuel and heating oil are expected. However, one expert said if the winter is colder than average, there may be a propane shortage. Propane is used by farmers to dry crops.

#90276u0562 10/03/1990 ~United Press International

HANOVER, NH (OCT. 3) UPI - Dartmouth College officials Tuesday rejected a public apology by editors of the Dartmouth Review after the controversial off-campus weekly published during the Jewish holidays an anti-semitic quote from Adolf Hitler.

The incident prompted the paper's president and two other staffers to resign.

The quote, from Hitler's political autobiography ''Mein Kampf,'' was printed in the current issue of the Dartmouth Review in the middle of a quote from Theodore Roosevelt on the paper's masthead.

In a written statement, Dartmouth Review Editor in Chief Kevin Pritchett apologized for printing the quote. But he denied responsibility for it, saying it was ''slipped in'' by a ''cancer in our ranks.''

Pritchett also vowed to find out which staffer was responsible for the incident and to fire him.

But college officials were not impressed by the apology, which was contained in an open letter to the Dartmouth community.

Alex Huppe, director of the Dartmouth College News Service, called the statement ''hollow'' and ''non-responsive.''

Dean of the College Edward Shanahan, a frequent critic and target of the paper called publication of the Hitler quote ''an assault to the entire community.'' He said the college community remained in a state of shock.

C. Tyler White, president of the Dartmouth Review, submitted his resignation Tuesday, saying he ''could not be a part'' of the paper anymore.

''The editor in chief has failed in his job and now must wear the albatross of anti-Semitism because he won't take responsibility for the issue's contents,'' White said in a statement.

Two other staff members of the paper also resigned.

Pritchett, on the advice of legal counsel, declined to comment beyond the written apology.

The quote, ''Therefore, I believe today that I am acting in the sense of the Almighty Creator: By warding off the Jews, I am fighting for the Lord's work '' was published in the Oct. 3 edition of the Dartmouth Review, which was distributed on Yom Kippur, the most solemn day of the Jewish calendar.

Up to 3,000 copies of the paper were delivered Friday before the quote was discovered. The remaining 10,000 copies were destroyed.

The incident is the latest in the stormy 10-year history of the Dartmouth Review, which is backed by William F. Buckley and other well- known conservatives.

The paper waged a campaign against a black music professor, William Cole, whom it accused of incompetence. Cole resigned during the summer, citing harassment by the Dartmouth Review as one of his reasons for leaving. Review staffers also carried out a sledge hammer raid in 1986 on a symbolic shantytown, built on the college green to protest apartheid in South Africa.

So far, about half of Dartmouth's 4,000 students have signed a petition protesting the Hitler quote and calling on everyone at the college to cut all ties with the Review. A rally to protest the incident has been scheduled for noon on Thursday.

#90276u0569 10/03/1990 ~United Press International

(OCT. 3) UPI - David Souter is to be sworn in next Tuesday as the 105th member of the U-S Supreme Court. The Senate confirmed him on a 90-9 vote yesterday. The court presently is split with four liberals and four conservatives on social issues. Souter could turn the court one way or the other. During his confirmation hearing, he refused to give his views on abortion.

Eight people were killed yesterday when a laboratory that manufactured cocaine exploded in Medellin, Colombia. Officials say five victims were children, aged four and five. The blast destroyed six houses and seriously damaged five others. A Medellin official says dynamite stored under a floor in the drug lab apparently exploded by accident.

Members of the Palestine Liberation Organization guerrilla group Fatah discovered a booby-trapped car yesterday in a crowded market in Sidon, Lebanon. Security sources say the occupants of the car belonged to a renegade Palestinian faction. The Fatah members questioned them and one person pulled a gun. Fatah members fired back and killed him. They then drove the car and the body to an open area and blew them up.

The Russian Orthodox Church will make a memorial shrine out of the site where Russia's last czar and his family were executed. The site of the house that Nicholas the Second died in has been given to the church by the city council of Sverdlovsk. Nicholas and his family were killed by the Bolsheviks in July 1918. Opponents of Communism say the killing was the first major Bolshevik crime.

#90276u0627 10/03/1990 ~United Press International

JACKSON, MS (OCT. 3) UPI - Impeached federal Judge Walter L. Nixon Jr., who served almost two years in prison for perjury, has been ordered back behind bars for violating conditions of his parole.

The U.S. Parole Commission Tuesday revoked Nixon's parole and ordered him to serve four months for carrying two guns on a wild turkey hunt in rural Jackson County Apr. 25. When the incident occurred, Nixon was on parole for a 1986 conviction on two felony charges of lying to a federal grand jury.

''He violated the conditions of his parole by posssessing multiple firearms and conspiracy to hunt wild birds with the aid of bait,'' said Frank Kelly, a Justice Department spokesman.

Felons are not permitted to carry or own firearms.

Nixon, 61, of Ocean Springs, had been released from a New Orleans halfway house in November 1989. He was subsequently stripped of his $89, 500-a-year judgeship by the Senate.

The Mississippi State Supreme Court disbarred Nixon, but he can reapply for his law license after 1992.

Nixon and a former state game warden, Austin Shattles, were convicted by a Jackson County Justice Court jury in July of conspiring to hunt over a field purposely baited to attract turkey. Both have appealed their $100 fines.

During a hearing before a parole commissioner in September, Nixon admitted he was in possession of the guns when he was arrested. But he said he changed his mind and left the guns in their zippered cases.

The commissioner subsequently recommended Nixon be returned to prison for 10 months.

''The decision was renedered after consideration of the facts that the offense was not as serious as normally rated in that the weapons were never removed from their case,'' Kelly said.

Defense attorney Alvin Binder of Jackson said he was ''very grateful and pleased'' that the commission tempered the 10-month recommendation. ''Judge Nixon is likewise pleased,'' he said.

#90276u0635 10/03/1990 ~United Press International

(OCT. 3) UPI - Tass says Soviet President Gorbachev today sent an aide on a special mission to Baghdad, Iraq. The Soviet news agency says the aide will travel on to Amman, Jordan, to meet King Hussein and Palestinian leader Yasser Arafat.

President Bush says the new budget proposal is the ''best agreement that can be legislated now.'' In a nationally broadcast speech last night... the president said the plan means everyone will bear a small burden... but have a large burden of economic danger lifted. .

Sources say White House workers are angry about opposition to the budget agreement by number two House G-O-P leader Newt Gingrich. Republican leader Robert Michel says the party ''caN'T afford to be fractured.''

East and West German leaders shook hands and embraced in Berlin to mark the unification of Germany. Leading West German author Guenther Grass was one of the few speakers to oppose the unity... saying it will make East Germans ''second-class citizens.''

The Simon Wiesenthal Center in Los Angeles charges that more than 200 Western companies... one-third of which were West German... supplied Iraq with components for chemical weapons as late as last year. The center blames the companies for helping to build Iraq into the threat it is today.

Vietnam is awaiting U-N approval to ship rice to some 17-thousand of its workers still in Iraq. Hanoi says its workers are nearing starvation.. but it will wait for U-N approval to get around the embargo against Iraq.

The countdown is on for the shuttle Discovery. The split-second timing procedure kicked in this morning at Cape Canaveral, Florida, for a Saturday lift-off to put the Ulysses probe in orbit around the sun.

Authorities in Canton, China, today raised the count of the dead to 127 from the flaming crash of a hijacked jetliner into two other planes. But Chinese officials refuse to answer questions about yesterday's hijacking.

#90276u0694 10/03/1990 ~United Press International

JOHANNESBURG (OCT. 3) UPI - A black-consciousness, anti-apartheid movement rejected Wednesday a government invitation to join the negotiations aimed at

ending 42 years of white minority rule.

Gerry Mosala, president of the Azanian People's Organization, told reporters the movement demanded that discussions concentrate on creating a non-racial constitution - implicitly criticizing the African National Congress for acceding to preliminary talks intended only to clear the way for substantive negotiations.

AZAPO claims the allegiance of black intellectuals and a national following of tens of thousands but is regarded as a junior partner to the ANC and other black opposition groups.

''We make a distinction between ... discussions aimed at producing a new constitution for a new society and talks aimed at enlisting the participation of liberation movements in the removal of measures that keep black people in prison and under legal political and socio- economic conditions of suppression and exploitation,'' Mosala said.

He said AZAPO ''remains committed'' to talks on a non-racial constituent assembly and would not be ''coopted in any other talks.''

The other major exclusively black alliance and rival to the ANC, the Pan-Africanist Congress, on Sept. 23 postponed a decision on participating in talks after President Frederik de Klerk urged it and AZAPO to join the process.

The ANC and the government have in two preliminary meetings cleared the way for full-blown power-sharing negotiations on ending white rule. The ANC on Aug. 6, after the second round of talks, abandoned its 29- year-old armed struggle against white rule in exchange for promises of an acceleration in de Klerk's racial reforms launched February.

But black-consciousness groups have criticized the ANC for what they charge are major concessions in response to relatively minor adjustments to apartheid and also the ANC's willingness to have whites as members on every level.

De Klerk legalized the ANC and PAC after 30 years and lifted two years of restrictions on AZAPO at the start of his reforms Feb. 2.

#90276u0702 10/03/1990 ~United Press International

AUGUSTA, ME (OCT. 3) UPI - ''Sparky the Clown'' said he fooled a national expert into believing his claims of a multiple personality disorder in an unsuccessful bid to beat a child abuse charge.

Richard Sparks called his performance ''the biggest challenge of my acting career.''

The children's entertainer and author made the admission in an interveiw with a state psychiatrist three years after he was convicted of molesting children in Maine and New Hampshire.

In the interview shown Tuesday at a public information forum at the Augusta Mental Health Institute, Sparks said he developed his act by listening to questions from an expert on multiple personality disorders.

The expert, Kentucky psychiatrist Cornelia Wilbur, supported Spark's claims after the interveiws. Wilbur is best known for her treatment of the woman featured in the book and movie ''Sybil.''

Sparks said he had not considered pretending he had multiple personalities until it was suggested by doctors who had observed him in jail. Sparks said he wanted to fool authorities because at the time the trial seemed ''a matter or life and death.''

Sparks was arrested in 1986 after a highway crew found his phone bill in a pile of discarded photographs of children being fondled.

Sparks pleaded guilty to the charges after a judge refused to believe his multiple personality claim. He was sentenced to 10 years in prison and 40 years probation.

#90276u0718 10/03/1990 ~United Press International

(OCT. 3) UPI - The countdown clock is running at Cape Canaveral for Saturday's launch of the shuttle Discovery. If all goes as planned, the shuttle mission will be the first by the space agency in five months. The countdown began this morning. Five astronauts are to launch a European spacecraft, Ulysses, which will will go into orbit around the sun.

One of Soviet President Mikhail Gorbachev's senior aides flew to Iraq today on what the official Tass news agency calls a ''special mission.'' Yevgeny Primakov, a member of the presidential council, also is to visit Jordan. Tass did NOT give any details of the surprise trip by Primakov.

Oil prices tumbled yesterday on hopes tensions are easing in the Persian Gulf and a peaceful settlement may result. West Texas Intermediate crude oil dropped three dollars a barrel in New York to 33 dollars 95 cents. It has fallen 14 percent this week. Home heating oil fell eight cents a gallon.

Germans partied in the streets and gasthauses last night to celebrate their new nation. East and West Germany are re-united after 45 years. A new holiday, the Day of German Unity, continues through the day on a more solemn note. Church services and concerts are planned.

A Catholic organization says the body of Cardinal Jozsef Mindszenty is to be re-buried next spring in his native Hungary. Mindszenty was buried in Austria where he died in 1975. He took refuge in the U-S Embassy in Budapest for 15 years. He asked that his remains be returned to Hungary after communism fell.

-30- 1688

#90276u0728 10/03/1990 ~United Press International

ST. LOUIS (OCT. 3) UPI - Manager Joe Torre of the St. Louis Cardinals has told four of the team's coaches they will not be retained for the 1991 season, club officials said Wednesday.

The four coaches are pitching coach Mike Roarke, hitting coach Steve Braun, first-base coach Jim Riggleman and third-base coach Rich Hacker.

Coach Red Schoendienst and bullpen coach Dave Ricketts will return, the team said. Club officials said Torre told his coaches about the changes Monday night in Montreal.

Roarke had been with the Cardinals for seven seasons, coming to the team in 1984 to replace Hub Kittle. At the time Roarke came to St. Louis, reliever Bruce Sutter was starring for the team. Roarke had been Sutter's pitching coach with the Chicago Cubs from 1978 to 1980 and was credited by the reliever for much of his success.

Several Cardinals pitchers expressed disappointment at the news that Roarke would not be back next season, saying he was the best pitching coach they had worked with.

Hacker, a native of former Manager Whitey Herzog's hometown of New Athens, Ill., had been with the Cardinals for five seasons. Riggleman had been with St. Louis for two years. Braun became the team's batting coach this season when the Cardinals demoted Johnny Lewis after last season.

Torre said he planned to hire only three coaches to replace the four who were let go. He said he would not look for a hitting coach and would perform some of those duties himself.

-30- 1673

#90276u0730 10/03/1990 ~United Press International

(OCT. 3) UPI - Peace-keeping soldiers from other West African nations staged heavy artillery attacks yesterday in Liberia's capital of Monrovia. They said they were trying to push back rebels led by Charles Taylor and keep them away from government troops. The peace-keeping units also have separated a second rebel force.

United Auto Workers President Owen Bieber says the union may reach tentative

agreement with Ford this week. But Ford Vice President Peter Pestillo is NOT so sure. Pestillo says several issues are still outstanding. The U-A-W hopes Ford will accept a contract based on a G-M settlement.

Former Democratic Chairman Lawrence O'Brien was buried yesterday in Springfield, Massachusetts. O'Brien was adviser to Presidents Kennedy and Johnson. He headed the Democratic National Party from 1968 to 1972, during the time of the Watergate break-in. O'Brien died of cancer last week at age 73.

Chinese authorities say one American was among those killed in yesterday's crash of a hijacked plane in Canton. But U-S officials say only that she is listed as missing. Another American who suffered a leg injury is in good condition. The Chinese officials say 127 people were killed.

Henry Hill, the former gangster whose life is portrayed in the hit film ''GoodFellas,'' calls the move ''99 percent accurate.'' In an interview, Hill says it shows how he lived. He says he was ''constantly on a hustle.'' Hill is in hiding after turning state's evidence against the mastermind of a five-Million-dollar robbery.

#90276u0769 10/03/1990 ~United Press International

WASHINGTON (OCT. 3) UPI - Factory orders advanced 1.8 percent in August to $244.6 billion on an increase in petroleum refining costs in the aftermath of Iraq's invasion of Kuwaiti oilfields, the Commerce Department said Wednesday.

Excluding petroleum, factory orders were up 0.6 percent in August.

There were also increases - although not as sizeable - in orders for military hardware, from ships and tanks to aircraft and missiles, according to the data compiled by the department's Census Bureau.

Not counting defense items, total orders advanced 1.4 percent. Excluding transportation equipment, orders increased 1.8 percent.

Private analysts, concerned about the latest Middle East crisis, had predicted a decline in August factory orders following a revised 1.5 percent gain in July and a 1.9 percent drop in June.

Factory orders for durable goods - costly products made to last three or more years - dipped 0.9 percent during the month, but August orders for non-durable goods climbed 4.4 percent.

''Most of the (total) increase is attributed to the petroleum refining industry, which had substantial price increases during the month,'' the Commerce Department said. ''Shipments were similarly influenced by the

petroleum refining industry.''

Total shipments of manufactured goods increased 3.4 percent to $245.9 percent. Unfilled orders, which are not affected by the oil industry, declined 0.2 percent to $518.7 billion, the government said.

Inventories, meanwhile, inched up 0.2 percent to $373.9 billion, while the inventory-to-shipments ratio, which tracks product delivery time, dropped to 1.52 percent in August from 1.57 in July.

Excluding petroleum, inventories were unchanged for the month.

In July, total factory shipments slipped 0.7 percent, unfilled orders edged up 0.5 percent and manufacturers' inventories increased 0.7 percent, the Commerce Department reported.

The government data were adjusted for seasonal factors.

BEIJING (OCT. 3) UPI - Authorities in southern Canton raised the death toll to 127 Wednesday in the fiery crash of a hijacked jetliner at the city airport and reported an American was among those killed. But U.S. officials would not confirm it.

Chinese officials reached by telephone in Canton, also known as Guangzhou, refused to answer inquiries on the casualty figures or the investigation into the hijacking Tuesday, which led to a flaming crash as the plane tried to land.

The accident appeared to be the worst air crash toll reported in more than a decade since China's reopening.

The Chinese Boeing 737 was commandeered on a domestic flight over south China by two hijackers reportedly demanding to fly to Hong Kong. It came down at Canton's Bai Yun airport but slammed into an empty plane and another loaded with passengers in a fireball.

The official Xinhua news agency reported the accident investigation team of Guangdong Province, of which Canton is the capital, released a manifest of the dead raising the toll to 127. Earlier reports said 120 had died.

Among those killed, Xinhua said, were 30 Taiwan citizens, four from Hong Kong, two from Macao and 90 mainland Chinese. It listed only one foreigner killed, saying the casualty was an American.

Two American women were known to be aboard the 737 flight from the east coast city of Xiamen to Canton. One, Erin L. Thomas, a teacher from Oklahoma City,

survived and was reported in good condition in Canton's Nanfang Hospital with a leg injury.

''She's doing well, she's in as good spirits as she can be after going through something like that,'' said a spokesman for the U.S. Consulate in Canton who visited her.

Thomas's mother, Diane Ames of Moore, Okla., reportedly told The Daily Oklahoman that her 30-year-old daughter had just begun a two-year assignment teaching English at Meixian University in China and previously taught two years in Japan.

Ames said U.S. Embassy officials called her early Tuesday and, ''They said she was groggy, but considering what she had been through she was in good spirits. I thought, 'That's my gal. She's a survivor.'

''I have to believe it was more than luck,'' Ames said. ''I have to believe Erin was in China for a purpose and that purpose was not fulfilled. I feel like the luckiest mother in the world.''

Ames said she was told her daughter suffered superficial burns, a broken or dislocated collarbone and swollen toes, as well as a re-injury to a leg broken before she left for China Aug. 18.

''She's really doing well,'' said a nurse at Nanfang Hospital.

But the Consulate spokesman said the second American, identified as Maryanne Gilbert, Thomas's traveling companion, remained officially missing and had not been accounted for.

''As far as the American consulate is concerned, there's one survivor and one missing,'' the spokesman said in a telephone interview.

He said the official manifest was confused, apparently listing Thomas as having been killed and Gilbert as having survived.

Most of the dead had been aboard the hijacked 737, but others were killed and injured on the Boeing 757 waiting on the runway to take off for Shanghai.

Official reports earlier listed 100 survivors, with 53 of them injured, but Canton newspapers reported only 46 injured, suggesting seven of the injured may have died later at hospitals.

A spokesman for the Japanese Embassy in Beijing said only one Japanese national was aboard the 757 and was not seriously hurt.

There was still no confirmation of airport reports the hijackers panicked when they realized they were landing in China and set off an explosion before the

crash, or of a survivor's account that they struggled with the cockpit crew prior to impact.

The death toll was the highest reported publicly in China in an aircraft accident in the past decade. The worst previous crash was when a Chinese state-run airliner slammed into a mountain in southern Guilin in April 1982, killing 112 people.

The last major crash was in January 1988, when another domestic airliner hit a hillside in central Chongqing, killing 108.

(OCT. 3) UPI - President Bush describes the national deficit as a ''cancer gnawing away at our nation's health.'' Bush made a nationally broadcast appeal last night for Americans to support the new budget proposal to reduce the deficit through spending cuts and new taxes. Bush says the plan will NOT raise income taxes... and is needed to prevent a recession. Bush will make his case again today at a news conference in Washington for out-of-town newspaper editors.

Germans ended 45 years of separation today by reunifying their country. West German Chancellor Helmut Kohl becomes the first chancellor of a united Germany since the fall of Adolf Hitler's Third Reich. Amid joyous celebrations in Berlin... Kohl said- ''years of communist dictatorship have cut deep wounds...'' but added young Germans now have the chance to spend their lives ''in peace and freedom.''

The U-S Embassy in South Africa reports a bomb exploded today outside the

residence of U-S Ambassador William Swing near Pretoria. The blast caused minor damage to a gate, but NO injuries. It is the first such incident involving the U-S ambassador in South Africa... and occurs just a week after President Frederik de Klerk returned from talks in Washington with President Bush... who endorsed his racial reforms.

Judge David Souter will be sworn in next Tuesday as Justice David Souter. The Senate voted 90-9 yesterday to confirm him as a member of the Supreme Court. Conservative Senator Strom Thurmond of South Carolina hailed the nominee as ''a man of keen intellect who is devoted to the law.'' But Souter opponent Alan Cranston of California warns if Souter votes to outlaw abortion... Cranston will work to make abortion a statutory right.

(OCT. 3) UPI - French President Francois Mitterrand set off today for a surprise visit to Saudi Arabia and the United Arab Emirates. He will review elite French troops and meet with the president of the emirates. A Soviet envoy also left for Iraq and Jordan today. Cyprus stopped a Honduran-registered oil tanker and arrested its crew on suspicion of transporting Iraqi oil.

New York Mayor David Dinkins has written out his prescription for solving the city's crime ills by hiring eight-thousand new police officers. Dinkins yesterday asked for the city and state to approve his plan to battle the record homicide rate in New York City. The plan includes money for jails, courts, education and job training. It will cost two-BILLION dollars... to be financed in part by a tax of 25 cents on each dollar lottery ticket sold.

Los Angeles has become the first U-S city to ban ritualistic animal slaughter under any circumstances. The city council voted yesterday to make animal sacrifices punishable by up to six months in jail and a fine of up to one-thousand dollars. The lone dissenting councilman objected saying the law will restrict the religious freedom of immigrant communities... particularly those who practice a form of voodoo called Santeria.

Researchers say an aspirin tablet taken every other day can significantly reduce the incidence of migraine headaches. A study involving 22-thousand male doctors found those who took aspirin regularly experienced 20 percent fewer migraines than those given a dummy pill. Researchers at the Brigham and Women's Hospital in Boston say although the research involved only men... taking aspirin should work just as well for women.

#90276u0816 10/03/1990 ~United Press International
MONTGOMERY, AL (OCT. 3) UPI - A Confederate battle flag that blacks have tried to have removed from above the Alabama State Capitol was stolen from the building's dome before dawn Wednesday.

Several radio stations in Montgomery reported receiving early-morning calls from a man who identified himself as a representative of an unknown group called the Justice League. He said the group took the flag in an attempt to bring whites and blacks together.

A disc jockey at WHHY-FM in Montgomery quoted the caller as saying, ''We're whites standing with our black brothers for racial harmony.'' The group left the American and state flags flying.

Gov. Guy Hunt ordered the Confederate flag replaced and a new banner was flying over the building by 9 a.m. State Capitol police were investigating the theft.

The battle flag was the object of a major controversy two years ago when more than a dozen black legislators were arrested as they tried to climb a fence around the capitol and carry out their threat to remove the flag. The legislators were given small fines, but no jail time.

Hunt has rejected calls from blacks to remove the flag, saying the Alabama Legislature is responsible for that decision. The Legislature has repeatedly ignored or killed bills to remove the Confederate banner.

The Confederate flag has flown over the capitol since the mid 1960s, when it was raised as part of a Civil War centennial.

MONTE CARLO, MONACO (OCT. 3) UPI - Stefano Casiraghi, the Italian husband of Princess Caroline of Monaco, died in a power boat accident Wednesday during a world championship race off the coast of Monaco, witnesses and official sources said.

The Monaco press office said it would make an official announcement about the tragedy off the shores of the tiny Mediterranean city-state.

Princess Caroline was believed to be in Paris when the accident took place during the second leg of the race, according to official sources and witnesses.

The accident came eight years after the royal family's worst tragedy - the death of Princess Grace, wife of Prince Rainier and mother of Caroline. The princess, the American movie star Grace Kelly, was died in a car crash while driving with Caroline's sister, Stephanie.

Casiraghi was aboard the motorized catamaran Pinot, Pinot when it turned into a large wave at full speed, witnesses said. Rescue efforts were mounted immediately and Casiraghi's teammate, Patrice Innocenti, was pulled out of the sea alive. But Casiraghi remained trapped in his seat under the capsized boat, the witnesses said.

Casirighi, Caroline's second husband and three years her junior, married the princess on Dec. 29, 1983, in a simple civil ceremony in the royal palace in Monte Carlo. Caroline was three month's pregnant at the wedding and gave birth to a son on June 9, 1984. The couple later had two more children.

The wedding was not recognized by the Roman Catholic Church because of Caroline's divorce from Phillipe Junot, the French playboy to whom she was married form 1978 to 1980. The church never acted on Caroline's request to annul the marriage to Junot, who was 17 years older than Caroline.

Casiraghi had an adventurous streak. In addition to racing speed boats, he and Caroline competed in the grueling 8,700-mile Paris-to- Dakar, Senegal road race in 1985. They had to drop out after two days in the Algerian desert because their vehicle crashed. Some media reports said Casiraghi was driving but Caroline said another member of their crew was at the wheel.

Casiraghi also was caught up in a controversy in 1986 when friends and relatives of Italian soldiers protested a decision to allow him to avoid the military draft. In 1983 Casiraghi had claimed he was unfit for service because a genital tumor had left him temporarily impotent.

Although Casiraghi had commercial interests with his family in Milan, he moved his export-import business to Monte Carlo after the marriage and the two lived in Caroline's villa near the palace on a high cliff jutting over the sea.

Caroline's mother, Princess Grace, died Sept. 14, 1982, at age 52 after she suffered a stroke while driving a car, and crashed off a curve. Caroline took over her mother's duties in heading various charities and activities in Monaco.

BEIJING (OCT. 3) UPI - Authorities in southern Canton raised the death toll to 127 Wednesday in the fiery crash of a hijacked jetliner at the city airport and reported one foreigner, an American, among those killed. But U.S. officials would not confirm it.

Chinese officials reached by telephone in Canton, also known as Guangzhou, refused to answer inquiries on the casualty figures or the investigation into the hijacking Tuesday, which led to a flaming crash as the plane tried to land.

The accident appeared to be the worst air crash toll reported in more than a decade since China's reopening.

A senior Chinese official said a task force had been organized to investigate the crash, but said details remained uncertain.

''The crash because of hijacking and hooligans was really a tragedy,'' State Council spokesman Yuan Mu told reporters at a Beijing reception.

The Chinese Boeing 737 was commandeered on a domestic flight over south China by two hijackers reportedly demanding to fly to Hong Kong. It came down at Canton's Bai Yun airport but slammed into an empty plane and another loaded with passengers in a fireball.

The official Xinhua news agency reported the accident investigation team of Guangdong Province, of which Canton is the capital, released a manifest of the dead raising the toll to 127. Earlier reports said 120 had died.

Among those killed, Xinhua said, were 30 Taiwan citizens, four from Hong Kong, two from Macao and 90 mainland Chinese. It listed only one foreigner killed, saying the casualty was an American.

Two American women were known to be aboard the 737 flight from the east coast

city of Xiamen to Canton. One, Erin L. Thomas, a teacher from Oklahoma City, survived and was reported in good condition in Canton's Nanfang Hospital with a leg injury.

''She's doing well, she's in as good spirits as she can be after going through something like that,'' said a spokesman for the U.S. Consulate in Canton who visited her.

Thomas's mother, Diane Ames of Moore, Okla., reportedly told The Daily Oklahoman that her 30-year-old daughter had just begun a two-year assignment teaching English at Meixian University in China and previously taught two years in Japan.

Ames said U.S. Embassy officials called her early Tuesday and, ''They said she was groggy, but considering what she had been through she was in good spirits. I thought, 'That's my gal. She's a survivor.'

''I have to believe it was more than luck,'' Ames said. ''I have to believe Erin was in China for a purpose and that purpose was not fulfilled. I feel like the luckiest mother in the world.''

Ames said she was told her daughter suffered superficial burns, a broken or dislocated collarbone and swollen toes, as well as a re-injury to a leg broken before she left for China Aug. 18.

''She's really doing well,'' said a nurse at Nanfang Hospital.

But the Consulate spokesman said the second American, identified as Maryanne Gilbert, Thomas's traveling companion, remained officially missing and had not been accounted for.

''As far as the American consulate is concerned, there's one survivor and one missing,'' the spokesman said in a telephone interview.

He said the official manifest was confused, apparently listing Thomas as having been killed and Gilbert as having survived.

Most of the dead had been aboard the hijacked 737, but others were killed and injured on the Boeing 757 waiting on the runway to take off for Shanghai.

Official reports earlier listed 100 survivors, with 53 of them injured, but Canton newspapers reported only 46 injured, suggesting seven of the injured may have died later at hospitals.

A spokesman for the Japanese Embassy in Beijing said only one Japanese national was aboard the 757 and was not seriously hurt.

There was still no confirmation of airport reports the hijackers panicked when

they realized they were landing in China and set off an explosion before the crash, or of a survivor's account that they struggled with the cockpit crew prior to impact.

The death toll was the highest reported publicly in China in an aircraft accident in the past decade. The worst previous crash was when a Chinese state-run airliner slammed into a mountain in southern Guilin in April 1982, killing 112 people.

The last major crash was in January 1988, when another domestic airliner hit a hillside in central Chongqing, killing 108.

CHICAGO (OCT. 3) UPI - Aggressive buying rallied soybean futures to sharply higher levels at midmorning Wednesday on the Chicago Board of Trade.

The grains also were higher, partly on spillover from soybeans.

Commercials and professionals dominated the buying in the soy complex on renewed speculation the Soviet Union will soon be offered most- favored-nation status.

There also were rumors that several European countries may have bought soybean meal from South America this week.

Corn was higher across the board on reports that Spain had bought 500,000 tons overnight.

Corn and soybeans had underlying support from weather-related harvest delays because of widespread rain across the Midwest.

Wheat futures rallied on hopes of near-term exports of wheat or wheat flour, although the volume was light.

The midmorning prices:

Corn Dec 2.29 up 3 3/4; Mar 2.38 1/2 up 3 3/4; May 2.44 1/4 up 3 3/4.

Soybeans Nov 6.20 up 13 3/4; Jan 6.34 1/2 up 13 1/2; Mar 6.47 up 12 3/4; May 6.57 1/2 up 13 1/4.

Wheat Dec 2.76 3/4 up 4 1/2; Mar 2.90 3/4 up 4 1/2; May 2.98 1/4 up 4 3/4.

Oats Dec 1.24 1/4 up 1 1/4; Mar 1.34 1/2 up 1 1/4; May 1.40 3/4 up 3/4.

WASHINGTON (OCT. 3) UPI - Emergency legislation to calm energy markets by expanding a test sale of oil from the Strategic Petroleum Reserve has run into potentially fatal opposition from key senators after easy House passage last week.

Bypassing the normal, lengthy process of hearings and committee action, the House swiftly approved a bill last Friday to triple the amount of oil the Energy Department is permitted to remove from the reserve under a ''test draw-down'' ordered by President Bush.

Similar legislation was introduced the same day in the Senate. But Senate Energy Committee Chairman Bennett Johnston, D-La., and the panel's ranking GOP member, Sen. James McClure, R-Idaho, moved to block further action on the bill sources said this week.

At Johnston and McClure's insistence, the bill was withheld from immediate consideration on the Senate floor and referred to the Energy Committee, where it is likely to languish, according to Senate staff members who asked not to be identified.

Both Johnston and McClure have expressed reservations about using America's emergency oil stockpile to influence oil prices absent an actual petroleum shortage, which energy analysts agree does not exist.

McClure went so far as to say in an interview last week that the ''administration is totally wrong'' to order a test sale of any size while oil supplies remain adequate.

The Energy Committee has scheduled no further meetings before Congress is set to adjourn later this month, and neither the chairman nor the ranking Republican have shown any inclination to move on the bill, the staffers said.

The Senate sponsors of the bill, Sens. Joseph Lieberman, D-Conn., and Carl

Levin, D-Mich., said through spokesmen they remained hopeful of committee action. But an aide to Lieberman, Jim Kennedy, acknowledged, ''It is an uphill battle. The odds are not high.''

Bush last Wednesday ordered 5 million barrels of crude released from the strategic reserve for sale on the open market, the maximum quantity allowed under a test draw-down. The House and Senate legislation would increase that amount to 15 million barrels.

Bush said he called for the test sale to demonstrate government readiness to meet the nation's energy needs in the event of a petroleum shortage and to curtail ''unwarranted'' market speculation that has driven oil futures as high as $40 a barrel since the Aug. 2 Iraqi invasion of Kuwait.

House action to authorize a larger test came just 24 hours after Energy Secretary James Watkins suggested to Congress last Thursday that 15 million barrels would prove a better exercise of the reserve's pumping and distribution system.

But in an apparent sign of division within the administration over use of the reserve, the White House has declined to take a position on the bill.

Bush signed separate legislation into law Sept. 15 giving him greater latitude to order a full-scale draw-down from the oil reserve, but has been reluctant to do so without a demonstrable interruption of oil supplies.

The loss of Iraqi and Kuwait oil due to U.N. trade sanctions imposed largely through U.S. military power has crimped world production, but experts have said overall oil inventories are expected to remain at or above normal levels in the near future.

Meanwhile, higher prices are curbing the government's ability to fill the petroleum reserve itself, cutting in half the amount of oil it can purchase for the stockpile under the spending bill approved for the coming year by the House Appropriations Committee, said Rep. Sidney Yates, D-Ill., chairman of the subcommittee that oversees fossil fuel programs.

The strategic reserve was created in 1975 following the Arab oil embargo to ensure the United States a supply of oil during an energy crisis caused by events overseas, natural disasters or sabotage.

Last month, the president signed a law expanding his discretion to tap the reserve in a situation ''that constitutes, or is likely to become, a domestic energy supply shortage of significant scope or duration.''

(OCT. 3) UPI - A U-S Embassy spokesman in Pretoria says NO one has claimed responsibility for the explosion of a home-made bomb early today outside the rear gate to the residence of U-S Ambassador William Swing. South African police say the bomb damaged the metal gate and a nearby garden shed. NO injuries are reported.

Cigarette company ads that target women as possible smokers are under attack from the American College of Obstetrics and Gynecology and from Surgeon General Antonia Novello. She says that 126-thousand women die every year from smoking-related disorders. And she says the deaths are entirely preventable. Thomas Lauria of the Tobacco Institute says the critics are being sexist.

The 30-year-old husband of Princess Caroline of Monaco was killed today in an accident in a speedboat race. Race organizers reported the death. Stefano Casiraghi married the princess in 1983. He later moved his export-import business from Milan to Monaco. Princess Caroline reportedly was in Paris when the accident occurred in the second leg of a race. Witnesses said Casiraghi's motorized catamaran overturned when it turned into a large wave at full speed.

WASHINGTON (OCT. 3) UPI - Officials of mainstream American churches said Wednesday the movie industry's decision to scrap the X rating for sexually explicit films was ''arrogant and ill-advised'' and should be reconsidered.

In a joint statement, leaders of the National Council of Churches and the U.S. Catholic Conference also warned the change may encourage further attacks on the industry and fuel a campaign for direct government regulation of movies.

In assailing the decision to adopt a new NC-17 rating to replace the X, the statement said the Motion Picture Association of America ''has caved in to the commercial interests of those who are are attempting to get sexually expoitative material into general theatrical release.''

''It is an arrogant and ill-advised decision which deeply affects the public good,'' said the statement released by Bishop Edward J. O'Donnell, chairman of the Committee on Communication fo the USCC, and Beverly Chain, head of the Communications Unit of the NCC.

The MPAA announced a week ago it would replace its controversial X rating with the NC-17 designation. The new rating, like the old X, will bar admission to anyone under the age of 17. The letters NC stand for ''no children.''

The R rating, still in effect, allows those under 17 to be admitted only when accompanied by an adult.

The industry group had been under mounting pressure from movie makers to

change the rating system, which was not copyrighted. Since the 1970s, makers of pornographic films have gleefully claimed X ratings, even though their movies are not reviewed by the MPAA.

Serious movies that are reviewed and rated X because of some scenes, the film makers argued, were unfairly stigmatized as pornography. Many newspapers will not advertise X films and most theaters will not show them.

A number of recent films, including Peter Greenway's ''The Cook, the Thief, His Wife & Her Lover,'' and Pedro Almodovar's ''Tie Me Up! Tie Me Down!'' received X ratings from the MPAA but rather than accept the rating, the film's were released unrated.

Universal Picture's ''Henry and June,'' due to be released Oct. 5, also had received an X rating - despite extensive editing - but is likely to be the first film released with the new NC-17 rating.

The church groups said the MPAA's decision to change the voluntary rating system was made ''in isolation, without public consultation. The change is neither in the public interest nor in the best interest of the industry.''

The two church officials also urged the National Association of Theater Owners to refuse to book NC-17 movies and asked newspapers and others to refuse to accept advertising for them.

The MPAA statement announcing the change was co-signed by the theater owners group. The New York Times announced last week it will accept ads for all movies rated by the MPAA, including those rated NC-17, ''providing the ads themselves are in acceptable taste.''

O'Donnell and Chain warned that the change in the system will be used by conservatives already calling for more government regulation of the media.

''That is unfortunate, because a voluntary system of self-regulation that skirts constitutional concerns, yet affords at least a minimum of protection for the public, is workable,'' they said.

JERUSALEM (OCT. 3) UPI - Assailants threw a hand grenade near the Old City's walls in Arab East Jerusalem Wednesday, wounding two paramilitary Border Police and five Arabs, authorities said.

Police detained dozens of Arabs for questioning in connection with the attack, Army Radio reported.

A police spokesman said the hand grenade was thrown at a Border Police patrol along a major East Jerusalem commercial road near the Old City's walls. The spokesman said the grenaded wounded the two paramilitary Border Police and five Arabs.

During the past week, severe clashes between masked Palestinian youths and Israeli security forces have erupted in several East Jerusalem neighborhoods in a resurgence of violence.

MOUNT WASHINGTON, NH (OCT. 3) UPI - Rescue workers battled winter-like conditions Wednesday as they tried to retrieve three victims who died when their small plane crashed into Mount Washington, the highest peak in the Northeast.

Authorities identified two of the three victims in the crash in a remote area of Mount Washington as Texas residents.

The Cessna 172 crashed into the Great Gulf area of the 6,288-foot mountain Tuesday while on a flight from Syracuse, N.Y., to Bangor, Maine.

Killed in the crash were the pilot, Jimmy Fred Jones, 33, and a passenger, Stewart H. Jones, 27, both of Fort Worth, Texas, according to Maj. Henry Mock, chief of law enforcement for the state Fish and Game Department.

The identity of the second passenger on the craft was withheld pending notification of next of kin.

Hikers found the wreckage in a light snow cover on the north side of the peak Tuesday afternoon, more than seven hours after the plane disappeared from radio and radar contact near Whitefield, Mock said.

The pilot had radioed air traffic controllers in Nashua about 3:20 a.m. to ask for weather and air traffic patterns along the route, said Michael Cicarrelli,

a spokesman for the Federal Aviation Administration.

Controllers lost radio and radar contact with the plane at 4:44 a.m. over Whitefield, about 20 miles northeast of Mount Washington, Ciccarelli said.

Mock said the hikers reached the base of the mountain too late for crews to return to the crash site before darkness.
